## Department of the Interior Paleontological Resource Use Permit Application

1a. Applicant Name	1b. Applicant Institutional Affiliation				
2. Professional Contact Information	3. Field Contact Information				
4. Description of Proposed Work					
5. Location of Proposed Work (attach map an	nd separate sheet if necessary)				
6. Purpose and Methodology of Proposed Work (attach separate sheet)					
7. Dates of Proposed Work					
Start: End:					
8. Name of the individuals who will be respon	nsible for supervising fieldwork or other work				
9. Information about the proposed repository					
10. Name(s) of organization(s) responsible fo	or curation costs				
11. I certify under penalty of perjury that the information furnished is true and correct. Knowingly making a false statement may subject the declarant to the penalty provided by 18 U.S.C. 1001 and 16 U.S.C. 3372(d).					
Signature of Applicant	Date				
Attach the following to this application (see be explanation of required content):  [ ] Current resume for the applicant and indi [ ] Institutional information. [ ] Copy of research plan.	oureau instructions on following pages for further ividuals named on line 8.				

[ ] Explanation of how the proposed repository meets the standards for bureau approval.[ ] Verification from the proposed repository that it agrees to receive the collection.

[ ] Contract Statement of Work if appropriate.

[ ] Bonding information, if required by the bureau.

[ ] Maps and supporting information.

[	] Names of organizations responsible for costs of curation.
[	Information on past performance, including civil or criminal penalties.

**Paperwork Reduction Act Statement.** We are collecting this information in accordance with the Paleontological Resources Preservation Act. Your response is required to obtain or retain a benefit. We will use the information you provide to evaluate your qualifications, decide whether or not to issue a permit, and decide whether or not to approve the proposed repository for deposit of any collections. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number. We estimate it will take you about 4 hours to complete this application, including time to maintain records, gather information, and complete the form. You may send comments on the burden estimate or any other aspect of this form to the Office of the Secretary, Departmental Information Collection Clearance Lead, Department of the Interior, 1849 C Street NW, Mailstop MIB-7056, Washington, DC 20240.

**Privacy Act Statement.** Information obtained by this form is protected by the Privacy Act of 1974 systems of records INTERIOR/DOI-XX. If you fail to complete the information requested, the bureau may refuse to grant a use permit.

<b>Work.</b> Briefly identify if	<b>Work.</b> A brief statement	<b>Work.</b> Give the proposed	
work under this permit	that defines the kind of work	work a brief title (for	
work under tins permit	and defines the Killy Of WOLK	work a orier due (101	

would be for research or mitigation, and give a brief title (for example: recovery of vertebrate and microvertebrate fauna in the San Juan Basin of Northwest New Mexico, etc.)

proposed. For example: Documentation of Pleistocene Trackways from Locality 27, American Falls Reservoir, Idaho.

example: excavation of dinosaur remains from the Hell Creek Formation in the Charles M. Russell National Wildlife Refuge, etc.)

5. Location of Proposed **Work.** Provide the State. County, map coordinate (UTM, NAD 83), BLM district or administrative area, and any other information that would allow the BLM to identify where paleontological work would occur. Discrete areas of work should be plotted on a legible 1:24,000 scale USGS topographic map that has not been altered or photo-reduced.

5. Location of Proposed Work. Indicate state and county, map coordinate (UTM, NAD 83) and Section/Township/Range to within the smallest unit (e.g., 1/4 1/4). Provide also a readable copy of a 1:24,000 scale USGS topographic map that has not been altered or photo-reduced, marked to show proposed work location(s).

5. Location of Proposed Work. Provide a State. County, map coordinate (UTM, NAD 83) and also Section/Township/Range within the appropriate ¼ ¼. Provide also a readable copy of a 1:24,000 scale USGS topographic map that has not been altered or photoreduced, marked to show proposed work location(s).

### 6. Purpose and Methodology of Proposed **Work.** Include a narrative

that identifies a research design or work plan. This should include the purpose of the work, research goals, field methods, access to field areas, and any other information that the BLM will need in order to evaluate the proposed permit application. Please identify the nature of possible land disturbance. Fieldwork that will result in excavation or disturbance of a large area, normally greater than one square meter, may require the bureau to analyze the potential effects under the National Environmental Protection Act (NEPA) and other statutes (NHPA, ESA, tribal consultation, etc.). Also, identify what proposed tools may be used, especially machinery, vehicles, or explosives. Explain the public benefit of the proposed work. Include bond information if

appropriate.

