United States Patent and Trademark Office
Patent Processing
OMB CONTROL NUMBER 0651-0031

A. JUSTIFICATION

1. Necessity of Information Collection

The United States Patent and Trademark Office (USPTO) is required by 35 U.S.C. § 131 to examine an application for patent and, when appropriate, issue a patent. The USPTO is also required to publish patent applications, with certain exceptions, promptly after the expiration of a period of eighteen months from the earliest filing date for which a benefit is sought under Title 35, United States Code (“eighteen-month publication”). Certain situations may arise which require that additional information be supplied in order for the USPTO to further process the patent or application. The USPTO administers the statutes through various sections of the rules of practice in 37 CFR Part 1.

The information in this collection can be used by the USPTO to continue the processing of the patent or application to ensure that applicants are complying with the patent regulations and to aid in the prosecution of the application.

Table 1 provides the specific statutes and rules requiring the USPTO to collect the information discussed above:

3. Use of Information Technology

The forms associated with this collection may be downloaded from the USPTO Web site in Portable Document Format (PDF), filled out electronically, and then either printed for mailing or submitted to the USPTO online through EFS-Web. The “EFS-Web only” items in this collection must be submitted to the USPTO online through EFS-Web. In addition, the USPTO provides an electronic interface on its Web site that the public can use to submit the information associated with the Electronic Applicant Initiated Interview Request Form.

EFS-Web is the USPTO’s web-based patent application and document submission system that allows customers to file patent applications and associated documents electronically through their standard web browser without downloading special software, changing their document preparation tools, or altering their workflow processes. Typically, the customer will prepare the forms or documents as standard PDF files and then upload them to the USPTO servers using the secure EFS-Web interface. EFS-Web offers many benefits to filers, including immediate notification that a submission has been received by the USPTO, automated processing of requests, and avoidance of postage or other paper delivery costs.

To protect the confidentiality, authenticity, and integrity of electronic submissions, the USPTO employs Public Key Infrastructure (PKI) technology for secure electronic communications with its customers. All electronic submissions are automatically

encrypted prior to transmission to ensure confidentiality of the submission contents. After the electronic package has been received by the USPTO, the EFS server uses digital signature technology to verify that the package contents have not been altered and generates an electronic acknowledgment receipt that is immediately returned to the customer.

Customers must have a Customer Number that is associated with the correspondence address for a patent application in order to access private information about the application using the Patent Application Information Retrieval (PAIR) system, which is available through the USPTO Web site. PAIR allows authorized individuals secure and immediate online access to up-to-date patent application status and history information, but only for patent applications that are linked to a Customer Number. PAIR also offers public access to non-private information about issued patents and published applications.

4. Efforts to Identify Duplication

This information is collected during the pendency of a patent application. It does not duplicate information or collection of data found elsewhere.

5. Minimizing the Burden to Small Entities

No significant impact is placed on small entities. Small entities simply need to identify themselves as such to obtain the benefits of small entity status.

Pursuant to 35 U.S.C. § 41(h)(1), the USPTO provides a fifty percent (50%) reduction in the fees charged under 35 U.S.C. § 41(a) and (b) for small entities. The USPTO also provides a fifty percent (50%) reduction of the already-reduced small-entity fees for those entities asserting micro entity status. The USPTO's regulations concerning the payment of reduced patent fees by small entities and micro entities are at 37 CFR 1.27 and 1.28, and reduced patent fees for applicants with either small-entity or micro-entity status are shown in 37 CFR 1.16, 1.17, 1.18 and 1.20.

6. Consequences of Less Frequent Collection

This information is collected only as required to process a patent application or enforceable patent, and is not collected elsewhere. Therefore, this collection of information could not be conducted less frequently. If the information were not collected, the USPTO would not be able to comply with 35 U.S.C. § 131.

7. Special Circumstances in the Conduct of Information Collection

There are no special circumstances associated with this collection of information.

8. Consultation Outside the Agency

The 60-Day Notice was published in the *Federal Register* on May 23, 2016 (81 Fed. Reg. 32298). The public comment period ended on July 22, 2016. Five public comments were received in response to the May 2016 60-Day Notice. In addition, a 30-day Notice was published in the *Federal Register* on July 26, 2016 (81 Fed. Reg. 48762). The public comment period ends on August 25, 2016. One public comment has been received in response to the July 2016 30-day Notice.

