

The Census Bureau plans to conduct additional research under the generic clearance for questionnaire pretesting research (OMB number 0607-0725). This letter covers recruiting respondents through response to a screener questionnaire.

This letter requests burden hours from September 1, 2016 through August 31, 2017 using two screeners – one for telephone and one for the internet. These screeners have been streamlined to include the bare minimum set of questions necessary for screening of potential respondents for our cognitive and usability projects that require a general population. Copies of the screeners are attached. This screener will be translated into Spanish and administered in Spanish as well. Questions unique to the Spanish language screener are highlighted in red for your information.

We estimate that between September 1, 2016 through August 31, 2017 approximately 4,000 people will complete the screener questionnaire. We estimate that completing the questionnaire takes a maximum of 5 minutes. Thus, the total estimated burden for this submission is 333 hours.

The contact person for questions regarding data collection and statistical aspects of the design of this research is listed below:
