Revision Log

Date	Version No.	Description	Author	Reviewer	Review Date
09/20/13	0.01	Initial Draft of User Guide	C. Yeh J. DeRosa	P. Saari	09/20/13
12/17/14	1.0	Final Section 5 Notices and Supports Primary Support User Guide Incorporated OPPT comments given on 11/07/2013 Incorporated Release 1.00 enhancements, other OPPT comments	C. Yeh	J. Bronick	12/17/14

1 Introduction

This document presents the user guide for the Office of Pollution Prevention and Toxics (OPPT) Section 5 Notices and Supports Forms application submission process. This document is the user guide for the Primary Support user of the Section 5 Notices and Supports application.

The Section 5 Notices and Supports Forms application is the electronic, web-based tool provided by Environmental Protection Agency (EPA) for the submission of Section 5 Notices and Supports data. As a Primary Support, you can modify a Section 5 Notices and Supports form that a Primary Authorized Official (AO) has assigned to you.

For questions concerning the Toxic Substances Control Act (TSCA) Section 5 Notices and Supports software requirements, please contact the Central Data Exchange (CDX) Help Desk at helpdesk@epacdx.net or call 1-888-890-1995 between the hours of 8 am – 6 pm Eastern Standard Time (EST). For questions concerning the TSCA Section 5 Notices and Supports reporting requirements, please contact the TSCA Hotline at TSCA-Hotline@epamail.epa.gov or call 202-554-1404 between the hours of 8:30 am – 5:00 pm EST.

2 System Requirements

To use the Section 5 Notices and Supports application to submit a Section 5 Notices and Supports form, the following are required:

- An e-mail account
- JavaScript enabled web browser
- Internet access
- Adobe Acrobat Reader 5.0 or higher
- CDX username and password

2.1 Supported Browsers

- Internet Explorer (IE) 7 or above (Internet Explorer 8 or higher is recommended; issues found using IE 7 will be resolved on a case-by-case basis during post-production and known issues within IE 7 are identified within the appropriate sections of this guide)
 - Go to the following link to download:
<http://windows.microsoft.com/en-US/internet-explorer/downloads/ie>
- Mozilla Firefox 3.0 or above
 - Go to the following link to download:
<http://www.mozilla.com/en-US/firefox/all-older.html>
- Safari 4 or above
 - Go to the following link to download:
<http://support.apple.com/kb/dl877>
- Google Chrome
 - Go to the following link to download:
<http://www.google.com/chrome>
- Opera
 - Go to the following link to download:
<http://www.opera.com/download>

2.2 Screen Resolution

- Screen resolution should be set to 1024 x 768 or greater.

3 Primary Support Functions

This section describes how to:

- Access the application
- Navigate the Section 5 Notices and Supports ‘Home’ screen
- Edit the Section 5 Notices and Supports forms – Premanufacture Notice (PMN), Biotechnology, Notice of Commencement (NOC), Support, Bona Fide, and Alternative Control Measures (ACM) 721.30
- Upload an Extensible Markup Language (XML) file

The Primary Support is designated by a Primary AO to provide supporting information on behalf of a company. A Primary Support may either work on behalf of a United States (U.S.)-based company or non-U.S. based company. Examples of a Primary Support may include, but are not limited to, a corporate on-site contact, a technical contact, a paid employee of the company, an outside consultant for the company, or an authorized representative agent for the company. Primary Supports do not have the ability to sign the certification statement required for a form, but they may enter or modify data for a form for which they have access. The Primary Support does not have access rights to create or submit a form.

Once the Primary AO creates a new form, the Primary AO will provide the Primary Support with the passphrase to access the form and complete all sections of the form. The Primary Support can edit a form that is created by the Primary AO. The Primary Support can only access forms to which the Primary AO has granted access.

The system will allow the Primary Support to save a form at any point during the data entry process. The save functionality allows you to return to a form at any point in the future. After the Primary Support completes a form, the Primary AO will access, review, and submit the form to EPA via CDX.

Exhibit 3-1 displays a table of the capabilities of user roles within the Section 5 Notices and Supports application.

3.1 Log into Section 5 Notices and Supports Application

After you create an account in CDX and click the ‘Primary Support’ link for the Chemical Safety and Pesticide Programs (CSPP) data flow, you will be taken to the ‘Chemical Information Submission System’ screen.

Exhibit 3-2 shows a screen capture of the ‘Chemical Information Submission System’ screen:

CHEMICAL INFORMATION SUBMISSION SYSTEM

TSCA Section 5 Notices and Supports - ePMN

OK

Section 5 of TSCA, EPA's New Chemicals Program, helps manage the potential risk to human health and the environment from chemicals prior to entry to the marketplace. Anyone who plans to manufacture or import a new chemical substance (i.e. one not listed on the TSCA inventory) for a non-exempt commercial purpose is required by Section 5 of TSCA to provide EPA with notice before initiating the activity. A Premanufacture Notice, or PMN, must be submitted at least 90 days prior to the manufacture or import of the chemical. Additional notice types which use the PMN form are listed to reflect different circumstances under which a chemical may be manufactured or imported such as Significant New Use Notices (SNUN), Low Volume Exemptions (LVE), Test Market Exemption Applications (TMEA), and Low Volume and Low Release Exemptions (LoREX). Biotechnology notice forms will be used to submit Microbial Commercial Activity Notices (MCAN), TSCA Experimental Release Applications (TERA), Tier 1 Exemptions, Tier 2 Exemptions, and Biotechnology Test Market Exemption Applications (Biotechnology TMEA). For a PMN or MCAN, the manufacturing or importing company must also notify EPA via a Notice of Commencement within 30 days after the start of the first manufacture or import of the chemical for non-exempt commercial purposes.

Please note: The public reporting and recordkeeping burden for this collection of information is estimated to average 93 hours per response for PMN, SNUN, LVE, and LOREX applications (TMEA is estimated to average 88 hours per response), including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The public reporting and recordkeeping burden for this collection of information is estimated to average 290 hours per response for MCAN applications and the NOC is estimated to average 0.8 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the Director, Collection Strategies Division, U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed EPA Form 7710-25 (PMN) or Form 6300-14 (Biotechnology) or Form 7710-56 (NOC) to this address.

The software includes submission forms, embedded help files and a downloadable user manual to guide you through the Section 5 Notices and Supports submission process. Click OK to complete a Section 5 Notices and Supports reporting form, using the Section 5 Notices and Supports software. If you are not reporting on Section 5 Notices and Supports, please select a different application in the drop-down menu.

Navigation: To access the Section 5 Notices and Supports ‘Home’ screen, select ‘TSCA Section 5 Notices and Supports – ePMN’ from the submission type drop-down menu and click the ‘OK’ button.

3.2 Home Screen Navigation

You can access the Section 5 Notices and Supports ‘Home’ screen by selecting ‘TSCA Section 5 Notices and Supports – ePMN’ from the submission type drop-down menu on the ‘Chemical Information Submission System’ screen and clicking the ‘OK’ button.

The Section 5 Notices and Supports ‘Home’ screen is the first screen within the Section 5 Notices and Supports application. It provides you with links and tabs to access the ‘Section 5

Notices and Supports Forms’ and ‘Resources’ screens. To navigate to either of these screens, click the screen link (highlighted in blue text), or click the screen tab (located within the application header). The links and tabs provide the same functionality.

There is a ten (10) minute logout timer for this application; the application will automatically log you out after ten minutes of inactivity and navigate you back to the CDX login screen.

- **Forms:** Click the ‘Forms’ link or tab to navigate to the ‘Section 5 Notices and Supports Forms’ screen. You can access Section 5 Notices and Supports forms using the ‘Section 5 Notices and Supports Forms’ screen. For additional details about the ‘Section 5 Notices and Supports Forms’ screen, please refer to **Section 3.3**.
- **Resources:** Click the ‘Resources’ link or tab to navigate to the ‘Resources’ screen. You can find the Section 5 Notices and Supports user guide, as well as useful links for guidance documents on the ‘Resources’ screen. For additional details about the ‘Resources’ screen, please refer to **Section 12**.

Exhibit 3-3 shows a screen capture for the Section 5 Notices and Supports ‘Home’ screen:

Forms

The TSCA Section 5 Notices and Supports Reporting rule requires anyone who plans to manufacture or import a new chemical substance (i.e. one not listed on the TSCA inventory) for a non-exempt commercial purpose is required by section 5 of TSCA to provide EPA with notice before initiating the activity.

Use the following forms to report new chemicals to EPA: Premanufacture Notice form (EPA Form 7710-25) should be used to submit PMNs, LVEs, SNUNs, LOREXs, TMEAs, Modifications for LVEs and LoREX submissions; Biotechnology Notice form (EPA Form 6300-14) should be used to submit MCANs, TERAs, Tier I Exemptions, Tier 2 Exemptions, and Biotechnology TMEAs; Notice of Commencement form (NOC, EPA Form 7710-56) should be used to submit Notices of Commencement for PMNs and MCANs; ACM 40 CFR 721.30 form (TBD) should be used to report proposed Alternative Control Measures for published SNURs; or Bona Fide Notice (TBD) for any requests to determine if a chemical is on the TSCA inventory. The Support form is used to submit supplemental information for Premanufacture and Biotechnology notices, such as Test Data, Correspondences, and Amendments to older submissions.

To determine if a substance is on the TSCA inventory, and therefore excluded from the requirement to provide premanufacturing notification, a submitter may submit a Bona Fide Intent to Manufacture notice ('Bona Fide Notice').

Resources

Displays links to helpful guidance documents and websites for TSCA and Section 5.

Support

A Support has the ability to modify any unlocked form that he/she is assigned to by the Authorized Official.

CDX Homepage | MyCDX Homepage | EPA Homepage | Terms and Conditions | Privacy Notice | CDX Helpdesk: (888) 890-1995

Navigation: Click the ‘Forms’ link or tab to access the ‘Section 5 Notices and Supports Forms’ screen.

3.3 Section 5 Notices and Supports Forms

You can access the ‘Section 5 Notices and Supports Forms’ screen by clicking the ‘Forms’ link from the Section 5 Notices and Supports ‘Home’ screen, or by clicking the ‘Forms’ tab located within the application header.

Only one Section 5 Notices and Supports form is created per form alias, which helps differentiate between forms. Each column within the table of the 'Section 5 Notices and Supports Forms' screen can be sorted by clicking the individual column headers.

Edit an 'In Progress' Form: To modify an existing Section 5 Notices and Supports form, click the alias link for a form that has a status of 'In Progress.' You are required to enter the passphrase created by the AO and associated with that particular form to access and edit the form. Refer to **Section 3.4** for further instructions on viewing and modifying a form that is 'In Progress.'

The 'Section 5 Notices and Supports Forms' screen displays the following columns of information:

- **Alias:** Displays the form alias provided on the 'General Form Information' screen within a PMN, Biotechnology, NOC, or Support form; the 'General Document Information' screen within a Bona Fide Notice; or 'Contact Information' screen within an ACM form. The 'Alias' column will display a default alias comprised of a form type, date stamp, and time stamp in the following format: <Form Type-YYYYMMDD-HH:MM:SS Time Zone> if you accept the system-generated 'Form Alias' on the first screen in a Section 5 Notices and Supports form. A form alias is helpful when a user or company has multiple forms and/or when you must differentiate between forms.
- **Type:** Displays the form type pertaining to the reported chemical substance or mixture. This column can contain the following values: 'Primary PMN,' 'Biotechnology,' 'Support,' 'NOC,' 'Bona Fide,' or 'ACM.'
- **Subtype:** Displays the form subtype pertaining to the form type for the reported chemical substance or mixture.
 - This column contains one of the following values for a PMN form: 'MOCK_SUBMISSION,' 'LOREX_MODIFICATION,' (Low Release/Low Exposure Exemption Modification) 'LVE_MODIFICATION,' (Low Volume Exemption Modification) 'LOREX,' 'LVE,' 'TMEA,' (Test Marketing Exemption Application) 'SNUN,' (Significant New Use Notice) or 'PMN.'
 - This column contains the following values for a Biotechnology form: 'MCAN,' (Microbial Commercial Activity Notice) 'TERA,' (TSCA Experimental Release Application) 'TIER1,' 'TIER2,' or 'Biotechnology_TME' (Biotechnology Test Market Exemption).
 - This column contains the following values for a Support form: 'Amendment,' 'TestData,' 'TransferOfOwnership,' 'WithdrawalRequest,' 'SuspensionRequest,' or 'OtherCorrespondence.'
 - NOC forms, ACM forms, and Bona Fide Notices do not have subtypes.
- **Case Number:** Displays the form case number pertaining to the reported chemical substance or mixture after EPA receives the submission. In all cases, the 'XX' represents the fiscal year in which the form was submitted, and the 'XXXX' represents the order in which the form was received. A consolidated submission will generate sequential case numbers for each chemical identified within the form and will display all case numbers associated with that specific form. If the form has not been submitted and received, the 'Case Number' field remains blank.

- A PMN submission can have the following case number formats: P-XX-XXXX for PMN, SN-XX-XXXX for SNUN, L-XX-XXXX for LVE, LM-XX-XXXX for LVE Modifications, X-XX-XXXX for LOREX, XM-XX-XXXX for LOREX Modifications, T-XX-XXXX for TMEA, and I-XX-XXXX for Mock PMN notice types.
- A Biotechnology form can have the following case number formats: J-XX-XXXX for MCAN, R-XX-XXXX for TERA, G-XX-XXXX for Tier I Exemption, and H-XX-XXXX for Tier II.
- Bona Fide forms will have a case number format of BF-XX-XXXX.
- ACM forms will have a case number format of ACM-XX-XXXX.
- NOC and Support forms will display user-specified case numbers.
- **Status:** Displays the status of the Section 5 Notices and Supports form. The values will display as either 'In Progress' or 'Submitted.'
- **Modify Date:** Displays the date the form was last modified.
- **Submission Date:** Displays the date the form was submitted to EPA via CDX. This date populates only after the form has been submitted.
- **Export Options:** Displays 'CSV,' 'Excel,' 'XML,' and 'PDF' links for you to export the 'Section 5 Notices and Supports Forms' screen in one of the specified formats as an Excel spreadsheet, Comma-Separated Values (CSV), Extensible Markup Language, or Portable Document Format (PDF). The export options section will not display until a form is created.

Exhibit 3-4 shows a screen capture of the ‘Section 5 Notices and Supports Forms’ screen:

Exhibit 3-4: Section 5 Notices and Supports Forms Screen

SECTION 5 NOTICES AND SUPPORTS FORMS

- To edit an In Progress form, click the form alias link in the Alias column in the table below.

6 items found. Page 1 of 1 Items Per Page: 25

Alias	Type	Subtype	Case Number	Status	Modify Date	Submission Date
ACM-20130520-16:42:43 EDT	ACM			In Progress	06/17/2013	
Biotechnology-20130619-10:05:49 EDT	Biotechnology			In Progress	06/19/2013	
Bona Fide-20130502-13:16:43 EDT	Bona Fide			In Progress	06/18/2013

Navigation: Click the alias link in the ‘Alias’ column of an ‘In Progress’ form to navigate to the ‘Enter Passphrase’ screen.

3.4 Enter Passphrase

To edit a form click the ‘Alias’ link for a Section 5 Notices and Supports form with a status of ‘In Progress’ on the ‘Section 5 Notices and Supports Forms’ screen. The ‘Enter Passphrase’ screen requires you to enter the passphrase that is associated with the form.

Enter Passphrase: Enter the passphrase supplied by the Primary AO that was originally associated with the form.

Exhibit 3-5 shows a screen capture of the ‘Enter Passphrase’ screen:

Exhibit 3-5: Enter Passphrase Screen

Navigation: Enter the passphrase that the Primary AO originally created and associated with the form and click the ‘Next’ button to navigate to the ‘General Form Information’ screen in a PMN, Biotechnology, NOC, or Support form. Click the ‘Next’ button to navigate to the ‘General Document Information’ screen in a Bona Fide form. Click the ‘Next’ button to navigate to the ‘Contact Information’ screen in an ACM form.

3.5 Navigation Tree

The navigation tree is located on the left-hand side of each screen. It allows you to navigate between the various screens within the application and the different sections of the form. You can perform the following functions using the navigation tree:

- **Open and close the navigation tree:** A navigation arrow that opens and closes the navigation tree is located to the right of the navigation tree to provide more visual form space. Click the arrow (◀) on the open navigation tree to close the navigation tree and increase the space of the form content. Likewise, click the arrow (▶) on the closed navigation tree to open the navigation tree.
- **Collapse and Expand folders:** Each section of the form falls under a collapsible folder within the navigation tree which allows you to save space or easily view items in the navigation tree. When a folder is expanded, you can click the minus sign (-), the ‘Folder’ icon (📁), or the folder title link to collapse that section of the navigation tree. When a folder is collapsed, you can click the plus sign (+), the ‘Folder’ icon (📁), or the folder title link to

expand that section of the navigation tree. When you place your cursor over a folder title link, it will highlight in red.

- **Navigate between screens:** You can use the navigation tree to navigate between the various screens within the application and the different sections of the form. Each section of the form is denoted with a 'Form' icon (📄). You can click a 'Form' icon (📄) or a section title link to navigate between screens. You are required to save all information entered on a particular screen before navigating to the next screen or all entered information will be lost. A prompt will appear after you click a link in the navigation tree indicating, 'Are you sure you want to leave the current page? Any unsaved changes will be lost.' If you click the 'OK' button, you will be taken to the requested screen without saving any of the data in the previous screen. If you click the 'Cancel' button, the prompt will close and you will not be taken to the requested screen.

Exhibit 3-6 shows a screen capture of the navigation prompt window:

Exhibit 3-6: Navigation Prompt

- **Delete chemical folders:** To delete specific chemical folders, a 'Delete' icon (✖) displays at the bottom of each chemical folder within the navigation tree of a PMN form. When a chemical folder is deleted, all information entered within the deleted chemical folder is lost and cannot be retrieved. You can add a new chemical folder by clicking the 'Add Consolidated Chemical' link, and filling in all corresponding data. This delete functionality is not applicable to the Biotechnology, NOC, Support, Bona Fide Notice, or ACM forms, and is unavailable when amending a PMN form.
- **Copy chemical folders:** To copy a specific chemical folder, click the 'Copy' icon (📄) that displays at the bottom of each chemical folder within the navigation tree of a PMN form. When a chemical folder is copied, the chemical name, Chemical Abstracts Service Registry Number (CASRN), and attached documents are removed from the copied chemical. This copy functionality is not applicable to the Biotechnology, NOC, Support, Bona Fide, or ACM forms, and is unavailable when amending a PMN form.
- **Delete 'Submitter Controlled Operations' or 'Operations Controlled By Others' folders:** Click the 'Delete' icon (✖) that displays at the bottom of each 'Submitter Controlled Operations' or 'Operations Controlled by Others' folder within the navigation tree to delete a specific operations folder. When a 'Submitter Controlled Operations' or 'Operations Controlled By Others' folder is deleted, all information entered within the deleted operation is lost and cannot be retrieved. You can add a new 'Submitter Controlled Operations' or 'Operation Controlled By Others' folder by clicking the 'Add Operation' link under the appropriate folder and filling in all corresponding data. The delete functionality is not applicable while a user is navigating on a screen within the 'Operations Controlled by

Others' folder. This delete functionality is not applicable to the Biotechnology, NOC, Support, Bona Fide Notices, or ACM forms.

- **Upload XML:** The system displays an 'Upload XML' button in the navigation tree to allow a user to upload an XML file into a PMN form or joint PMN form, or to export an existing PMN form into an XML file format. A user may also upload eTSCA thick client files into a PMN form. If an XML file is uploaded into an existing form, the contents of that XML file overwrite the contents within the PMN form. For more information about the upload XML functionality, refer to **Section 4.33**.

Please note that in IE 7, the scroll bar within the navigation bar may freeze or portions of the bar may be missing which can prevent you from using the navigation tree. If the scroll bar freezes, click the 'Previous' and 'Next' buttons on a page to navigate, or click other links within the navigation tree to continue within the form.

3.6 Action Bar

The action bar is located at the bottom of the form section on each screen. You can perform the following functions using the action bar:

- Validate:** You can click the ‘Validate’ icon (✓) at any stage of completing a Section 5 Notices and Supports form. A ‘Section 5 Notices and Supports Validation’ pop-up window generates when you click the ‘Validate’ icon (✓) if you disable the pop-up blocker within your internet browser. The ‘Section 5 Notices and Supports Validation’ pop-up window displays a report of all warning messages and validation errors. On screens that display an expandable/collapsible field set, you must click the ‘Save’ button displayed within the expandable/collapsible field set to save the information entered within the field set before the ‘Validate’ functionality initiates. Refer to **Section 11** for more information on validating a form.

The following exhibits, Exhibit 3-17, Exhibit 3-18, and Exhibit 3-19 show screen captures for the action bar:

Exhibit 3-17: Action Bar – Validate

- Save:** Click the ‘Save’ icon (floppy disk) at any stage of completing a Section 5 Notices and Supports form to save the form. To generate and access a links to other pages of the form within the navigation tree, you must click the ‘Save’ icon (floppy disk) within the action bar. After you click the ‘Save’ icon (floppy disk), you will receive a prompt indicating that all data entered in the form has been saved successfully. The save function does not validate any entered data. On screens that display an expandable/collapsible field set, you must click the ‘Save’ button displayed within the expandable/collapsible field set to save the information entered before being able to click the ‘Save’ icon (floppy disk) located within the action bar or use the ‘Previous’ and ‘Next’ buttons to navigate to another page. Click the ‘Previous’ and ‘Next’ buttons on a form to save the data entered within a form. Click the ‘X’ button in the upper right-hand corner of the form in your browser to close the form without saving.

Exhibit 3-18: Action Bar – Save

Preview: Click the ‘Preview’ icon () at any stage of completing a Section 5 Notices and Supports form to preview the form. After you click the ‘Preview’ icon (), you will be given the option to view a regular version of the PDF (the confidential business information (CBI) version of the form or the non-CBI version if the form contains no CBI) or a sanitized version of the PDF. Choosing either option will generate and display a watermarked PDF of the form in a separate tab of your internet browser. Please note that attachment header sheets no longer generate within the PDF.

Exhibit 3-19: Action Bar – Preview

Please note that in IE 7, the action bar might align to the left or the right of the screen when viewing certain sections of the form.

- **Help Links:** You can click the ‘Help’ links, located at the bottom of each screen, at any stage of completing a Section 5 Notices and Supports form.
 - If you click the ‘CDX Homepage’ link, the application takes you to the CDX Homepage.
 - If you click the ‘MyCDX Homepage’ link, the application takes you to the CDX Login screen.
 - If you click the ‘EPA Homepage’ link, the application takes you to the EPA Homepage.
 - If you click the ‘Terms and Conditions’ link, the application takes you to the CDX Terms and Conditions screen.
 - If you click the ‘Privacy Notice’ link, the application takes you to the CDX Privacy and Security Notice screen.

Exhibit 3-20 shows a screen capture of the action bar ‘Help’ links:

Exhibit 3-20: Action Bar – Help Links

3.7 Attach Documents

The ‘Attach Document’ button displays on various screens within a Section 5 Notices and Supports form, and provides functionality for you to attach supporting documents where needed.

You can access the 'Attach Documents' pop-up window by clicking the 'Attach Document' button displayed on a screen. You can attach a file and enter a description, number of pages, and indicate CBI status. There is no limit on the size of the file that can be attached; however, the application prevents a user from uploading an empty document.

The system allows you to claim an uploaded document as CBI. If you claim a document as CBI, the system requires you to upload a sanitized version of the attached document. If you wish to change a CBI attachment to be non-CBI by un-checking the 'CBI' checkbox, a warning appears to notify you that un-checking the 'CBI' checkbox will delete the sanitized file. If you neglect to populate a required field and click the 'OK' button, an error message will display to indicate the missing field and the application will delete the previously attached file.

After you upload a document to be attached, the 'Attach Documents' pop-up window will close and the document's information will display in a table format on the screen. Depending on the screen, the attachment table may display the section of the page the file is associated with, the file name and file extension of the document, a description of the document, the number of pages in the document, and if the document was claimed CBI. The system allows you to delete unwanted documents by clicking the 'Delete' icon (✖) located under the 'Actions' column. To view, open, or edit previously attached documents, click the appropriate file name of the document within the 'File Name' column of the document table to view previously entered document information.

Please note that in IE 7, the 'Cancel' button within the 'Attach Documents' pop-up window disappears and reappears when checking the 'CBI' checkbox.

- **Type:** Select the document type of the document that you upload. This drop-down menu contains the following values: 'Aquatic Ecotoxicity,' 'Chemical Structure Diagram,' 'Fate,' 'GPC,' 'Genetic Toxicity,' 'Health Toxicity,' 'IES Report,' 'Safety Datasheet,' and 'Terrestrial Ecotoxicity.' This is a required field.
- **Subtype:** Select the subtype of the document that you upload. This drop-down menu contains the following values, which are grouped under specific document types: 'Partitioning (e.g., Koc, Kd, Kow, Koa, Henry's law constant),' 'Hydrolysis,' 'Fugacity,' 'Photolysis,' 'Monitoring data (e.g. air, water, soil, biota, human),' 'Biodegradation,' 'Bioconcentration Factors/Bioaccumulation Factors (BCF/BAF),' 'Material Safety Data Sheet/Safety Data Sheet (MSDS/SDS),' 'Technical Datasheet,' 'Eye Irritation,' 'Combined Repeated-Dose/Developmental/Reproductive Toxicity,' 'Sensitization,' 'Carcinogenicity,' 'Repeated-Dose Toxicity,' 'Neurotoxicity,' 'Acute Toxicity,' 'Developmental Toxicity,' 'Pharmacokinetics/Metabolism,' 'Dermal Irritation,' 'Reproductive Toxicity,' 'Fish Chronic Toxicity,' 'Invertebrate Acute Toxicity,' 'Invertebrate Chronic Toxicity,' 'Algae Toxicity,' 'Fish Acute Toxicity,' 'Chromosomal Aberrations Assay,' 'Unscheduled DNA Synthesis,' 'Genetic Mutation Assay,' 'Plant Toxicity,' 'Invertebrate Toxicity,' 'Avian Toxicity,' and 'Other.' This is a required field when displayed.
- **Attachment:** Click the 'Browse' button to generate the 'File Upload' window to search for a document on your hard drive. The application prevents the upload of empty documents. The attached file can be one of the following file types: .pdf, .ppt, .pptx, .xls, .xlsx, .doc, .docx, .rtf, .txt, .gif, .jpg, .png, .bpm, .fas, .gbk, or .embl.

- **Description:** Enter a description associated with the attached document. Submitters should not include any CBI information in the document description. This is a required field.
- **Number of Pages:** Enter the number of pages in a document. This is a required field.
- **Check to claim the attachment as CBI:** Check the 'CBI' checkbox to claim the attached document as confidential. Un-checking the 'CBI' checkbox for a CBI document generates a warning notifying you that un-checking the CBI claim will delete the sanitized file.
- **Sanitized Attachment:** Click the 'Browse' button to generate the 'File Upload' window to search for a document on your hard drive. The attached file can be one of the following file types: .pdf, .ppt, .pptx, .xls, .xlsx, .doc, .docx, .rtf, .txt, .gif, .jpg, .png, .bpm, .fas, .gbk, or .embl. For any attached document claimed as CBI, you will be required to attach a sanitized version of the document.
- **Cancel:** Click the 'Cancel' button to cancel the attach document process.
- **OK:** Click the 'OK' button to attach and link the document uploaded on the 'Attach Documents' window to the form. If a field is missing, a warning message will display notifying you that all attachments must be re-attached and the missing field must be populated.

Exhibit 3-21 shows a screen capture of the ‘Attach Documents’ pop-up window:

Exhibit 3-21: Attach Documents Pop-Up Window

Navigation: Click the ‘Cancel’ button or ‘X’ icon in the upper right-hand corner to cancel the document attachment process. Click the ‘OK’ button to attach the document to the form and navigate back to the original screen from which the document attachment process was initiated.

3.8 Search Substance Registry Services (SRS)

The 'Search SRS' button displays on various screens within a Section 5 Notices and Supports form to identify chemicals that may be stored in SRS.

Search SRS: Click the 'Search SRS' button to generate the 'Search Substance Registry Services' window. You can search for the reported chemical(s) by either the 'Chemical Abstracts Service Registry Number (CASRN)' or 'CA Index Name or Other Synonym.' The application also offers the option of entering user-specified chemical information by clicking the 'Create New Chemical' button. Click the 'Create New Chemical' button to generate the 'Chemical Not Found In Substance Registry Services' window and enter chemical information by filling in the 'Chemical Name' and 'CASRN' (if desired) field under the manual entry field set.

The system allows you to enter each chemical by clicking the 'OK' button located at the bottom of the 'Search SRS' window. Once you enter all known chemical information and click the 'OK' button, the chemical information saves and populates into the chemical description table. The 'Actions' column of the chemical table allows you to delete chemicals that have been added.

The Section 5 Notices and Supports application contains functionality to prevent a user from adding duplicate chemicals within a multi-component submission. Chemicals are checked in the following order:

- If both chemicals have CASRNs, they will be compared.
- If only one chemical has a CASRN, they will not be compared and are considered different.
- If neither chemicals have CASRNs, their chemical names will be compared.

An error message generates within the expandable/collapsible field set if a user attempts to add a duplicate chemical within a multi-component submission.

Please note in IE 7, the CSPP logo might be misaligned in the 'Search Substance Registry Services' window.

- **CASRN:** Enter the CASRN of the chemical. Either the 'CASRN' or 'CA Index Name or Other Synonym' field is required when searching SRS.
- **CA Index Name or Other Synonym:** Enter the chemical abstract '(CA) Index Name or Other Synonym' of the chemical. This field displays the following options: 'Matches Exactly,' 'Contains,' and 'Begins With.' Either the 'CASRN' or 'CA Index Name or Other Synonym' field is required when searching SRS.
- **Search:** Click the 'Search' button to initiate the database search for the CASRN or CA Index Name or Other Synonym for the desired chemical.
- **Create New Chemical:** Click the 'Create New Chemical' button to display the 'Chemical Not Found In Substance Registry Services' pop-up window.

Exhibit 3-22 shows a screen capture of the ‘Search Substance Registry Services’ pop-up window:

Exhibit 3-22: Search Substance Registry Services Pop-Up Window

CSPP

SEARCH SUBSTANCE REGISTRY SERVICES

Enter the specific or partial, currently correct Chemical Abstracts (CA) Index name or a Chemical Abstract Services Registry Number (CASRN). Click Search SRS and select the appropriate CA Index name/ CASRN combination from EPA's Substance Registry Services (SRS).

Please search by CASRN or CA Index Name

1. CASRN: Matches exactly

2. CA Index Name or Other Synonym: Matches Exactly

Search SRS

Create New Chemical

Navigation: Click the ‘Search’ button on the ‘Search Substance Registry Services’ window to initiate the database search for the CASRN or CA Index Name or Other Synonym. After SRS returns results, select the chemical, click the ‘OK’ button on the ‘Search SRS’ window, close the ‘Search Substance Registry Services’ window, and navigate back to the screen from which the SRS search was initiated where the chemical information will be populated.

If the chemical is not found in the ‘Search Substance Registry Services’ window, click the ‘Create New Chemical’ button to generate the ‘Chemical Not Found In Substance Registry Services’ pop-up window.

- **CBI:** Check the ‘CBI’ checkbox to claim the entered chemical as confidential. The ‘CBI’ checkbox will not be displayed on the ‘Chemical Not Found In Substance Registry Services’

window for the 'Class 1 or 2 Chemical Substances,' 'Polymer Identification Information,' or the 'Monomers and Other Reactants' screen.

- **Chemical Name:** Enter the chemical name. This is a required field.
- **CASRN:** Enter the manually entered CASRN, if available.
- **Maximum Percent:** Enter the maximum percentage for the impurity. This field is displayed only in the 'Chemical Not Found In Substance Registry Services' window on the 'Additional Chemical Information' screen.
- **Cancel:** Click the 'Cancel' button to navigate back to the 'Search Substance Registry Services' window.
- **OK:** Click the 'OK' button to enter the manually entered chemical information into the fields on the screen from which the SRS search was initiated.

Exhibit 3-23 shows a screen capture of the ‘Chemical Not Found In Substance Registry Services’ pop-up window:

Exhibit 3-23: Chemical Not Found In Substance Registry Services Pop-Up Window

CSPP

CHEMICAL NOT FOUND IN SUBSTANCE REGISTRY SERVICES

Complete all known chemical substance information in the below fields. Click the 'OK' button when all known chemical substance information has been fulfilled.

