

## Appendix J: SCDTDP Justification for Annual Estimate of Burden

- *Number of Respondents: 4* (the number of Regional Coordinating Centers submitting data to the National Coordinating Center)
- *Responses per Region:* calculated as an average
  - Number of states per region x data sources (State Medicaid and/or Medicaid MCOs) per state x frequency of data submission (number of quarters)
  - STORM:  $5 \times 2 \times 3 = 30$
  - Heartland:  $3 \times 2 \times 3 = 18$
  - Pacific:  $4 \times 1 \times 2 = 8$
  - Northeast:  $7 \times 1 \times 2 = 14$
  - **Total: 70**
  - **Average:**  $(30+18+8+14)/4 = 17.5$
- *Average Hours per Response for all time periods:* calculated as an average
  - STORM: **45** ( $30 \times 1.5$  hours\*)
  - Heartland: **27** ( $18 \times 1.5$  hours)
  - Pacific: **12** ( $8 \times 1.5$  hours)
  - Northeast: **21** ( $14 \times 1.5$  hours)
  - **Total: 105 Hours**
  - **Average:**  $(105)/4 = 26.25$  Hours

*\*(we estimate 1.5 Hours or 90 minutes, for entering each response into CoLab as well as incorporating any changes based on Technical Assistance)*