One commenter raised an issue regarding the patent term adjustment statement under 37 CFR 1.704(d). The USPTO notes that it is working on a form solution to help applicants make the patent term adjustment statement under 37 CFR 1.704(d). The same commenter also raised an issue regarding form PTO/SB/08a EFS-Web. The USPTO is (i) correcting the reference to 37 CFR 10.18 by replacing it with a reference to 37 CFR 11.18 and (ii) providing a red border around the field for "Publication Date" and removing the red border around the field for "Name of Patentee or Applicant of Cited Document", both under the subsection "Foreign Patent Documents". The commenter correctly noted that the red border is intended to communicate a mandatory field. The same commenter further raised an issue regarding form PTO/AIA/96. The USPTO is in the midst of updating form PTO/AIA/96. As part of its review of form PTO/AIA/96 during the update, the USPTO will consider the suggestion to remove the "type of assignee" field.

One commenter raised an issue regarding "all forms that require correction of a defect, list multiple possible defects, and fail to identify the specific defect alleged to be present". The types of forms identified in the comment are outside the scope of the present renewal.

One commenter suggested harmonizing the date format between various USPTO systems, such as USPTO forms, Private PAIR, TESS, EPAS and PCT filings. The suggestion is noted, and the date format used for the forms in this collection will be reviewed. The date format used in other USPTO systems is outside the scope of the present renewal. The same commenter also suggested electronic enhancements to forms AIA/14 and AIA/15. The USPTO's next generation e-filing system currently is in development and is expected to provide a number of improvements that should address the commenter's suggestions.

One commenter raised an issue regarding the warning messages associated with form PTO/SB/08a EFS-Web. The USPTO will review the warning messages associated with form PTO/SB/08a EFS-Web. The same commenter also had several suggestions for improving form AIA/14 (the Application Data Sheet). As noted above, the USPTO's next generation e-filing system currently is in development and is expected to provide a number of improvements to many USPTO forms, including the AIA/14.

One commenter provided time estimates for completion of many of the forms in this collection. In response, the USPTO has taken the commenter's estimates into consideration when providing its estimates in the present renewal. The commenter also identified the following forms as missing forms: PTO/AIA/40; PTO/AIA/41; PTO/SB/21;

PTO/SB/37; PTO/SB/61; PTO/SB/97; PTO-2053-A/B; PTO-2054-A/B; and PTO-2055-A/B.

Forms PTO/AIA/40 and PTO/AIA/41 are new forms created to assist with providing the information required by existing requirements (i) Request for Correction in a Patent Application Relating to Inventorship or an Inventor Name, or Order of Names, Other than in a Reissue Application (37 CFR 1.48) and (ii) Request to Correct or Update the Name of the Applicant Under 37 CFR 1.46(c)(1), or Change the Applicant under 37 CFR 1.46(c)(2), respectively. They will be available on the USPTO Web site at <http://www.uspto.gov/patent/patents-forms> once the present renewal has been approved.

Forms PTO/SB/21 and PTO/SB/37 are available on the USPTO Web site at <http://www.uspto.gov/patent/forms/forms>.

Forms PTO/SB/61 and PTO/SB/97 have been discontinued and are no longer available. Form PTO/SB/61 was discontinued because it collected information regarding revival for unavoidable delay. The unavoidable delay standard was eliminated as a basis for revival by the Patent Law Treaties Implementation Act of 2012. As for PTO/SB/97, it was merged with PTO/SB/92. PTO/SB/92 now collects information regarding certificates of mailing or transmission (previously PTO/SB/92 collected information regarding certificates of mailing and PTO/SB/97 collected information regarding certificates of transmission).

Forms PTO-2053-A/B, PTO-2054-A/B, and PTO-2055-A/B are used by the USPTO to notify the applicant that the application or patent file is unlocatable and to request a copy of the applicant's or patentee's record of the application or patent file (including copies of the correspondence, list of the correspondence, and statements verifying whether the record is complete or not) in order to reconstruct the file of an unlocatable application or patent. Due to their nature, the USPTO does not make these forms available on the USPTO Web site. They are provided to relevant applicants and patent owners only after their file(s) have been identified as unlocatable.