If you need to go back to the Search SRS screen, please click 'Cancel'.

Chemical ID

CBI:

Chemical Name:

CASRN:

Maximum Percent:

Cancel **OK**

Navigation: Click the ‘OK’ button to save the manually entered chemical information and navigate back to the screen from which the SRS search was initiated where the chemical information will be populated. Click the ‘Cancel’ button to navigate back to the ‘Search SRS’ pop-up window. Click the ‘X’ located in the upper right-hand corner to close the pop-up window and navigate back to the screen from which the SRS search was initiated.

3.9 Add Facility

The 'Add Facility' button displays on the 'Submitter Operation Information' screen and the 'Industrial Sites Controlled By Others' screen within a PMN form. This button also displays on the 'Site Information' screen within a NOC form and the 'Submitter Site Identification' screen within a Bona Fide form. The 'Add Facility' button is used to generate the 'Add Facility' pop-up window and select the applicable sites for which you will be reporting. The 'Add Facility' drop-down menu contains the sites that all AO users within the user's organization are registered for within CDX registration; additional facilities can be added within CDX to further populate this drop-down menu.

If you are not registered to any facilities within CDX registration, or you have finished identifying all possible sites, a message displays within a pop-up window notifying you to add additional sites within your CDX registration profile to add additional sites to a form.

Click the 'Add Facility' button to generate the 'Add Facility' pop-up window which displays the following fields: 'Select a site from the drop-down menu below,' 'CBI,' 'Alias,' 'EPA Registry ID,' 'Facility Name,' 'Facility Address,' 'City,' 'State,' and 'Postal Code.' Each individual site may be claimed as CBI.

- **Select a site from the drop-down menu below:** Select a site from the drop-down menu that you will be reporting on.
- **CBI:** Check the 'CBI' checkbox to claim the facility information as confidential.
- **Alias:** Enter the site alias. This is a required field if a Joint Submission or Letter of Support is pending for the form.
- **EPA Registry ID:** Displays the EPA registry ID of the site selected from the drop-down menu.
- **Facility Name:** Displays the name of the site selected from the drop-down menu.
- **Facility Address:** Displays the address of the site selected from the drop-down menu.
- **City:** Displays the city of the site selected from the drop-down menu.
- **State:** Displays the state of the site selected from the drop-down menu.
- **Postal Code:** Displays the postal code of the site selected from the drop-down menu.
- **Add Facility:** Click the button to add the selected site to the main page from which you are initiating the search.
- **Cancel:** Click the button to cancel the process of adding a site.

Exhibit 3-24 shows a screen capture of the 'Add Facility' pop-up window:

Alias:

EPA Registry ID:

Facility Name:

Facility Address:

City:

State:

Postal Code:

Add Facility Cancel

Navigation: Click the ‘Add Facility’ button to add the selected site to the screen from which you initiated the site identification process.

4 Edit Premanufacture Notice (PMN)

Anyone who plans to manufacture or import a new chemical substance for a non-exempt commercial purpose is required by Section 5 of TSCA to provide EPA with notice before initiating the activity, known as a PMN form. A PMN must be submitted at least ninety (90) days prior to the manufacture or import of the chemical.

4.1 Edit PMN Form

To edit a PMN form, navigate to the 'Section 5 Notices and Supports Forms' screen and click the alias link in the 'Alias' column of a form with a status of 'In Progress.' Refer to **Section 3.3** for additional details regarding the 'Section 5 Notices and Supports Forms' screen.

Refer to **Section 3.4** for additional details regarding the enter passphrase process.

4.2 General Form Information

You can navigate to the 'General Form Information' screen by accessing a Section 5 Notices and Supports form that is 'In Progress' and entering the passphrase associated with the selected form.

The 'General Form Information' screen provides fields to input identifying information for a form. You will have the option to assign a 'Form Alias' to identify the form. A unique form alias is helpful when a user or company has multiple forms and/or when you must differentiate between forms to the help desk. Upon navigating to the 'General Form Information' screen, the system auto-generates a default alias comprised of a form type, date stamp and time stamp in the following format: <Form Type-YYYYMMDD-HH:MM:SS Time Zone>.

The application contains the following functionality and may generate additional screens for a PMN form based on the type of notice selected from the 'Type of Notice' drop-down menu on the 'General Form Information' screen:

- If you select 'Premanufacture Notice (PMN)' or 'Significant New Use Notice (SNUN)' from the 'Type of Notice' drop-down menu, the 'Payment ID' and the 'TS Number' fields are required. Click the 'Next' button to navigate to the 'User Fees Certification' screen.
- If you select 'SNUN' from the 'Type of Notice' drop-down menu, it is recommended that a cover letter be provided. Otherwise, a warning message will display during validation of the form.
- If you are not filing a PMN or SNUN, click the 'Next' button to navigate to the 'Agent Information' screen.
- If 'Low Volume Exemption (LVE) @ 40 CFR 723.50(c)(1)' or 'LVE Modification' is selected from the 'Type of Notice' drop-down menu, a 'LVE Certification' screen generates and displays during the submission process. The 'LVE Modification' form type requires only identification of a technical contact, and selection of a 'Manufacture' or 'Import' option.
- If 'Low Release/Low Exposure Exemption (LOREX) @ 40 CFR 723.50(c)(2)' or 'LOREX Modification' is selected from the 'Type of Notice' drop-down menu, a 'LOREX Certification' screen generates and displays during the submission process. The 'LOREX Modification' form type requires only identification of a technical contact, and selection of a 'Manufacture' or 'Import' option.
- If 'Test Marketing Exemption Application (TMEA)' is selected from the 'Type of Notice' drop-down menu, click the 'Next' button to navigate to the 'Agent Information' screen. The

'TMEA' form type requires only identification of a technical contact, and selection of a 'Manufacture' or 'Import' option.

The 'PMN Identification' section provides fields for you to enter information regarding other communications with EPA by entering a 'TS Number' and 'Payment ID.' The TS number is determined by a company and is used to identify the form for both payment and connect related submissions when additional communications (Letters of Support, Joint Submissions, and corrections) are sent before a PMN/LVE case number has been assigned. The TS number can be any six (6) character alphanumeric combination. The TS number should include two (2), three (3), or four (4) letters. Company names, recognizable words, and numeric series are not recommended. A unique identification number for the form will generate later if a Letter of Support or Joint Submission is being filed.

The 'Payment ID' is a user supplied alphanumeric value that corresponds to the method of payment used to submit the user fee (e.g. a check number, a wire transfer number, or a Pay.gov transaction number). The 'Payment ID' is a required field when you are filing a PMN or SNUN.

The 'Test Data' section provides checkboxes to identify data that is included in the notice selected from the 'Type of Notice' drop-down menu. The following values will display as checkboxes: 'Environmental fate data,' 'Health effects data,' 'Environmental effects data,' 'Physical/Chemical properties,' 'Risk assessments,' 'Structure/Activity relationships,' 'Test data not in the possession or control of the submitter,' and 'Other data.'

You are required to submit all test data in your possession or control and to provide a description of all other data known to or reasonably ascertainable by you if the data is related to the health and environmental effects on the manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance. Standard literature citations may be submitted for data in the open scientific literature. Complete test data (written in English), not summaries of data, must be submitted if they do not appear in the open literature. You should clearly identify whether test data is on the substance or on an analog. In addition, the chemical composition of the tested material should be characterized. Data should be submitted according to the requirements of §720.50 of the Premanufacture Notification Rule (40 Code of Federal Regulations (CFR) Part 720).

The 'Identify whether any of the below options apply' section provides checkboxes for you to indicate how interactions with other companies occur within the form. If the company is filing a Joint Submission, a 'Joint Submission' folder generates within the navigation tree for you to enter information concerning the Joint Submission. A unique identification number will be generated and sent to the joint submitter by the primary submitter and will link the two forms together. You will also be able to indicate that a Letter of Support submitted by a Secondary AO is expected with the original PMN form. You will also be able to indicate that a Letter of Support is expected with the PMN form. The Letter of Support will be submitted by a Secondary AO, with a unique identification number linking the forms.

- **Form Alias:** Displays the form alias created by the Primary AO. This is an editable field that can be modified if necessary. This is a required field.
- **Type of Notice:** Select a value to indicate the type of notice for the PMN form. Valid values include: 'Premanufacture Notice (PMN),' 'Significant New Use Notice (SNUN),' 'Test Marketing Exemption Application (TMEA),' 'Low Volume Exemption (LVE) @ 40 CFR

723.50 (c)(1), 'Low Release/Low Exposure Exemption (LOREX) @ 40 CFR 723.50(c)(2),' 'LVE Modification,' 'LOREX Modification,' and 'Mock Submission.' Select 'PMN' if the application is for a standard, fine-product new chemical substance for placement on the TSCA inventory. Select 'Significant New Use Notice' for any notice that is marked in accordance with a Significant New Use Rule (SNUR). Select 'TMEA' for any notice submitted in accordance with the criteria listed in 40 CFR §720.38. A 'Mock Submission' is an enforcement case where the chemical was manufactured/imported in the past and is not currently being manufactured/imported by the company. This is a required field.

- **TS Number:** Enter the TS number related to the PMN form; this field accepts any six (6) character alphanumeric combination. It is used by the financial institution that receives payment for EPA when it notifies the Agency that the fee has been received. The TS number should include two (2), three (3), or four (4) letters. Company names, recognizable words, and numeric series are not recommended. TS numbers should be unique to the submission and should not be reused in subsequent submissions. This field is required if 'Premanufacture (PMN)' or 'Significant New Use Notice (SNUN)' is selected from the 'Type of Notice' drop-down menu.
- **Payment ID:** The 'Payment ID' can be entered as free text, but refers to a check number, wire transfer number, or a Pay.gov transaction number used to electronically transmit a fee. This field is required if either 'Premanufacture (PMN)' or 'Significant New Use Notice (SNUN)' is selected from the 'Type of Notice' drop-down menu.
- **Environmental fate data:** Check the 'Environmental fate data' checkbox to indicate that the form contains environmental fate data.
- **Health effects data:** Check the 'Health effects data' checkbox to indicate that the form contains health effects data.
- **Environmental effects data:** Check the 'Environmental effects data' checkbox to indicate that the form contains environmental effects data.
- **Physical/Chemical properties:** Check the 'Physical/Chemical properties' checkbox to indicate that the form contains physical/chemical properties data.
- **Test data not in the possession or control of the submitter:** Check the 'Test data not in the possession or control of the submitter' checkbox to indicate that the form contains test data not in the possession or control of the submitter.
- **Risk assessments:** Check the 'Risk assessments' checkbox to indicate that the form contains risk assessments data.
- **Structure/Activity relationships:** Check the 'Structure/Activity relationships' checkbox to indicate that the form contains structure-activity relationships (SAR) data.
- **Other data:** Check the 'Other data' checkbox to indicate that the form contains other types of data.
- **Check here if you are filing a joint PMN:** Check the 'Check here if you are filing a joint PMN' checkbox to indicate that the form is pending a joint PMN form. A 'Joint Submission' folder generates within the navigation tree upon clicking the 'Save' icon located at the bottom of the screen within the action bar or by clicking the 'Next' button on the 'General Form Information' screen.

- **Check here if you have a Letter of Support pending:** Check the ‘Check here if you have a Letter of Support pending’ checkbox to indicate that the form is pending a Letter of Support. A ‘Letter of Support’ folder displays within the navigation tree upon clicking the ‘Save’ icon located at the bottom of the screen within the action bar or by clicking the ‘Next’ button on the ‘General Form Information’ screen.

Navigation: If you are filing a ‘PMN’ or ‘SNUN’ form, click the ‘Next’ button to navigate to the ‘User Fees Certification’ screen. You can also access this screen by clicking the ‘User Fees Certification’ link within the navigation tree. If you are not filing a ‘PMN’ or ‘SNUN’ form, click the ‘Next’ button to navigate to the ‘Agent Information’ screen. You can also access this screen by clicking the ‘Agent Information’ link within the navigation tree. The ‘Save’ button in the action bar or the ‘Next’ button must be clicked before the links within the navigation tree generate and are available to a user.

4.3 User Fees Certification

You can access the ‘User Fees Certification’ screen by selecting ‘Premanufacture Notice (PMN)’ or ‘Significant New Use Notice (SNUN)’ from the ‘Type of Notice’ drop-down menu and by clicking the ‘Next’ button from the ‘General Form Information’ screen. You can also access this screen by clicking the ‘User Fees Certification’ link within the navigation tree.

The purpose of the ‘User Fees Certification’ screen is to inform EPA of how the user fees were paid. You will have three (3) options to select from to notify EPA which user fee was selected. A company will indicate whether ‘\$100’ was submitted for a small business, ‘\$1,000’ was submitted for an intermediate PMN, or ‘\$2,500’ was submitted for a large business. You can find the specifics of which category to file under by reviewing 40 Code of Federal Regulations (CFR) Section 700.

- **The Company named in Part 1, Section A has remitted the fee of \$2,500 specified in 40 CFR 700.45(b):** Select this radio button to indicate that you have submitted a user fee in the amount of \$2,500. One of the three user fee options must be selected.
- **The Company named in Part 1, Section A has remitted the fee of \$1,000 for Intermediate PMN (defined @ 40 CFR 700.43) in accordance with 40 CFR 700.45(b):** Select this radio button to indicate that you have submitted a user fee in the amount of \$1,000. One of the three user fee options must be selected.
- **The Company named in Part 1, Section A is a small business concern under 40 CFR 700.43 and has remitted a fee of \$100 in accordance with 40 CFR 700.45(b):** Select this radio button to indicate that you have submitted a user fee in the amount of \$100. One of the three user fee options must be selected.

Exhibit 4-3 shows a screen capture of the ‘User Fees Certification’ screen:

Exhibit 4-3: User Fees Certification Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Agent Information’ screen. You can also access this screen by clicking the ‘Agent Information’ link within the navigation tree.

4.4 Agent Information

You can access the ‘Agent Information’ screen by clicking the ‘Next’ button from the ‘General Form Information’ screen if you are not filing a ‘PMN’ or ‘SNUN.’ You can also navigate to this screen by clicking the ‘Next’ button from the ‘User Fees Certification’ screen if you are filing a ‘PMN’ or ‘SNUN.’ Click the ‘Agent Information’ link within the navigation tree to access this screen.

The ‘Agent Information’ screen provides fields for you to enter information regarding all parties involved in representing the PMN form. The agent should be a person who can answer questions about the form. The ‘Agent Information’ screen displays an ‘Add Agent’ button that generates the ‘Add Agent’ pop-up window for you to input the contact information on behalf of whom the

submission is being made. You will be able to enter multiple agents; if the agent is the same individual who is filling out the form, click the 'Copy CDX Registration' button to retrieve user information entered during CDX registration. The system provides a checkbox for you to claim entered contact information as confidential by checking the 'Check here to claim this information as CBI' checkbox. Each agent will have an individual CBI claim. You will be able to enter contact information for each agent, and click the 'OK' button, which will populate the agent table located on the 'Agent Information' screen. Click the 'Delete' icon (✖) located under the 'Actions' column to delete agents. To edit agent information, click the agent name link within the 'Last Name' column, which will generate the 'Add Agent' pop-up window with the previously entered agent information.

- **Add Agent:** Click this button to display the 'Add Agent' pop-up window, which provides fields for you to enter agent contact information.
- **Last Name:** Displays the last name of the reported agent. Click the last name link to edit the agent information.
- **First Name:** Displays the first name of the reported agent.
- **Address:** Displays the address of the reported agent.
- **CBI:** Indicates the CBI status of the agent information by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon (✖) to delete specific agents. A warning message displays to confirm deletion of the agent information.

Exhibit 4-4 shows a screen capture of the ‘Agent Information’ screen:

Exhibit 4-4: Agent Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Technical Contact Information’ screen. You can also access this screen by clicking the ‘Technical Contact Information’ link within the navigation tree.

4.4.1 Add Agent

Click the ‘Add Agent’ button to generate the ‘Add Agent’ pop-up window. Enter agent information into the fields displayed on the ‘Add Agent’ pop-up window. Click the ‘Cancel’ button to stop populating agent information. Click the ‘OK’ button after entering agent information to populate the information on the main ‘Agent Information’ screen.

- **Copy CDX Registration:** Click the ‘Copy CDX Registration’ button to display a prompt confirming the import of CDX registration information and allow the system to populate the agent information fields with your contact information provided during CDX registration.

- **Check here to claim this information as CBI:** Check the ‘Check here to claim this information as CBI’ checkbox to claim agent information as confidential. If the ‘CBI’ checkbox is checked before clicking the ‘Copy CDX Registration’ button, the ‘CBI’ checkbox will become unchecked upon navigating back to the pop-up window after copying CDX registration information. To claim agent information as confidential, check the ‘CBI’ checkbox after importing CDX registration information.
- **First Name:** Enter the agent’s first name. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Last Name:** Enter the agent’s last name. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Position:** Enter the agent’s job title.
- **Company Name:** Enter the agent’s company name. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Phone Number:** Enter the agent’s daytime phone number: U.S. or international. This field does not allow dashes. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Phone Extension:** Enter the agent’s daytime phone number extension. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information.
- **Email Address:** Enter the agent’s email address. The email address must follow the standard email address format: John.Doe@abc.com. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Mailing Address 1:** Enter the first line of the agent’s mailing address. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Mailing Address 2:** Enter the second line of the agent’s mailing address. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information.
- **City:** Enter the city of the agent’s mailing address. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **State:** Select the state of the agent’s mailing address from the drop-down menu. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field if the ‘Country’ field is set to ‘United States.’ This field is disabled if a non-US country is selected from the ‘Country’ drop-down menu.
- **Postal Code:** Enter the postal code of the agent’s mailing address. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field only if the ‘Country’ field is set to ‘United States.’
- **Country:** Select the country of the agent’s mailing address from the drop-down menu. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This field is automatically set to ‘United States’ if a value is selected from the ‘State’ drop-down menu. This is a required field.

4.5 Technical Contact Information

You can access the ‘Technical Contact Information’ screen by clicking the ‘Next’ button from the ‘Agent Information’ screen. You can also access this screen by clicking the ‘Technical Contact Information’ link within the navigation tree.

The technical contact should be able to answer, or obtain answers to, questions related to the chemical submitted to EPA within the PMN form. The technical contact does not have to physically work at the site reported on the form, but must be readily available by phone or email. It is required to identify at least one technical contact.

The system provides functionality to enter multiple technical contacts. If the contact is the same person who is filling out the form, the system presents a 'Copy CDX Registration' button for you to retrieve your user information from CDX. You will enter the contact information for each technical contact within the 'Add Technical Contact' window and click the 'OK' button at the bottom of the window, which will populate the technical contacts table located on the screen. Click the 'Delete' icon (✖) located under the 'Actions' column to delete a technical contact. Click the technical contact name within the 'Last Name' column to edit technical contact information.

- **Add Technical Contact:** Click the 'Add Technical Contact' button to generate the 'Add Technical Contact' pop-up window, which provides fields for you to enter technical contact information.
- **Last Name:** Displays the last name of the reported technical contact. Click the 'Last Name' link to edit the technical contact information.
- **First Name:** Displays the first name of the reported technical contact.
- **Address:** Displays the address of the reported technical contact.
- **CBI:** Indicates the CBI status of the technical contact information by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon (✖) to delete specific technical contacts.

Exhibit 4-6 shows a screen capture of the ‘Technical Contact Information’ screen:

Exhibit 4-6: Technical Contact Information Screen

Navigation: Click the ‘Add Technical Contact’ button to begin the process of adding technical contact information. Click the ‘Next’ button to navigate to the ‘Additional Submission Information’ screen. You can also access this screen by clicking the ‘Additional Submission Information’ link within the navigation tree.

4.5.1 Add Technical Contact

Click the ‘Add Technical Contact’ button to generate the ‘Add Technical Contact’ pop-up window. Enter technical contact information into the fields displayed on the ‘Add Technical Contact’ pop-up window. Click the ‘Cancel’ button to stop populating technical contact information. Click the ‘OK’ button to populate the entered technical contact information on the main ‘Technical Contact Information’ screen.

- **Copy CDX Registration:** Click the ‘Copy CDX Registration’ button to populate the fields with your contact information provided during CDX registration. A prompt will display confirming the import of CDX registration information.

- **Check here to claim this information as CBI:** Check the ‘Check here to claim this information as CBI’ checkbox to claim the technical contact information as confidential. If the ‘CBI’ checkbox is checked before clicking the ‘Copy CDX Registration’ button, the ‘CBI’ checkbox will become unchecked upon navigating back to the pop-up window after copying CDX registration information. To claim a technical contact as confidential, check the ‘CBI’ checkbox after importing CDX registration information.
- **First Name:** Enter the technical contact’s first name. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Last Name:** Enter the technical contact’s last name. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Position:** Enter the technical contact’s job title.
- **Company Name:** Enter the technical contact’s company name. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Phone Number:** Enter the technical contact’s daytime phone number. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Phone Extension:** Enter the technical contact’s phone number extension. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information.
- **Email Address:** Enter the technical contact’s email address. The email address must follow the standard email address format: John.Doe@abc.com. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information.
- **Mailing Address 1:** Enter the first line of the technical contact’s mailing address. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Mailing Address 2:** Enter the second line of the technical contact’s mailing address. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information.
- **City:** Enter the technical contact’s U.S. city of the mailing address. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **State:** Select the state of the technical contact’s mailing address from the drop-down menu. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Postal Code:** Enter the postal code of the technical contact’s mailing address. Click the ‘Copy CDX Registration’ button to populate the fields with CDX registration information. This is a required field.
- **Country:** Displays ‘United States.’

Click the ‘OK’ button to save and populate the entered technical contact information and navigate back to the ‘Technical Contact Information’ screen.

4.6 Additional Submission Information

You can access the ‘Additional Submission Information’ screen by clicking the ‘Next’ button from the ‘Technical Contact Information’ screen. You can also access this screen by clicking the ‘Additional Submission Information’ link within the navigation tree.

The 'Additional Submission Information' screen gathers information concerning the PMN form that references generic information allowing EPA to set a base point for the project.

The 'Prenotice Communication Number' is a number given to a user during past communication with EPA. The 'Prenotice Communication Number' is required if you are filing a consolidated PMN. EPA must approve all consolidated PMN forms prior to submission. The system will require that you either enter a number into the text field or check the 'None' checkbox. You may declare the number confidential by checking the 'CBI' checkbox.

EPA uses the 'Previously Submitted Notice Number' to link past, current, and future forms. This number allows EPA to associate previous renditions of the current submission in the PMN process. The system will require that you either enter a case number into the text field or check the 'None' checkbox. You may declare the number confidential by checking the 'CBI' checkbox.

The 'Bona Fide Intent Notice Number' is listed to show the company previously contacted EPA to determine whether the chemical in question was previously listed on the TSCA inventory. The system will require that you either enter a number into the text field or check the 'None' checkbox. You may declare the number confidential by checking the 'CBI' checkbox.

On this screen, a company must also declare whether the newly registered chemical will be manufactured or imported. You will have the option to select 'Manufacture' and/or 'Import' and depending on whether the company only intends to do one of the available options, the system provides 'Binding' checkboxes to indicate a binding option. If the 'Manufacture' checkbox is checked, the screens within the 'Submitter Controlled Operations' folder automatically generates.

The binding option demonstrates that you intend to only do the one option selected and would be willing to legally bind to that situation if EPA chooses to regulate that chemical. The purpose of the binding option is to enable EPA (if necessary) to efficiently negotiate with a PMN submitter the development of §5(e) consent orders and promulgate SNUR for those new chemical substances that the Agency determines may present an unreasonable risk if certain control actions are not implemented. This option is intended to reduce delays that can slow the development of consent orders. At one time, SNUR were limited to environmental release activities and certain industrial, commercial, or consumer activities, but now they can include other important activities, such as protection in the workplace and hazard communications. Control measures instituted by the submitter to reduce exposures and/or releases of the substance may have a direct bearing on the Agency's conclusions regarding risk. Therefore, you may wish to indicate your willingness to be bound to certain submitted information on the form, which relates to the issue of potential risk such as use, production volume, protective equipment, engineering controls, and/or process description. By indicating your willingness to make these commitments, you would be indicating an interest in future negotiations if EPA deems them necessary.

Please note that in IE 7, leaving an identification number field blank and clicking the 'Save' icon associated with an identification number does not cause the empty field to turn yellow. In addition, entering identification numbers with incorrect formats into the 'Previously Submitted Notice Number' field does not cause the field to turn yellow.

- **Prenotice Communication Number – None:** Check the ‘None’ checkbox for the ‘Prenotice Communication Number’ to indicate that there is no prenotice communication number. Checking the ‘None’ checkbox removes the ‘Prenotice Communication Number’ fields and associated actions. Un-check the ‘None’ checkbox to re-generate a ‘Prenotice Communication Number’ field and enter a value.
- **Prenotice Communication Number:** Enter the prenotice communication number to associate with a previous contact with EPA. Click the ‘Save’ icon (📁) to save an individual entry. Click the ‘Form’ icon (📄) that displays after saving to edit an individual entry. Click the ‘Delete’ icon (✖) to delete individual entries. Click the ‘Add’ icon (+) to generate blank text fields to provide additional entries. This field is required if a form is a consolidated submission, regardless of whether the ‘None’ checkbox is checked.
- **Prenotice Communication Number – CBI:** Check the ‘CBI’ checkbox to claim all identified prenotice communication numbers as confidential.
- **Previously Submitted Notice Number – None:** Check the ‘None’ checkbox for the ‘Previously Submitted Notice Number’ to indicate that there is no previously submitted notice number. Checking the ‘None’ checkbox removes the ‘Previously Submitted Notice Number’ fields and associated actions. Un-check the ‘None’ checkbox to re-generate a ‘Previously Submitted Notice Number’ field and enter a value.
- **Previously Submitted Notice Number:** Enter the previously submitted notice number to associate with a previous contact with EPA. Enter this number in a case number format; this value accepts alphanumeric characters and dashes. Click the ‘Save’ icon (📁) to save an individual entry. Click the ‘Form’ icon (📄) that displays after saving to edit an individual entry. Click the ‘Delete’ icon (✖) to delete individual entries. Click the ‘Add’ icon (+) to generate blank text fields to provide additional entries. This field is required, or the ‘None’ checkbox must be checked.
- **Previously Submitted Notice Number – CBI:** Check the ‘CBI’ checkbox to claim all identified previously submitted notice numbers as confidential.
- **Bona Fide Intent Notice Number – None:** Check the ‘None’ checkbox for the ‘Bona Fide Intent Notice Number’ to indicate that there is no bona fide intent notice number. Checking the ‘None’ checkbox removes the ‘Bona Fide Intent Notice Number’ fields and associated actions. Un-check the ‘None’ checkbox to re-generate a ‘Bona Fide Intent Notice Number’ field and enter a value.
- **Bona Fide Intent Notice Number:** Enter the bona fide intent notice number to associate with a previous contact with EPA. Click the ‘Save’ icon (📁) to save an individual entry. Click the ‘Form’ icon (📄) that displays after saving to edit an individual entry. Click the ‘Delete’ icon (✖) to delete individual entries. Click the ‘Add’ icon (+) to generate blank text fields to provide additional entries. This field is required, or the ‘None’ checkbox must be checked.
- **Bona Fide Intent Notice Number – CBI:** Check the ‘CBI’ checkbox to claim all identified bona fide intent notice numbers as confidential.
- **Manufacture:** Check the ‘Manufacture’ checkbox to claim the intent to manufacture. The screens within the ‘Submitter Controlled Operations’ folder automatically generate when the ‘Manufacture’ checkbox is checked.

- **Binding:** Check the 'Binding' checkbox to claim intent to manufacture information as binding.
- **Import:** Check the 'Import' checkbox to claim the intent to import.
- **Binding:** Check the 'Binding' checkbox to claim intent to import information as binding.

Exhibit 4-8 shows a screen capture of the ‘Additional Submission Information’ screen:

Exhibit 4-8: Additional Submission Information Screen

Navigation: If you are not filing a Joint PMN or Letter of Support submission, click the ‘Next’ button to navigate to the ‘Chemical Identification’ screen. You can also access this screen by clicking the ‘Chemical Identification’ link within the navigation tree. If you are submitting a Joint Submission, click the ‘Next’ button to navigate to the ‘Joint Submitter Information’ screen. You can also navigate to this screen by clicking the ‘Joint Submitter Information’ link within the navigation tree. If you have a Letter of Support pending and are not submitting a joint submission, click the ‘Next’ button to navigate to the ‘Letter of Support Submitter Information’

screen. You can also navigate to this screen by clicking the ‘Letter of Support Submitter Information’ link within the navigation tree.

4.7 Joint Submitter Information

You can access the ‘Joint Submitter Information’ screen by clicking the ‘Next’ button from the ‘Additional Submission Information’ screen. You can also access this screen by clicking the ‘Joint Submitter Information’ link within the navigation tree. Click the ‘Add Joint Submission’ link within the navigation tree to add an additional joint submitter; a maximum of two joint submitters may be listed in a PMN form.

The ‘Joint Submitter Information’ screen is used to enter contact information regarding the joint submitter that will be submitting separate information regarding the PMN form. The joint submitter will be sent the unique identification number by the Primary AO. The provided email address will be used to send the joint submitter the unique identification number.

- **Check here to claim this information as CBI:** Check the ‘Check here to claim this information as CBI’ checkbox to claim the joint submitter contact information as confidential.
- **First Name:** Enter the joint submitter’s first name. This is a required field.
- **Last Name:** Enter the joint submitter’s last name. This is a required field.
- **Position:** Enter the joint submitter’s job title.
- **Company Name:** Enter the joint submitter’s company name. This is a required field.
- **Phone Number:** Enter the joint submitter’s daytime phone number; U.S. or international. This field does not accept dashes. This is a required field.
- **Phone Extension:** Enter the joint submitter’s U.S. phone number extension if applicable.
- **Email Address:** Enter the joint submitter’s email address. The email address must follow the standard email address format: John.Doe@abc.com. This is not a required field, but is suggested for this contact.
- **Mailing Address 1:** Enter the first line of the joint submitter’s mailing address. This is a required field.
- **Mailing Address 2:** Enter the second line of the joint submitter’s mailing address.
- **City:** Enter the city of the joint submitter’s mailing address. This is a required field.
- **State:** Select the state of the joint submitter’s mailing address from the drop-down menu. This is a required field.
- **Postal Code:** Enter the postal code of the joint submitter’s mailing address. This is a required field.
- **Country:** Displays ‘United States.’

Exhibit 4-9 shows a screen capture of the ‘Joint Submitter Information’ screen:

Exhibit 4-9: Joint Submitter Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Joint Submission Information’ screen. You can also access this screen by clicking the ‘Joint Submission Information’ link within the navigation tree.

4.8 Joint Submission Information

You can access the ‘Joint Submission Information’ screen by clicking the ‘Next’ button from the ‘Joint Submitter Information’ screen. You can also access this screen by clicking the ‘Joint Submission Information’ link within the navigation tree.

The ‘Joint Submission Information’ screen is used as a communication point between two companies. The ‘Joint Submission Information’ screen displays fields that capture information that will be passed on to the joint submitter. A text box is used by the Primary AO or Primary

Agent/Consultant to send information to the joint submitter in an unencrypted email. A ‘Unique Identifier for Joint Submissions’ box will also display on this screen. The unique identification number displays when a user declares a joint submission is being established.

Joint Submission Process: When a Primary AO, Primary Agent/Consultant, or Primary Support designates that a joint submission is being filed, you will be asked to enter contact information for a joint submitter. When the Primary AO or Primary Agent/Consultant navigates to the ‘Joint Submission Information’ screen, the Primary AO or Primary Agent/Consultant can choose to send an email to the joint submitter identified on the ‘Joint Submitter Information’ screen. The email will contain the unique identification number that will link the two forms.

When the joint submitter (Secondary AO or Secondary Agent/Consultant) accesses the ‘Section 5 Notices and Supports Forms’ screen and creates a new form, the joint submitter will be prompted to enter the unique identification number on the ‘Create Passphrase’ screen. Once the unique identification number has been entered, the system will link the primary and joint forms. The original notice will not undergo a review process until all forms are received.

- **Joint Submission Information Instructions:** Enter the information that the primary submitter is sending to the joint submitter.
- **Joint Submission Informational Text:** Displays instructional text provided by OPPT, the unique identification number automatically generated for the form, and provides functionality to email the unique identification number to the joint submitter by clicking the ‘Notify the Secondary Submitter of the Joint Submission’ link.
- **Unique Identification Number:** The unique identification number is a random, auto-generated number that must be provided to the joint submitter to create a joint submission.

