En el futuro, es posible que el cuestionario de PATH se pueda contestar por Internet en su computadora de escritorio, computadora portátil o tableta. Debido a su longitud, el cuestionario no se podrá contestar en teléfonos inteligentes o smartphones.

Usted podrá contestar el cuestionario cuando le convenga, sin la presencia de un entrevistador. El incentivo llegaría por correo unos días después de que conteste el cuestionario.

Cree que contestar el cuestionario PATH por Internet en su computadora de escritorio, computadora portátil o tableta, ¿le interesaría mucho, un poco o en absoluto?

Finalmente, nos gustaría escanear el código de barra de cualquier producto de tabaco que tenga consigo ahora para su consumo propio[, incluyendo sus EPRODFILL2]. Los investigadores usarán esta información para conocer los distintos tipos de productos que las personas consumen.

Únicamente nos interesan los productos que ha consumido o que tiene pensado consumir pronto.

Nuestro entrevistador escaneará el producto. El entrevistador también le hará un par de preguntas acerca de los productos que estamos escaneando. Puede ser que otras personas en su casa vean los productos cuando se los dé al entrevistador, o podrían escuchar las preguntas que le hagamos acerca de los productos.

¿Le parece bien si escaneamos los productos de tabaco ahora?

The next questions are about **electronic nicotine products**, such as e-cigarettes, vape pens, personal vaporizers and mods, e-cigars, e-pipes, e-hookahs and hookah pens.

These products are battery-powered and produce vapor or aerosol instead of smoke. Some electronic nicotine products can be bought as one-time, disposable products, while others can be bought as re-usable kits with cartridges or a tank system. They typically use a nicotine liquid called "e-liquid", although the amount of nicotine can vary and some may not contain any nicotine at all.

Some common brands include Vuse, Blu, Logic, MarkTen, NJOY, eGo, and iTaste.

**Smokeless tobacco** is tobacco which you put in your mouth. Smokeless tobacco may be loose or it may be packaged in small pouches that you place under your lip. Frequently you chew, suck, or spit while using smokeless tobacco, although for some types you may not need to.

There are many different types of smokeless tobacco which go by lots of different names, so please use these descriptions and photos to understand what they are.

PROGRAM - DISPLAY THE FOLLOWING TRANSITION TEXT AT THE START OF LOOPS:

IF LOOP=BTRAD (Traditional Cigars as blunts-only):

The next questions are about traditional cigars when smoked as blunts.

Traditional cigars contain tightly rolled tobacco that is wrapped in a tobacco leaf. Sometimes people take tobacco out of a traditional cigar and replace it with marijuana. This is sometimes called a blunt. As you answer these questions, please think only about your use of traditional cigars when smoked as blunts like those shown below. [ONLY IF THIS IS NOT THE LAST TIME THROUGH THE BLUNT SECTION:] There will be a separate section later about other kinds of blunts.

[SHOW GENERIC IMAGE OF TRADITIONAL CIGAR]

IF LOOP=BRILLO (Cigarillos as blunts-only):

The next questions are about cigarillos when smoked as blunts.

Cigarillos are medium-sized cigars and sometimes come with plastic or wood tips. [Sometimes people take tobacco out of a cigarillo and replace it with marijuana. This is sometimes called a blunt.] As you answer these questions, please think only about your use of cigarillos when smoked as blunts like those shown below. [ONLY IF THIS IS NOT THE LAST TIME THROUGH THE BLUNT SECTION:] There will be a separate section later about other kinds of blunts.

[SHOW GENERIC IMAGE OF CIGARILLO]

IF LOOP=BFILTR (Filtered Cigars as blunts-only):

The next questions are about filtered cigars when smoked as blunts.

Filtered cigars are usually brown and have a filter like a cigarette. [Sometimes people take tobacco out of a filtered cigar and replace it with marijuana. This is sometimes called a blunt.] As you answer these questions, please think only about your use of filtered cigars when smoked as blunts like those shown below.

