

Task 1: What is your address? Identify and select your own home by placing the cursor over it (on laptop computer), or by tapping it (on a smartphone).

Task 2: Looking at the map, do you know of any homes (e.g. apartment units, houses) that are vacant? If so, please identify and select all vacant units in your neighborhood by placing the cursor over them (on laptop computer), or by tapping it (on a smartphone). Tell me how you decide if a home is vacant.

Task 3: Place the cursor over the home (apartment unit or house) that is the fourth unit away from yours (count your own home as the first). Tell me which direction you will go (e.g. up or down the block; if in an apartment building -- tell me how you would navigate this map to identify the fourth unit).

Task 4: Identify and select up to three additional homes (e.g. houses, apartment units) in your neighborhood with which you know people who live there.