Exhibit 4-10 shows a screen capture of the ‘Joint Submission Information’ screen:

Exhibit 4-10: Joint Submission Information Screen

Navigation: Click the ‘Notify the Secondary Submitter of the Joint Submission’ link to access the unique identifier notification pop-up window. Click the ‘Next’ button to navigate to the ‘Chemical Identification’ screen if you are not filing a Letter of Support. You can also access this screen by clicking the ‘Add Consolidated Chemical’ link within the navigation tree. Click the ‘Next’ button to navigate to the ‘Letter of Support Submitter Information’ screen if you are submitting a Letter of Support. You can also access this screen by clicking the ‘Letter of Support Submitter Information’ link within the navigation tree. A warning generates on this screen after

clicking the 'Next' or 'Previous' button if you have not sent an email notification to the Joint Submitter.

4.8.1 Notify Joint Submitter of Joint Submission Information

You can access the unique identifier notification window by clicking the 'Notify the Secondary Submitter of the Joint Submission' link from the 'Joint Submission Information' screen.

The unique identifier notification window is used to provide the unique identification number to the joint submitter. The unique identifier notification window displays a 'CC' field for you to add other email addresses to the notification (including the original submitter), a 'To' field, and an 'Additional Comments' text box.

- **Chemical Checkbox (es):** The chemical(s) identified within a form displays on the unique identifier notification pop-up window. Check the checkbox (es) for the chemical(s) identified within the form for which the secondary submitter should provide supporting information.
- **From:** Displays the email address of the user that created the form.
- **CC:** This editable field automatically populates with the email address of the user that created the original form and the email address(es) of the technical contact(s) identified within the form.
- **To:** Contains instructional text for you to enter multiple email addresses. Contains the editable email address of the joint submitter specified on the 'Joint Submitter Information' screen; this email address will be pre-populated upon navigating to the window. Enter any additional email addresses to which the email should be sent.
- **Subject:** Displays 'YYYY Primary PMN.'
- **Message:** Contains a pre-determined message that will display in the email sent to a joint submitter.
- **Additional Comments:** Enter any other additional comments or instructions that should be passed onto the joint submitter.
- **Send:** Click the 'Send' button to generate and send the email to the email addresses identified in the 'CC' and 'To' fields.

Exhibit 4-11 shows a screen capture of the ‘Unique Identifier Notification’ pop-up window:

Exhibit 4-11: Unique Identifier Notification Pop-Up Window

To:

Subject: 2014 Primary PMN

Message: As the Authorized Official of TESTORGCGI1, I have identified you as a Secondary Submitter of a joint submission for this 2014 Premanufacture Notice (PMN) form. Please use the Section 5 Notices and Supports application to provide the correct information for the necessary items in this form. See the instructions below for accessing the Section 5 Notices and Supports application. You will need to use the unique identification number to access and complete the Premanufacture Notice (PMN) form for the joint submission.

Unique Identifier ae7e4637-d900-403a-bb79-11c156366112

Information about the Section 5 programs, how to access the Section 5 Notices and Supports application, and instructions for reporting under the Section 5 rule are available at www.epa.gov/oppt/newchems/. For additional information or if you believe you have received this email in error, please contact me.

Additional Comments:

Send

Navigation: Click the ‘Send’ button to send the email to the joint submitter and navigate back to the ‘Joint Submission Information’ screen. Click the ‘X’ icon in the upper right-hand corner to

exit the screen without sending the email and navigate back to the ‘Joint Submission Information’ screen.

4.9 Letter of Support Submitter Information

Click the ‘Next’ button from the ‘Joint Submission Information’ screen to access the ‘Letter of Support Submitter Information’ screen if a Letter of Support is pending. You can also access this screen by clicking the ‘Letter of Support Submitter Information’ link within the navigation tree. If you are only filing a Letter of Support, click the ‘Next’ button from the ‘Additional Submission Information’ screen to navigate to the ‘Letter of Support Submitter Information’ screen. Click the ‘Add Letter of Support’ link within the navigation tree to add extra Letters of Support.

The ‘Letter of Support Submitter Information’ screen is used to enter contact information for the Letter of Support submitter who will enter separate information for the PMN form. The unique identification number will be sent to the Letter of Support submitter via the email address provided.

An unlimited number of Letters of Support can be identified for each form.

- **Check here to claim this information as CBI:** Check the ‘Check here to claim this information as CBI’ checkbox to claim the Letter of Support submitter contact information as confidential.
- **First Name:** Enter the Letter of Support submitter’s first name. This is a required field.
- **Last Name:** Enter the Letter of Support submitter’s last name. This is a required field.
- **Position:** Enter the Letter of Support submitter’s job title.
- **Company Name:** Enter the Letter of Support submitter’s company name. This is a required field.
- **Phone Number:** Enter the Letter of Support submitter’s daytime phone number; U.S. or international. This field does not accept dashes. This is a required field.
- **Phone Extension:** Enter the Letter of Support submitter’s phone number extension if applicable.
- **Email Address:** Enter the Letter of Support submitter’s email address. The email address must follow the standard email address format: John.Doe@abc.com. This is not a required field, but is suggested for this contact.
- **Mailing Address 1:** Enter the first line of the Letter of Support submitter’s mailing address. This is a required field.
- **Mailing Address 2:** Enter the second line of the Letter of Support submitter’s mailing address.
- **City:** Enter the city of the Letter of Support submitter’s mailing address. This is a required field.
- **State:** Select the state of the Letter of Support submitter’s mailing address from the drop-down menu. This is a required field if ‘United States’ is selected from the ‘Country’ drop-down menu.

- **Postal Code:** Enter the postal code of the Letter of Support submitter’s mailing address. This is a required field if the ‘Country’ field is set to ‘United States.’
- **Country:** Select the country of the Letter of Support submitter’s mailing address from the drop-down menu. This is a required field.

Exhibit 4-12 shows a screen capture of the ‘Letter of Support Submitter Information’ screen:

Exhibit 4-12: Letter of Support Submitter Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Letter of Support Submission Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submission Information’ link within the navigation tree.

4.10 Letter of Support Submission Information

You can navigate to the ‘Letter of Support Submission Information’ screen by clicking the ‘Next’ button from the ‘Letter of Support Submitter Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submission Information’ link within the navigation tree.

The 'Letter of Support Submission Information' screen is used as a communication point between two companies. The 'Letter of Support Submission Information' screen displays fields that capture information to pass onto the Letter of Support submitter. A text box is used to send information to the Letter of Support submitter in an email sent by the Primary AO. A 'Unique Identifier for Letter of Support Submissions' box will also display on this screen. The unique identification number generates when you declare a Letter of Support is being established.

Letter of Support Submission Process: When you designate that a Letter of Support is pending, you will be asked to enter all the information within the 'Letter of Support' folder.

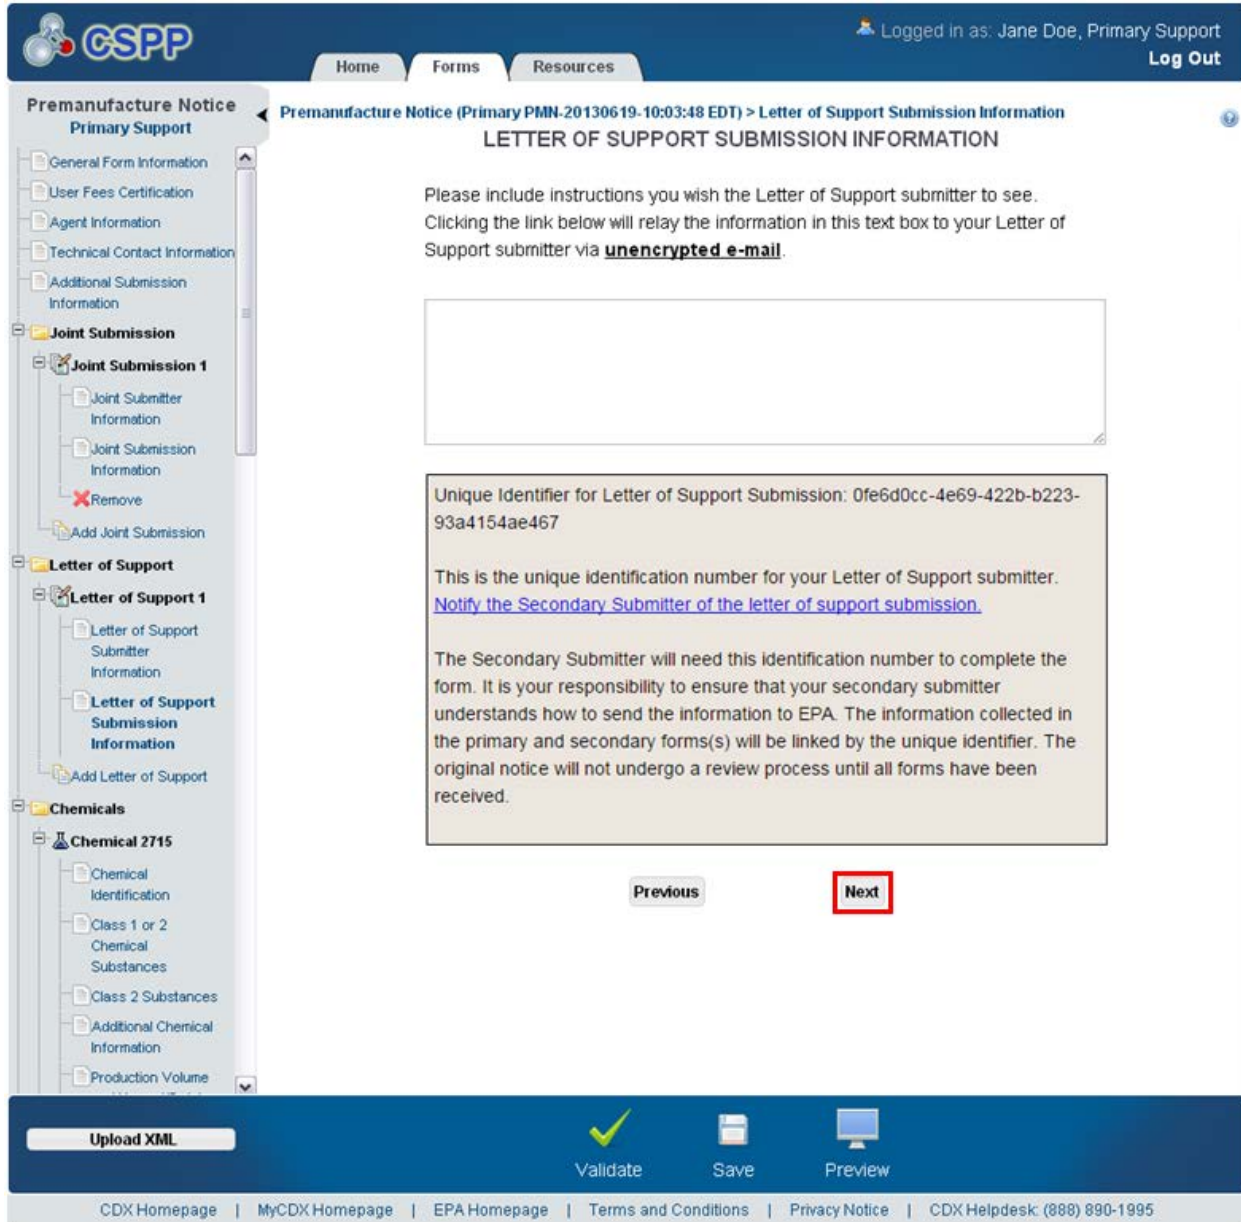

When the primary submitter chooses to, the system will send an email to the Letter of Support submitter designated on the 'Letter of Support Submitter Information' screen. The email will contain the unique identification number that will link the two forms.

When the Letter of Support submitter accesses the 'Section 5 Notices and Supports Forms' screen and clicks the 'Start New Form' button, the Letter of Support submitter will be prompted to enter the unique identification number on the 'Create Passphrase' screen. Once the unique identification number has been entered, the system will link the primary form and Letters of Support. Click the 'Add Letter of Support' link within the navigation tree to add extra Letters of Support as needed.

- **Letter of Support Submission Information Instructions:** Enter the information that the primary submitter is sending to the Letter of Support submitter.
- **Letter of Support Submission Informational Text:** Displays instructional text provided by EPA, the unique identification number generated for the form, and provides functionality to email the unique identification number to the Letter of Support submitter by clicking the 'Notify the Secondary Submitter of the letter of support submission' link.
- **Unique Identification Number:** The unique identification number is a random number auto-generated to pass on to the Letter of Support submitter to create a Letter of Support.

Exhibit 4-13 shows a screen capture of the ‘Letter of Support Submission Information’ screen:

Exhibit 4-13: Letter of Support Submission Information Screen

Navigation: Click the ‘Notify the Secondary Submitter of the letter of support submission’ link to navigate to the unique identifier notification window. Click the ‘Add Letter of Support’ link to file two or more Letters of Support. Click the ‘Next’ button to navigate to the ‘Letter of Support Submitter Information’ screen if additional Letters of Support are identified. A warning generates on this screen after clicking the ‘Next’ or ‘Previous’ button (which may be present depending on the presence of multiple Letters of Support) if you have not sent an email notification to the Letter of Support submitter.

4.10.1 Notify Secondary Submitter of Letter of Support Information

You can access the unique identifier notification window by clicking the ‘Notify the Secondary Submitter of the letter of support submission’ link from the ‘Letter of Support Submission Information’ screen.

The unique identifier notification window is used to notify the Letter of Support submitter of the unique identification number. The unique identifier notification window displays a ‘CC’ field for you to add other email addresses to the notification (including the original submitter), a ‘To’ field, and an ‘Additional Comments’ text box.

- **Chemical Checkbox(es):** The chemical(s) identified within a form displays on the unique identifier notification pop-up window. Check the checkbox(es) for the chemical(s) identified within the form for which the secondary submitter should provide supporting information.
- **From:** Displays the email address of the logged in user that created the form.
- **CC:** This field automatically populates with the email address of the logged in user that created the form and the email address (es) of the technical contact(s).
- **To:** This field contains instructional text for you to enter multiple email addresses. Contains the editable email address of the Letter of Support submitter specified on the ‘Letter of Support Submitter’ screen; this field is pre-populated with an email address upon navigating to the unique identifier notification window.
- **Subject:** Displays ‘YYYY Primary PMN.’
- **Message:** Displays a pre-determined message in the email sent to a Letter of Support submitter.
- **Additional Comments:** Enter any other additional comments or instructions to pass onto the Letter of Support submitter.
- **Send:** Click the ‘Send’ button to generate and send the email to the email addresses identified in the ‘CC’ and ‘To’ fields.

Exhibit 4-14 shows a screen capture of the ‘Unique Identifier Notification’ pop-up window:

Exhibit 4-14: Unique Identifier Notification Pop-Up Window

Select the chemicals you want to notify the Secondary Submitter with:

From: Jane.Doe@test.com

CC:

To:

Subject: 2014 Primary PMN

Message: As the Authorized Official of TESTORGCGI1, I have identified you as a Secondary Submitter of a letter of support submission for this 2014 Premanufacture Notice (PMN) form. Please use the Section 5 Notices and Supports application to provide the correct information for the necessary items in this form. See the instructions below for accessing the Section 5 Notices and Supports application. You will need to use the unique identification number to access and complete the Premanufacture Notice (PMN) form for the letter of support submission.
Unique Identifier f6630013-d64c-4c17-90f7-8000e4af3899

Information about the Section 5 programs, how to access the Section 5 Notices and Supports application, and instructions for reporting under the Section 5 rule are available at www.epa.gov/oppt/newchems/. For additional information or if you believe you have received this email in error, please contact me.

Additional Comments:

Send

Navigation: Click the ‘Send’ button to send the email to the Letter of Support Submitter and navigate back to the ‘Letter of Support Submission Information’ screen. Click the ‘X’ icon to exit the screen without sending the email and navigate back to the ‘Letter of Support Submission Information’ screen.

4.11 Chemical Identification

You can navigate to the 'Chemical Identification' screen by clicking the 'Next' button from the 'Additional Submission Information' screen if you have not identified a joint submitter and/or Letter of Support submitter. You can access this screen by clicking the 'Next' button from the 'Joint Submission Information' screen if you have identified a joint submitter. You can navigate to this screen by clicking the 'Next' button from the 'Letter of Support Submission Information' screen if you have identified a Letter of Support submitter. You can also navigate to this screen by clicking the 'Add Consolidated Chemical' link within the navigation tree.

The 'Chemical Identification' screen identifies the type of chemical the submitter will be entering into the application. You will be able to file a PMN form for a class 1 or 2 chemical substance or a polymer. Based on your selection, the appropriate screens for the respective chemical will appear. If you select the 'Class 1 or 2 Chemical Substance' radio button, click the 'Save' icon () within the bottom action bar, or click the 'Next' button to generate the 'Class 1 or 2 Chemical Substances' screen within the navigation tree. If you identify the chemical as a polymer by selecting the 'Polymer' radio button, click the 'Save' icon () within the bottom action bar, or click the 'Next' button to generate the 'Polymer Identification Information' screen and the 'Monomers and Other Reactants' screen within the navigation tree.

This screen provides a field to identify an alias for the chemical substance, and allows you to identify chemicals in a consolidated chemical submission. The chemical alias is required if a Joint Submission or Letter of Support is being filed and renames the chemical folder within the navigation tree.

- **Class 1 or 2 Chemical Substance:** Select the 'Class 1 or 2 Chemical Substance' radio button to indicate that the chemical is a class 1 or 2 substance. If you select the 'Polymer' radio button after initially selecting the 'Class 1 or 2 Chemical Substance' radio button, the application generates a confirmation message warning you that you will lose all data for this chemical if the chemical type changes. Selecting either the 'Class 1 or 2 Chemical Substance' or 'Polymer' radio button is required.
- **Polymer:** Select the 'Polymer' radio button to indicate that the chemical is a polymer. If you select the 'Class 1 or 2 Chemical Substance' radio button after initially selecting the 'Polymer' radio button, the application generates a confirmation message warning you that you will lose all data for this chemical if the chemical type changes. Selecting either the 'Class 1 or 2 Chemical Substance' or 'Polymer' radio button is required.
- **Chemical Alias:** Enter the chemical alias to associate with a chemical. This field will auto-generate a chemical alias in the navigation tree upon leaving the screen if this field is left blank. This field is required if the form is pending a Joint Submission or a Letter of Support.

Exhibit 4-15 shows a screen capture of the ‘Chemical Identification’ screen:

Premanufacture Notice Primary Support

Premanufacture Notice (Primary PMN-20130619-10:03:48 EDT) > Chemical Identification

CHEMICAL IDENTIFICATION

Chemical Type
Complete either item 1 (Class 1 or 2 chemical substances, PMN page 4/4a) or item 2 (Polymers, PMN Page 5/5a) as appropriate. Indicate which selection you intend to complete below.

Class 1 or 2 Chemical Substance
Polymer

Chemical Alias:

Chemical report folder alias is an optional field that changes the folder name in the navigation tree on the left. The chemical report folder alias is required if a joint submission and/or letter of support is being filed. Its purpose is to make it easier to distinguish between chemical folders when there is more than one and for joint and/or letter of support submitters to refer to when they supply information for that chemical.

*To add a consolidated chemical, please click the 'Add Consolidated Chemical' link within the navigation tree after you have selected 'Class 1 or 2 Chemical Substance' or 'Polymer' above and then selected 'Next' below.

CDX Homepage | MyCDX Homepage | EPA Homepage | Terms and Conditions | Privacy Notice | CDX Helpdesk: (888) 890-1995

Navigation: If you selected the ‘Class 1 or 2 Chemical Substance’ radio button, click the ‘Next’ button to navigate to the ‘Class 1 or 2 Chemical Substances’ screen. You can also access this screen by clicking the ‘Class 1 or 2 Chemical Substances’ link within the navigation tree.

If you selected the ‘Polymer’ radio button, click the ‘Next’ button to navigate to the ‘Polymer Identification Information’ screen. You can also access this screen by clicking the ‘Polymer Identification Information’ link within the navigation tree.

4.12 Class 1 or 2 Chemical Substances

You can access this screen if you selected the ‘Class 1 or 2 Chemical Substance’ radio button on the ‘Chemical Identification’ screen and clicked the ‘Next’ button. You can also access this screen by clicking the ‘Class 1 or 2 Chemical Substances’ link within the navigation tree.

The ‘Class 1 or 2 Chemical Substances’ screen provides fields for you to enter information describing the chemical for which the PMN is to be filed. This screen will outline the unique chemical properties that show the name, composition, and structure of the chemical. The system provides fields for you to identify several key aspects concerning a chemical’s identity.

For a single component submission, create the field set by clicking the ‘Add New Chemical’ button. Upon clicking the ‘Add New Chemical’ button, the application generates an expandable/collapsible field set containing numerous fields for you to enter information pertaining to that particular chemical.

For a multi-component submission, create another field set by clicking the ‘Add New Chemical’ button. Multi-component chemical submissions occur when two or more chemicals are always generated together in a single pot and are never isolated. Upon clicking the ‘Add New Chemical’ button, the application generates a field set containing numerous fields for you to enter information pertaining to that particular chemical. Enter additional chemical components, each with unique identifying information, by clicking the ‘Add New Chemical’ button for each additional chemical that is part of the multi-component mixture. All multi-component chemicals will reside in one chemical folder in the navigation tree. Duplicate chemicals are not allowed within a multi-component submission.

For a consolidated submission, create and identify chemicals in separate chemical folders by clicking the ‘Add Consolidated Chemical’ link within the navigation tree.

If you select the ‘Class 1’ radio button on the ‘Class 1 or 2 Chemical Substances’ screen, click the ‘Next’ button to navigate to the ‘Additional Chemical Information’ screen. If you select the ‘Class 2’ radio button on the ‘Class 1 or 2 Chemical Substances’ screen, click the ‘Next’ button to navigate to the ‘Class 2 Substances’ screen.

For a class 1 substance chemical structure diagram, provide a complete and correct chemical structure diagram. A class 1 structural diagram should clearly and completely indicate the identity of the atoms and the nature and location of the bonds joining the atoms. Provide ionic charges and known stereo chemical details. Carbon atoms in ring systems do not need to be explicitly shown.

For a class 2 substance chemical structure diagram:

- 1) List the immediate precursor substances with their respective CASRN.
- 2) Describe the nature of the reaction or process.
- 3) Indicate the range of composition and the typical composition (where appropriate).
- 4) Provide a correct representative or partial chemical structure diagram, as complete as can be known, if one can be reasonably ascertained.

Provide partial, complete, or representative structural diagrams to the extent possible. The diagram should indicate the characteristic or variable compositional structural components of the substance. If you are unsure of the exact structure, provide the best information you have and indicate that it is your best estimate of the chemical structure.

- **Add New Chemical:** Click the button to generate the class 1 or 2 chemical substances expandable/collapsible field set.
- **Cancel:** Click the ‘Cancel’ link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and to remove a field set. The ‘Cancel’ link displays when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.

- **Edit:** Click the 'Edit' link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The 'Edit' link displays when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the 'Delete' icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion.
- **Expand All:** Click the link located at the upper-right of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the link located at the upper-right of the expandable/collapsible field sets to collapse a series of field sets.
- **B.1.a. Class of Substance:** In section B.1.a., select the 'Class 1' or 'Class 2' radio button to identify whether a 'Class 1' or 'Class 2' chemical substance is being reported. Selecting the 'Class 2' chemical substance radio button indicates that some portions of the structure may not be known and a 'Class 2 Substances' screen will appear within the navigation tree after clicking the 'Next' button for you to enter information concerning how the chemical was created. If multiple 'Class 2' chemical components are added, only one 'Class 2 Substances' screen will generate that applies to all the components. You may claim the chemical substance class as confidential by checking the 'CBI' checkbox. Either the 'Class 1' or 'Class 2' radio button must be selected.
- **Class 1:** Select the 'Class 1' radio button to identify the chemical as a 'Class 1' substance. A 'Class 1' substance is a single molecular entity that can be represented by a single, definite structural diagram. Either the 'Class 1' or the 'Class 2' radio button in the 'B.1.a. Class of Substance' section is required.
- **Class 2:** Select the 'Class 2' radio button to identify the chemical as a 'Class 2' substance. A 'Class 2' substance is a substance whose composition cannot be represented by a single, definite chemical structural diagram. Class 2 substances include substances of unknown, variable, or uncertain composition, complex mixtures or reaction products, or well-defined substances without specific structures. Either the 'Class 1' or the 'Class 2' radio button in the 'B.1.a. Class of Substance' section is required.
- **CBI:** Check the 'CBI' checkbox to claim the 'Class of Substance' as confidential.
- **Search SRS:** Click the 'Search SRS' button to generate the 'Search Substance Registry Services' pop-up window. Refer to **Section 3.8** for further details regarding the search SRS functionality.
- **CASRN:** Displays the CASRN of the chemical identified on the 'Search Substance Registry Services' pop-up window, if applicable.
- **Chemical Name:** Displays the chemical name of the chemical identified on the 'Search Substance Registry Services' pop-up window. For class 1 substances, a 'Chemical Abstracts (CA) Index Name' must be provided. For class 2 substances either a 'CA Index Name' or 'CA Preferred Name' must be provided, whichever is appropriate based on current CA nomenclature rules and conventions. This is a required field.
- **CBI:** Check the 'CBI' checkbox to claim the 'Chemical Name' field as confidential; this generates the 'Generic Chemical Name' field.

- **B.6. Generic Chemical Name:** Enter the generic name to associate with a chemical. This field only displays when 'CASRN' and 'Chemical Name' are marked as 'CBI.' This is a required field when displayed.
- **Method 1 (CAS Inventory Expert Service):** Select the 'Method 1 (CAS Inventory Expert Service)' radio button to identify the ID method as the CAS Inventory Expert Service (IES) method and generate the 'IES Order #' field. A copy of the identification report obtained from the CAS Inventory Expert Services must be submitted as an attachment to this notice; an IES report is required. For a consolidated submission, each chemical must be 'Method 1' except when the submission is pending a Letter of Support for that chemical. In the case of an LVE/LOREX modification form type, this 'Method 1' requirement is not applicable. A single response option in the 'B.1.c. ID Method' section is required.
- **Method 2 (Other Method):** Select the 'Method 2 (Other Method)' radio button to identify the ID method as 'Other Method.' An alternative method of providing a name, such as a Scientific and Technical Information Network (STN) database report or a CAS Client Services report, qualifies as 'Method 2.' The chemical can be 'Method 2' if the consolidated submission is pending a Letter of Support. A single response option in the 'B.1.c. ID Method' section is required.
- **IES Order #:** Enter the IES order number of the report. This field only displays when the 'Method 1 (CAS Inventory Expert Service)' radio button is selected. This is a required field.
- **B.1.d. Molecular Formula:** Enter the molecular formula associated with a chemical. The molecular formula must give the correct identity and number of atoms of each element contained in the PMN molecule or a description if the substance is a class 2 material. The system will not allow subscripts and superscripts to be used. This is a required field.
- **CBI:** Check the 'CBI' checkbox to claim the 'Molecular Formula' data as confidential.
- **Attachments:** Select the section of the page the file is associated with that you intend to attach from the drop-down menu. This drop-down menu contains the following values: 'Chemical Structure Diagram' and 'ID Method.' This is a required field to upload an attachment.
- **Attach Document:** Click the 'Attach Document' button to generate the 'Attach Documents' pop-up window. Refer to **Section 3.7** for further details regarding the attach document functionality.
- **Section:** Displays the section associated with a document.
- **File Name:** Displays the file name and file extension of the file that is uploaded on the 'Attach Documents' pop-up window.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon (✖) to delete the entire document row permanently from the system; a warning message displays to confirm the deletion of the document.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the 'Save' icon (💾) located within the bottom

action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the ‘Previous’ and ‘Next’ buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.

Exhibit 4-16 shows a screen capture of the ‘Class 1 or 2 Chemical Substances’ screen (Scroll 1):

Exhibit 4-16: Class 1 or 2 Chemical Substances Screen (Scroll 1)

The screenshot displays the GSPPP (Global Submission and Processing Platform) interface. At the top, the user is logged in as Jane Doe, Primary Support. The main navigation bar includes 'Home', 'Forms', and 'Resources'. The left sidebar shows a tree view of the submission process, with 'Class 1 or 2 Chemical Substances' selected under the 'Chemicals' section.

The main content area is titled 'CLASS 1 OR 2 CHEMICAL SUBSTANCES'. It contains the following form elements:

- B.1.a. Class of Substance:** Radio buttons for 'Class 1' and 'Class 2', and a checkbox for 'CBI'.
- Search SRS:** A button to search EPA's Substance Registry Services (SRS) for the desired chemical.
- CASRN:** A text input field.
- Chemical Name:** A text input field.
- CBI:** A checked checkbox.
- B.6. Generic Chemical Name:** A large text area for input.
- B.1.c. ID Method:** Radio buttons for 'Method 1 (CAS Inventory Expert Service)' (selected) and 'Method 2 (Other Method)'. Below this is an 'IES Order #' input field and a note to include an attachment for the ID Method (optional).
- B.1.d. Molecular Formula:** A text input field and a 'CBI' checkbox.
- B.1.e. Chemical Structure Diagram:** A note to include an attachment for the chemical structure diagram.
- Choose a section to attach a document:** A dropdown menu.

At the bottom of the screen, there is an action bar with the following buttons: 'Upload XML', 'Validate' (with a green checkmark icon), 'Save' (with a floppy disk icon), and 'Preview' (with a monitor icon). The footer contains links to CDX, MyCDX, EPA, Terms and Conditions, Privacy Notice, and CDX Helpdesk (888) 890-1995.

CDX Home | MyCDX Home | EPA Home | Terms and Conditions | Privacy Notice | CDX Helpdesk: (888) 890-1995

Navigation: If you select the ‘Class 1’ radio button, click the ‘Next’ button to navigate to the ‘Additional Chemical Information’ screen. You can also access this screen by clicking the ‘Additional Chemical Information’ link within the navigation tree. If you select the ‘Class 2’ radio button, click the ‘Next’ button to navigate to the ‘Class 2 Substances’ screen. You can also access this screen by clicking the ‘Class 2 Substances’ link within the navigation tree.

4.13 Class 2 Substances

You can navigate to the ‘Class 2 Substances’ screen by clicking the ‘Next’ button from the ‘Class 1 or 2 Chemical Substances’ screen when you select the ‘Class 2’ radio button for the

'Class of Substance' field. You can also access this screen by clicking the 'Class 2 Substances' link within the navigation tree.

The 'Class 2 Substances' screen captures information regarding a class 2 chemical substance. A class 2 chemical substance is a substance that may not have a defined chemical structure that has been identified. This screen provides fields to identify specific elements in the creation of the chemical using the following fields: 'Precursor Substances,' 'Nature of Reaction,' and 'Range of Composition.'

Enter precursor substances by searching SRS or using manual entry when the substance is not in SRS. The selected substances will display in a table listing the 'Chemical Name' and 'CASRN.'

The system provides fields to capture 'Nature of Reaction' and 'Range of Composition' in text boxes. The 'Nature of Reaction' and 'Range of Composition' text fields can be claimed as CBI.

- **B.1.e.1. Precursor Substances:** This table captures the chemicals identified as immediate precursor substances, along with the respective CASRNs, if applicable.
- **CBI:** Check the 'CBI' checkbox to claim the precursor substances information as confidential.
- **Search SRS:** Click the 'Search SRS' button to generate the 'Search Substance Registry Services' pop-up window. Refer to **Section 3.8** for further details regarding the search SRS functionality.
- **Chemical Name:** Displays the chemical name associated with a precursor substance. Click the chemical name link to generate the 'Search SRS' pop-up window to make edits.
- **CASRN:** Displays the CASRN, if applicable, associated with a precursor substance.
- **Actions:** Click the 'Delete' icon (✖) to delete the entire chemical row permanently from the system; a warning message displays to confirm the deletion of the chemical.
- **B.1.e.2. Nature of Reaction:** Enter the nature of the reaction or process description.
- **CBI:** Check the 'CBI' checkbox to claim the nature of reaction information as confidential.
- **B.1.e.3. Range of Composition:** Enter the range of composition and the typical composition description. Provide the range of composition in weight percent for each specific component or class of components that you intend to manufacture for commercial purposes.
- **CBI:** Check the 'CBI' checkbox to claim the range of composition information as confidential.
- **Attachments:** Select the section of the page the document you intend to attach is associated with from the drop-down menu. This drop-down menu contains the following values: 'B.1.e.1. Precursor Substances,' 'B.1.e.2. Nature of Reaction,' and 'B.1.e.3. Range of Composition.' This is a required field.
- **Attach Document:** Click the 'Attach Document' button to generate the 'Attach Documents' pop-up window and initiate the document upload process. Refer to **Section 3.9** for further details regarding the attach document functionality.
- **Section:** Displays the section associated with a document.
- **File Name:** Displays the file name and file extension of a file that is uploaded on the 'Attach Documents' window.

- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon (✖) to delete the entire document row permanently from the system; a warning message displays to confirm the deletion.

Exhibit 4-18 shows a screen capture of the ‘Class 2 Substances’ screen (Scroll 1):

Exhibit 4-18: Class 2 Substances Screen (Scroll 1)

The screenshot displays the 'Class 2 Substances' screen within the CDX system. The top navigation bar includes 'Home', 'Forms', and 'Resources' tabs, and a user profile for 'Jane Doe, Primary Support' with a 'Log Out' button. The left sidebar shows a tree view of the application's structure, with 'Class 2 Substances' selected under the 'Chemicals' category. The main content area is titled 'CLASS 2 SUBSTANCES' and contains the following sections:

- Class 2 Substance Details:** A text area for providing details about the substance, including precursor substances, reaction nature, and composition range.
- B.1.e.1. Precursor Substances:** A section with a CBI checkbox and a 'Search SRS' button for finding precursor substances in the EPA's Substance Registry Services (SRS).
- B.1.e.2. Nature of Reaction:** A section with a CBI checkbox and a large text input area for describing the reaction.
- B.1.e.3. Range of Composition:** A section with a CBI checkbox and a large text input area for describing the composition range.
- Attachments:** A section for managing document attachments.

At the bottom of the screen, there is a dark blue bar with buttons for 'Upload XML', 'Validate' (with a green checkmark icon), 'Save' (with a floppy disk icon), and 'Preview' (with a monitor icon). The footer contains links to 'CDX Homepage', 'MyCDX Homepage', 'EPA Homepage', 'Terms and Conditions', 'Privacy Notice', and 'CDX Helpdesk: (888) 890-1995'.

Exhibit 4-19 shows a screen capture of the ‘Class 2 Substances’ screen (Scroll 2):

Exhibit 4-19: Class 2 Substances Screen (Scroll 2)

The screenshot displays the CDX interface for Class 2 Substances. At the top, the user is logged in as Jane Doe, Primary Support. The navigation menu on the left includes sections for Premanufacture Notice, Joint Submission, Letter of Support, and Chemicals. The main content area shows a table with columns for Chemical Name, CASRN, and Actions. Below the table, there are form fields for 'B.1.e.2. Nature of Reaction' and 'B.1.e.3. Range of Composition', each with a CBI checkbox. An Attachments section allows users to select a section and attach a file. At the bottom, there are buttons for 'Previous' and 'Next', with 'Next' highlighted in a red box. The footer contains an 'Upload XML' button and icons for 'Validate', 'Save', and 'Preview'.

Navigation: Click the ‘Next’ button to navigate to the ‘Additional Chemical Information’ screen. You can also access this screen by clicking the ‘Additional Chemical Information’ link within the navigation tree.

4.14 Additional Chemical Information

You can navigate to the ‘Additional Chemical Information’ screen by selecting the ‘Class 1’ radio button on the ‘Class 1 or 2 Chemical Substances’ screen and clicking the ‘Next’ button, by

clicking the 'Next' button on the 'Class 2 Substances' screen, or clicking the 'Next' button from the 'Monomers and Other Reactants' screen. You can also access this screen by clicking the 'Additional Chemical Information' link within the navigation tree.

The 'Additional Chemical Information' screen captures information regarding the chemicals produced as byproducts and impurities when a chemical is manufactured. This screen also captures other names for the chemical at hand in the 'Synonyms' and 'Trade Identification' tables.

An 'Impurities' table displays information regarding the impurities that may be reasonably anticipated to be in the respective chemical or polymer as manufactured for commercial purpose. Click the 'Search SRS' button to access the 'Search SRS' pop-up window and populate the 'Impurities' table. You will also be able to enter a chemical using the 'Chemical Name' and 'CASRN' field (if applicable) on the 'Chemical Not Found In Substance Registry Services' pop-up window. If there are unidentified impurities, enter "unidentified." You also have the option of claiming the chemical as confidential by checking the 'CBI' checkbox. A 'Maximum %' field is also displayed which captures the maximum percentage for the impurity. Documents may be attached for the 'Impurities' section if necessary.

A 'Byproducts' table provides fields to capture information regarding the byproducts that may be produced from the manufacture of the respective chemical or polymer. Click the 'Search SRS' button to access the 'Search SRS' pop-up window and populate the 'Byproducts' table. You may associate a CASRN with a byproduct (if applicable) and check the 'CBI' checkbox to claim a byproduct as confidential. Documents may be attached for the 'Byproducts' section if necessary.

A 'Synonyms' table provides fields to capture the synonyms that the respective chemical or polymer may be referred to in the documentation. A maximum of five synonyms can be entered in the table. The search SRS functionality cannot be used to populate the 'Synonyms' table. You may attach documents associated with the 'Synonyms' section to provide additional synonyms if necessary.

A 'Trade Identification' table provides fields to capture information about the trade names by which the respective chemical or polymer may be referred in documentation. There is no limit to the number of trade names that may be added. You may attach documents associated with the 'Trade Identification' section to provide additional information if necessary.

The 'Attach Documents' pop-up window provides fields to upload documents related to the 'Impurities,' 'Byproducts,' 'Synonyms,' and/or 'Trade Identification' section(s). Select the section of the page the document is associated with from the 'Section' drop-down menu, and click the 'Attach Document' button to generate the 'Attach Documents' pop-up window and attach a document. The system provides a 'CBI' checkbox to claim the uploaded document as confidential. If you claim a document as CBI, the system requires you to upload the sanitized version of the attached document.

If the sanitized version of the document is not provided, the Section 5 Notices and Supports form will fail validation upon navigating away from the 'Attach Documents' window. To view or edit previously attached documents, click the appropriate file name of the document within the 'File Name' column of the attachments table.

The attachments table displays the section of the page the document is associated with, the file name and file extension of the document, the document description, the number of pages in the document, and if the document was claimed CBI. Click the 'Delete' icon (✘) located under the 'Actions' column to delete unwanted documents. Click a file name link in the 'File Name' column to generate the 'Attach Documents' pop-up window to view and/or edit an attached document.

- **B.3 Impurities - Search SRS:** Click the 'Search SRS' button to display the 'Search Substance Registry Services' pop-up window. Refer to **Section 3.8** for further details regarding the search SRS functionality.
- **Impurity:** Displays the name of the impurity. An impurity is a chemical substance that you did not intend to be present with your PMN substance. List all known impurities that are present, regardless of their weight percent. List the expected maximum percentage of each impurity and indicate its confidentiality status. An impurity may be suggestive of chemical precursors or chemical processes. Click the 'Impurity' link to navigate to the 'Search Substance Registry Services' pop-up window to edit chemical information for an impurity.
- **CASRN:** Displays the Chemical Abstracts Service Registry Number for the impurity (if applicable).
- **Maximum %:** Displays the maximum percentage for the impurity; decimal values are accepted.
- **CBI:** Indicates the CBI status of the impurity by displaying either a 'Y' or an 'N.'
- **Action:** Click the 'Delete' icon (✘) to delete the entire impurity entry permanently from the system; a warning message displays to confirm the deletion.
- **B.7. Byproducts - Search SRS:** Click the 'Search SRS' button to generate the 'Search Substance Registry Services' pop-up window. Refer to **Section 3.8** for further details regarding the search SRS functionality.
- **Byproduct Name:** Displays the name of the byproduct. Describe any byproducts resulting from the manufacture, processing, use, or disposal of the new chemical substance. List any byproducts that you reasonably anticipate will result from the manufacture, processing, use and disposal of the new chemical substance at sites under your control. Click the 'Byproduct Name' link to generate the 'Search Substance Registry Services' pop-up window to view and/or edit byproduct information. Provide the specific chemical name, CAS numbers if they can be determined, and the confidential status of the byproducts formed. If no byproducts are formed, enter "None" or leave the section blank.
- **CASRN:** Displays the CASRN for the byproduct (if applicable).
- **CBI:** Indicates the CBI status of the byproduct by displaying either a 'Y' or an 'N.'
- **Action:** Click the 'Delete' icon (✘) to delete the entire byproduct entry permanently from the system; a warning message displays to confirm the deletion.
- **B.4. Synonyms - CBI:** Check the 'CBI' checkbox to claim the 'Synonym' field set as confidential.
- **Synonym:** Enter the synonym of the chemical; there is a maximum of five chemical synonyms that can be added in the 'Synonyms' table. Additional synonyms can be provided in an attachment. Synonyms include common chemical names used in scientific or technical

literature, and code numbers or code names referenced in the PMN and its attachments. Indicate which synonyms may be proprietary and require CBI protection. Chemical name synonyms must be consistent with the chemical structure and thus not misleading. If you add a blank, editable line in this table and click the 'Next' button, no error will display indicating that the blank line should be saved or deleted. If text is entered in a blank field and you click the 'Next' button, the application will save the entered value. If you click the 'Form' icon (📄), edit the entered values and click the 'Next' button without saving the changed value, an error will generate.

- **Actions:** Click the 'Add' icon (+) to add a new text field to enter additional synonyms. Click the 'Save' icon (💾) to save a chemical synonym. Click the 'Form' icon (📄) that appears after saving to edit a chemical synonym. Click the 'Delete' icon (✖) to delete a previously added chemical synonym. To cancel changes to a field, simply clear the data entered in the field.
- **B.5. Trade Identification – CBI:** Check the 'CBI' checkbox to claim the trade identification section as confidential.
- **Trade name:** Enter the trade identification name. List any trade name that is used, or will be used, for the neat chemical substance, whether or not they are registered brands/trademarks. There is no limit to the number of trade names that can be added. Indicate the CBI status of trade names. If you add a blank, editable line in this table and click the 'Next' button, no error will display indicating that the blank line should be saved or deleted. If text is entered in a blank field and you click the 'Next' button, the application will save the entered value. If you click the 'Form' icon (📄), change the entered value(s) and click the 'Next' button without saving the changed value(s), an error message will generate.
- **Actions:** Click the 'Add' icon (+) to add a new text field to enter additional trade identification names. Click the 'Save' icon (💾) to save a chemical synonym. Click the 'Form' icon (📄) to edit a chemical synonym. Click the 'Delete' icon (✖) to delete a previously added trade identification name.
- **Attachments:** Select the section of the page with which the document is associated from the drop-down menu. This drop-down menu contains the following values: 'Byproducts Section,' 'Impurities Section,' 'Synonyms Section,' and 'Trade Identification Section.'
- **Attach Document:** Click the 'Attach Document' button to display the 'Attach Documents' pop-up window. Refer to **Section 3.7** for further details regarding the attach document functionality.
- **Section:** Displays the section of the page with which the document is associated.
- **File Name:** Displays the file name and file extension of the file that is uploaded on the 'Attach Documents' pop-up window.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm deletion of the document.

Navigation: Click the ‘Next’ button to navigate to the ‘Production Volume and Hazard/Safety Information’ screen. You can also access this screen by clicking the ‘Production Volume and Hazard/Safety Information’ link within the navigation tree.

4.15 Polymer Identification Information

You can access the ‘Polymer Identification Information’ screen by clicking the ‘Next’ button from the ‘Chemical Identification’ screen if you select the ‘Polymer’ radio button. You can also access this screen by clicking the ‘Polymer Identification Information’ link within the navigation tree after selecting the ‘Polymer’ radio button on the ‘Chemical Identification’ screen.

The ‘Polymer Identification Information’ screen captures information describing the polymer(s) for which the PMN will be filed. This screen outlines the unique chemical properties that show the name, composition, and structure of the polymer. The system will provide fields for you to identify several key aspects concerning a polymer’s identity.

To reference a monomer cleared with an LVE, comments should be included in an attachment (for example, on a reaction scheme).

Click the ‘Add New Chemical’ button to create a chemical field set. Upon clicking the ‘Add New Chemical’ button, an expandable/collapsible field set generates that contains numerous fields that pertain to the particular polymer. You are able to enter multiple chemical substances, each with unique information, by clicking the ‘Add New Chemical’ button for each chemical you wish to identify.

For a single component submission, create the field set by clicking the ‘Add New Chemical’ button. Upon clicking the ‘Add New Chemical’ button, the application generates a field set containing numerous fields that captures information pertaining to that particular chemical.

For a multi-component submission, click the ‘Add New Chemical’ button to create a field set. Multi-component chemical submissions occur when two or more chemicals always generate together in a single pot and are never isolated. Upon clicking the ‘Add New Chemical’ button, the application generates a field set that provides numerous fields to enter information pertaining to that particular chemical. Enter additional chemical substances, each with unique identifying information, by clicking the ‘Add New Chemical’ button for each additional chemical that is part of the multi-component mixture. All multi-component chemicals will reside in one chemical folder in the navigation tree.

For a consolidated submission, create separate chemical folders by clicking the ‘Add Consolidated Chemical’ link within the navigation tree. A form may contain a maximum of six (6) separate chemical folders.

- **Add New Chemical:** Click the ‘Add New Chemical’ button to generate a polymer identification information expandable/collapsible field set.
- **Cancel:** Click the ‘Cancel’ link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and to remove a field set. The ‘Cancel’ link displays when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the ‘Edit’ link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The ‘Edit’ link displays when the expandable/collapsible field set has been saved and the data is not currently editable.

- **Delete:** Click the ‘Delete’ icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set; a confirmation message displays to confirm the deletion.
- **Expand All:** Click the link located at the upper-right of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the link located at the upper-right of the expandable/collapsible field sets to collapse a series of field sets.
- **Search SRS:** Click the button to generate the ‘Search SRS’ pop-up window. Refer to **Section 3.8** for additional details regarding the search SRS functionality.
- **CASRN:** Displays the CASRN of the chemical identified on the ‘Search SRS’ pop-up window, if applicable.
- **Chemical Name:** Displays the name of the chemical that has been identified on the ‘Search SRS’ pop-up window.
- **CBI:** Check the ‘CBI’ checkbox to identify the chemical as confidential.
- **Generic chemical name:** Enter the generic name to associate with a chemical. This field displays when ‘Chemical Name’ and ‘CASRN’ are claimed CBI. This is a required field if there is no pending Letter of Support or Joint Submission for the form.
- **Method 1 (CAS Inventory Expert Service):** Select the ‘Method 1 (CAS Inventory Expert Service)’ radio button to identify the ID method as the ‘CAS Inventory Expert Service’ method. Submit a copy of the identification report obtained from the CAS Inventory Expert Services as an attachment to this notice. For a consolidated submission, each chemical must be ‘Method 1’ except when the submission is pending a Letter of Support for that chemical. Select the ‘Method 1 (CAS Inventory Expert Service)’ radio button to generate the ‘IES Order #’ field. A single response option in the ‘ID Method’ section is required if there is no pending Letter of Support or Joint Submission for the form.
- **IES Order #:** Select the ‘Method 1 (CAS Inventory Expert Service)’ radio button to generate this field. Enter the IES order number. This is a required field if there is no pending Letter of Support or Joint Submission for the form.
- **Method 2 (Other Method):** Select the ‘Method 2 (Other Method)’ radio button to identify the ID method as ‘Other Method.’ An alternative method of providing a name, such as a STN database report or a CAS Client Services report, qualifies as ‘Method 2.’ If the chemical is pending a Letter of Support, the method can only be ‘Method 2.’ A single response option in the ‘ID Method’ section is required if there is no pending Letter of Support or Joint Submission for the form.
- **Attachments:** Select the section of the page with which the document is associated from the drop-down menu. This drop-down menu contains the following values: ‘Chemical Structure Diagram’ and ‘ID Method.’ It is required that a document be attached for the ID Method if there is no pending Letter of Support or Joint Submission for the form.
- **Attach Document:** Click the button to generate the ‘Attach Documents’ pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **Section:** Displays the section of the page with which the file is associated.

- **File Name:** Displays the file name and file extension of a document that is uploaded on the 'Attach Documents' window.
- **Description:** Displays the description of a document.
- **Pages:** Displays the number of pages in a document.
- **CBI:** Indicates the CBI status of a document by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the 'Save' icon (💾) located within the bottom action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the 'Previous' and 'Next' buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.

Exhibit 4-22 shows a screen capture of the 'Polymer Identification Information' screen (Scroll 1):

Navigation: Click the 'Next' button to navigate to the 'Monomers and Other Reactants' screen. You can also access this screen by clicking the 'Monomers and Other Reactants' link within the navigation tree.

4.16 Monomers and Other Reactants

You can navigate to the 'Monomers and Other Reactants' screen by clicking the 'Next' button from the 'Polymer Identification Information' screen. You can also access this screen by clicking the 'Monomers and Other Reactants' link within the navigation tree.

The 'Monomers and Other Reactants' screen is used to identify the chemical measurements and monomers that make up a polymer. The screen is divided into two sections to identify different

elements describing a polymer: ‘Polymer Weight Information’ and ‘Monomers and Other Reactants.’

In the ‘Monomers and Other Reactants’ section, enter the typical weight percent of each monomer or other reactant in the polymer. Enter the maximum weight percent of each monomer or other reactant that may be present as a residual in the polymer as manufactured for commercial purposes. The maximum residual should be less than the typical composition. Do not use parts per million (ppm) units (1 ppm = 0.0001 wt%).

To reference a monomer cleared with an LVE, include an attachment detailing any specifics.

- **CBI:** Check the ‘CBI’ checkbox to claim the ‘Polymer Weight Information’ section as confidential.
- **Method of Measurement:** Only a single response option can be selected for ‘Method of Measurement;’ valid values include ‘GPC’ and ‘Other (Specify).’ Gel-permeation chromatography (GPC) is a well-established method for establishing the number average molecular weight (M_n) and weight fractions below 500 and 1,000 Daltons. It may not be useful for all polymer evaluations; however, solubility problems and misleading calibration standards can lead to questionable GPC data. Correction estimates can be documented and presented in cases where only a soluble fraction of the polymer can be analyzed. This is a required field if there is no pending Letter of Support or Joint Submission for the form.
- **Specify other method of measure:** Enter the method of measurement when you select the ‘Other (Specify)’ radio button as the method of measurement. This is a required field when the ‘Other (Specify)’ radio button is selected.
- **(i) lowest number avg. molecular weight:** Enter the lowest number average molecular weight; the entered value must be a positive numerical value and can contain decimal values. This is a required field if there is no pending Letter of Support or Joint Submission.
- **(ii) max. weight % below 500 molecular weight:** Enter the maximum weight percentage below 500 molecular weight; the value entered must be a positive numerical value greater than or equal to zero (0), but less than or equal to one hundred (100) and can contain decimal values. This value must be less than or equal to the value specified in the ‘(iii) max. weight % below 1000 molecular weight’ field. This is a required field if there are no pending Joint Submissions or Letters of Support. Please note that in IE 7, the % symbols might be slightly misaligned.
- **(iii) max. weight % below 1000 molecular weight:** Enter the maximum weight percentage below 1,000 molecular weight; the value entered must be a positive numerical value greater than or equal to zero (0) but less than or equal to one hundred (100) and can contain decimal values. This value must be greater than or equal to the value specified in the ‘(ii) max. weight % below 500 molecular weight’ field. This is a required field if there are no pending Joint Submissions or Letters of Support. Please note that in IE 7, the % symbols might be slightly misaligned.
- **Add Monomer:** Click the button to generate the monomer expandable/collapsible field set.
- **Cancel:** Click the ‘Cancel’ link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and to remove a field set. The

'Cancel' link is displayed when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.

- **Edit:** Click the 'Edit' link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The 'Edit' link is displayed when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the 'Delete' icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion.
- **Expand All:** Click the link located at the upper-right of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the link located at the upper-right of the expandable/collapsible field sets to collapse a series of field sets.
- **Search SRS:** Click the 'Search SRS' button to generate the 'Search Substance Registry Services' pop-up window. Refer to **Section 3.8** for additional details regarding the search SRS functionality.
- **Monomer or Other Reactant:** Displays the monomer or other reactant name; this field populates based on information entered on the 'Search SRS' pop-up window. This is a required field.
- **Include in Identity:** Check the 'Include in Identity' checkbox to claim the value for 'Monomer or Other Reactant' as part of the monomer identification. This checkbox is most applicable for monomers that are less than or equal to 2% since the monomer is not considered to be included in the identity unless this checkbox is checked. This checkbox appears when a value of '2' or less is entered into the 'Typical Composition' text field.
- **CBI:** Check the 'CBI' checkbox to claim the monomer or other reactant name and CASRN as confidential.
- **CAS Registry Number:** Displays the CASRN for the specified monomer; this field populates based on information entered on the 'Search SRS' pop-up window.
- **Chemical Name:** Displays the name of the chemical identified on the 'Search SRS' pop-up window.
- **Typical Composition:** Enter the typical composition value that a monomer contributes to a polymer; the value entered must be a positive numerical value greater than zero (0) and less than or equal to one hundred (100) and can contain decimal values. If the value entered is less than or equal to '2' a warning will be displayed in the global 'Validate' function or during the submission process indicating that the typical composition is a value that is less than or equal to 2 percent and asking you whether it should be included in the chemical identity. This is a required field, and the value must be greater than zero (0).
- **CBI:** Check the 'CBI' checkbox to claim the 'Typical Composition' and 'Include In Identity' fields as confidential.
- **Maximum Residual:** Enter the maximum residual value. Indicate the maximum weight percent of each monomer or other reactant that may be present as a residual in the polymer as manufactured for commercial purposes. Enter a percent value less than or equal to the

maximum weight; do not use ppm units (1 ppm = 0.0001 wt%). The value entered must be a positive numerical value that is less than or equal to the typical composition value. This is a required field.

- **CBI:** Check the 'CBI' checkbox to claim the 'Maximum Residual' field as confidential.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the 'Save' icon () located within the bottom action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the 'Previous' and 'Next' buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.
- **Attach Document:** Click the 'Attach Document' button to generate the 'Attach Documents' pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of the document that is uploaded on the 'Attach Documents' pop-up window. Click the file name link to navigate to the 'Attach Documents' pop-up window to make any edits.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon () to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion of the document.

Premanufacture Notice Primary Support

Premanufacture Notice (Primary PMN-20130619-10:03:48 EDT) > Monomers and Other Reactants

MONOMERS AND OTHER REACTANTS

B.2.a. Polymer Weight Information CBI:

Indicate the method of measurement in which the polymer weight was recorded.

Method of Measurement: GPC Other(Specify)

Specify other method of measure

Indicate the number-average weight of the lowest molecular weight composition of the polymer you intend to manufacture. Indicate maximum weight percent of low molecular weight species (not including residual monomers, reactants, or solvents) below 500 and below 1,000 absolute molecular weight of that composition.

(i) lowest number avg. molecular weight:

(ii) max. weight % below 500 molecular weight: %

(iii) max. weight % below 1000 molecular weight: %

B.2.b. Monomers and Other Reactants

Enter a percent value less than or equal to the maximum weight, do not use ppm units. (1 ppm = 0.0001 wt%).

Select the Add Monomer button to add monomers that make up the polymer composition.

Click the **Add Monomer** button to add a monomer. Composition Total:0.0%

Exhibit 4-25 shows a screen capture of the ‘Monomers and Other Reactants’ screen (Scroll 2):

Exhibit 4-25: Monomers and Other Reactants Screen (Scroll 2)

The screenshot shows the 'Monomers and Other Reactants' screen in the GSPP system. The top navigation bar includes 'Home', 'Forms', and 'Resources' tabs, and a 'Log Out' button. The user is logged in as 'Jane Doe, Primary Support'. The left navigation tree shows the current path: 'Physical & Chemical Properties' > 'Monomers and Other Reactants'. The main content area contains instructions: 'Enter a percent value less than or equal to the maximum weight, do not use ppm units. (1 ppm = 0.0001 wt%).' and 'Select the Add Monomer button to add monomers that make up the polymer composition.' Below this is a search form with fields for 'Monomer or other reactant', 'CAS Registry Number', 'Chemical Name', 'Typical Composition', and 'Maximum Residual'. There are checkboxes for 'Include in Identity' and 'CBI' for each field. A 'Search SRS' button is present. Below the search form is an 'Add Monomer' button and a 'Composition Total:0.0%' display. An 'Attachments' section has an 'Attach Document' button. At the bottom, there is a table with columns 'File Name', 'Description', 'Pages', 'CBI', and 'Actions'. A 'Next' button is highlighted in a red box. The bottom toolbar includes 'Upload XML', 'Validate', 'Save', and 'Preview' buttons. The footer contains links to 'CDX Homepage', 'MyCDX Homepage', 'EPA Homepage', 'Terms and Conditions', 'Privacy Notice', and 'CDX Helpdesk: (888) 890-1995'.

Navigation: Click the ‘Next’ button to navigate to the ‘Additional Chemical Information’ screen. You can also access this screen by clicking the ‘Additional Chemical Information’ link within the navigation tree.

4.17 Production Volume and Hazard/Safety Information

You can navigate to the ‘Production Volume and Hazard/Safety Information’ screen by clicking the ‘Next’ button from the ‘Additional Chemical Information’ screen. You can also access this screen by clicking the ‘Production Volume and Hazard/Safety Information’ link within the navigation tree.

The ‘Production Volume and Hazard/Safety Information’ screen collects different information regarding a chemical’s production and hazard elements.

Production Volume: The ‘Production Volume’ section captures information about production for the respective chemical or polymer for the ‘Maximum first 12-month production’ and the ‘Maximum 12-month production.’ The ‘Maximum first 12-month production’ value should be less than or equal to the ‘Maximum 12-month production’ value. The maximum volume may not exceed 100,000,000,000,000 kg/year for either field. The entered values will automatically display decimal points upon navigating away from the page. Decimals are allowed up to the milligram (.000001). Estimates should be on a 100% new chemical substance basis. Your production volumes should be estimated as accurately as possible, but you are not bound to your estimates unless you check the ‘Binding’ checkbox and are creating an LVE or LVE modification submission. Include amounts you intend to produce for export. Provide an estimate of the first 12 months of production and the maximum production volume for any consecutive 12-month period during the first three (3) years of commercial manufacture. You may upload an attachment to enter additional production information.

Hazard Information: The ‘Hazard Information’ section captures information regarding hazards that the company chooses to disclose. For EPA to take respirator use into account when evaluating risks posed by a new chemical, the MSDS (material safety data sheet) for the substance must specify a respirator that is appropriate for the types of anticipated exposures. For the same reason, all respirators must be certified by the National Institute for Occupational Safety and Health (NIOSH), and be referenced in the MSDS as “NIOSH certified” respirators.

If any type of risk assessment is prescribed to determine personal protective equipment (PPE) requirements, such risk assessment must be performed by a qualified Industrial Hygienist (IH) or other authorized occupational safety and health specialist.

Engineering controls are the preferred methods for managing workplace exposures to hazards. If these controls are inadequate or lacking, personal protective equipment must be used.

For EPA to take glove use into account when evaluating risks posed by a new chemical, the MSDS for the substance must specify gloves that are impervious to the substances of concern, as well as suitable for the type of tasks.

Close-fitting goggles or a full-face piece facemask are preferred for vapor, mist, or fume exposures, or wherever workplace contaminants can readily bypass loose-fitting equipment.

The information is collected in a file attachment. The system will display instructional text for you to identify which forms should be uploaded.

Provide the MSDS for the PMN substance or intermediate or product mixture (that contains it) as an attachment to the PMN. Also, include hazard warning statements or labels, if relevant. The personal protection requirements of the MSDS become integral requirements of an LVE notice.

- **CBI:** Check the ‘CBI’ checkbox to claim the production volume information as confidential.
- **Binding:** Check the ‘Binding’ checkbox to claim the production volume information as binding. This checkbox is enabled for LVE or LVE modifications only.
- **Maximum first 12-month production:** Provide an estimate of the first 12 months of production. The entered value must be a numerical value and must be greater than zero but

less than 100,000,000,000,000 kg/year. This field accepts decimals to the milligram and is a required field if you do not have a pending Joint Submission and/or Letter of Support.

- **Maximum 12-month production:** Enter the data associated with the production volume. Provide an estimate of the maximum production volume for any consecutive 12-month period during the first three (3) years of commercial manufacture. The entered value must be a numerical value and must be greater than zero but less than 100,000,000,000,000 kg/year. This value must be greater than or equal to the 'Maximum first 12-month production' value. This field accepts decimals to the milligram and is a required field if you do not have a pending Joint Submission and/or Letter of Support.
- **Binding:** Check the 'Binding' checkbox to claim the hazard information as binding.
- **Attachments:** Select the section of the page with which the attached document is associated. This drop-down menu contains the following value: 'Production Information Section' and 'Hazard Information Section.'
- **Attach Document:** Click the 'Attach Document' button to generate the 'Attach Documents' pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **Section:** Displays the section with which the document is associated.
- **File Name:** Displays the file name and file extension of the file that is uploaded on the 'Attach Documents' pop-up window. Click the file name link to navigate to the 'Attach Documents' pop-up window to make any edits.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion.

Exhibit 4-26 shows a screen capture of the ‘Production Volume and Hazard/Safety Information’ screen:

Exhibit 4-26: Production Volume and Hazard/Safety Information Screen

The screenshot shows the GSPP (Global Submission Processing Portal) interface for a Premanufacture Notice (PMN). The user is logged in as Jane Doe, Primary Support. The current screen is titled 'Production Volume and Hazard/Safety Information' for PMN-20130619-10:03:48 EDT. The main content area contains instructions for providing production volume information and a section for hazard information. The 'C.1. Production Volume' section includes checkboxes for 'CBI' and 'Binding', and two input fields for 'Maximum first 12-month production' and 'Maximum 12-month production', both in kg/yr. The '3. Hazard Information' section includes a 'Binding' checkbox and a text area for providing hazard information. Below the text area is a dropdown menu to select which section the attachment applies to, and an 'Attach Document' button. At the bottom of the main content area, there is a table with columns for 'Section', 'File Name', 'Description', 'Pages', 'CBI', and 'Actions'. Below the table are 'Previous' and 'Next' buttons. The 'Next' button is highlighted with a red box. The bottom navigation bar includes an 'Upload XML' button, 'Validate', 'Save', and 'Preview' buttons, and a footer with links to CDX, MyCDX, EPA, and other resources.

Navigation: Click the ‘Next’ button to navigate to the ‘Use Information’ screen. You can also access this screen by clicking the ‘Use Information’ link within the navigation tree.

4.18 Use Information

You can navigate to the ‘Use Information’ screen by clicking the ‘Next’ button from the ‘Production Volume and Hazard/Safety Information’ screen. You can also access this screen by clicking the ‘Use Information’ link within the navigation tree.

The 'Use Information' screen is used to capture data about how the new chemical substance is intended to be used by function and application. Function refers to the chemical purpose for which the substance is designed and is often based on the physical and chemical properties of the substance. Application refers to how the substance is used in particular processes or products. An example of a function and application would be as a dispersive dye for finishing polyester fibers. When you navigate to the screen, the screen contains instructional text and an 'Add Use' button. When you click the 'Add Use' button, an expandable/collapsible field set will open and display the 'Use Information' fields. Upon saving the entry, the expandable/collapsible field set collapses and displays the 'Category of Use' and 'Production %' values.

You will first enter a description for the 'Category of Use' field. Each use will center on the 'Category of Use' and the different variables surrounding it. The category of use information should be specific enough to allow EPA reviewers to anticipate potential exposure patterns for the new substance (e.g. merely indicating "Dye" is not sufficient – is it photographic dye, a reactive dye for nylon fibers, or a dye to be incorporated in a polymer making film?). LVE notices limit you to your stated category of use(s), so make sure your description fully encompasses all intended uses for any LVE. When you claim the 'Category of Use' as CBI, you are required to enter a 'Generic Use Description.' The generic use description will be available publicly.

The table captures the different elements of use that the PMN form captures. The 'Production %' and '% in Formulation' values will be captured to indicate how the product will be used and at what percent in that use. Each use must capture the percent of the production and percent in formulation for each category of use. The 'Production %' must equal up to 100% for all uses, and the field can be declared CBI. The '% in Formulation' value can equal up to 100%, and the field can be declared CBI.

The '% of substance expected' per use is captured for the following categories: 'Site Limited,' 'Consumer,' 'Industrial,' and 'Commercial.' The '% of substance expected' value must total 100%. The '% of substance expected' values can be claimed as CBI or listed as binding. These use types are used to determine the risks that the chemical will place on society.