One commenter raised an issue regarding the U.S. government interest field of the Provisional Application for Patent Cover Sheet (forms PTO/SB/16 and PTO/SB/16 EFS-Web). Forms PTO/SB/16 and PTO/SB/16 EFS-Web are not part of this collection; they are part of collection 0651-0032. Nevertheless, the USPTO will consider the suggestion to enlarge the field provided for the U.S. government interest on forms PTO/SB/16 and PTO/SB/16 EFS-Web.

One commenter suggested that some time estimates did not include consideration of other factors beyond the time needed to complete certain responses. These comments cited factors such as time needed to evaluate options, consulting clients, or making other informed decisions. Although the USPTO appreciates that respondents utilize time and effort for many matters related to and during the course of the patent

examination process, these estimates necessarily focus on the estimated time to complete the specific information collection responses.

The previous commenter also suggested USPTO provide a response to comments previously submitted on an Agency request for comments pertaining to a Patent Subject Matter Eligibility Federal Register notice (2016). The commenter also requested clarification as to which version of guidance was in effect. Although the Agency considers all comments for which it solicits feedback it does not routinely provide, nor is it required to provide, a separate response to a comment document unless otherwise specified. Additionally, the 2016 guidance document referenced by the commenter supplements guidance on other topics than those addressed in 2014 and 2105 guidance issued by USPTO. Therefore, it does not address or supersede matters discussed in previously issued guidance in 2014 and 2015 on the issue of Patent Subject Matter Eligibility. This same commenter referenced Executive Order 13566 and the requirement for USPTO to periodically review their regulations. Again, although this is outside the scope of this information collection, the Agency notes that it does conduct a periodic retrospective analyses of existing regulations consistent with the Executive Order and submits them to OMB with the Department of Commerce.

The USPTO has long-standing relationships with groups from whom patent application data is collected, such as the American Intellectual Property Law Association (AIPLA), as well as patent bar associations, independent inventor groups, and users of our public facilities. Views expressed by these groups are considered in developing proposals for information collection requirements.

9. Payment or Gifts to Respondents

This information collection does not involve a payment or gift to any respondent.

10. Assurance of Confidentiality

Confidentiality of patent applications is governed by statute (35 U.S.C. § 122) and regulation (37 CFR 1.11 and 1.14). The USPTO has a legal obligation to maintain the confidentiality of the contents of unpublished patent applications and related documents. For secure electronic access to PAIR, the USPTO employs digital certificates and PKI technology to permit only authorized individuals to access private patent application information and to maintain the confidentiality and integrity of the information as it is transmitted over the Internet. Upon publication of an application or issuance of a patent, the patent application file is made available to the public, subject to the provisions for providing only a redacted copy of the file contents. The entire file of a reexamination proceeding is available to the public.

11. Justification for Sensitive Questions

None of the required information in this collection is considered to be sensitive.

12. Estimate of Hour and Cost Burden to Respondents

Table 3 calculates the anticipated burden hours and costs of this information collection to the public, based on the following factors:

- **Respondent Calculation Factors**

The USPTO estimates that it will receive approximately 3,542,082 responses per year for this collection, with approximately 25% of these responses submitted by small entities.

These estimates are based on the Agency's long-standing institutional knowledge of and experience with the type of information collected by these items.

- **Burden Hour Calculation Factors**

The USPTO estimates that it will take the public between 2 minutes (.03 hours) and 8 hours to submit a single item in this collection depending on the instrument used, including the time to gather the necessary information, prepare the appropriate form or petition, and submit the completed request to the USPTO. The time per response, estimated annual responses, and estimated annual hour burden associated with each instrument in this collection are shown in the table below.

These estimates are based on the Agency's long-standing institutional knowledge of and experience with the type of information collected and the length of time necessary to complete responses containing similar or like information.

- **Cost Burden Calculation Factors**

The USPTO expects that patent attorneys and paraprofessionals will complete and submit this information.

The professional hourly rates for attorneys and paralegals, based on the 2015 *Report of the Economic Survey* published by the Committee on Economics of Legal Practice of the American Intellectual Property Law Association (AIPLA), are \$410 and \$125 respectively. Using these hourly rates, the USPTO estimates that the total respondent cost burden for this collection is \$978,250,660.00 per year.

Postage

The public may submit the paper forms and petitions in this collection to the USPTO by mail through the United States Postal Service. The public may also include a signed certification of the date of mailing in order to receive credit for timely filing. Therefore, the USPTO estimates that the average first-class postage for a standard 3 ounce manila envelope is \$1.36.

