*Abstract:* Owners and operators of affected facilities are required to comply with reporting and record-keeping requirements for the General Provisions (40 CFR Part 63, Subpart A), as well as for the specific requirements at 40 CFR Part 63 Subparts AA and BB. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

*Form Numbers:* None.

*Respondents/affected entities:* Phosphoric acid manufacturing and phosphate fertilizer production facilities.

*Respondent's obligation to respond:* Mandatory (40 CFR Part 63, Subparts AA and BB).

*Estimated number of respondents:* 13 (total).

*Frequency of response:* Initially, occasionally, quarterly, semiannually and annually.

*Total estimated burden:* 2,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$413,000 (per year), which includes \$186,000 in either annualized capital/startup or operation & maintenance costs.

*Changes in the Estimates:* There is an adjustment increase in the total estimated cost, burden, number of responses, and capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. The change in burden for the new and existing facilities is due primarily to a program change in the regulation requiring: 1) mercury testing and total fluoride (TF) testing of phosphate rock calciners; and 2) TF testing of oxidation reactors. The Residual Risk and Technology Review (RTR) associated with this program change estimated 12 phosphoric acid units and 11 phosphate fertilizer units (a total of 23 process units) located at 13 facilities.