- **Add Use:** Click the 'Add Use' button to add a new use information expandable/collapsible field set.
- **Cancel:** Click the 'Cancel' link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and to remove a field set. The 'Cancel' link displays when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the 'Edit' link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The 'Edit' link displays when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the 'Delete' icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion.
- **Expand All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to expand a series of field sets.

- **Collapse All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to collapse a series of field sets.
- **Category of Use:** Enter the category of use for the specific chemical substance by function and application. This is a required field.
- **CBI:** Check the 'CBI' checkbox to claim the category of use information as confidential and generate the 'Generic Use Description' field. Claiming the 'Category of Use' field as CBI and then un-checking the 'CBI' checkbox generates a confirmation message that all attached documents will be deleted.
- **Binding:** Check the 'Binding' checkbox to claim the category of use information as binding.
- **C.2.b. Generic Use Description:** Enter the generic use description of the chemical. This field is displayed when the 'Category of Use' field is claimed CBI. If you claim any category of use description as confidential, enter a generic description of that category. This field is required when the 'Category of Use' field is claimed CBI.
- **Total Production for this Use %:** Enter an estimate of the percent of total production for the first three years devoted to each category of use for the specific chemical. The entered value must be a value greater than zero (0) but less than or equal to one hundred (100). This field allows for decimal values. This is a required field.
- **CBI:** Check the 'CBI' checkbox to claim the 'Total Production for this Use' information as confidential.
- **In Formulation %:** Estimate the percent of the new substance as formulated in mixture, suspensions, emulsions, solutions, or gels as manufactured for commercial purposes at sites under your control associated with each category of use. The entered value must be a value greater than zero (0) but less than or equal to one hundred (100) and can include decimal values. This is a required field.
- **CBI:** Check the 'CBI' checkbox to claim the 'Percentage in Formulation' information as confidential.
- **CBI:** Check the 'CBI' checkbox to claim the percentage of substance expected per use information as confidential.
- **Binding:** Check the 'Binding' checkbox to claim the percentage of substance expected per use information as binding.
- **Site Limited %:** Enter the site limited percentage of substance expected per use for the submitted substance. Blank fields are recognized as zeroes. This field allows for decimal values. Break down the use(s) by percentage for the indicated end user categories. For example, site-limited means the substance will only be used on the adjacent property unit where manufactured and will not intentionally be removed from the site except for waste disposal.
- **Consumer %:** Enter the consumer percentage of substance expected per use for the submitted substance. Blank fields are recognized as zeroes. This field allows for decimal values. Break down the use(s) by percentage for the indicated end user categories. Consumer use means that private individuals will use the chemical substance or products containing the substance for personal use or enjoyment.

- **Industrial %:** Enter the industrial percentage of substance expected per use for the submitted substance. Blank fields are recognized as zeroes. This field allows for decimal values. Break down the use(s) by percentage for the indicated end user categories. Industrial use means that the chemical substance or product containing the substance will be used at the locations of other manufacturers or processors.
- **Commercial %:** Enter the commercial percentage of substance expected per use for the submitted substance. Blank fields are recognized as zeroes. This field allows for decimal values. Break down the use(s) by percentage for the indicated end user categories. Indicate percentage of product volume expected for the listed “use” sectors. Commercial use refers to the chemical substance or product containing the chemical substance being used by a company to provide a consumer service.
- **If you have provided a “consumer” use, provide details:** Enter consumer use details. Provide a detailed description of the use(s) of this chemical substance in consumer products. In addition, include estimates of the concentration of the new chemical substance as expected in consumer products and describe the chemical reactions by which this substance loses its identity in the consumer product. This is a required field if the ‘Consumer % of substance expected per use’ field is populated and is a value greater than zero (0).
- **CBI:** Check the ‘CBI’ checkbox to claim the ‘If you have provided a ‘consumer’ use, provide details’ information as confidential.
- **Attach Document:** Click the ‘Attach Document’ button to generate the ‘Attach Documents’ pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of the file uploaded on the ‘Attach Documents’ pop-up window. Click the ‘File Name’ link to navigate to the ‘Attach Documents’ pop-up window to make any edits.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm deletion of the document.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the ‘Save’ icon (💾) located within the bottom action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the ‘Previous’ and ‘Next’ buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.
- **Production Total:** Displays the total production percentage for all uses. This value must be equal to 100, unless a Joint Submission or Letter of Support is pending, in which case the total value requirement is not immediately applicable.

Navigation: Click the ‘Next’ button to navigate to the ‘Physical and Chemical Properties Worksheet’ screen. You can also access this screen by clicking the ‘Physical and Chemical Properties Worksheet’ link within the navigation tree.

4.19 Physical and Chemical Properties Worksheet

You can navigate to the 'Physical and Chemical Properties Worksheet' screen by clicking the 'Next' button from the 'Use Information' screen. You can also access this screen by clicking the 'Physical and Chemical Properties Worksheet' link within the navigation tree.

The 'Physical and Chemical Properties Worksheet' screen is used to capture optional information about a chemical's properties. The chemical properties are used by EPA to determine additional safety data about a chemical. The properties are used to determine potential risks and exposures of the chemicals.

The properties for a chemical are captured in an expandable/collapsible field set format. The following categories may apply to a chemical: 'Physical state of neat substance,' 'Vapor Pressure @ temperature,' 'Density/relative density,' 'Solubility @ temperature ___ solvent __,' 'Solubility in water @ temperature __,' 'Melting temperature,' 'Boiling/sublimation temperature @ __,' 'Spectra,' 'Dissociation constant,' 'Particle size distribution,' 'Octanol/water partition coefficient,' 'Henry's Law constant,' 'Volatilization from water,' 'Volatilization from soil,' 'pH @ concentration [concentration],' 'Flammability,' 'Explosibility,' and 'Adsorption/coefficient.' All of the properties will capture the relevant values for a chemical. Each property may be claimed individually as CBI.

To enter physical/chemical property information, select a physical/chemical property from the drop-down menu and click the 'Add Property' button. The expandable/collapsible field set will expand and display all fields that should be entered for that property. You are then able to enter all relevant information regarding that property. Value fields are able to accept '<' or '>' symbols. When all information is entered, click the 'Save' button. Each property may only be entered once per chemical.

You may also enter an option for 'Other.' The 'Other' option will allow you to enter a user-specified property and any relevant values. The property will capture the relevant values for the chemical and the property measurement can be identified as 'Measured' or 'Estimate.' The 'Other' option may be claimed individually as CBI. You may enter multiple properties as 'Other.'

You may upload attachments for the chemical properties on the 'Physical and Chemical Properties Worksheet – Continued (Optional)' screen.

EPA's risk assessment process does utilize physiochemical properties, as some of the attributes listed here can relate directly to chemical risks. Among the most useful parameters of a new substance to EPA are the boiling point, the melting point, vapor pressure, the octanol/water partition coefficient, water solubility, Henry's Law Constant, hydrolysis, spectral data, mass spectrometry (MS), proton and C13 Nuclear Magnetic Resonance (NMR), Infrared (IR), and Ultraviolet (UV) absorption, and the soil/sediment absorption coefficient. In the absence of this data, EPA will estimate to the extent possible physiochemical data to aid in their risk evaluations.

Indicate whether the value you provide is based on an actual test measurement ('Measured') or is based on an estimate ('Estimate'). Note that EPA staffers indicate that data qualifiers such as 'negligible' or 'soluble' are not useful descriptions.

You are not required to generate the listed test data if you do not have it.

Physical/chemical properties data may be so unique that they could in the future link the PMN substance to a commercial product or may tend to identify unique classes of chemical substance, and therefore some data elements may represent confidential business information. Review the CBI status of each entry carefully, and avoid making unsupportable claims.

Please note that in IE 7, all physical/chemical properties you wish to add must be identified before navigating away from this page; otherwise, the properties are removed from the 'Add Property' drop-down menu. In addition, you will be able to add the 'Henry's Law constant' property more than once, and the chemical property fields located within the expandable/collapsible fields sets on this page will be disorganized. After clicking the 'Next' button, you will navigate to the 'Physical and Chemical Properties Worksheet – Continued (Optional)' screen. After clicking the 'Previous' button, the physical/chemical properties have been removed from the 'Add Property' drop-down menu.

- **Add Property:** Click the 'Add Property' button to add and open a new 'Property' expandable/collapsible field set for a selected property.
- **Cancel:** Click the 'Cancel' link located in the upper right-hand corner of an expandable/collapsible field set to prevent edits from saving and to remove a field set. The 'Cancel' link displays when an expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the 'Edit' link located in the upper right-hand corner of an expandable/collapsible field set to modify the information entered in the fields. The 'Edit' link displays when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the 'Delete' icon (✖) located in the upper right-hand corner of an expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion.
- **Expand All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to collapse a series of field sets.
- **Adsorption/Coefficient - Value:** Enter the adsorption/coefficient value of the chemical substance. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Adsorption/coefficient' property is selected.
- **Adsorption/Coefficient - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Adsorption/coefficient' property is selected.
- **Adsorption/Coefficient – CBI:** Check the 'CBI' checkbox to claim the adsorption/coefficient property as confidential.
- **Boiling/sublimation temperature @ – Value:** Enter the boiling/sublimation temperature in °C of the chemical substance. This is a required field if the 'Boiling/sublimation temperature @' property is selected.
- **Boiling/sublimation temperature @ [pressure] torr:** Enter the value of the pressure in torr for which the boiling/sublimation of the chemical substance was determined. Value fields are

able to accept '<' or '>' symbols. This is a required field if the 'Boiling/sublimation temperature @' property is selected.

- **Boiling/sublimation temperature @ - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Boiling/sublimation temperature @' property is selected.
- **Boiling/sublimation temperature @ - CBI:** Check the 'CBI' checkbox to claim the 'Boiling/sublimation temperature @' property as confidential.
- **Density/relative density - Value:** Enter the density/relative density value of the chemical substance in g/cm³. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Density/relative density' property is selected.
- **Density/relative density - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Density/relative density' property is selected.
- **Density/relative density - CBI:** Check the 'CBI' checkbox to claim the 'Density/relative density' property as confidential.
- **Dissociation constant - Value:** Enter the dissociation constant value of the chemical substance. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Dissociation constant' property is selected.
- **Dissociation constant - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Dissociation constant' property is selected.
- **Dissociation constant - CBI:** Check the 'CBI' checkbox to claim the 'Dissociation constant' property as confidential.
- **Explosibility - Value:** Enter the explosibility value of the chemical substance. This field allows text or numbers to be entered and is also able to accept '<' or '>' symbols. This is a required field if the 'Explosibility' property is selected.
- **Explosibility - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Explosibility' property is selected.
- **Explosibility - CBI:** Check the 'CBI' checkbox to claim the 'Explosibility' property as confidential.
- **Flammability - Value:** Enter the flammability value of the chemical substance. This field allows text and is also able to accept '<' or '>' symbols. This is a required field if the 'Flammability' property is selected.
- **Flammability - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Flammability' property is selected.
- **Flammability - CBI:** Check the 'CBI' checkbox to claim the 'Flammability' property as confidential.

- **Henry's Law constant - Value:** Enter the Henry's law constant value of the chemical substance in atm-m³/mole. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Henry's Law constant' property is selected.
- **Henry's Law constant - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Henry's Law constant' property is selected.
- **Henry's Law - CBI:** Check the 'CBI' checkbox to claim the 'Henry's Law constant' property as confidential.
- **Melting Temperature - Value:** Enter the melting temperature of the chemical substance in °C. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Melting Temperature' property is selected.
- **Melting Temperature - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Melting Temperature' property is selected.
- **Melting Temperature - CBI:** Check the 'CBI' checkbox to claim the 'Melting Temperature' property as confidential.
- **Octanol/water partition coefficient - Value:** Enter the octanol/water partition coefficient value of the chemical substance. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Octanol/water partition coefficient' property is selected.
- **Octanol/water partition coefficient - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Octanol/water partition coefficient' property is selected.
- **Octanol/water partition coefficient - CBI:** Check the 'CBI' checkbox to claim the 'Octanol/water partition coefficient' property as confidential.
- **Particle size distribution - Value:** Enter the particle size distribution value of the chemical substance. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Particle size distribution' property is selected.
- **Particle size distribution - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Particle size distribution' property is selected.
- **Particle size distribution - CBI:** Check the 'CBI' checkbox to claim the 'Particle size distribution' property as confidential.
- **Physical state of neat substance - Value:** Select the physical state of a neat substance of chemicals, which can be either a 'Solid,' 'Liquid,' or 'Gas.' This is a required field if the 'Physical state of neat substance' property is selected.
- **Physical state of neat substance - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Physical state of neat substance' property is selected.

- **Physical state of neat substance - CBI:** Check the 'CBI' checkbox to claim the 'Physical state of neat substance' property as confidential.
- **pH @ concentration [concentration]:** Enter the concentration at which the pH was measured. This field allows for text. This is a required field if the 'pH @ concentration [concentration]' property is selected.
- **pH @ concentration [concentration] - Value:** Enter the pH value. This field allows text and is also able to accept '<' or '>' symbols. This is a required field if the 'pH @ concentration [concentration]' property is selected.
- **pH @ concentration [concentration] - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'pH @ concentration [concentration]' property is selected.
- **pH @ concentration [concentration] - CBI:** Check the 'CBI' checkbox to claim the 'pH @ concentration [concentration]' property as confidential.
- **Solubility @ temperature solvent:** Enter the temperature value in °C for which the solubility was measured. This field allows text and is also able to accept '<' or '>' symbols. This is a required field if the 'Solubility @ temperature solvent' property is selected.
- **Solubility @ temperature solvent - Solvent:** Enter the solvent that will be used for the chemical substance. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Solubility @ temperature solvent' property is selected.
- **Solubility @ temperature solvent - Value:** Enter the solubility of the chemical substance in g/L.
- **Solubility @ temperature solvent - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Solubility @ temperature solvent' property is selected.
- **Solubility @ temperature solvent - CBI:** Check the 'CBI' checkbox to claim the 'Solubility @ temperature solvent' property as confidential.
- **Solubility in Water @ temperature:** Enter the temperature value in °C of the chemical for which the solubility in water was measured. This is a required field if the 'Solubility in Water @ temperature' property is selected.
- **Solubility in Water @ temperature - Value:** Enter the solubility in water of the chemical substance in g/L. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Solubility in Water @ temperature' property is selected.
- **Solubility in Water @ temperature - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Solubility in Water @ temperature' property is selected.
- **Solubility in Water @ temperature - CBI:** Check the 'CBI' checkbox to claim the 'Solubility in Water @ temperature' property as confidential.

- **Spectra - Value:** Enter the spectra value of the chemical substance. Value fields are able to accept '<' or '>' symbols. This is a required field if the spectra property is selected.
- **Spectra - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Spectra' property is selected.
- **Spectra - CBI:** Check the 'CBI' checkbox to claim the 'Spectra' property as confidential.
- **Vapor Pressure @ temperature:** Enter the temperature value in °C of the chemical for which the vapor pressure was measured. This is a required field if the 'Vapor Pressure @ temperature' property is selected.
- **Vapor Pressure @ temperature - Value:** Enter the value of the Vapor Pressure in torr units of the chemical substance. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Vapor Pressure @ temperature' property is selected.
- **Vapor Pressure @ temperature - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Vapor Pressure @ temperature' property is selected.
- **Vapor Pressure @ temperature - CBI:** Check the 'CBI' checkbox to claim the 'Vapor Pressure @ temperature' property as confidential.
- **Volatilization from water - Value:** Enter the volatilization from water value of the chemical substance. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Volatilization from water' property is selected.
- **Volatilization from water - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Volatilization from water' property is selected.
- **Volatilization from water - CBI:** Check the 'CBI' checkbox to claim the 'Volatilization from water' property as confidential.
- **Volatilization from soil - Value:** Enter the volatilization from soil value. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Volatilization from soil' property is selected.
- **Volatilization from soil - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Volatilization from soil' property is selected.
- **Volatilization from soil - CBI:** Check the 'CBI' checkbox to claim the 'Volatilization from soil' property as confidential.
- **Other:** Enter any 'Other' property that you may specify.
- **Other - Value:** Enter an 'Other' property value. Value fields are able to accept '<' or '>' symbols. This is a required field if the 'Other' property was selected.
- **Other - Measured or Estimate:** Indicate whether the property value is 'Measured' or based on an 'Estimate' by selecting the appropriate value from the drop-down menu. This is a required field if the 'Other' property is selected.
- **Other - CBI:** Check the 'CBI' checkbox to claim the property as confidential.

PHYSICAL AND CHEMICAL PROPERTIES WORKSHEET

To assist EPA's review of physical and chemical properties data, please complete the following worksheet for data you provide and include it in the notice. Identify the property measured, the value of the property, the units in which the property is measured (as necessary), and whether or not the property is claimed as confidential. The physical state of the neat substance should be provided. These measured properties should be for the neat (100% pure) chemical substance. Properties that are measured for mixtures or formulations should be so noted (% PMN substance in). You should submit this worksheet as a supplement to your submission of test data. This worksheet is not a substitute for submission of test data.

Navigation: Click the ‘Next’ button to navigate to the ‘Physical and Chemical Properties Worksheet – Continued (Optional)’ screen. You can also access this screen by clicking the

‘Physical and Chemical Properties Worksheet – Continued (Optional)’ link within the navigation tree.

4.20 Physical and Chemical Properties Worksheet – Continued (Optional)

You can navigate to the ‘Physical and Chemical Properties Worksheet – Continued (Optional)’ screen by clicking the ‘Next’ button from the ‘Physical and Chemical Properties Worksheet’ screen. You can also access this screen by clicking the ‘Physical and Chemical Properties Worksheet – Continued (Optional)’ link within the navigation tree.

The ‘Physical and Chemical Properties Worksheet – Continued (Optional)’ screen is used to capture all the studies and attachments that refer to the chemical properties captured on the ‘Physical and Chemical Properties Worksheet’ screen. When you first access the ‘Physical and Chemical Properties Worksheet – Continued (Optional)’ screen, instructional text, an ‘Attach Document’ button, and an attachments table display.

When you attach a document, the properties that were selected on the ‘Physical and Chemical Properties Worksheet’ screen will be listed with checkboxes in the ‘Attach Documents’ window for you to select with which properties an attachment is associated. Check the properties that are relevant to the document, and then select a type and subtype value for the document. You will be able to attach a document, enter a description of the document, and list the number of pages.

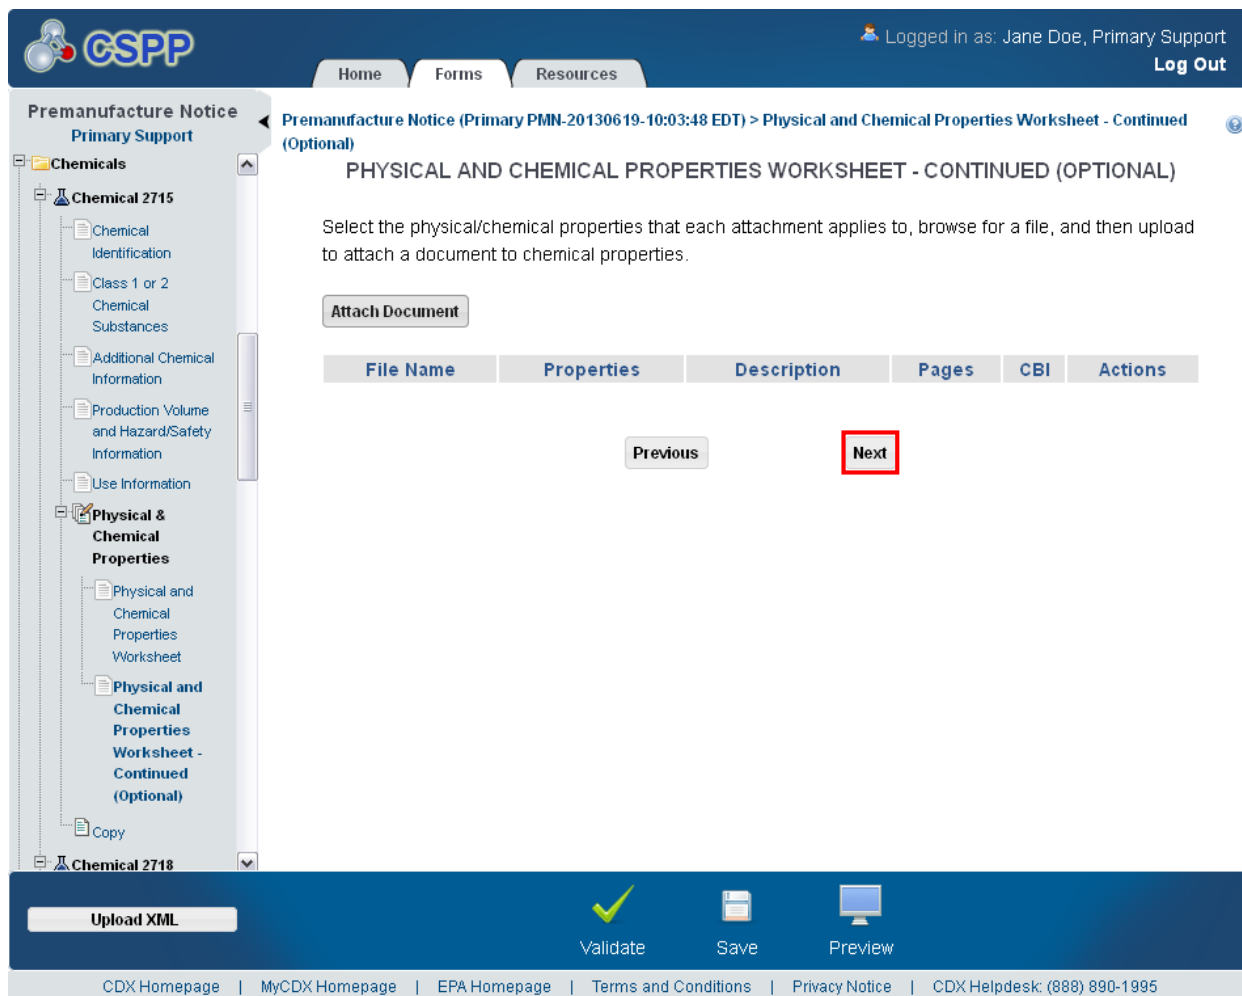

The system provides functionality to claim an uploaded document as CBI. If a document is claimed as CBI, the system requires you to upload the sanitized version of the attached document. To view, open, or edit previously attached documents, click the appropriate file name of the document within the ‘File Name’ column of the attachment table.

The attachment table displays the ‘File Name,’ ‘Properties,’ ‘Description,’ ‘Pages,’ ‘CBI,’ and ‘Actions’ columns. Click the ‘Delete’ icon (✖) located under the ‘Actions’ column to delete unwanted documents.

- **Attach Document:** Click the ‘Attach Document’ button to generate the ‘Attach Documents’ pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of the original file that is uploaded on the ‘Attach Documents’ pop-up window. Click the ‘File Name’ link to navigate to the ‘Attach Documents’ pop-up window to make any edits.
- **Properties:** Displays the chemical properties associated with a document.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of the document by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion.

Exhibit 4-31 shows a screen capture of the ‘Physical and Chemical Properties Worksheet – Continued (Optional)’ screen:

Exhibit 4-31: Physical and Chemical Properties Worksheet – Continued (Optional) Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Submitter Controlled Site Information’ screen if you have not identified another chemical. You can also access this screen by clicking the ‘Submitter Controlled Site Information’ link within the navigation tree. If you would like to add a consolidated chemical, click the ‘Add Consolidated Chemical’ link within the navigation tree.

4.20.1 Physical and Chemical Properties Worksheet – Continued (Optional) Attach Documents

You can navigate to the ‘Physical and Chemical Properties Worksheet – Continued (Optional) Attach Documents’ window by clicking the ‘Attach Document’ button on the ‘Physical and Chemical Properties Worksheet – Continued (Optional)’ screen.

When attaching a document, all properties selected on the 'Physical and Chemical Properties Worksheet' screen will display with checkboxes to allow the properties to which the attachment refers to be selected. Select the type and subtype for the attachment and the properties relevant to the document, attach the document, and enter the number of pages.

The system allows the uploaded document to be claimed as CBI. If a document is claimed as CBI, the system requires the sanitized version of the attached document to be uploaded. To access or edit previously attached documents, click the appropriate file name of the document within the 'File Name' column of the attachment table.

- **Type:** Select the document type from the drop-down menu.
- **Subtype:** Select the document subtype from the drop-down menu.
- **Chemical Properties:** Displays the physical and/or chemical properties identified on the previous screen that can be potentially associated with a document. Check the appropriate chemical properties that are associated with a document that is being attached. These checkboxes are enabled only if 'Physical Chemical Property' is selected from the 'Type' drop-down menu.
- **Attachment:** Displays the 'Browse' button to search for and identify documents on your local hard drive to be attached that can be associated with the physical/chemical properties identified on the 'Physical and Chemical Properties Worksheet' screen.
- **Description:** Enter the description associated with a document.
- **Number of Pages:** Enter the number of pages a document contains.
- **CBI:** Check the 'CBI' checkbox to claim the document as confidential.
- **Sanitized Attachment:** Click the 'Browse' button to generate the 'File Upload' window to search for a particular file on your hard drive. For any attached document claimed as CBI, you are required to attach a sanitized version of the document.

Exhibit 4-32 shows a screen capture of the ‘Physical and Chemical Properties Worksheet – Continued (Optional) Attach Documents’ pop-up window (Scroll 1):

Navigation: Click the ‘Cancel’ button or ‘X’ icon located in the upper right-hand corner to stop the process of adding document information. Click the ‘OK’ button to save the entered

information and navigate back to the ‘Physical and Chemical Properties Worksheet – Continued (Optional)’ screen.

4.21 Site Information

You can navigate to the ‘Site Information’ screen by clicking the ‘Next’ button from the ‘Physical and Chemical Properties Worksheet – Continued (Optional)’ screen. You can also access this screen by clicking the ‘Site Information’ link within the navigation tree.

The ‘Site Information’ screen captures information about the identification of submitter-controlled sites and sites controlled by others. If a user indicates there are submitter-controlled sites, the ‘Submitter Operation Information,’ ‘Occupational Exposures,’ and ‘Environmental Releases’ screens are automatically generated within the ‘Submitter Controlled Operations’ folder within the navigation tree. If a user indicates there are sites controlled by others, the ‘Industrial Sites Controlled By Others,’ ‘Exposures/Releases,’ and ‘Byproduct Information’ screens automatically generates within the ‘Operations Controlled By Others’ folder within the navigation tree upon clicking the ‘Next’ button. Toll manufacturing sites are considered sites controlled by the submitter.

- **Do you have sites controlled by the submitter?:** Select the ‘Yes’ radio button to indicate that you have submitter controlled sites to identify; this response automatically generates the screens within the ‘Submitter Controlled Operations’ folder in the PMN navigation tree upon clicking the ‘Next’ button. Select the ‘No’ radio button if you do not have any submitter-controlled sites to identify. An error message displays if a submitter-controlled site displays within the navigation tree and the ‘No’ radio button is selected.
- **Do you have sites controlled by others?:** Select the ‘Yes’ radio button to indicate that you have sites controlled by others to identify; this response automatically generates the screens within the ‘Operations Controlled by Others’ folder in the PMN navigation tree upon clicking the ‘Next’ button. Select the ‘No’ radio button if you do not have any sites controlled by others to identify. An error message displays if a site controlled by others displays within the navigation tree and the ‘No’ radio button is selected.

Exhibit 4-34 shows a screen capture of the 'Site Information' screen:

Exhibit 4-34: Site Information Screen

The screenshot displays the 'Site Information' screen within the CDX application. The page title is 'Premanufacture Notice (Primary PMN-20130619-10:03:48 EDT) > Submitter Controlled Site Information'. The main content area contains two questions: '1. Do you have sites controlled by the submitter?' and '2. Do you have sites controlled by others?'. Each question has radio buttons for 'Yes' and 'No'. Below the questions are 'Previous' and 'Next' buttons. The 'Next' button is highlighted with a red border. The left navigation pane shows a tree structure with 'Site Information' selected. The bottom of the screen features a blue bar with 'Upload XML', 'Validate', 'Save', and 'Preview' buttons, and a footer with links to CDX, MyCDX, EPA, and other resources.

Navigation: Click the 'Next' button to navigate to the 'Sites Controlled By Others' screen. You can also access this screen by clicking the 'Sites Controlled By Others' link within the navigation tree.

4.22 Sites Controlled By Others

You can navigate to the 'Sites Controlled By Others' screen by clicking the 'Next' button from the 'Site Information' screen. You can also access this screen by clicking the 'Sites Controlled By Others' link within the navigation tree.

The 'Sites Controlled By Others' screen captures information about known and/or unknown sites not controlled by the submitter. Complete the 'Operations Controlled By Others' section within the navigation tree for typical processing or use operations involving the new chemical substance at sites not controlled by the submitter. Importers do not have to complete this section for operations outside the U.S.; however, you must report any processing or use activities after

import. Complete a separate 'Operations Controlled By Others' section for each type of processing, or use operation involving the new chemical substance. If the same operation is performed at more than one site, describe the typical operation common to these sites. The screen first captures whether there is any data for other controlled sites. If there is no data for sites controlled by others, the screen will not update and the option of selecting the 'Next' button is available. If there is data for sites controlled by others, an additional question will appear. The screen then captures whether site-specific data for the chemical is known for 'Sites Controlled By Others.' If you indicate that there is site-specific data by selecting the 'Yes' radio button, the screen will generate a text field to enter the '# of unknown sites' and a 'CBI' checkbox to claim the number of unknown sites as confidential. If there is no site-specific data, the screen displays a text box to capture the number of unknown sites.

Please note that in IE 7, after adding a site, the '# of unknown sites' text box label disappears but the text field and 'CBI' checkbox are still displayed.

- **Do you have any sites controlled by others for which you have information to report?:** If you select 'Yes' the screen will display the question 'Do you have site-specific information?' If you select 'No' only the listed navigation options will display. If an operation controlled by others displays within the navigation tree, the 'Yes' radio button must be selected for this question.
- **Do you have site-specific information?:** If you select 'Yes' the screen generates fields to capture specific site information. If you select 'No,' an error message displays indicating that any other sites you have will be deleted.
- **# of unknown sites:** Enter the number of unknown sites; zero (0) is an acceptable value. This is a required field.
- **CBI:** Check the 'CBI' checkbox to claim the number of unknown sites as confidential.

Exhibit 4-35 shows a screen capture of the ‘Sites Controlled By Others’ screen:

Exhibit 4-35: Sites Controlled By Others Screen

The screenshot shows the GSPP (Global Site Profile) interface. The user is logged in as Jane Doe, Primary Support. The page title is "SITES CONTROLLED BY OTHERS". The form contains the following elements:

- Navigation tabs: Home, Forms, Resources.
- Left sidebar: Premanufacture Notice, Primary Support, Worksheet - Continued (Optional), Remove, Copy, Add Consolidated Chemical, Site Information, Submitter Controlled Site Information, Sites Controlled By Others, Submitter Controlled Operations, Site Alias 1, Submitter Operation Information, Occupational Exposures, Environmental Releases, Remove, Add Operation, Operations Controlled by Others.
- Main content area:
 - Question: "Do you have any sites controlled by others for which you have information to report?" with radio buttons for Yes (selected) and No.
 - Section: **B.1.a. Operation description**
 - Question: "Do you have site-specific information?" with radio buttons for Yes (selected) and No.
 - Text: "The '# of Unknown Sites' field is required. Enter '0' if none."
 - Field: "# of unknown sites:" with an input box.
 - Buttons: "Previous" and "Next" (highlighted with a red box).
 - Checkbox: "CBI:".
- Footer: "Upload XML", "Validate", "Save", "Preview", and navigation links: CDX Homepage, MyCDX Homepage, EPA Homepage, Terms and Conditions, Privacy Notice, CDX Helpdesk: (888) 890-1995.

Navigation: Click the ‘Next’ button to navigate to the ‘Optional Pollution Prevention’ screen if the submitter controlled operations screens have not been generated. You can access the ‘Submitter Operation Information’ screen by clicking the ‘Submitter Operation Information’ link under the ‘Submitter Controlled Operations’ folder within the navigation tree.

