## Good Laboratory Practice Recommendations for Biochemical Genetic Testing: Preanalytic Phase

[f](#) [t](#) [+](#)

**Description**

This online training will provide an overview of the quality practices in the preanalytic phase of biochemical genetic testing: specifically quality assurance for test requisitions, specimen collection and submission; communications between the laboratory, clinicians and other stakeholders; and preanalytic quality assessment.

**Audience**

Laboratory professionals working in biochemical genetic testing or reference laboratories, and healthcare professionals who order biochemical genetic tests.

**Objectives**

At the conclusion of this program, the participant will be able to:

- Recognize the role each stakeholder group plays in the pre-analytic procedures and processes
- Choose the preanalytic procedures and processes for biochemical genetic tests that are consistent with regulatory requirements and good laboratory practices
- Select indicators to evaluate the quality of the pre-analytical phase of biochemical genetic testing
- Explain the communication needs of each stakeholder group

**Continuing Education Units (CEU)**

The Centers for Disease Control and Prevention, Division of Laboratory Systems, Laboratory Training and Services Branch, is approved as a provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E.® Program. This webinar is approved for 1.5 hour of P.A.C.E.® credit.

P.A.C.E.® Course Number: 288-008-17
