FDA warns of serious skin reactions with the use of DRUG A for diabetes

Safety Announcement

The U.S. Food and Drug Administration (FDA) is warning that DRUG A, used to treat diabetes, has been associated with a risk of serious skin reactions. We are requiring a warning about this risk to be added to the label of DRUG A.

Patients who develop a skin rash or reaction while using DRUG A should seek medical attention right away. These reactions can occur with first-time use of DRUG A or at any time while it is being taken, and can be life-threatening. **It is important to know that all drugs have risks as well as benefits.** Patients who have experienced a skin reaction with DRUG A should contact their health care professional to discuss alternative diabetes medicines.