4.23 Submitter Operation Information

You can navigate to the ‘Submitter Operation Information’ screen by clicking the ‘Next’ button from the ‘Sites Controlled By Others’ screen. You can also access this screen by clicking the ‘Submitter Operation Information’ link under the ‘Submitter Controlled Operations’ folder within the navigation tree. You can add additional sites by clicking the ‘Add Operation’ link within the navigation tree under the ‘Submitter Controlled Operations’ folder.

The ‘Submitter Operation Information’ screen captures information about an operation that occurs at a particular site or group of sites. You are asked a series of questions and, based on the

responses, information will display to fill out a series of fields about a specific operation. The guided approach is designed to eliminate errors and ensure the completion of all relevant sections for a site. You will be able to enter an operation alias to identify the operation. Importers are not required to complete this section for operations outside the U.S.; however, any industrial processing or use operation that takes place after import must be described. It should be noted that Toll manufacturing sites are considered to be sites controlled by the submitter.

You will first be asked to select the site(s) and chemical(s) for the operation and will then select the applicable operation type checkboxes.

If you select an option other than 'Use' for the operation type, you will be asked whether the chemical is manufactured or processed as a 'batch' or 'continuous' process. Based on the property selected, fill in the relevant information. If you select the 'Use' operation type, then there will be no further options on this screen. The follow-up screens are used to capture specific information about the operation type process.

The system provides a text box for describing the process description. Additional process information may also be included in an attachment. In the process description, include the following information: (1) Diagram the major unit operation steps and chemical conversions. Include interim storage and specify transport containers (e.g., 5-gallon pails, 55-gallon drum, rail car, tank truck, etc.). (2) Provide the identity, approximate weight (by kilograms (kg) kg/day or kg/batch on a new chemical substance basis), and entry point of all starting materials, feedstocks (including reactants, solvents, catalysts, etc.), products, recycle streams, and wastes. Include cleaning chemicals (note frequency if not used daily or per batch). (3) Identify by number the points of release, including small or intermittent releases, to the environment of the new chemical substance. If releasing to two media at the same step, assign a second release number for the second medium.

You may claim the process description or attachment as CBI. If an attached document is claimed as CBI, the system requires a sanitized version of the attached document to be uploaded. To access or edit previously attached documents, click the file name of the document within the 'File Name' column of the document table.

The document table displays the file name and file extension of the document, the document description, the number of pages in the document, and whether a sanitized copy of the document was attached. Click the 'Delete' icon (✖) under the 'Actions' column to delete unwanted documents.

- **Operation Alias:** Enter the operation alias. This field makes it easier to distinguish between operations in the navigation tree when there is more than one operation. This is a required field if the form is pending a Joint Submission or a Letter of Support.
- **Add Facility:** Click the button to generate the 'Add Facility' pop-up window and select a site from the drop-down menu to add to the 'Submitter Operation Information' screen. Refer to **Section 3.9** for additional details regarding the add facility functionality.
- **Site Name:** Displays the site name.
- **Address:** Displays the site address.
- **City:** Displays the site city.
- **State:** Displays the site state.

- **Postal Code:** Displays the site postal code.
- **CBI:** Indicates the CBI status of the site by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon (✖) to delete a site from the table. A warning message displays to confirm the deletion of the site.
- **Select the chemical(s) that this submission pertains to:** Displays all consolidated chemicals in a PMN submission.
- **CBI:** Check the ‘CBI’ checkbox to claim the operation type as confidential.
- **Manufacturing:** Check the ‘Manufacturing’ checkbox to indicate that manufacturing is taking place at the site. Checking the ‘Manufacturing’ checkbox generates the ‘Is it batch or continuous’ radio buttons.
- **Processing:** Check the ‘Processing’ checkbox to indicate that processing is taking place at the site. Checking the ‘Processing’ checkbox generates the ‘Is it batch or continuous’ radio buttons.
- **Use:** Check the ‘Use’ checkbox to indicate that chemical use is taking place at the site.
- **CBI:** Check the ‘CBI’ checkbox to claim the amount and duration information as confidential.
- **Is it batch or continuous?:** Select the ‘Batch’ radio button to indicate that the chemical is produced in a batch process. Select the ‘Continuous’ radio button to indicate that the chemical is produced on a continuous basis. Either the ‘Batch’ or ‘Continuous’ radio button is required to be selected.
- **Max kg/batch:** Enter the maximum number of kilograms produced per batch. This field only displays when you select the ‘Batch’ radio button and is a required field. This field accepts decimal values.
- **Hours/batch:** Enter the hours of manufacturing or processing time needed per batch. This field only displays when you select the ‘Batch’ radio button and is a required field. This field accepts decimal values.
- **Batches/year:** Enter the number of batches produced per year. This field only displays when you select the ‘Batch’ radio button and is a required field. This field accepts decimal values.
- **Max kg/day:** Enter the maximum number of kg of a chemical produced per day. This field only displays when you select the ‘Continuous’ radio button and is a required field. This field accepts decimal values.
- **Hours/day:** Enter the number of hours per day that the chemical is processed or manufactured; this value cannot exceed 24. This field only displays when you select the ‘Continuous’ radio button and is a required field. This field accepts decimal values.
- **Days/year:** Enter the number of days per year that the chemical is processed or manufactured; this value cannot exceed 365. This field only displays when you select the ‘Continuous’ radio button, and is a required field. This field accepts decimal values.
- **CBI:** Check the ‘CBI’ checkbox to claim the process description as confidential.
- **Process Description:** Enter the process description. In the ‘Process Description’ text box, or an attachment, address the following items: (1) Diagram the major unit operation steps and

chemical conversions. Include interim storage and transport containers (specify – e.g., 5-gallon pails, 55-gallon drum, rail car, tank truck, etc.). (2) Provide the identity, the approximate weight (by kg/day or kg/batch on a 100% new chemical substance basis), and entry point of all starting materials and feedstocks (including reactants, solvents, catalysts, etc.), and of all products, recycle streams, and wastes. Include cleaning chemicals (note frequency if not used daily or per batch). (3) Identify by number the points of release, including small or intermittent releases, to the environment of the new chemical substance. If releasing to two media at the same step, assign a second release number for the second medium. Either this field is required or a document must be attached.

- **Attach Document:** Click the ‘Attach Document’ button to generate the ‘Attach Documents’ pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of the file that is uploaded on the ‘Attach Documents’ pop-up window.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion.

Navigation: Click the ‘Next’ button to navigate to the ‘Occupational Exposures’ screen. You can also access this screen by clicking the ‘Occupational Exposures’ link within the navigation tree.

4.24 Occupational Exposures

You can navigate to the ‘Occupational Exposures’ screen by clicking the ‘Next’ button from the ‘Submitter Operation Information’ screen. You can also access this screen by clicking the ‘Occupational Exposures’ link within the navigation tree.

Click the ‘Add’ button to generate an expandable/collapsible field set to enter occupational exposure information. The application displays fields for you to enter information for ‘Worker Category (1),’ ‘Worker Activity (1),’ ‘Protective Equipment/Engineering Controls (3),’ ‘Physical Form(s) (5),’ ‘% New Substance (5),’ ‘# Workers Exposed (8),’ ‘Maximum Duration Hours/Day (10),’ and ‘Maximum Duration Days/Year (11).’ EPA is attempting to estimate exposure levels, the number of workers potentially exposed, and possible routes and duration of exposure to the PMN substance. Work with your plant engineers to develop accurate data; review the CBI status of data you provide.

Information entered into the ‘Maximum Duration Hours/Day (10)’ and ‘Maximum Duration Days/Year (11)’ fields must be a positive whole number or decimal. The system does not allow special characters to be saved in these fields. If further explanation is required regarding duration of exposure, please provide this in an attachment.

- **Add:** Click the ‘Add’ button to generate the ‘Occupational Exposure – Submitter Controlled Sites’ expandable/collapsible field set.
- **Cancel:** Click the ‘Cancel’ link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and remove the field set. The ‘Cancel’ link is displayed when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the ‘Edit’ link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The ‘Edit’ link is displayed when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the ‘Delete’ icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion. The ‘Delete’ icon (✖) is displayed when the user has clicked the ‘Add’ button.
- **Expand All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to collapse a series of field sets.
- **Worker Category (1):** Select the category of work from the drop-down menu in which a worker may be exposed to a chemical substance. This is a required field.
- **CBI:** Check the ‘CBI’ checkbox to claim worker category information as confidential.
- **Worker Activity (1):** Select the worker activity (e.g. bag dumping, tote filling, unloading drums, sampling, cleaning, etc.) in which workers may be exposed to a chemical substance. Please note that if you are populating this field via an XML file created from the ePMN thick client, this drop-down menu will not populate. This is a required field.

- **Protective Equipment/Engineering Controls (3):** Enter the protective equipment/engineering controls used to protect workers. This is a required field.
- **CBI:** Check the ‘CBI’ checkbox to claim the protective equipment/engineering controls information as confidential.
- **Binding:** Check the ‘Binding’ checkbox to claim the protective equipment/engineering controls information as binding.
- **Physical Form(s) (5):** Enter the physical forms(s) of the new chemical substance (e.g., solid, crystal, granule, powder, or dust) and percentage of new chemical substance (if part of a mixture) at the time of exposure. Be as specific as possible on the physical form (e.g., is the PMN substance isolated as a crystalline or amorphous powder, wet cake, flake solid, granular solid, or a fused solid?). If data on particle size of solids are available, it should be included as an attachment. For wet cakes, a percent moisture estimate may prevent EPA from making an estimate that is too conservative. Please pay particular attention to the information within if this field is populated via XML file. The information contained within the ‘Physical Forms and % New Substance’ field in the thick client separates into two (2) separate fields, the ‘Physical Form(s)’ field and ‘% New Substance’ field when these fields are populated via an XML file generated from the ePMN thick client. This is a required field.
- **Binding:** Check the ‘Binding’ checkbox to claim the physical form(s) information as binding.
- **% New Substance (5):** Enter the percentage of new chemical substance (if part of a mixture) at the time of exposure. A value of zero (0) entered in this field will display an error. Please pay particular attention to the information within if this field is populated via XML file. The information contained within the ‘Physical Forms and % New Substance’ field in the thick client separates into two (2) separate fields, the ‘Physical Form(s)’ field and ‘% New Substance’ field when these fields are populated via an XML file generated from the ePMN thick client. This is a required field that accepts decimal values.
- **Binding:** Check the ‘Binding’ checkbox to claim the percentage new substance information as binding.
- **# Workers Exposed (8):** Enter the number of workers exposed. Estimate the maximum number of all workers involved in each activity for all sites combined. This is a required field.
- **CBI:** Check the ‘CBI’ checkbox to claim the number of workers exposed as confidential.
- **Hours/Day (10):** Enter the maximum duration occupational exposure occurs for the activity for any worker in hours per day; this field allows decimal values. A value of zero (0) entered in this field will display an error. This is a required field.
- **Days/Year (11):** Enter the maximum duration occupational exposure occurs for the activity for any worker in days per year; this field allows decimal values. A value of zero (0) entered in this field will display an error. This is a required field.
- **CBI:** Check the ‘CBI’ checkbox to claim the maximum duration values as confidential.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the ‘Save’ icon () located within the bottom action bar to successfully save the entered information within the field set before being able

to navigate away from the screen using the ‘Previous’ and ‘Next’ buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.

Exhibit 4-38 shows a screen capture of the ‘Occupational Exposures’ screen (Scroll 1):

Exhibit 4-38: Occupational Exposures Screen (Scroll 1)

Exhibit 4-39 shows a screen capture of the ‘Occupational Exposures’ screen (Scroll 2):

Exhibit 4-39: Occupational Exposures Screen (Scroll 2)

The screenshot displays the 'Occupational Exposures' screen within the GSPP (Global Site Profile) application. The interface is organized into several sections:

- Header:** Shows the GSPP logo, navigation tabs (Home, Forms, Resources), and user information (Logged in as: Jane Doe, Primary Support) with a Log Out button.
- Navigation Tree (Left):** A hierarchical menu with categories like 'Premanufacture Notice Primary Support', 'Site Information', 'Submitter Controlled Operations', and 'Operations Controlled by Others'. The 'Occupational Exposures' link is highlighted.
- Main Form Area:** Contains the following fields and controls:
 - Worker Category (1):** A dropdown menu currently showing 'Loading into Transport Containers/Vessels'.
 - Worker Activity (1):** A dropdown menu.
 - Protective Equipment/ Engineering Controls (3):** A large text area for input, with checkboxes for 'CBI' and 'Binding' to its right.
 - Physical Form(s) (5):** A text input field.
 - % New Substance (5):** A text input field followed by a percentage sign.
 - # Workers Exposed (8):** A text input field.
 - Maximum Duration:** Two sub-fields: 'Hours/Day (10):' and 'Days/Year (11):', each with a text input field.
- Buttons:** A 'Save' button is located below the form fields. Below the form, there is an instruction: 'Click the **Add** button to add an occupational exposure.' followed by an 'Add' button. At the bottom of the form area, there are 'Previous' and 'Next' buttons. The 'Next' button is highlighted with a red rectangular box.
- Footer:** A dark blue bar contains an 'Upload XML' button, a 'Validate' button with a green checkmark icon, a 'Save' button with a floppy disk icon, and a 'Preview' button with a monitor icon. Below this bar is a footer with links: CDX Homepage | MyCDX Homepage | EPA Homepage | Terms and Conditions | Privacy Notice | CDX Helpdesk: (888) 890-1995.

Navigation: Click the ‘Next’ button to navigate to the ‘Environmental Releases’ screen. You can also access this screen by clicking the ‘Environmental Releases’ link within the navigation tree.

4.25 Environmental Releases

You can navigate to the ‘Environmental Releases’ screen by clicking the ‘Next’ button from the ‘Occupational Exposures’ screen. You can also access this screen by clicking the ‘Environmental Releases’ link within the navigation tree.

The ‘Environmental Releases’ screen captures information about the environmental release and disposal status of a particular site. The information on exposure and environmental release is related to the flow diagram/process description on the ‘Submitter Operation Information’ screen. This page is duplicated and populated for each flow diagram supplied in the PMN (manufacturing, each processing description, and any use diagrams). The information provided should focus on the PMN substance. EPA reviewers pay particular attention to human exposure and environmental release data under their TSCA mandate to protect against unreasonable risks from new chemical substances. In the absence of this information, EPA will make its own estimates of worker exposure and environmental release, which are usually conservative. You should present data that is accurate and as complete as possible.

The page displays an ‘Add’ button to add an expandable/collapsible field set to enter ‘Environmental Release and Disposal – Submitter Controlled Sites’ information. The page displays fields to enter information for ‘Release Number,’ the amount of the new substance released ‘to environment’ and the amount of new substance released ‘to control technology,’ ‘Media of Release,’ ‘Control Technology Description,’ and ‘Release after Control Technology.’ You will be asked to enter information concerning the release to water, such as Publicly Owned Treatment Works (POTW), navigable waterways, and others.

- **Add:** Click the ‘Add’ button to generate the ‘Occupational Exposure – Submitter Controlled Sites’ expandable/collapsible field set.
- **Cancel:** Click the ‘Cancel’ link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and remove the field set. The ‘Cancel’ link is displayed when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the ‘Edit’ link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The ‘Edit’ link is displayed when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the ‘Delete’ icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion. The ‘Delete’ icon (✖) is displayed when the user has clicked the ‘Add’ button.
- **Expand All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to collapse a series of field sets.
- **Release Number (1):** Enter the number of each release point identified in the process description on the ‘Submitter Operation Information’ screen. This is a required field.
- **CBI:** Check the ‘CBI’ checkbox to claim the release number information as confidential.

- **Amount of new substance released to Environment (2a):** Enter the amount of new substance released to environment. Release estimates should be consistent with the release levels shown on the preceding flow diagram. Include intermittent release estimates from cleaning of equipment and transportation containers, even if cleaned off-site. Either the ‘Amount of new substance released to Environment’ or the ‘Amount of new substance released to Control Technology’ field should be populated.
- **Amount of new substance released to Environment kg/day:** Select the radio button to claim that the amount of new substance released to the environment is measured in kilograms per day.
- **Amount of new substance released to Environment kg/batch:** Select the radio button to claim that the amount of new substance released to the environment is measured in kilograms per batch.
- **Amount of new substance released to Control Technology (2b):** Enter the amount of new substance released to control technology. Release estimates should be consistent with the release levels shown on the preceding flow diagram. Include intermittent release estimates from cleaning of equipment and transportation containers, even if cleaned off-site. Either the ‘Amount of new substance released to environment’ or the ‘Amount of new substance released to Control Technology’ field should be populated.
- **Amount of new substance released to Control Technology kg/day:** Select the radio button to claim that the amount of new substance released to control technology is measured in kilograms per day.
- **Amount of new substance released to Control Technology kg/batch:** Select the radio button to claim that the amount of new substance released to control technology is measured in kilograms per batch.
- **Media of Release (4):** Identify the media of release (i.e., stack air, fugitive air, surface water, on-site or off-site land or incineration, POTW, or other (please specify)) to which the new substance will be released from that release point from the drop-down menu. This is a required field.
- **CBI:** Check the ‘CBI’ checkbox to claim the media of release as confidential.
- **If Other, specify:** Enter the other media of release when you select ‘Other’ from the ‘Media of Release’ drop-down menu.
- **Control Technology Description (5a):** Enter the control technology description. Describe control technology, if any, and control efficiency used to limit the release of the new substance to the environment. For releases disposed of on land, characterize the disposal method and state whether it is approved for disposal of Resource Conservation and Recovery Act (RCRA) hazardous waste. For each site, describe any additional disposal methods that will be used and whether the waste is subject to secondary or tertiary on-site treatment. Indicate if you want this information to bind. Check the ‘CBI’ checkbox if the information is confidential. This is a required field.
- **Binding:** Check the ‘Binding’ checkbox to claim the control technology description as binding.

- **Release after Control Technology (5b):** Enter the release after control technology. Estimate the amount released to the environment after control technology (in kilograms per day). This is a required field.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the 'Save' icon () located within the bottom action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the 'Previous' and 'Next' buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.
- **POTW Name:** Enter the POTW (publicly owned treatment works) name.
- **POTW NPDES #:** Enter the POTW National Pollutant Discharge Elimination System (NPDES) number.
- **POTW CBI:** Check the 'CBI' checkbox to claim the POTW as confidential.
- **Navigable Waterway Name:** Enter the navigable waterway name.
- **Navigable Waterway NPDES #:** Enter the navigable waterway NPDES number.
- **Navigable Waterway CBI:** Check the 'CBI' checkbox to claim the navigable waterway as confidential.
- **Other (Specify) Name:** Enter the name of the other destination of release to water.
- **Other (Specify) CBI:** Check the 'CBI' checkbox to claim the other destination of release to water as confidential.

Exhibit 4-40 shows a screen capture of the 'Environmental Releases' screen (Scroll 1):

Exhibit 4-40: Environmental Releases Screen (Scroll 1)

The screenshot displays the 'Environmental Releases' screen within the GSPP (Global Site Profile) application. The user is logged in as Jane Doe, Primary Support. The page title is 'Premanufacture Notice (Primary PMN-20130913-22:21:41 EDT) > Environmental Releases'. The main content area is titled 'A.3. Environmental Release and Disposal - Submitter Controlled Sites' and contains a form with the following fields and options:

- Release Number (1):** A text input field.
- Amount of new substance released:**
 - to Environment (2a):** A text input field with radio buttons for 'Kg/Day' and 'Kg/Batch'.
 - to Control Technology (2b):** A text input field with radio buttons for 'Kg/Day' and 'Kg/Batch'.
- Media of Release (4):** A dropdown menu.
- Control Technology Description (5a):** A large text area.
- Release after Control Technology (5b):** A text input field.
- CBI Binding:** A checkbox.
- Save:** A button highlighted with a red box.

Below the form, there is a section titled 'A.3.7. Mark the destinations of release to water' with the following fields:

- POTW:** Name: [input], NPDES #: [input], CBI: [checkbox]
- Navigable Waterway:** Name: [input], NPDES #: [input], CBI: [checkbox]

The footer of the page includes a navigation bar with links to 'CDX Homepage', 'MyCDX Homepage', 'EPA Homepage', 'Terms and Conditions', 'Privacy Notice', and 'CDX Helpdesk: (888) 890-1995'. A status bar at the bottom contains buttons for 'Upload XML', 'Validate', 'Save', and 'Preview'.

Exhibit 4-41 shows a screen capture of the ‘Environmental Releases’ screen (Scroll 2):

Exhibit 4-41: Environmental Releases Screen (Scroll 2)

Navigation: Click the ‘Next’ button to navigate to the ‘Industrial Sites Controlled By Others’ screen. You can also access this screen by clicking the ‘Industrial Sites Controlled By Others’

link within the navigation tree. Click the 'Add Operation' link under the 'Operations Controlled By Others' folder within the navigation tree to generate the screens for an operation controlled by others.

4.26 Industrial Sites Controlled By Others

Click the 'Add Operation' link under the 'Operations Controlled By Others' folder within the navigation tree to generate the screens for an operation controlled by others. You can navigate to this screen by clicking the 'Next' button from the 'Environmental Releases' screen. You can also access this screen by clicking the 'Industrial Sites Controlled By Others' link within the navigation tree under the 'Operations Controlled by Others' folder.

The 'Industrial Sites Controlled By Others' screen captures information about activities occurring at a particular site or group of sites. You will be able to enter an operation alias to identify the operation. Importers are not required to complete this section for operations outside the U.S.; however, any industrial processing or use operation that takes place after import must be described.

You will first be asked to select the site(s) and chemical(s) for the operation. You will then proceed to the next screen to enter resources concerning the operation. The system provides a field to add an operation process description.

The site(s) and chemical(s) for the operation must be identified. The system then navigates to the next screen to enter resources concerning the operation. The screen also displays a field to add an operation process description. In the operation description, include the following information: (1) Diagram the major unit operation steps and chemical conversions, including interim storage and specify transport containers (e.g., 5-gallon pails, 55-gallon drums, rail cars, tank trucks, etc.). On the diagram, identify by letter and briefly describe each worker activity. (2) Either in the diagram or in the text field, provide the identity, the approximate weight (by kg/day or kg/batch, on a 100% new chemical substance basis), and entry point of all feedstocks (including reactants, solvents and catalysts, etc.), products, recycle streams, and wastes. Include cleaning chemicals (note frequency if not used daily or per batch). (3) Either in the diagram or in the text field, identify by number the points of release, including small or intermittent releases, to the environment of the new chemical substance.

- **Operation Alias:** Enter the operation alias. This is a required field if the form is pending a Joint Submission or a Letter of Support.
- **Add Facility:** Click the button to generate the 'Add Facility' pop-up window and select a site from the drop-down menu to add to the 'Industrial Sites Controlled By Others' screen. Refer to **Section 3.9** for additional details regarding the add facility functionality.
- **Site Name:** Displays the site name.
- **Address:** Displays the site address.
- **City:** Displays the site city.
- **State:** Displays the site state.
- **Postal Code:** Displays the site postal code.
- **CBI:** Indicates the CBI status of the site by displaying either a 'Y' or an 'N.'

- **Actions:** Click the ‘Delete’ icon (✖) to delete a site from the table. A warning message confirming deletion of the site displays.
- **Select the chemical(s) that this submission pertains to:** Displays all consolidated chemicals in a PMN form.
- **Operation Description:** Enter the operation process description. Cover the following items:
(1) Diagram the major unit operation steps and chemical conversions, including interim storage and transport containers (specify – e.g., 5-gallon pails, 55-gallon drums, rail cars, tank trucks, etc.). On the diagram, identify by letter and briefly describe each worker activity.
(2) Either in the diagram or in the text field, provide the identity, the approximate weight (by kg/day or kg/batch, on a 100% new chemical substance basis), entry point of all feedstocks (including reactants, solvents and catalysts, etc.), all products, recycle streams, and wastes. Include cleaning chemicals (note frequency if not used daily or per batch).
(3) Either in the diagram or in the text field, identify by number the points of release, including small or intermittent releases, to the environment of the new chemical substance. Either this field is required or a document must be attached.
- **CBI:** Check the ‘CBI’ checkbox to claim the operation description as confidential.
- **Attach Document:** Click the ‘Attach Document’ button to generate the ‘Attach Documents’ pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of the document that was uploaded on the ‘Attach Documents’ pop-up window.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm deletion of the document.

Navigation: Click the ‘Next’ button to navigate to the ‘Exposures/Releases’ screen. You can also access this screen by clicking the ‘Exposures/Releases’ link within the navigation tree.

4.27 Exposures/Releases

You can navigate to the ‘Exposures/Releases’ screen by clicking the ‘Next’ button from the ‘Industrial Sites Controlled By Others’ screen. You can also access this screen by clicking the ‘Exposures/Releases’ link within the navigation tree under the ‘Operations Controlled By Others’ folder.

The screen provides buttons to add expandable/collapsible field sets for worker exposure release information and environmental disposal information. The screen displays fields in the worker exposure expandable/collapsible field set to enter information for ‘# Workers Exposed (2),’ ‘Duration of Exposure Hours/Day (4a),’ ‘Duration of Exposure Days/Year (4b),’ ‘Protective Equipment/Engineering Controls (6),’ ‘Physical Form (6),’ ‘% New Substance (6),’ and ‘% in Formulation (7).’ The screen displays fields in the environmental release expandable/collapsible field set to enter information for ‘Release Number (9),’ the amount of the new substance released directly ‘to environment (10a),’ the amount of new substance released ‘into control technology (10b),’ ‘Media of Release (12),’ and ‘Control Technology (12).’

Information entered into the ‘Duration of Exposure Hours/Day (4a)’ and ‘Duration of Exposure Days/Year (4b)’ fields must be a positive whole number or decimal. The system does not allow special characters to be saved in these fields. If further explanation is required regarding duration of exposure, please provide this in an attachment.

- **Add:** Click the ‘Add’ button to generate the ‘Worker Exposure’ expandable/collapsible field set.
- **Cancel:** Click the ‘Cancel’ link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and to remove a field set. The ‘Cancel’ link is displayed when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the ‘Edit’ link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The ‘Edit’ link is displayed when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the ‘Delete’ icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion.
- **Expand All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to collapse a series of field sets.
- **Letter of Activity (1):** Indicate the activities in which workers may be exposed to the specified substance.
- **CBI:** Check the ‘CBI’ checkbox to claim the letter of activity as confidential.

- **# Workers Exposed (2):** Enter an estimate of the number of workers exposed for all sites combined.
- **CBI:** Check the 'CBI' checkbox to claim the number of workers exposed as confidential.
- **Duration of Exposure Hours/Day (4a):** Enter an estimate of the typical duration of exposure per worker in hours/day. This field allows decimal values.
- **Duration of Exposure Days/Year (4b):** Enter an estimate of the typical duration of exposure per worker in days/year. This field allows decimal values.
- **CBI:** Check the 'CBI' checkbox to claim the duration of exposure hours/day and days/year as confidential.
- **Protective Equipment/Engineering Controls (6):** Enter a description of any protective equipment and engineering controls, if any, used to protect workers. Please pay particular attention to the information within if this field is populated via XML file. The information contained within the 'Protective Equipment/Engineering Controls/Physical Forms' field in the thick client separates into two (2) separate fields, the 'Protective Equipment/Engineering Controls' and 'Physical Forms' field when these fields are populated via an XML file generated from the ePMN thick client.
- **CBI:** Check the 'CBI' checkbox to claim the protective equipment/engineering controls information as confidential.
- **Physical Form (6):** Enter a description of physical forms of exposure. Please pay particular attention to the information populated in this field if this field is populated via XML file. The information contained within the 'Protective Equipment/Engineering Controls/Physical forms' field in the thick client separates into two (2) separate fields, the 'Protective Equipment/Engineering Controls' and 'Physical Forms' field when these fields are populated via an XML file generated from the ePMN thick client.
- **% New Substance (6):** Describe percentage new chemical substance (if in mixture).
- **% in Formulation (7):** Estimate the percent of the new substance as formulated when packaged or used as a final product.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the 'Save' icon () located within the bottom action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the 'Previous' and 'Next' buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.

Exhibit 4-43 shows a screen capture of the ‘Exposures/Releases’ screen (Scroll 1):

Exhibit 4-43: Exposures/Releases Screen (Scroll 1)

- **Add:** Click the ‘Add’ button to generate the ‘Environmental Disposal’ expandable/collapsible field set.

- **Release Number (9):** Enter the number of each release point from the process diagram previously entered.
- **CBI:** Check the 'CBI' checkbox to claim the release number information as confidential.
- **Amt New Substance Released Directly into Environment (10a):** Enter an estimate of the amount of the new substance released directly to the environment in Kg/Day or Kg/Batch.
- **Amt New Substance Released Directly into Environment Kg/Day:** Select the 'Kg/Day' radio button to indicate that the amount of substance released into environment measures in kilograms per day.
- **Amt New Substance Released Directly into Environment Kg/Batch:** Select the 'Kg/Batch' radio button to indicate that the amount of substance released into environment measures in kilograms per batch.
- **Amt New Substance Released Directly into Control Technology (10b):** Estimate the amount of the new substance released into control technology in Kg/Day or Kg/Batch.
- **Amt New Substance Released Directly into Control Technology Kg/Day:** Select the 'Kg/Day' radio button to indicate that the amount of substance released into control technology measures in kilograms per day.
- **Amt New Substance Released Directly into Control Technology Kg/Batch:** Select the 'Kg/Batch' radio button to indicate that the amount of substance released into control technology measures in kilograms per batch.
- **Media of Release (12):** Select a value from the drop-down menu to capture the media of release. The 'Media of Release' drop-down menu contains the following values: 'Fugitive Air,' 'Off-Site Incineration,' 'On-site Incineration,' 'On-site WWT,' 'POTW,' 'Stack Air,' 'Surface Water,' and 'Other,' that will be used to limit the release of the new substance to the environment. Please pay particular attention to the information within if this field is populated via XML file. The information contained within the 'Media of Release & Control Technology' field in the thick client separates into two (2) separate fields, the 'Media of Release' drop-down menu and 'Control Technology' field when these fields are populated via an XML file generated from the ePMN thick client.
- **If Other, specify:** Enter the other media of release.
- **CBI:** Check the 'CBI' checkbox to claim the media of release as confidential.
- **Control Technology (12):** Enter the control technology, if any, which will be used to limit the release of the new substance to the environment. Please pay particular attention to the information within if this field is populated via XML file. The information contained within the 'Media of Release & Control Technology' field in the thick client separates into two (2) separate fields, the 'Media of Release' drop-down menu and 'Control Technology' field when these fields are populated via an XML file generated from the ePMN thick client.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the 'Save' icon () located within the bottom action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the 'Previous' and 'Next' buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.

Exhibit 4-44 shows a screen capture of the ‘Exposures/Releases’ screen (Scroll 2):

Exhibit 4-44: Exposures/Releases Screen (Scroll 2)

The screenshot displays the 'Exposures/Releases' screen in the CDX system. At the top, the user is logged in as 'Jane Doe, Primary Support'. The main form area is titled 'Click Add to add a worker exposure' and contains several input fields:

- Release Number (9):** A text input field.
- Amt New Substance Released Directly into Environment (10a):** A text input field with radio buttons for 'Kg/Day' and 'Kg/Batch'.
- Amt New Substance Released Directly into Control Technology (10b):** A text input field with radio buttons for 'Kg/Day' and 'Kg/Batch'.
- Media of Release (12):** A dropdown menu.
- Control Technology (12):** A large text area.

Additional elements on the screen include a 'Save' button at the top, a 'CBI' checkbox, and 'Previous' and 'Next' navigation buttons at the bottom. A footer bar contains 'Upload XML', 'Validate', 'Save', 'Preview', and 'Submit' buttons. The bottom-most navigation bar includes links to CDX, MyCDX, EPA, and other resources.

Navigation: Click the 'Next' button to navigate to the 'Byproduct Information' screen. You can also access this screen by clicking the 'Byproduct Information' link within the navigation tree.

4.28 Byproduct Information

You can navigate to the 'Byproduct Information' screen by clicking the 'Next' button from the 'Exposures/Releases' screen. You can also access this screen by clicking the 'Byproduct Information' link under the 'Operations Controlled By Others' folder within the navigation tree.

The 'Byproduct Information' screen captures byproducts resulting from a particular site. The system displays fields to enter byproducts.

Please note in IE 7, the right side of the text box may be cut off.

- **CBI:** Check the 'CBI' checkbox to claim all byproducts as confidential.
- **Byproduct:** Enter byproducts that may result from the operation.
- **Actions:** Click the 'Save' icon () to save an entered byproduct. Click the 'Delete' icon () to delete a byproduct. Click the 'Add' icon () to add a byproduct. Click the 'Form' icon () to edit a saved byproduct.

