Uppercase Numbers
Lowercase Punctuation or Special Characters (Ex: @, %, &, \$, %)

Example: Jump12345

Password: Confirm Password:

Security Questions (Please answer at least 3 questions.) *

What is your city of birth?

What is your high school name?

What is the name of your favorite childhood friend?

What is your favorite pet's name?

In what town was your first job?

Who was your childhood hero?

CDC estimates the average public reporting burden for this collection of information as 10 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0923-0041).

National ALS Research Notification Consent

Research is an important part of the National ALS Registry. Not all research is done by ATSDR. Sometimes other ALS researchers would like to contact people in the National ALS Registry to ask them to take part in clinical research. If you want to receive emails from ATSDR about clinical research, please check the "I Agree" box below.

We will not give the researchers your name or contact information. If you want to be part of a project, you will have to contact the researcher listed in the email.

I Agree

National ALS Biorepository Participant Interest

Research is an important part of the National ALS Registry. Specimens are needed for much of this research. The National ALS Biorepository is a new part of the National ALS Registry. If you are interested in learning more about the Biorepository, please check the "Yes" box. A sample of interested PALS will get information packets.

I Agree

- I would like to learn more about donating biospecimens to the National ALS Biorepository
- I would like to learn more about donating postmortem tissues to the National ALS Biorepository
- I would like to learn more about donating both biospecimens and postmortem tissues to the National ALS Biorepository

Please provide your mailing address and phone number. This information will be used to make sure we ask PALS from all over the US to take part. We will also use this information to contact you if you are selected.

Address:	<input type="text"/>	City:	<input type="text"/>
State:	<input type="text"/>	Zip:	<input type="text"/>
Phone:	<input type="text"/>		

National ALS Research Notification Global Unique Identifier(GUID)

Many groups are doing ALS research. It is important for researchers to be able to combine data across studies. It is also important to make sure that when combining data that each person is only included one time. A Global Unique Identifier (GUID) is a code assigned to each patient's data. This code does not include personal information. The GUID enables tracking and following of patients over time and across diseases, registries, studies and countries. Several groups such as the National Institute of Health (NIH) and NeuroBANK™ create GUIDs that can be used to link data across studies.

We are asking if you would like us to create GUID(s) for the data you gave the National ALS Registry. If you agree to have us create GUID(s), please check I agree below and answer a few questions needed to create the GUID(s).

I Agree
