

Instructions to the Notice of Research Exception under the Genetic Information Nondiscrimination Act

I. Introduction.

This notice is required to be provided if a group health plan or health insurance issuer intends to claim the research exception permitted under Title I of the Genetic Information Nondiscrimination Act of 2008 (GINA). Under GINA, a plan or issuer generally may not request or require an individual or family member to undergo a genetic test. However, a plan or issuer may request (but not require) a genetic test in connection with certain research activities so long as such activities comply with specific requirements, including (i) the research complies with 45 CFR part 46 or equivalent federal regulations and applicable State or local law or regulations for the protection of human subjects in research, (ii) the request for the participant or beneficiary (or in the case of a minor child, the legal guardian of such beneficiary) is made in writing and clearly indicates that compliance with the request is voluntary and that non-compliance will have no effect on eligibility for benefits or premium or contribution amounts; and (iii) no genetic information collected or acquired will be used for underwriting purposes.

If there is no group health plan or health insurance issuer involved in the research, this form is not required to be filed.

II. Definitions

“Church Plan”

In general, a church plan is a plan established or maintained for its employees or their beneficiaries by a church or by a convention or association of churches that is exempt from tax under section 501 of the Internal Revenue Code (Code).
