TABLE 1

Exposure Control Plan

Hours = # of Establishments x Time

Cost = # Burden Hours x \$47.36 (wage rate of an infection control practitioner)

Assumptions:

* Develop New Plans: Hospitals and Nursing Homes take 16 hours; Medical and dental labs take 8 hours; Physicians, dentists, and residential care take 4 hours

* Review existing plans: Hospitals take 8 hours to review, all other sectors take 2 hours

 Hepatitis B Vaccination (Employee Time)
 Hours = # of workers x (% non-vaccinated) x employee participation rate x employee time x occupational turnover rate

TABLE 2

Assumptions:

To receive the vaccination and post vaccination is 38 minutes (.63 hour) for categories A and B; 23 minutes (.38 hour) for Categories C and D; only health care workers receive post vaccinations.
 For Sectors where a physician, dentist or licensed nurses is not normally on the premises, employee time to receive the vaccination and post vaccination is 115 minutes (1.92 hour) for categories A and B; 100 minutes (1.67 hours) for Categories C and D.

HBV Antibody Testing for Vaccinated Workers (Employee Time)
 Hours = Number of exposures x % vaccinated x employee time x 10% x (1 - compliance rate)

Assumptions:
 percent vaccinated = prior vaccination rate + employee participation rate x (1 - prior vaccination rate).
 This assumes that no previously non-vaccinated worker has offered and declined the free vaccination.
 Employee time is equivalent to 1/3 time required for HBV vaccination.
 10% of vaccinated employees will receive tests.

HBV Antibody Testing for Non-Vaccinated Workers (Employee Time)

HOURS = # exposures x (1-% vaccinated) x employee time x (source participation rate x RSS + sources refusing test x % exposures attributable to high risk group) x (1-compliance rate)

ASSUMPTIONS:

- * Percent vaccinated * prior vaccination rate + employee participation rate x (1 - prior vaccination rate).
- * This assumes that no previously non-vaccinated worker was offered and declined free vaccination.
- * Employee time is equivalent to 1/3 of the time required to receive the HBV vaccination.
- * 50% of sources will agree to be tested; 50% of sources will refuse to be tested.
- * For exposures where the source agree to be tested, the estimated percent of exposures in which the non-vaccinated employee would agree to be tested is equivalent to the RSS, since employees would most likely only be tested if the source was found to be positive.
- * 5% of exposures are attributable to a matter of a high risk group.
- * For classes where the sources refuse to be tested, non-vaccinated workers will agree to be tested for the 5% of the exposures that are attributable to a member of a high risk group.

Table 8

HBV Antibody Testing for Non-Vaccinated Workers (Health Care Professional Time)

Hours = # exposures x (1 - % vaccinated) x health care professional time x (source acceptance rate x RRS + % sources refusing test x % exposures attributable to high risk group) x (1 - compliance rate)

Cost = # exposures x (1 - % vaccinated) x cost of HBV antibody test x (source acceptance rate x RRS + % sources refusing test x % exposures attributable to high risk group) x (1 - compliance rate)

Assumptions

* percent vaccinated = prior vaccination rate + employee participation rate x (1 - prior vaccination rate). This assumes

that no previously non-vaccinated worker was offered and declined free vaccination

* Health care professional time is equivalent to 1/3 of the time required to administer the HBV vaccination

* 50% of sources will agree to be tested, 50% of sources will refuse to be tested

* For exposures where the source agrees to be tested, the estimated percent of exposures in which the non-vaccinated

employee would agree to be tested, is equivalent to the RSS, since employees would most likely only be tested

if the source was found to be positive.

* 5% of exposures are attributable to a member of a high risk group.

* Cost of HBV antibody test = \$30.

* For cases where the source refuses to be tested, non-vaccinated workers will agree to be tested for the 5% of the

exposures that are attributable to a member of a high risk group.