Las siguientes preguntas son acerca de **productos electrónicos con nicotina**, tales como cigarrillos electrónicos, puros electrónicos, pipas electrónicas, hookahs electrónicas, vaporizadores personales de fumar y plumas hookah.

Estos productos funcionan con batería y producen vapor o aerosol en vez de humo. Algunos productos electrónicos con nicotina se pueden comprar como productos desechables que se usan una sola vez, mientras que otros se compran como productos reusables que vienen con cartuchos o un sistema de tanque. Normalmente usan un líquido con nicotina llamado "líquido electrónico", aunque la cantidad de nicotina puede variar y es posible que algunos no contengan nada de nicotina.

Algunas marcas conocidas son Vuse, Blu, Logic, MarkTen, NJOY, eGo y iTaste.

El tabaco que no se fuma es tabaco que se pone en la boca. El tabaco que no se fuma puede venir suelto o empaclado en bolsitas que se ponen bajo el labio. Cuando se consume tabaco que no se fuma, la persona con frecuencia lo mastica, lo chupa o lo escupe, aunque con algunas clases de tabaco que no se fuma no es necesario hacer eso.

Hay muchas clases diferentes de tabaco que no se fuma que se conocen por distintos nombres, así que por favor use las descripciones y las fotos para entender qué tipo de producto es.

El **snus** es una clase de tabaco que no se fuma. Por lo general, el snus viene en bolsitas pero también hay snus que se vende suelto. Normalmente, al consumir la mayoría de clases de tabaco que no se fuma, la persona lo escupe, pero con el snus no es necesario hacerlo. Algunas marcas comunes de snus son Camel Snus, Marlboro Snus y General Snus.

Piense en el **snus** cuando conteste estas preguntas. Más adelante habrá otra sección acerca de las otras clases de productos de tabaco que no se fuma (como el dip, el tabaco de mascar y las bolsitas de tabaco que no se fuma.)

Las siguientes preguntas son acerca del **tabaco que no se fuma**, sin incluir el snus.

El tabaco que no se fuma es una clase de tabaco que se pone en la boca y se mastica, se chupa o se escupe. Puede venir suelto o en bolsitas que se ponen en la boca. Hay muchas clases de tabaco que no se fuma, como por ejemplo el dip, el rapé o tabaco de inhalar, bolsitas y el tabaco de mascar. Algunas marcas conocidas son Skoal, Copenhagen, Grizzly, Redman y Levi Garrett.

Por favor **no** incluya el snus cuando conteste las siguientes preguntas.

IF LOOP=BTRAD (Traditional Cigars as blunts-only):

Las siguientes preguntas son acerca de los puros tradicionales o "grandes" que se fumaron como si fueran "toques o blunts".

Los puros tradicionales o "grandes" contienen tabaco envuelto en una hoja de tabaco. A veces las personas sacan el tabaco de un puro tradicional y lo substituyen con marihuana. A esto también se le conoce como un "toque o blunt". Cuando conteste estas preguntas, por favor piense únicamente en su consumo de puros tradicionales cuando los fumó como si fueran toques o blunts, como los que se muestran a continuación. ## NICOTINE DEPENDENCE

**BOX ID: R04\_ANV04**

PROGRAM - DEFINE THE FOLLOWING DERIVED VARIABLES (SEE APPENDIX):

**R04\_EXPERIMENTAL\_PRODUCT\_COUNT** = Number of tobacco products the respondent currently uses experimentally.

**R04\_RECENT\_FORMER\_PRODUCT\_COUNT** = Number of tobacco products used in the past 12 months, but not currently used.

**R04\_TOBXEPROD\_USER\_STATUS = 1** (Current tobacco user excluding e-products) Adult respondents who are current users of at least one tobacco product other than electronic nicotine products. The respondent may have any e-product user status.

**R04\_TOBXEPROD\_USER\_STATUS = 2** (Experimental current tobacco user excluding e-products) Adult respondents who are experimental current users of any tobacco product other than electronic nicotine products, and are not current or recent former users of any tobacco products. The respondent may have any e-product user status.