Exhibit 4-45 shows a screen capture of the 'Byproduct Information' screen:

Navigation: Click the ‘Next’ button to navigate to the ‘Optional Pollution Prevention’ screen. You can also access this screen by clicking the ‘Optional Pollution Prevention’ link within the navigation tree.

4.29 Optional Pollution Prevention

You can navigate to the ‘Optional Pollution Prevention’ screen by clicking the ‘Next’ button from the ‘Byproduct Information’ screen. You can also access this screen by clicking the ‘Optional Pollution Prevention’ link within the navigation tree.

The ‘Optional Pollution Prevention’ screen provides fields for companies to enter data about their pollution prevention efforts. The company has the option of entering information as a free text field or as an attachment. The company can claim the information as confidential by checking the ‘CBI’ checkbox.

The system allows an uploaded document to be claimed as CBI. If a document is claimed as CBI, the system requires the sanitized version of the attached document to be uploaded. To access or edit previously attached documents, click the appropriate file name of the document within the ‘File Name’ column of the document table.

The attachment table displays the file name and file extension of the document, the document description, the number of pages the document contains, and the CBI status of the document. Click the 'Delete' icon (✖) located within the 'Actions' column to delete unwanted documents.

You may provide information not reported elsewhere in this form regarding your efforts to reduce or minimize potential risks associated with activities surrounding manufacturing, processing, use, and disposal of the PMN substance. Include new information pertinent to pollution prevention, including source reduction, recycling activities and safer processes or products available due to the new chemical substance. Source reduction includes the reduction in the amount or toxicity of chemical wastes by technological modification, process and procedure modification, product reformulation, and/or raw materials substitution. Recycling refers to the reclamation of useful chemical components from wastes that would otherwise be treated or released as air emissions or water discharges, or land disposal. Quantitative or qualitative descriptions of pollution prevention, source reduction and recycling should emphasize potential risk reduction in addition to compliance with existing regulatory requirements. EPA is interested in the information to assess overall net reductions in toxicity or environmental releases and exposures, not the shifting of risks to other media (e.g., air to water) or non-environmental areas (e.g., occupational or consumer exposure). To the extent known, information about the technology being replaced will assist EPA in its relative risk determination. In addition, information on the relative cost or performance characteristics of the PMN substance to potential alternatives may be provided.

Describe the expected net benefits, such as:

- (1) An overall reduction in risk to human health or the environment;
- (2) A reduction in the generation of waste materials through recycling, source reduction or other means;
- (3) A reduction in the use of hazardous starting materials, reagents, or feedstocks;
- (4) A reduction in potential toxicity, human exposure and/or environmental release; or
- (5) The extent to which the new chemical substance may be a substitute for an existing substance that poses a greater overall risk to human health or the environment.

EPA strongly encourages submitters to provide pollution prevention data in their notices, as this information assists the Agency in balancing the benefits of a PMN substance against its unique risks.

While Agency staffers frequently receive information on the benefits of the PMN substance with respect to its use(s), data on pollution prevention effects are rarely included. This section should be utilized to indicate to EPA benefits in terms of the raw materials incorporated, the manufacturing process, emission reductions, less toxic waste byproducts, or lower risks upon end use and disposal. You should consider the entire life cycle of the PMN substance in your evaluation.

Also consider opportunities for product stewardship or other risk management controls that could significantly reduce risk characteristics of the new substance (e.g., disposal techniques that can be easily implemented and substantially reduce waste toxicity).

Initiatives in the New Chemicals Program such as Environmental Technology Initiative (ETI) for Chemicals, and the Pollution Prevention Recognition Project, are geared towards incorporating

this type of information into the Agency's risk management decision making and recognizing innovative chemical design or technological innovation that shows potential for environmental and human health benefits.

Describe any pollution prevention benefits here, and indicate if this information is confidential business information. Attempt to quantify the expected benefits to the extent possible and avoid exaggeration and highly speculative statements. The following questions can be used to assess pollution prevention benefits:

- (1) Are there pollution prevention benefits associated with the new PMN chemical?
- (2) Does it allow reduction of elimination of (more) toxic solvents?
- (3) Does it reduce disposal to land, or in safer forms, compared to the chemistry it replaces?
- (4) Can it be recycled more easily than existing materials?
- (5) Does your manufacturing process eliminate or reduce the use/release of hazardous substances?

- **Please [click here](#) to review additional information that should be included on this page:** Click the link to display additional information regarding the pollution information.
- **Check here to claim this information as CBI:** Check the 'Check here to claim this information as CBI' checkbox to claim the pollution prevention information as confidential.
- **Optional Pollution Prevention text box:** Enter information about pollution prevention in this field.
- **Attach Document:** Click the 'Attach Document' button to generate the 'Attach Documents' pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of a document that is uploaded on the 'Attach Documents' pop-up window. Click the file name link to navigate to the 'Attach Documents' pop-up window to make any edits to an attached document.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion.

Navigation: Click the ‘Next’ button to navigate to the ‘Additional Attachments’ screen. You can also access this screen by clicking the ‘Additional Attachments’ link within the navigation tree.

4.30 Additional Attachments

You can navigate to the ‘Additional Attachments’ screen by clicking the ‘Next’ button from the ‘Optional Pollution Prevention’ screen. You can also access this screen by clicking the ‘Additional Attachments’ link within the navigation tree.

The ‘Additional Attachments’ screen provides a table for you to add additional attachments that have not been incorporated into the form. This screen allows documents that did not have a suitable place in the application to be uploaded.

- Please [click here](#) to view a list of commonly attached documents and where they should be attached: Click the link to display a list of documents and where they should be attached.
- **Attach Document:** Click the ‘Attach Document’ button to display the ‘Attach Documents’ pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.

- **File Name:** Displays the file name and file extension of a document that is uploaded on the 'Attach Documents' pop-up window. Click the file name link to view, open, or make edits to the document.
- **Description:** Displays the description associated with a document.
- **Pages:** Displays the number of pages a document contains.
- **Date:** Displays the date a document was uploaded.
- **CBI:** Indicates the CBI status of a document by displaying either a 'Y' or an 'N.'
- **Action:** Click the 'Delete' icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion.

Exhibit 4-47 shows a screen capture of the 'Additional Attachments' screen:

Exhibit 4-47: Additional Attachments Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Attachment Summary’ screen. You can also access this screen by clicking the ‘Attachment Summary’ link within the navigation tree.

4.31 Attachment Summary

You can navigate to the ‘Attachment Summary’ screen by clicking the ‘Next’ button from the ‘Additional Attachments’ screen. You can also access this screen by clicking the ‘Attachment Summary’ link within the navigation tree.

The ‘Attachment Summary’ screen displays a summary of the documents attached to the PMN form. The attachment table displays the section of the form a document is associated with, file name and file extension of a document, the document description, number of pages in a document, date attached, and whether the document is CBI.

- **Section:** Displays the section of the PMN form with which the attached document is associated.
- **File Name:** Displays the file name and file extension of the documents that were uploaded on the ‘Attach Documents’ pop-up window.

- **Description:** Displays the description of a document that was uploaded on the ‘Attach Documents’ pop-up window.
- **Pages:** Displays the number of pages in a document that was uploaded on the ‘Attach Documents’ pop-up window.
- **Date:** Displays the upload date of a document that was uploaded on the ‘Attach Documents’ pop-up window.
- **CBI:** Indicates the CBI status of a document by displaying either a ‘Y’ or an ‘N.’

Exhibit 4-48 shows a screen capture of the ‘Attachment Summary’ screen:

Exhibit 4-48: Attachment Summary Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Optional Cover Letter’ screen. You can also access this screen by clicking the ‘Optional Cover Letter’ link within the navigation tree.

4.32 Optional Cover Letter

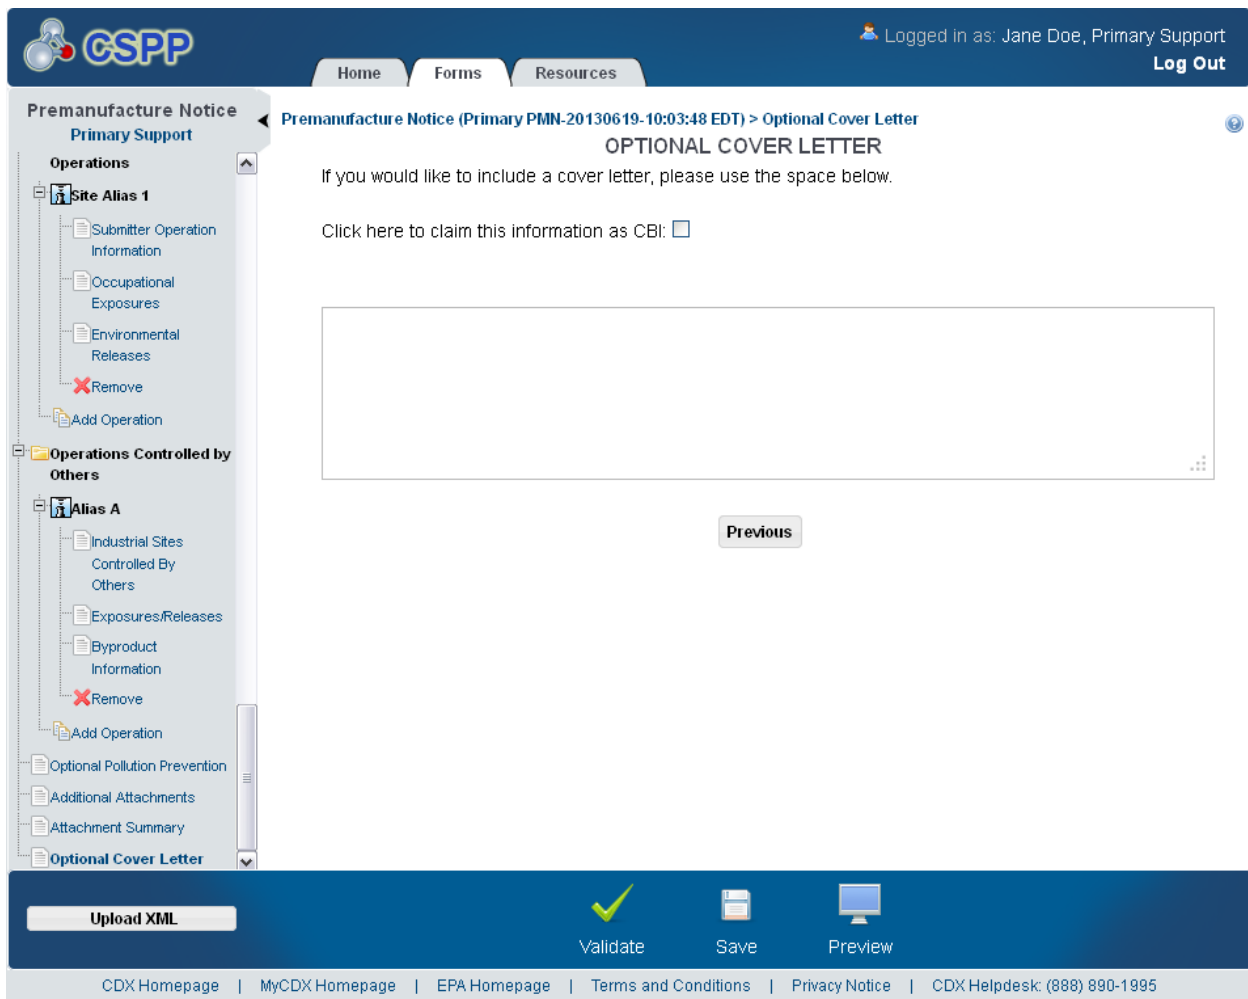

You can navigate to the ‘Optional Cover Letter’ screen by clicking the ‘Next’ button from the ‘Attachment Summary’ screen. You can also access this screen by clicking the ‘Optional Cover Letter’ link within the navigation tree.

The ‘Optional Cover Letter’ screen is used to communicate information to EPA that is not collected elsewhere in the form. The cover letter is used to give OPPT resources and special instructions regarding the application.

- **Click here to claim this information as CBI:** Check the ‘Check here to claim this information as CBI’ checkbox to claim the information as confidential.
- **Optional Cover Letter:** Enter the description and any additional special instructions regarding the form.

Exhibit 4-49 shows a screen capture of the ‘Optional Cover Letter’ screen:

Exhibit 4-49: Optional Cover Letter Screen

Navigation: Click the ‘Validate’ icon (✓) located in the bottom action bar to validate the form. Click the ‘Save’ icon (💾) located in the bottom action bar to perform a global save on the form. Click the ‘Preview’ icon (🖨️) located in the bottom action bar to view a PDF preview of the form.

4.33 Upload XML

You can access the 'Upload XML' screen by clicking the 'Upload XML' button within the lower-left side of the bottom action bar.

The 'Upload XML' screen is used to upload a PMN XML file (created from the PMN thick client with a file type of .pmn_tsca or the ZIP file generated from a CoR) into a current PMN form for PMN forms with numerous chemicals. You also have the option to export a current PMN form into an XML file using the 'Export XML' link. The upload XML functionality is only available for a PMN form.

If you upload an XML file into a pre-populated form, the XML file overwrites the contents of the pre-populated form. In addition, uploading any file removes the attached documents within a form, which must be re-attached. You must also add any sites identified within the form to your CDX registration profile.

After uploading a file, click the 'Preview' icon () located in the bottom action bar to view a PDF preview of the form ensuring that all the data has populated correctly and any other information is displayed accurately. In particular, ensure that the 'Letter of Activity (1),' 'Protective Equipment/Engineering Controls,' 'Physical Form,' 'Media of Release,' 'Control Technology,' and '% New Substance' fields of entry have been populated correctly.

Please note that in IE 7, if an upload fails, the action bar at the bottom of the screen might be misaligned when the 'Upload XML' screen reloads.

- **Upload archive file:** Click the button to generate the 'File Upload' window to search for the ZIP copy of record archive file populated with PMN information. The copy of record archive file must contain the XML form in a file labeled 'formdata.xml.' The application processes the ZIP copy of record archive file and displays any applicable error messages.
- **Export XML:** Click the button to generate the XML file of the current PMN form that a user can download.

Exhibit 4-50 shows a screen capture of the ‘Upload XML’ screen:

Exhibit 4-50: Upload XML Screen

Navigation: Click the ‘Validate’ icon (✓) located in the bottom action bar to validate the form. Click the ‘Save’ icon (💾) located in the bottom action bar to perform a global save on the form. Click the ‘Preview’ icon (🖥️) located in the bottom action bar to view a PDF preview of the form.

5 Edit a Biotechnology Form

The Biotechnology form is used to collect information about “intergeneric” microorganisms that will be manufactured or imported into the United States. EPA collects the information provided in a Biotechnology form through a free text box and attachments. The Biotechnology form does not have a structured data format, but there are several types of Biotechnology notices that can be filed. The different types are as follows: ‘Microbial Commercial Activity Notice (MCAN),’ ‘TSCA Experimental Release Application (TERA),’ ‘Tier I Exemption,’ ‘Tier II Exemption,’ and ‘Biotechnology Test Market Exemption (TME)’ forms. All the forms have the same upload requirements, and EPA will retain responsibility for verifying the correct information is received.

5.1 Edit Biotechnology Form

To edit a Biotechnology form, navigate to the ‘Section 5 Notices and Supports Forms’ screen, and click the alias link in the ‘Alias’ column of a Biotechnology form with a status of ‘In Progress.’ Refer to **Section 3.3** for additional details regarding the ‘Section 5 Notices and Supports Forms’ screen.

Refer to **Section 3.4** for additional details regarding the enter passphrase process.

5.2 General Form Information

You can access the ‘General Form Information’ screen by clicking the alias link in the ‘Alias’ column of an ‘In Progress’ form and entering a passphrase on the ‘Enter Passphrase’ screen.

The ‘General Form Information’ screen presents a list of text fields and drop-down menus for you to input identifying information for the specific form. You will have the option to assign a ‘Form Alias’ to help you identify the form. A form alias is helpful when a user or company has multiple forms and/or when you must differentiate between forms to the help desk. Upon navigating to the ‘General Form Information’ screen, the system will auto-generate a default alias in the following format: <Form Type-YYYYMMDD-HH:MM:SS Time Zone>.

Select the submission type from the ‘Type of Submission’ drop-down menu. The ‘Type of Submission’ drop-down menu displays the following values:

- MCAN (Microbial Commercial Activity Notice)
- TERA (TSCA Experimental Release Application)
- Tier I Exemption
- Tier II Exemption
- Biotechnology TME (Text Market Exemption)

The system will provide a ‘TS Number’ field for you to enter a TS number to tie support forms or Joint Submissions to the original Biotechnology form. The TS number must be a six (6) character alphanumeric combination. The TS number should include two (2), three (3), or four (4) letters. Company names, recognizable words, and numeric series are not recommended.

The ‘Text/Comments’ text box is required when an attachment is not provided. A ‘CBI’ checkbox is displayed above the ‘Text/Comments’ text box to claim the information as confidential.

The ‘General Form Information’ screen displays the option to attach a document by clicking the ‘Attach Document’ button.

- **Form Alias:** Enter the form alias. Upon navigating to the screen, the system auto-generates an editable alias comprised of <Form Type-YYYYMMDD-HH:MM:SS Time Zone>. This is a required field.
- **Type of Submission:** Select the submission type from the drop-down menu. This drop-down menu contains the following values: ‘MCAN (Microbial Commercial Activity Notice),’ ‘TERA (TSCA Experimental Release Application),’ ‘Tier I Exemption,’ ‘Tier II Exemption,’ and ‘Biotechnology TME (Test Market Exemption).’
- **TS Number:** Enter the TS number. The TS number can be any six (6) character alphanumeric combination and should include two (2), three (3), or four (4) letters. Company names, recognizable words and numeric series are not recommended. This field is required if ‘MCAN’ is selected from the ‘Type of Submission’ drop-down menu, if a Letter of Support is pending, and/or if a joint Biotechnology form is being filed.
- **Text/Comments:** Enter a description of the form and/or attachment.
- **CBI:** Check the ‘CBI’ checkbox to claim the ‘Text/Comments’ information as confidential.
- **Attach Document:** Click the ‘Attach Document’ button to generate the ‘Attach Documents’ pop-up window. Upload attachments including published literature, regulations and certifications, ID data, construct data, effects data, MSDS, manufacturing details, use details, inactivation data, and/or other types of documents. At least one document is required even if a Letter of Support or Joint Submission is claimed. Please refer to **Section 3.7** for additional details regarding the attach document process.
- **File Name:** Displays the file name and file extension of a document that is uploaded on the ‘Attach Documents’ pop-up window.
- **Description:** Displays the description of a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion.
- **Check here if you are filing a consolidated Biotechnology form:** Check the ‘Check here if you are filing a consolidated Biotechnology form’ checkbox to indicate you will be submitting a consolidated form. This field is required if a value is entered in the ‘Number of Microorganisms’ text field. This field is non-editable when creating a Biotechnology amendment.
- **Number of Microorganisms:** Enter the number of microorganisms in a consolidated submission; this number should be a value from two (2) through twenty (20). This field is required if the ‘Check here if you are filing a consolidated Biotechnology form’ checkbox is checked. This field is non-editable when creating a Biotechnology amendment.
- **Check here if you are filing a joint Biotechnology form:** Check the ‘Check here if you are filing a joint Biotechnology form’ checkbox to indicate you will be submitting a joint form.
- **Check here if you have a Letter of Support pending:** Check the ‘Check here if you have a Letter of Support pending’ checkbox to indicate the form is pending a Letter of Support.

Navigation: If you are filing a joint Biotechnology form, click the ‘Next’ button to navigate to the ‘Joint Submitter Information’ screen. You can also access this screen by clicking the ‘Joint Submitter Information’ link within the navigation tree. If you are filing a Letter of Support and not a joint Biotechnology form, click the ‘Next’ button to navigate to the ‘Letter of Support Submitter Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submitter Information’ link within the navigation tree. If you are not filing either a Letter of Support or a Joint Biotechnology form, click the ‘Next’ button to navigate to the ‘Technical Contact Information’ screen. You can also access this screen by clicking the ‘Technical Contact Information’ link within the navigation tree.

5.3 Joint Submitter Information

You can access the 'Joint Submitter Information' screen by clicking the 'Next' button from the 'General Form Information' screen if you indicate that a joint Biotechnology form is pending. You can also access this screen by clicking the 'Joint Submitter Information' link within the navigation tree. You may add a maximum of two (2) Joint Submissions by clicking the 'Add Joint Submission' link within the navigation tree. Click the 'Remove' link (✖) within the navigation tree to remove a Joint Submission.

The 'Joint Submitter Information' screen presents a list of text fields and drop-down menus used to enter contact information for the joint submitter who will be submitting separate information for the Biotechnology form. The provided email address will be used to send the joint submitter the unique identification number.

- **Check here to claim this information as CBI:** Check the 'CBI' checkbox to claim the joint submitter information as confidential. When you claim CBI, you are stating that the information is confidential and should not be released to the public.
- **First Name:** Enter the joint submitter's first name. This is a required field.
- **Last Name:** Enter the joint submitter's last name. This is a required field.
- **Position:** Enter the joint submitter's job title.
- **Company Name:** Enter the joint submitter's company name. This is a required field.
- **Phone Number:** Enter the joint submitter's U.S. phone number. This is a required field.
- **Phone Extension:** Enter the joint submitter's U.S. phone number extension if applicable.
- **Email Address:** Enter the joint submitter's email address. The email address must follow the standard email address format: John.Doe@abc.com.
- **Mailing Address 1:** Enter the first line mailing address of the joint submitter. This is a required field.
- **Mailing Address 2:** Enter the second line of the mailing address of the joint submitter.
- **City:** Enter the U.S. city of the mailing address of the joint submitter. This is a required field.
- **State:** Enter the state of the mailing address of the joint submitter. This is a required field.
- **Postal Code:** Enter the postal code of the mailing address of the joint submitter. This is a required field.
- **Country:** Displays 'United States.'

Exhibit 5-2 shows a screen capture of the ‘Joint Submitter Information’ screen:

Exhibit 5-2: Joint Submitter Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Joint Submission Information’ screen. You can also access this screen by clicking the ‘Joint Submission Information’ link within the navigation tree.

5.4 Joint Submission Information

You can access the ‘Joint Submission Information’ screen by clicking the ‘Next’ button from the ‘Joint Submitter Information’ screen. You can also access this screen by clicking the ‘Joint Submission Information’ link within the navigation tree.

The ‘Joint Submission Information’ screen is used as a communication point between two companies. The ‘Joint Submission Information’ screen displays fields that capture information to pass to the joint submitter. A text box is used to send information to the joint submitter in an unencrypted email sent by the primary submitter. A ‘Unique Identifier for Joint Submissions’ box will also display on this screen. The unique identification number auto-generates when a user declares a joint submission is being established.

Joint Submission Process: A ‘Special Information’ field will be used to send information to the joint submitter in an email sent by the primary submitter.

When the secondary submitter accesses the ‘Section 5 Notices and Supports Forms’ screen and creates a new form, the secondary submitter will be prompted to enter the unique identification number on the ‘Create Passphrase’ screen.

- **Joint Submission Information Instructions:** Enter the information that the primary submitter is sending to the joint submitter.
- **Joint Submission Informational Text:** Displays instructional text provided by OPPT, the unique identification number automatically generated for the form, and provides functionality to email the unique identification number to the joint submitter by clicking the ‘Notify the Secondary Submitter of the Joint Submission’ link.
- **Unique Identification Number:** The unique identification number is a random number auto-generated to pass on to the joint submitter to create a joint submission.

Exhibit 5-3 shows a screen capture of the ‘Joint Submission Information’ screen:

Exhibit 5-3: Joint Submission Information Screen

The screenshot displays the 'JOINT SUBMISSION INFORMATION' screen within the GSPP application. The user is logged in as Jane Doe, Primary Support. The page title is 'Biotechnology (Biotechnology-20130619-10:05:49 EDT) > Joint Submission Information'. The main content area includes the following text: 'Please include instructions you wish the joint submitter to see. Clicking the link below will relay the information in this text box to your joint submitter via **unencrypted e-mail**.' Below this is a large, empty text input field. A unique identifier is displayed: 'Unique Identifier for Joint Submission: 3bb40ce9-0dda-4a2f-9b06-e76a500f898e'. Below the identifier, there is a link: 'Notify the Secondary Submitter of the Joint Submission'. A detailed instruction follows: 'The Secondary Submitter will need this identification number to complete the form. It is your responsibility to ensure that your secondary submitter understands how to complete the Biotechnology form and sends the information to EPA by the end of the submission period. The information collected in the primary and secondary form(s) will be linked by the unique identifier. The form will not undergo a review process until all forms have been received.' At the bottom of the main content area, there are 'Previous' and 'Next' buttons, with 'Next' highlighted in red. The footer bar contains 'Validate', 'Save', and 'Preview' buttons.

Navigation: Click the ‘Notify the Secondary Submitter of the Joint Submission’ link to access the unique identifier notification window. If you are filing a Letter of Support, click the ‘Next’ button to navigate to the ‘Letter of Support Submitter Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submitter Information’ link within the navigation tree. If you are not filing a Letter of Support, click the ‘Next’ button to navigate to the ‘Technical Contact Information’ screen. You can also access this screen by clicking the ‘Technical Contact Information’ link within the navigation tree.

5.4.1 Notify Secondary Submitter of Joint Submission Information

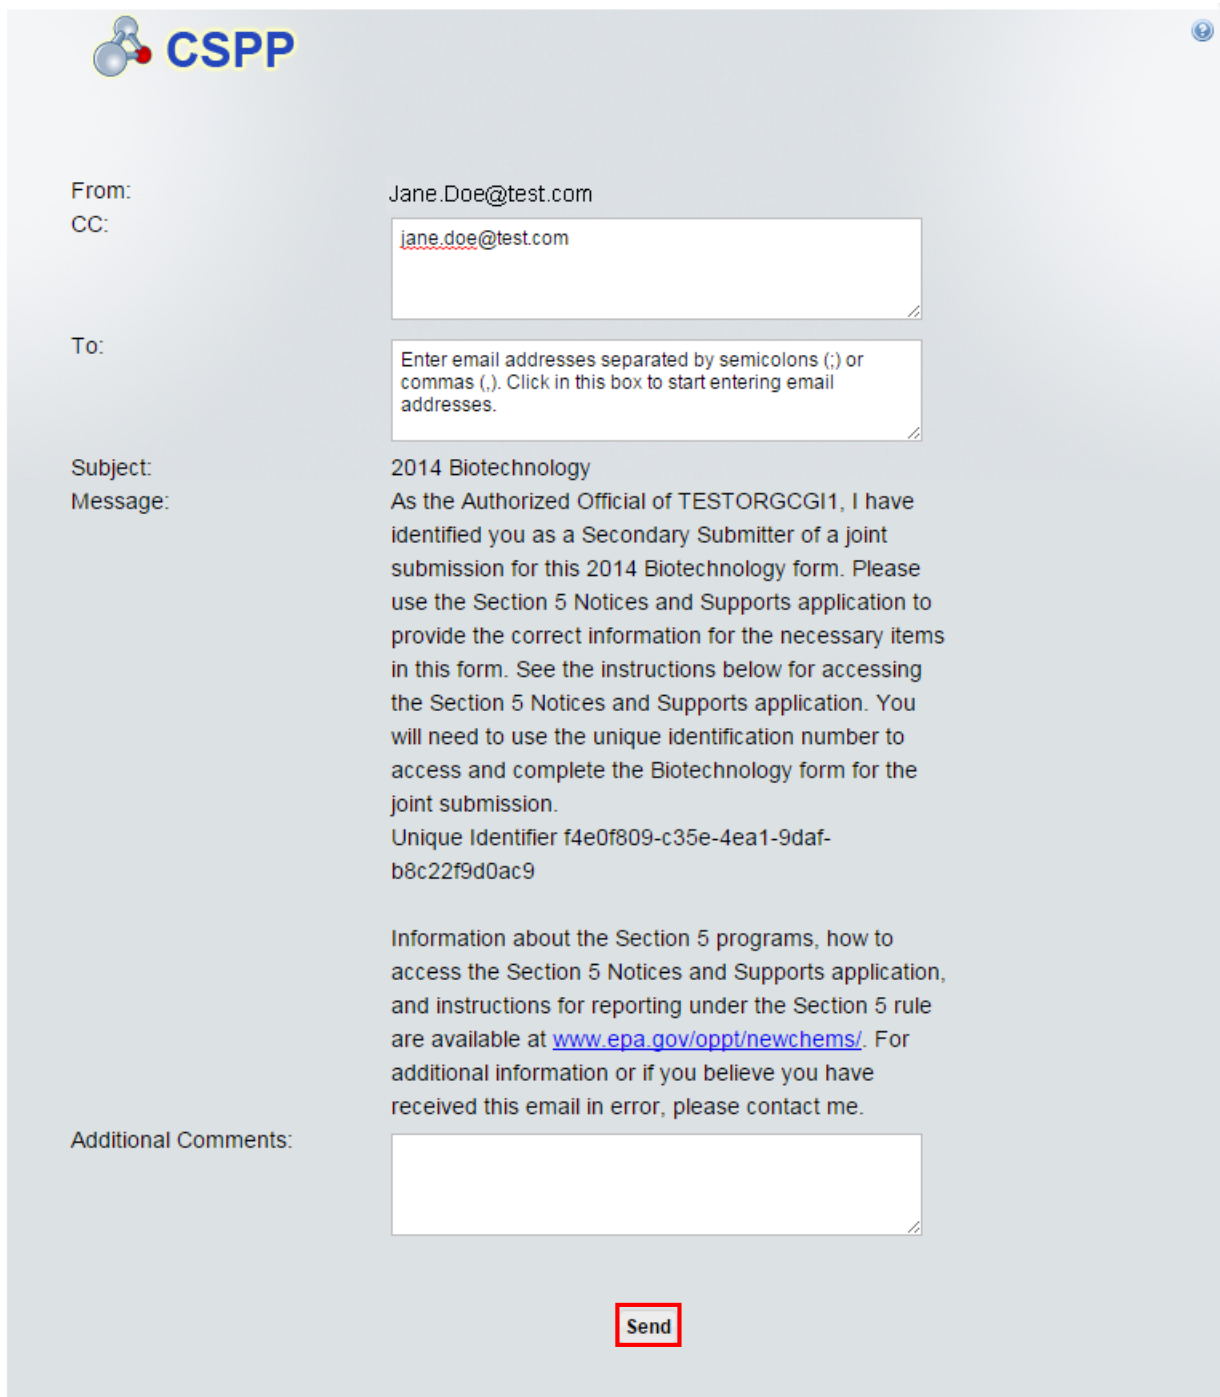

You can access the unique identifier notification pop-up window by clicking the ‘Notify the Secondary Submitter of the Joint Submission’ link from the ‘Joint Submission Information’ screen.

The unique identifier notification pop-up window is used to notify the secondary submitter of the unique identification number. The unique identifier notification window displays a ‘CC’ field to add other email addresses to the notification (including the original submitter), a ‘To’ field, and an ‘Additional Comments’ text box.

- **From:** Displays the email address of the Primary AO who created the form.
- **CC:** Contains the email address of the Primary AO populated from CDX registration information, and the email address of the technical contact. This is an editable field and additional email addresses may be added if necessary.
- **To:** Contains instructional text to enter multiple email addresses. Contains the editable email address of the joint submitter specified on the ‘Joint Submitter Information’ screen; this email address will be automatically populated upon navigating to the unique identifier notification window. Enter any additional email addresses that the email should be sent to.
- **Subject:** Displays ‘YYYY Biotechnology.’
- **Message:** Displays a pre-determined message that will be contained in the email sent to a secondary submitter.
- **Additional Comments:** Enter any other additional comments or instructions that should be passed onto the secondary submitter.
- **Send:** Click the button to generate and send an email to the email addresses identified in the ‘CC’ and ‘To’ fields.

Exhibit 5-4 shows a screen capture of the ‘Unique Identifier Notification’ pop-up window.

Exhibit 5-4: Unique Identifier Notification Pop-Up Window

The screenshot shows a web-based email composition window titled 'CSPP'. The window has a light blue header with the CSPP logo and a close button in the top right corner. The email fields are as follows:

- From:** Jane.Doe@test.com
- CC:** A text input field containing 'jane.doe@test.com'.
- To:** A text input field with placeholder text: 'Enter email addresses separated by semicolons (;) or commas (.). Click in this box to start entering email addresses.'
- Subject:** 2014 Biotechnology
- Message:**

As the Authorized Official of TESTORGCGI1, I have identified you as a Secondary Submitter of a joint submission for this 2014 Biotechnology form. Please use the Section 5 Notices and Supports application to provide the correct information for the necessary items in this form. See the instructions below for accessing the Section 5 Notices and Supports application. You will need to use the unique identification number to access and complete the Biotechnology form for the joint submission.