14. Annual Cost to the Federal Government

The USPTO estimates that it takes a GS-7, step 1 employee between 2 minutes (0.03 hours) and 4 hours to process the items in this collection. The USPTO estimates that the cost of a GS-7, step 1 employee is currently \$27.21 (GS hourly rate of \$20.93 with 30% [\$6.28] added for benefits and overhead).

15. Summary of Changes in Burden Since Previous Renewal

Changes from the 60-Day Federal Register Notice

From the 60-Day Notice, the annual respondent burden hour, annual respondent cost burden, and annual respondent (non-hour) cost burden have been revised, based on new estimates from commenters and edits made by the USPTO business units. The annual respondent burden hours have been increased by 105,520.67 hours, from 3,631,187.33 to 3,736,708. The annual respondent cost burden has been increased by \$25,431,355.83, from \$952,818,894.17 to \$978,250,250.00. Finally, the annual

respondent (non-hour) cost burden has decreased by \$927,849.49, from \$420,815,258.45 to \$419,887,408.96.

Summary of Changes Since the Previous Renewal

OMB previously approved the renewal of this information collection in July 2013. With the four non-substantive changes implemented in the interim between that renewal and this submission, this collection as currently approved contains an estimated:

- 3,817,830 responses
- 3,792,691.00 burden hours
- \$370,701,948.00 in annual (non-hour) costs
- \$835,942,624.00 in respondent hourly cost burden

The proposed collection, as outlined in the tables above, seeks to modify these estimates. The new collection, if approved, is estimated to contain:

- 3,542,082 responses
- 3,736,708burden hours
- \$419,887,408.96 in annual (non-hour) costs
- \$978,250,250.00 in respondent hourly cost burden

¹

Changes in Response and Burden Hours

With this renewal, the number of responses decreased by 275,748, from 3,817,830 to 3,542,082, and the burden hours decreased by 55,983, from 3,792,691.00 to the proposed 3,736,708per year. This decrease is due to both program changes and administrative adjustments, as follows:

Administrative adjustments:

- As part of its ongoing efforts to ensure the accuracy of the information related to the burden of a given information collection, the USPTO has revised its estimates for the number of responses 3,817 received and the amount of burden hours created during the creation and submission of those responses for this information collection. **Therefore, this submission takes a burden decrease of 71,483 hours due to administrative adjustments.**

Program changes:

- The “Correction of Inventorship after First Office Action on the Merits” item has been added to this collection. **Therefore, this submission takes a burden increase of 2,250 hours as a program change.**
- The “Request for Correction in a Patent Application Relating to Inventorship or an Inventor Name, or Order of Names, Other than in a Reissue Application (37 CFR 1,.48)” item has been added to this collection. **Therefore, this submission takes a burden increase of 11,250 hours as a program change.**

- The “Request to Correct or Update the Name of the Applicant under 37 CFR 1.46(c)(1), or Change the Applicant under 37 CFR 1.46(c)(2)” item has been added to this collection. **Therefore, this submission takes a burden increase of 2,000 hours as a program change.**

Administrative adjustments: decrease 71,483 of burden hours

Program changes: increase of 15,500 burden hours

Total net burden hour decrease: 55,983 hours

Changes in Annual (non-hour) Costs

For this renewal, the USPTO estimates that the total annual (non-hour) costs will increase by \$49,185,460.96, from \$370,701,948.00 currently in the OMB inventory to the proposed \$419,887,408.96 for the renewal. The increase in costs is due to adjustments in responses and response times as well as an adjustment for the current postage fees and filing fees.

Change in Respondent Cost Burden

The total estimated respondent cost burden for this collection has increased by \$142,307,626.00, from \$835,942,624.00 to \$978,250,250.00. Estimated hourly rates in the 2013 renewal and associated non-substantive changes were \$371 for attorneys and \$122 for paraprofessionals, based on a median rate. The USPTO now estimates attorney respondent costs using a mean rate of \$410. Estimates for this renewal are updated to reflect hourly rates of \$410 for attorneys. The paraprofessional rate is estimated now at \$125. Even with the slight decrease in annual responses (down 275,748 from 3,817,830 to 3,542,082), the increase in respondent costs led to the overall increase in respondent cost burden for this proposed collection.