#### 6. Purpose and Methodology of Proposed

**Work.** Provide a research design/work plan with the following information. provided at a level of detail commensurate with the nature/complexity of work. (1) purpose, research goals, planned activities, and anticipated public benefit. (2) field and analytical methods.

- (3) name of key personnel and their assigned roles and responsibilities for field, analytical, and reporting efforts, with a summary of their prior experience that qualifies them to perform these duties. Also define the standards of training and experience crew shall meet before they can perform these tasks.
- (4) a schedule for fieldwork, analysis, and report preparation, and for delivery of collected materials to the approved repository. (5) nature and extent of proposed specimen collection, and collection methods; any intent to perform consumptive use of collected specimens, and

10. Name of organizations responsible for curation costs. Indicate how costs of curating the collections made under the permit will be addressed. These costs are the responsibility of the permittee and must be arranged prior to collecting any paleontological resources.

10. Name of organizations responsible for curation costs. Indicate how costs of curating the collections made under the permit will be addressed. These costs are the responsibility of the permittee and must be arranged prior to collecting any paleontological resources.

10. Name of organizations responsible for curation costs. The costs of curation are the responsibility of the permittee and must be arranged prior to collecting any paleontological resources.

49.205.

11. Signature of Applicant. By signing this application, the applicant certifies that the information provided is true and accurate. If BLM finds that the applicant has intentionally provided misleading or false information, or has failed to disclose facts about past performance, or otherwise failed to provide a complete and truthful application about proposed actions and their ability to perform, it is a basis for denial of a permit.

11. Signature of Applicant. By signing this application, the applicant certifies that the information provided is true and accurate. If Reclamation finds that the applicant has intentionally provided misleading or false information, or has failed to disclose facts about past performance, or otherwise failed to provide a complete and truthful application about proposed actions and their ability to perform, it is a basis for denial of a permit.

11. Signature of Applicant. By signing this application, the applicant certifies that the information provided is true and accurate. If FWS finds that the applicant has intentionally provided misleading or false information, or has failed to disclose facts about past performance, or otherwise failed to provide a complete and truthful application about proposed actions and their ability to perform, it is a basis for denial of a permit.

# **Additional Materials:** Attach the following to this

Attach the following to this application:
- Resume for the applicant

- Resume for the applicant and individuals named on line 8
- Institutional/Corporate information
- Copy of research plan, including party size, methods that will be employed to explore for or remove the paleontological resources, proposed content and nature of any collection to be made under the permit, collection management processes, timetable for transfer to the proposed repository, and any additional information that will help the authorized officer identify the extent, nature, and impacts of the proposal.
- Contract Statement of Work if appropriate
- Maps and supporting information
- Bonding information, if

**Additional Materials:** 

Unless indicated otherwise, attach the materials listed on the form, as well as other supplemental materials requested by Reclamation (see prior instruction for completing the application) or that the applicant believes will improve the application. Attach the required PI and key personnel resumes, research design/work plan: location maps, etc., defined in prior sections of the form, and written verification by the proposed repository indicating it has agreed to accept the collections, and will curate them consistent with DOI and Reclamation museum property policies and requirements. The verification must be signed and dated by a repository official who has the authority to so commit the repository and who is not named in the application as the PI or named on line 8 of

#### **Additional Materials:**

Attach the following to this application:

- Resume for the applicant and individuals named on line 8
- Institutional/Corporate information
- Copy of research plan, including party size, methods that will be employed to explore for or remove the paleontological resources, proposed content and nature of any collection to be made under the permit, collection management processes, timetable for transfer to the proposed repository, and any additional information that will help the authorized officer identify the extent, nature, and impacts of the proposal.
- Contract Statement of Work if appropriate
- Maps and supporting information
- Bonding information, if

required by the bureau - Written verification, signed by a properly authorized official (who is NOT named in lines 1 or line 8 of this form) of the proposed repository, verifying the repository's willingness to accept any collections, including and associated records, generated during the proposed work, and to assume curatorial responsibility for such materials on behalf of the United States Government.

-Information on past performance, including civil or criminal penalties the application. Additional materials that may be requested by Reclamation are: samples of work by key personnel named in line 8 of this application; references; information about past performance, including prior or current civil or criminal violations pertinent to performance under the permit or use of Federal land; proof of insurance; bonding information; statements assigning responsibility for payment of curation fees or expenses for collected materials; and other information or warranties necessary to ensure the applicant can perform work under a permit in a responsible manner.

required by the bureau
- Written verification that
proposed repository will
curate collections
-Information on past
performance, including civil
or criminal penalties
-FWS Special Use Permit
