SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension of a currently approved information collection. The revision consists of minor changes to the information collection tool.

Historically, changes in fisheries management regulations have been shown to result in impacts to individuals within the fishery. An understanding of social impacts in fisheries—achieved through the collection of data on fishing communities, as well as on individuals who fish—is a requirement under several federal laws. Laws such as the National Environmental Protection Act and the Magnuson Stevens Fishery Conservation Act (as amended 2007) describe such requirements. The collection of this data not only helps to inform legal requirements for the existing management actions, but will inform future management actions requiring equivalent information.

Literature indicates fisheries rationalization programs have an impact on those individuals participating in the affected fishery. The Pacific Fisheries Management Council implemented a rationalization program for the Pacific Coast Groundfish limited entry trawl fishery in January 2011. This research aims to continue to study the individuals in the affected fishery over the long term. Data collection will shift from a timing related to changes in the catch share program design elements to a five-year cycle. In addition, the study will compare results to previous data collection efforts in 2010, 2012, and

2015/2016. The data collected will provide updated and more comprehensive descriptions of the industry as well as allow for analysis of changes the rationalization program may create in the fishery. The measurement of these changes will lead to a greater understanding of the social impacts the management measure may have on the individuals in the fishery. To achieve these goals, it is critical to continue data collection for comparison to previously collected data and establish a time-series which will identify changes over the long term. Analysis can also be correlated with any regulatory adjustments due to the upcoming five-year review of the program. This study will continue data collection efforts to achieve the stated objectives.

This study is managed by the Human Dimensions Team, Ecosystem Science Program, Conservation Biology Division, Northwest Fisheries Science Center, National Marine Fisheries Service, Seattle, WA.

II. Method of Collection

Verbal communication and collaboration with key informants, focus groups, paper surveys, electronic surveys, and in person interviews will be utilized in combination to obtain the greatest breadth of information as possible.

"Collection of Information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3 and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the Commission is publishing notice of the proposed extension of the collection of information listed below.

Title: Exemption for Swaps Between Affiliates (OMB Control No. 3038-0104). This is a request for extension of a currently approved information collection.

Abstract: Section 2(h)(1)(A) of the Commodity Exchange Act requires certain entities to submit for clearing certain swaps if they are required to be cleared by the Commission. Rule 50.52 permits certain affiliated entities to elect not to clear certain inter-affiliate swaps that otherwise would be required to be cleared, provided that they meet certain conditions. The rule further requires the reporting of certain information if the exemption is elected. This collection pertains to information the Commission needs to monitor use of the exemption and assess market risk in connection therewith. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
