

Justification for No Material or Non-Substantive Change Request

0710-0016 - Hurricane Evacuation Behavioral Survey - Generic ICR

The purpose of this request for a “No material or nonsubstantive change to a currently approved collection” is to release the burden hours and to make them available for upcoming individual ICs. At the time this original generic ICR was created, an IC was also mistakenly created that inadvertently encumbered all the requested respondents (6000) and all the requested burden hours (1500). The result of that error was to make it impossible to submit any generic ICs because ROCIS is assuming that all the burden hours were already used up.

After consulting with the ROCIS developer and the OMB Desk Officer, the way forward was to submit a no material or nonsubstantive change request to correct that error. Once the change request has been approved and the burden hours are released, an individual IC for a specific survey, the “Southeast Louisiana Hurricane Evacuation Survey,” will be submitted.
