Screen: **RIREF4**

Are you “checking up” on me?  
I told you the truth the first time you called.

The purpose of reinterview is not to check up on respondents. In order to ensure that we are efficiently and accurately collecting data, we reinterview a few households who are in the survey.

[Frequently Asked Questions for the National Health Interview Survey](#)

◆ [Press F8 to proceed with the reinterview.](#)

- 1. General Information
- 2. How was I chosen for the National Health Interview Survey?
- 3. Why not interview the house across the street? Why is my participation important?
- 4. I'm not sick – why should I be included in a health survey?
- 5. Will the data be held confidential?
- 6. Why should I provide my social security number?
- 7. How are the National Health Interview Survey data used?
- 8. Address for Survey Comments
- 9. Return to Reinterview

Screen: **H\_PURPOSE1**[General Information](#)

The basic purpose of the National Health Interview Survey is to obtain national information about the amount and distribution of illness, its effects in terms of disability and chronic impairments, and the kind of health services people receive.

- 1. Continue
- 2. Back to original FAQ list

Screen: **H\_PURPOSE2**[How was I chosen for the National Health Interview Survey?](#)

Every week about 1,400 addresses are chosen by scientific sampling methods to serve as a cross section of the entire United States. The people at those addresses are interviewed to obtain information used to describe the health of all Americans.

- 1. Continue
- 2. Back to original FAQ list

Screen: **H\_PURPOSE3**[Why not interview at the house across the street? Why is my participation important?](#)

We cannot change another address for yours. Scientific sampling methods do not permit the substitution of another address for those originally selected. It is important that the people living in the address selected be a part of the survey in order to provide the most accurate picture of the country's health.

- 1. Continue
- 2. Back to original FAQ list

Screen: **H\_PURPOSE4**[I'm not sick – why should I be included in a health survey?](#)

This is a survey of the nation's health. Health is often described as people who are not sick. We want to know how many people are sick and why they are sick, but it is also important to know how many people are healthy and why they are healthy. These answers will help keep the nation healthy.

- 1. Continue
- 2. Back to original FAQ list

Screen: **H\_PURPOSE5**[Will the data be held confidential?](#)

All information collected in this survey that would permit identification of any individual or any other business will be held in strict confidence. This information is in accordance with Section 308(d) of the Public Health Service Act (42 United States Code 242m (d)). We will not release information that could identify you or your family without your consent. If any federal employee or contractor gives out confidential information not authorized by law, he or she can be fired and fined and/or imprisoned.

- 1. Continue
- 2. Back to original FAQ list

Screen: **H\_PURPOSE6**[Why should I provide my Social Security Number?](#)

We would like to know your Social Security Number so we can obtain information that you have given to other government agencies. The information will be used to conduct research on issues related to health. This will help us avoid asking questions for which information is already available. It will also help ensure the accuracy and completeness of survey results, and help us recontact you, if necessary. We will protect any information we obtain about you from these agencies from unauthorized use just as the survey responses are protected. Providing this information is voluntary, and is collected under the authority of the Public Health Service Act. There will be no effect on your benefits if you do not provide it.

- 1. Continue
- 2. Back to original FAQ list

Screen: **H\_PURPOSE7**[How are the National Health Interview Survey data used?](#)

NCHS was authorized by Congress in Section 306 of the Public Health Service Act to conduct this survey and to produce health information for the nation. Government agencies, universities, private health planners, and researchers use the data to identify and work on significant health problems. The data are also used to determine how best to use available dollars and personnel to solve these health problems.