**R04\_TOBXEPROD\_USER\_STATUS = 3** (Experimental former tobacco user excluding e-products) Adult respondents who are experimental former users of any tobacco product other than electronic nicotine products, and are not current, experimental current, or recent former users of any tobacco products. The respondent may have any e-product user status.

**R04\_TOBXEPROD\_USER\_STATUS = 4** (Recent former tobacco user excluding e-products) Adult respondents who are recent former users of any tobacco product other than electronic nicotine products, and are not current users of any tobacco products other than electronic nicotine products. The respondent may have any e-product user status.

**R04\_NDSKIP** = Type of product use -- polyusers or multiple product users:

R04\_NDSKIP = 0 (Respondents who are current or new former users of only one product. Or respondents who are experimental current users of only one product and who are not current or new former users of any products. If R04\_NDSKIP = 0, only the e-product ND module or the tobacco ND module will be asked, not both, with fills tailored to their specific product.)

R04\_NDSKIP = 1 (Respondents who are current or new former users of two or more products, where none of those products is/was e-products. Or respondents who are experimental current users of two or more products, where none of those products is e-products, and who are not current or new former users of any products. If R04\_NDSKIP = 1, only the tobacco ND module will be asked, with fills tailored to their tobacco use overall.)

R04\_NDSKIP = 2 (Respondents who are current or new former users of three or more products, where one of those products is/was e-products. Or respondents who are experimental current users of three or more products, where one of those products is e-products, and who are not current or new former users of any products. If R04\_NDSKIP = 2, both ND modules will be asked, first the e-product ND module and second the tobacco ND module with fills tailored to their tobacco use overall.

R04\_NDSKIP = 3 (Respondents who are current or new former users of two products, where one of those products is/was e-products. Or respondents who are experimental current users of two products, where one of those products is e-products, and who are not current or new former users of any products. If R04\_NDSKIP = 3, both ND modules will be asked, first the e-product ND module and second the tobacco ND module with fills tailored to their other specific product.)

**R04\_GROUP** = IF R04\_NDSKIP = 0, 3 THESE RESPONSE GROUPS ARE USED TO DEFINE THE FILLS IN THE NICOTINE DEPENDENCE SEQUENCE OF QUESTIONS: NC, NG, NL, NF, NP, NH, NU, NS, ND.

**If current user or recent former user of tobacco** go through the Nicotine Dependence e-product and tobacco modules according to the following conditions:

**Condition a:** Respondents who currently use or formerly used in the past 12 months only one product. Condition **a** will be asked the questions in either the e-product module or the tobacco module (not both), with fills tailored to their specific product.

**Condition b:** Respondents who currently use or formerly used in the past 12 months more than one product, where one of those products is/was an electronic nicotine product. Condition **b** will respond to the questions in both modules; the e-product module will be tailored to their electronic nicotine product and the tobacco module will be tailored to their other specific product.

**Condition c:** Respondents who currently use or formerly used in the past 12 months two or more products, where none of those products is an e-product. Condition **c** will respond to the questions in the tobacco module only, with fills tailored to their tobacco use overall.

**Condition d:** Respondents who currently use or formerly used in the past 12 months three or more products, where one of those products is/was an e-product. Condition **d** will respond to the questions in both modules; the e-product module will be tailored to their electronic nicotine product and the tobacco module will be tailored to their tobacco use overall.

Finalmente, nos gustaría escanear el código de barra de cualquier producto de tabaco que tenga consigo ahora para su consumo propio[, incluyendo sus EPRODFILL2]. Los investigadores usarán esta información para conocer los distintos tipos de productos que las personas consumen.

Únicamente nos interesan los productos que ha consumido o que tiene pensado consumir pronto.

Nuestro entrevistador escaneará el producto. El entrevistador también le hará un par de preguntas acerca de los productos que estamos escaneando. Puede ser que otras personas en su casa vean los productos cuando se los dé al entrevistador, o podrían escuchar las preguntas que le hagamos acerca de los productos.
