

PETs Survey

Form Approved, OMB Control No. 0920-1150, Expiration date: 12/31/2019

Welcome to the "Pet Owners Encountering Ticks" (PETs) Study. This survey is conducted through the Maryland Department of Health and CDC. This survey will take 10 to 30 minutes to complete, depending on how many pets you have. This survey is voluntary and you may stop the survey or skip questions at any time. When you are finished with the survey, you will have a chance to provide your contact information to ensure you receive your \$10 gift card.

CDC's authority to sponsor this survey is provided by the Public Health Service Act. Your participation is voluntary, and the information you provide will only be shared with authorized CDC and Emerging Infections Program personnel.

Public reporting burden of this collection of information is estimated to average 10-30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB Control Number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA 0920-1150

If you are 18 years of age or older and can answer questions about the care, medication, and activities of your pet(s), we invite you to take this survey. We are only looking for information about pets that spend time both inside and outside the home. Your responses will help us better understand how to prevent Lyme disease and other tickborne diseases.

If you have any questions about the survey, please call 410-767-5649. Please have the access code that was on your invitation postcard ready so that we can best assist you.

Thank you!