TABLE 10

Hepatitis B Immune Globulin (HBIG): Vaccinated Workers (Health Professional Time)
 Hour = # exposures x % vaccinated x 10% x 4% x health professional time x [(source participation rate x RSS + (% of sources refusing test x 5%)) x (1 - compliance)]
 Costs = # of exposures x % vaccinated x 10% x 4% x cost of HBIG x [(source participation rate x RSS) + (% of sources refusing test x 5%)] x (1 - compliance rate)

ASSUMPTIONS:
 * HBIG will be considered whenever a source is tested and found to be positive and whenever a high risk source refuses to be tested.
 * HBIG will be offered only to those vaccinated workers who are found to be non-responders.
 * 4% of employees will be non-vaccinated workers who are found to be non-responders.
 * Required health care professional time is equivalent to 1/3 the time required to administer the HBV vaccination.
 * Sources will agree to be tested in 50% of exposure incidents.

Cost of HBIG = \$211

Hours = # of exposures x (1-% vaccinated x 22% x employee time x [(source participation rate x RSS) + (% of source refusing test x 5%)] x (1-compliance)
ASSUMPTIONS

- * HBIG will be offered only to those non-vaccinated workers who are found not to have natural immunity
- * 22% of non-vaccinated workers do not have natural immunity
- * HBIG will be considered whenever a source is tested and found to be positive and whenever a high risk source refuses to be tested
- * 5% of exposures are attributable to a high risk source
- * Time required equivalent to 1/3 time required to receive HBV vaccination
- * Source participation rate is 50%

Table #12

HBIG: Non Vaccinated Workers (Health Care Professional)
 Hours = # exposures x (1-% vaccinated) x 22% x health care professional time x [(source participation rate x RSS) + (% of sources refusing test * 5%)] x (1-compliance rate)
 Costs = # exposures x (1-% vaccinated) x 22% x cost of HBIG [(source participation rate x RSS) + (% of sources refusing test x 5%)] x (1-compliance rate)

ASSUMPTIONS:

- *HBIG will be offered only to those non-vaccinated workers who are found not to have natural immunity.
- *22% of non-vaccinated workers do not have natural immunity.
- *HBIG will be considered whenever a source is tested and found to be positive and whenever a high risk source refuses to be tested.
- *5% of exposures are attributable to a high risk source.
- *Time required equivalent to 1/3 time required to administer HBV vaccination.
- *Source will agree to be tested in 50% of exposure incidents.
- *COST of HBIG = \$211.

TABLE 13

HIV Antibody Tests (Employee Time)

Hours = # exposures x employer participation rate x (% of sources refusing test + (source participation rate x RSS) x # of tests x employee time x (1- compliance rate)

Assumptions:

*Employee participation rate for HIV antibody test is 0.8.%

*50% of sources will agree to be tested, 50% will refuse to be tested.

*RSS is 0.05% for blood/plasma/tissue centers. 17% for law enforcement. 17% for corrections and 0.8% for all other sectors.

*A sequence of 4 HIV antibody tests will be performed for employees tested.

*Employee time is equivalent to 1/3 time required for HBV vaccination.

Table 18

Recordkeeping: Medical Records
 Hours = [((# workers x 10 minutes (.17 hour) + (3 potentially vaccinated x 15 minutes (.25 hour)) x job turnover rate] +
 [# of exposures x (5 minutes + 15 minutes)]
 Assumptions:
 Cost of creating records for new hires: [((# of workers x .08 hour) + (# of potentially vaccinated x .2 hour)) x Job turnover]
 - 10 minutes is required to establish a file for a new worker
 - # potentially vaccinated = (# workers -(# workers x prior vaccination rate)) x participation rate.
 - 15 minutes of HCP is need to prepare a written opinion with regard to the ability of each employee to accept the hepatitis B vaccine
 Time required to update records and have a health care professional I prepare a written opinion workers reporting exposures
 exposure is [# of exposures x (5 minutes + 15 minutes)]
 - 5 minutes to update existing files
 - 15 minutes is required for a HCP to prepare a written opinion regarding an exposure incident
