

How important are reef diving & snorkeling to Florida's economy?

An underwater photograph of a vibrant coral reef. The scene is filled with diverse coral species, including branching corals and large, flat, leaf-like structures. Several colorful fish are visible, including a prominent blue tang in the foreground, a yellow tang, and several smaller blue and black fish. The water is clear and blue, creating a bright and lively atmosphere.

Been diving or snorkeling in Florida in the last 12 months?

If so, please participate in the Florida Reef Diving & Snorkeling Economic Survey

Diving and snorkeling cost money. Whether money is spent on equipment rentals and purchases, guided dives, or lodging we know that your hobby is very important to the Florida economy.

But how important is it? That is where you come in. You can help us determine exactly how important reef diving and snorkeling are to Florida's economy.

The data collected in this survey will give managers the information they need to make informed decisions about environmental mitigation, research priorities, and budget allocations.

Your participation in this voluntary survey is highly encouraged. Please visit www.website.com