Unique Identifier f4e0f809-c35e-4ea1-9daf-b8c22f9d0ac9

Information about the Section 5 programs, how to access the Section 5 Notices and Supports application, and instructions for reporting under the Section 5 rule are available at www.epa.gov/oppt/newchems/. For additional information or if you believe you have received this email in error, please contact me.
- Additional Comments:** An empty text input field.

At the bottom center of the window is a red-bordered button labeled 'Send'.

Navigation: Click the ‘Send’ button to send the email to the Joint Submitter and navigate back to the ‘Joint Submission Information’ screen. Click the ‘X’ button in the upper right-hand corner to cancel the process of notifying a Joint Submitter and navigate back to the ‘Joint Submission Information’ screen.

5.5 Letter of Support Submitter Information

You can access the 'Letter of Support Submitter Information' screen by clicking the 'Next' button from the 'General Form Information' screen if you are not filing a Joint Submission. You can also access this screen by clicking the 'Next' button from the 'Joint Submission Information' screen if you identified that a Joint Submission would be filed. You can also access this screen by clicking the 'Letter of Support Submitter Information' link within the navigation tree when you have indicated that a Letter of Support form will be filed. Click the 'Add Letter of Support' link within the navigation tree to add a Letter of Support. The system will allow an unlimited number of Letters of Support to be filed. Remove a Letter of Support by clicking the 'Remove' link (✖) within the navigation tree.

The 'Letter of Support Submitter Information' screen presents a list of text fields and drop-down menus used to enter contact information for the Letter of Support submitter who will be submitting separate information for the Biotechnology form. The provided email address will be used to send the Letter of Support submitter the unique identification number to create the Letter of Support at the discretion of the primary submitter.

- **Check here to claim this information as CBI:** Check the 'Check here to claim this information as CBI' checkbox to claim the Letter of Support submitter information as confidential. When you claim the Letter of Support submitter contact information as CBI, you are stating that the information is confidential and should not be released to the public.
- **First Name:** Enter the Letter of Support submitter's first name. This is a required field.
- **Last Name:** Enter the Letter of Support submitter's last name. This is a required field.
- **Position:** Enter the Letter of Support submitter's job title.
- **Company Name:** Enter the Letter of Support submitter's company name. This is a required field.
- **Phone Number:** Enter the Letter of Support submitter's phone number. This is a required field.
- **Phone Extension:** Enter the Letter of Support submitter's phone number extension if applicable.
- **Email Address:** Enter the Letter of Support submitter's email address. The email address must follow the standard email address format: John.Doe@abc.com.
- **Mailing Address 1:** Enter the first line of the Letter of Support submitter's mailing address. This is a required field.
- **Mailing Address 2:** Enter the second line of the Letter of Support submitter's mailing address.
- **City:** Enter the city of the mailing address of the Letter of Support submitter. This is a required field.
- **State:** Enter the state of the mailing address of the Letter of Support submitter. This is a required field if the 'Country' field is set to 'United States.'
- **Postal Code:** Enter the postal code of the mailing address for the Letter of Support submitter.

- **Country:** Select the country of the mailing address for the Letter of Support submitter. This is a required field.

Exhibit 5-5 shows a screen capture of the ‘Letter of Support Submitter Information’ screen:

Exhibit 5-5: Letter of Support Submitter Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Letter of Support Submission Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submission Information’ link within the navigation tree.

5.6 Letter of Support Submission Information

You can navigate to the ‘Letter of Support Submission Information’ screen by clicking the ‘Next’ button from the ‘Letter of Support Submitter Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submission Information’ link within the navigation tree.

The ‘Letter of Support Submission Information’ screen is used as a communication point between two companies. The ‘Letter of Support Submission Information’ screen presents fields to enter information to pass to the secondary submitter. A text box is used to send information in

an email to the secondary submitter. A ‘Unique Identifier for Letter of Support Submissions’ box will also display on this screen. The unique identifier will auto-generate when a Letter of Support submission is being established.

Letter of Support Submission Process: A field titled ‘Special Information’ will be used to send information to the Joint Submitter in an email sent at the discretion of the primary submitter.

When the secondary submitter accesses the ‘Section 5 Notices and Supports Forms’ screen and creates a new form, the secondary submitter will be prompted to enter the unique identifier on the ‘Create Passphrase’ screen. Once the unique identifier has been entered, the application will tie the two forms together.

- **Letter of Support Submission Information Instructions:** Enter the information that the primary submitter is sending to the Letter of Support submitter.
- **Letter of Support Submission Informational Text:** Displays instructional text provided by EPA, the unique identification number generated for the form, and provides functionality to email the unique identification number to the Letter of Support submitter by clicking the ‘Notify the Secondary Submitter of the letter of support submission’ link.
- **Unique Identification Number:** The unique identification number is a random number auto-generated to pass on to the Letter of Support submitter to create a Letter of Support.

Exhibit 5-6 shows a screen capture of the ‘Letter of Support Submission Information’ screen:

Exhibit 5-6: Letter of Support Submission Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Technical Contact Information’ screen. You can also access this screen by clicking the ‘Technical Contact Information’ link within the navigation tree.

5.6.1 Notify Secondary Submitter of Letter of Support Information

You can access the unique identifier notification pop-up window by clicking the ‘Notify the Secondary Submitter of the Letter of Support Submission’ link from the ‘Letter of Support Submission Information’ screen.

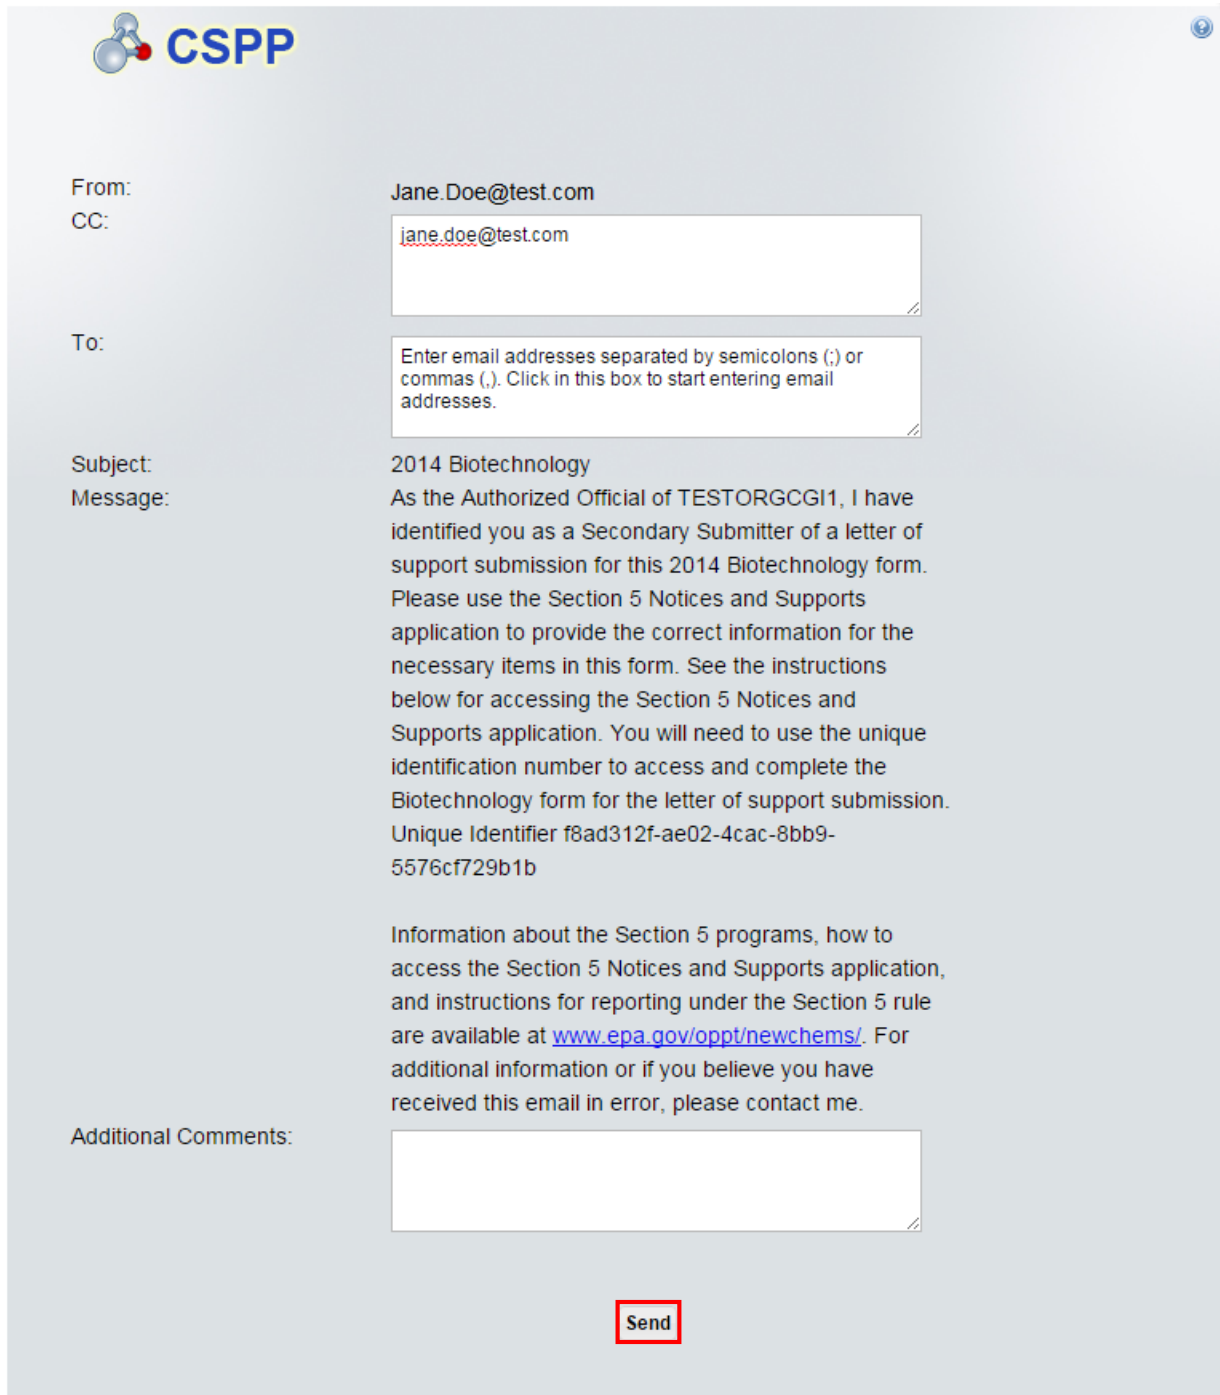

The unique identifier notification pop-up window is used to notify the secondary submitter of the unique identification number. The unique identifier notification window displays a ‘CC’ field to

add other email addresses to the notification (including the original submitter), a 'To' field, and an 'Additional Comments' text box.

- **From:** Displays the email address of the Primary AO that created the form.
- **CC:** This automatically populates with the email address of the Primary AO that created the form and the email address of the technical contact. This is an editable field.
- **To:** Contains instructional text to enter multiple email addresses. Contains the editable email address of the joint submitter specified on the 'Joint Submitter Information' screen; this email address will be automatically populated upon navigating to the window.
- **Subject:** Displays 'YYYY Biotechnology.'
- **Message:** Displays a pre-determined message that will display in the email sent to a secondary submitter.
- **Additional Comments:** Enter any other additional comments or instructions that can be passed onto the secondary submitter.
- **Send:** Click the button to generate and send the email to the email addresses identified in the 'CC' and 'To' fields.

Exhibit 5-7 shows a screen capture of the ‘Unique Identifier Notification’ pop-up window:

Exhibit 5-7: Unique Identifier Notification Pop-Up Window

The screenshot shows a web-based email composition window titled 'CSPP'. The window has a light blue header with the CSPP logo and a close button in the top right corner. The email fields are as follows:

- From:** Jane.Doe@test.com
- CC:** A text input field containing 'jane.doe@test.com'.
- To:** A text input field with placeholder text: 'Enter email addresses separated by semicolons (;) or commas (,). Click in this box to start entering email addresses.'
- Subject:** 2014 Biotechnology
- Message:**

As the Authorized Official of TESTORGCGI1, I have identified you as a Secondary Submitter of a letter of support submission for this 2014 Biotechnology form. Please use the Section 5 Notices and Supports application to provide the correct information for the necessary items in this form. See the instructions below for accessing the Section 5 Notices and Supports application. You will need to use the unique identification number to access and complete the Biotechnology form for the letter of support submission. Unique Identifier f8ad312f-ae02-4cac-8bb9-5576cf729b1b

Information about the Section 5 programs, how to access the Section 5 Notices and Supports application, and instructions for reporting under the Section 5 rule are available at www.epa.gov/oppt/newchems/. For additional information or if you believe you have received this email in error, please contact me.
- Additional Comments:** An empty text input field.

At the bottom center of the window is a red-bordered button labeled 'Send'.

Navigation: Click the ‘Send’ button to send the email to the Letter of Support submitter and navigate back to the ‘Letter of Support Submission Information’ screen. Click the ‘X’ icon in the upper right-hand corner to exit the screen without sending the email and navigate back to the ‘Letter of Support Submission Information’ screen.

5.7 Technical Contact Information

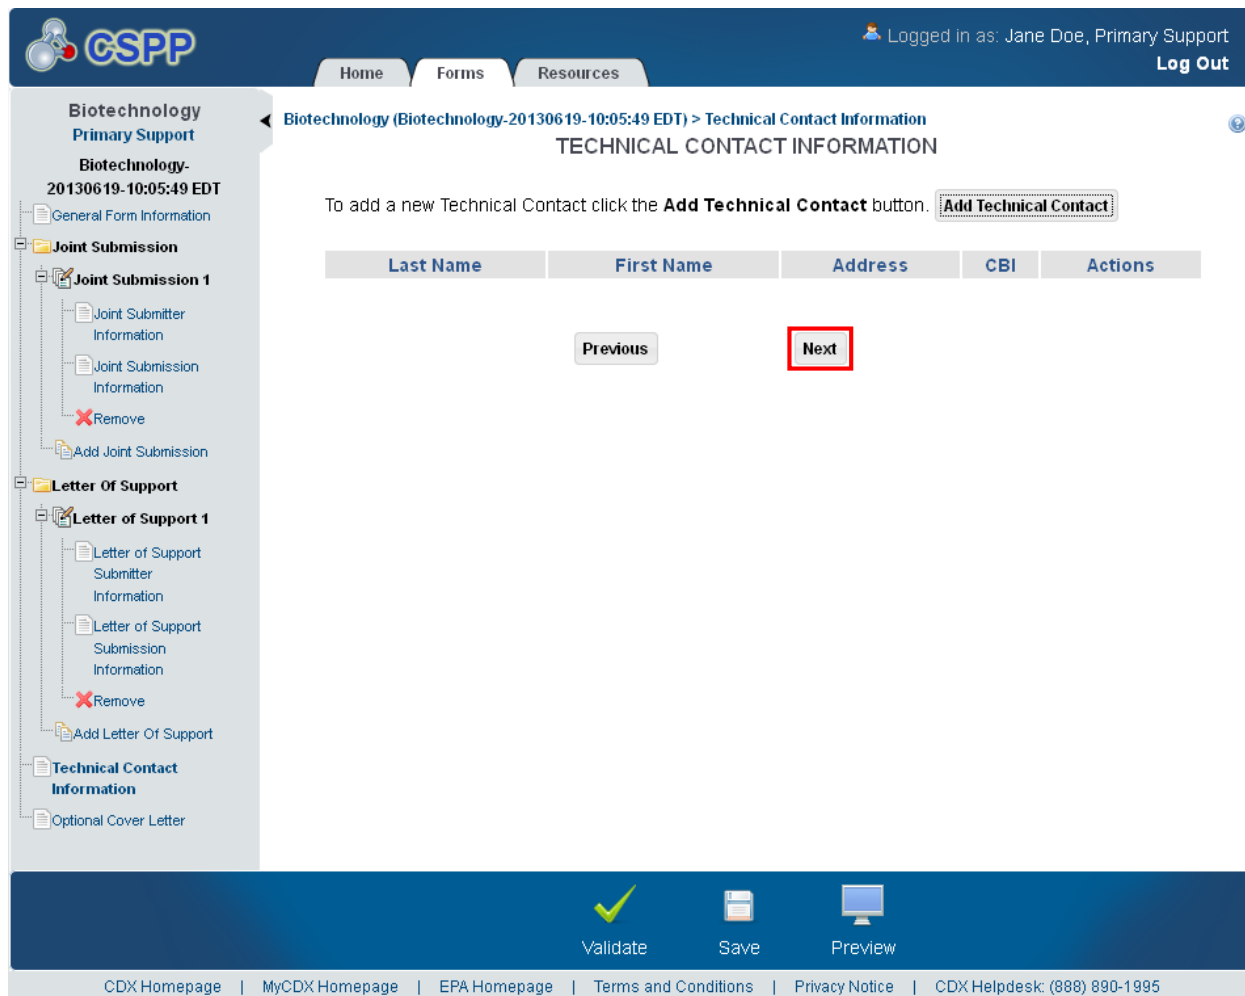

You can access the 'Technical Contact Information' screen by clicking the 'Next' button from the 'General Form Information' screen if you are not filing a Joint Submission or Letter of Support. You can also access this screen by clicking the 'Next' button from the 'Joint Submission Information' screen if you are not filing a Letter of Support. You can navigate to the 'Letter of Support Submission Information' screen by clicking the 'Next' button if you are not filing a Joint Submission. You can be directed to the 'Technical Contact Information' screen by clicking the 'Technical Contact Information' link within the navigation tree.

The 'Technical Contact Information' screen displays an 'Add Technical Contact' button. Click the 'Add Technical Contact' button to generate an 'Add Technical Contact' pop-up window to enter information into the text fields. Click the 'Copy CDX Registration' button to populate the text fields using your CDX registration information. Check the 'Check here to claim this information as CBI' checkbox to indicate that the information is confidential and will not be released to the public.

- **Add Technical Contact:** Click the 'Add Technical Contact' button to generate the 'Add Technical Contact' pop-up window.
- **Last Name:** Displays the last name of the reported technical contact.
- **First Name:** Displays the first name of the reported technical contact.
- **Address:** Displays the address of the reported technical contact.
- **CBI:** Indicates the CBI status of the reported technical contact information by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon (✖) to delete the technical contact information from the table. A warning message displays to confirm the deletion.

Exhibit 5-8 shows a screen capture of the ‘Technical Contact Information’ screen:

Exhibit 5-8: Technical Contact Information Screen

Navigation: Click the ‘Next’ button from the ‘Technical Contact Information’ screen to navigate to the ‘Optional Cover Letter’ screen. You can also access this screen by clicking the ‘Optional Cover Letter Link’ within the navigation tree.

5.7.1 Add Technical Contact

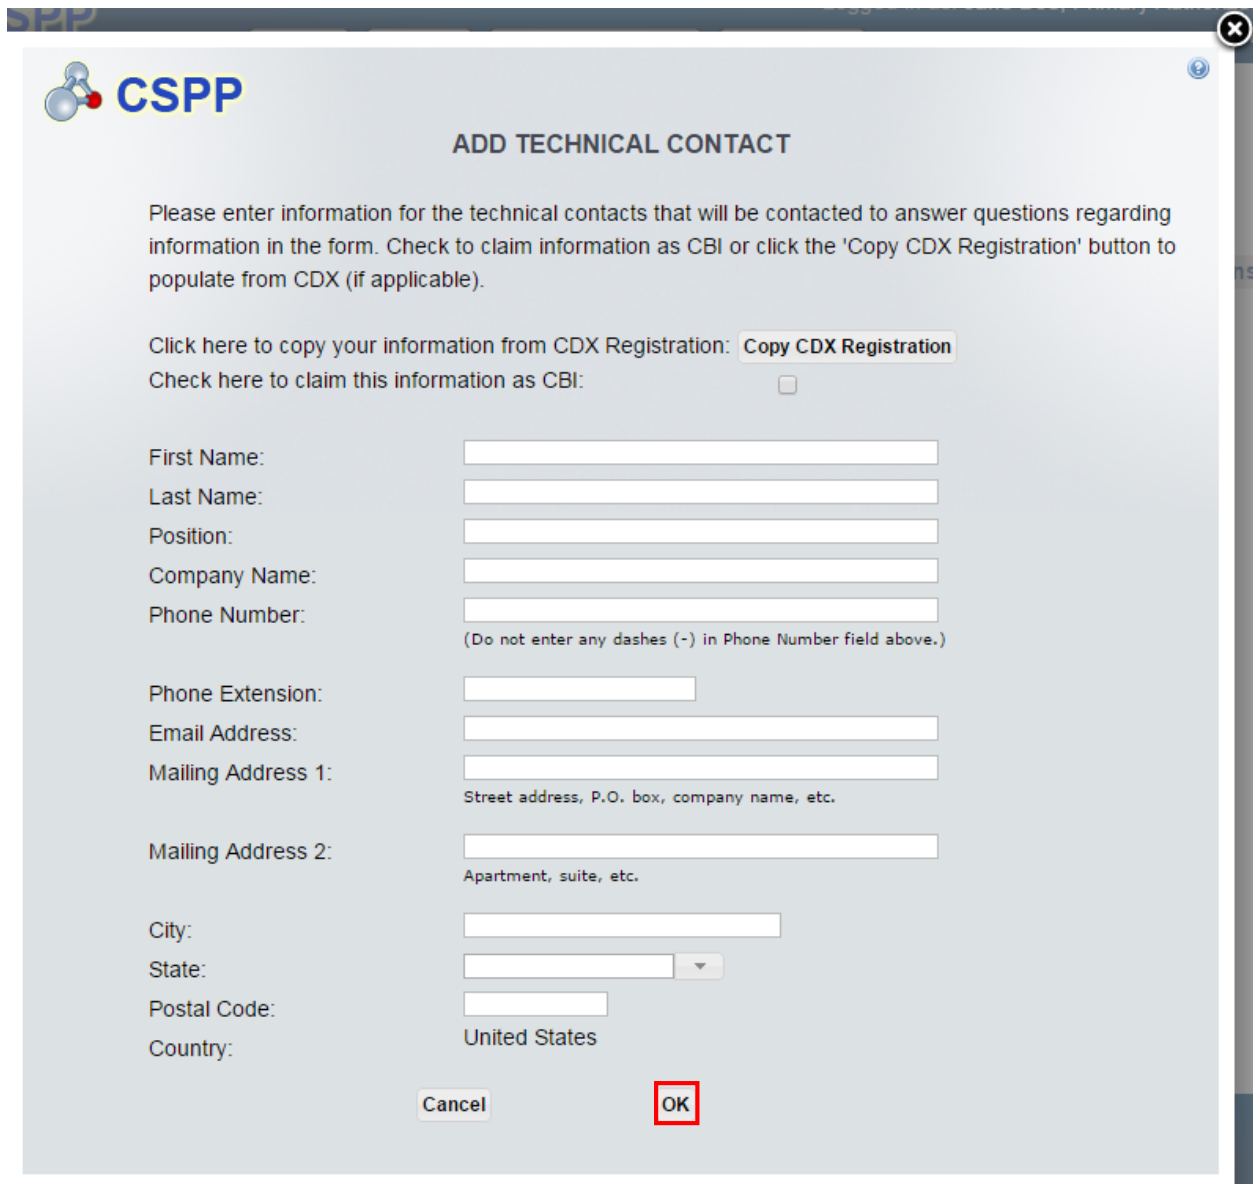

You can access the ‘Add Technical Contact’ pop-up window by clicking the ‘Add Technical Contact’ button on the ‘Technical Contact Information’ screen.

- **Copy CDX Registration:** Click the ‘Copy CDX Registration’ button to copy your information from CDX registration; a message displays confirming the import of CDX registration information.
- **Check here to claim this information as CBI:** Check the ‘Check here to claim this information as CBI’ checkbox to claim the technical contact information as confidential.
- **First Name:** Enter the technical contact’s first name. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration. This is a required field.

- **Last Name:** Enter the technical contact's last name. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Position:** Enter the technical contact's job title.
- **Company Name:** Enter the technical contact's company name. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Phone Number:** Enter the daytime U.S. phone number of the technical contact; this must be at least 10 characters long and does not accept dashes. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Phone Extension:** Enter the technical contact's phone number extension if applicable.
- **Email Address:** Enter the technical contact's email address. The email address must follow the standard email address format: John.Doe@domain. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration.
- **Mailing Address 1:** Enter the first line of the technical contact's mailing address. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Mailing Address 2:** Enter the second line of the technical contact's mailing address. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration.
- **City:** Enter the city of the technical contact's mailing address. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **State:** Select the state of the technical contact's mailing address. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Postal Code:** Enter the postal code of the technical contact's mailing address. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Country:** Displays 'United States.'

Exhibit 5-9 shows a screen capture of the ‘Add Technical Contact’ pop-up window:

Exhibit 5-9: Add Technical Contact Pop-Up Window

Navigation: Click the ‘Cancel’ button to stop populating technical contact information and navigate back to the ‘Technical Contact Information’ screen. Click the ‘OK’ button to save and populate the entered technical contact information and navigate back to the ‘Technical Contact Information’ screen.

5.8 Optional Cover Letter

You can access the ‘Optional Cover Letter’ screen by clicking the ‘Next’ button from the ‘Technical Contact Information’ screen. You can also access this screen by clicking the ‘Optional Cover Letter’ link within the navigation tree.

The ‘Optional Cover Letter’ screen is used to communicate information to EPA not collected elsewhere in the form. The cover letter is used to give OPPT resources and special instructions

regarding the application; enter any necessary instructions into the blank text field. The cover letter should be either fully CBI or non-CBI to eliminate user error to promote transparency between the company and EPA.

- **Check here to claim this information as CBI:** Check the ‘Check here to claim this information as CBI’ checkbox to claim the cover letter information as confidential.
- **Optional Cover Letter:** Enter the description and any additional special instructions regarding the form.

Exhibit 5-10 shows a screen capture of the ‘Optional Cover Letter’ screen:

Exhibit 5-10: Optional Cover Letter Screen

Navigation: Click the ‘Validate’ icon (✓) located in the bottom action bar to validate the form. Click the ‘Save’ icon (💾) located in the bottom action bar to perform a global save on the form. Click the ‘Preview’ icon (🖥️) located in the bottom action bar to view a PDF preview of the form.

6 Edit Notice of Commencement (NOC) Form

The Notice of Commencement (NOC) form allows industry users to notify EPA when a new chemical or microorganism, submitted under a Biotechnology or PMN form, has already started manufacture or import. A NOC form cannot be submitted before the chemical or microorganism has gone through the review period by EPA. The NOC must be submitted within thirty (30) days after the start date of the first manufacture or import.

6.1 Edit NOC Form

To edit a NOC form, navigate to the 'Section 5 Notices and Supports Forms' screen and click the alias link in the 'Alias' column of a NOC form with a status of 'In Progress.' Refer to **Section 3.3** for additional details regarding the 'Section 5 Notices and Supports Forms' screen.

Refer to **Section 3.4** for additional details regarding the enter passphrase process.

6.2 General Form Information

You can access the 'General Form Information' screen by clicking the alias link in the 'Alias' column of an 'In Progress' form and entering a passphrase on the 'Enter Passphrase' screen. This screen provides fields to identify information that notifies EPA of the form alias, case number, and manufacture or import information.

The 'General Form Information' screen presents a list of text fields and drop-down menus to input information about the originally filed form. The 'Manufacture/Import Information' field presents radio buttons for you to state whether the company intends to manufacture or import the new chemical substance. When a manufacture/import radio button is selected, a calendar widget appears for you to enter the date of commencement.

- **Form Alias:** Enter a custom form alias, if applicable. Upon navigating to the screen, the system auto-generates an editable form alias in the following format: <Form Type-YYYYMMDD-HH:MM:SS Time Zone>. This is a required field.
- **Case Number:** Enter the case number pertaining to the reported chemical substance or mixture. The case number must be in the following format: P-XX-0999 for Premanufacture Notice cases or J-XX-0999 for MCAN Biotechnology cases where 'XX' indicates the fiscal year in which the case number is generated, and the leading '0' is required. This is a required field.
- **First Commercial Manufacture:** Enter the date for the first commercial manufacture. A calendar widget appears when the radio button is selected to select the appropriate date. If you select a future date past the current date, an error displays when navigating away from the screen. Either the 'First Commercial Manufacture' radio button or the 'First Commercial Importation' field is required.
- **First Commercial Importation:** Enter the date for the first commercial importation. A calendar widget appears when the radio button is selected to select the appropriate date. If you select a future date past the current date, an error displays when navigating away from the screen. Either the 'First Commercial Manufacture' or the 'First Commercial Importation' field is required.

Exhibit 6-1 shows a screen capture of the ‘General Form Information’ screen:

Exhibit 6-1: General Form Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Technical Contact Information’ screen. You can also access this screen by clicking the ‘Technical Contact Information’ link within the navigation tree.

6.3 Technical Contact Information

You can access the ‘Technical Contact Information’ screen by clicking the ‘Next’ button from the ‘General Form Information’ screen. You can also access this screen by clicking the ‘Technical Contact Information’ link within the navigation tree.

The ‘Technical Contact Information’ screen displays an ‘Add Technical Contact’ button. Click the ‘Add Technical Contact’ button to generate an ‘Add Technical Contact’ pop-up window to enter technical contact information into the list of text fields. Click the ‘Copy CDX Registration’ button to populate the text fields with your contact information entered during CDX registration. Check the ‘Check here to claim this information as CBI’ checkbox to claim the technical contact information as confidential to indicate that the information will not be released to the public.

- **Add Technical Contact:** Click the ‘Add Technical Contact’ button to generate the ‘Add Technical Contact’ pop-up window.
- **Last Name:** Displays the technical contact’s last name.
- **First Name:** Displays the technical contact’s first name.
- **Address:** Displays the technical contact’s address.
- **CBI:** Indicates the technical contact’s CBI status by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon (✖) to delete the technical contact. A warning message displays to confirm the deletion of the technical contact.

Exhibit 6-2 shows a screen capture of the ‘Technical Contact Information’ screen:

Exhibit 6-2: Technical Contact Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Chemical Information’ screen. You can also access this screen by clicking the ‘Chemical Information’ link within the navigation tree.

6.3.1 Add Technical Contact

Click the ‘Add Technical Contact’ button to begin the process of adding technical contacts.

You will enter the contact information for each technical contact within the ‘Add Technical Contact’ window. The ‘Add Technical Contact’ pop-up window displays the fields for you to input the information for a technical contact. The system provides functionality to enter multiple technical contacts. If you are the technical contact, click the ‘Copy CDX Registration’ button to populate the technical contact information with your user information entered during CDX registration. The system provides you with the option to claim the technical contact information as confidential by checking the ‘CBI’ checkbox. Each technical contact will have an individual

CBI claim. After entering the information for a technical contact, click the ‘OK’ button which will populate the technical contacts table located on the ‘Technical Contact Information’ screen.

- **Copy CDX Registration:** Click the ‘Copy CDX Registration’ button to import contact information from CDX registration; a confirmation will display.
- **Check here to claim this information as CBI:** Check the ‘Check here to claim this information as CBI’ checkbox to claim the technical contact information as confidential.
- **First Name:** Enter the technical contact’s first name. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration. This is a required field.
- **Last Name:** Enter the technical contact’s last name. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration. This is a required field.
- **Company Name:** Enter the technical contact’s company name. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration. This is a required field.
- **Phone Number:** Enter the technical contact’s daytime U.S. phone number; this must be at least 10 characters long and does not accept dashes. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration. This is a required field.
- **Phone Extension:** Enter the technical contact’s phone number extension, if applicable.
- **Email Address:** Enter the technical contact’s email address. The email address must follow the standard email address format: John.Doe@abc.com. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration.
- **Mailing Address 1:** Enter the first line of the technical contact’s mailing address. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration. This is a required field.
- **Mailing Address 2:** Enter the second line of the technical contact’s mailing address. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration.
- **City:** Enter the city of the technical contact’s mailing address. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration. This is a required field.
- **State:** Select the state of the technical contact’s mailing address from the drop-down menu. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration. This is a required field.
- **Postal Code:** Enter the postal code of the technical contact’s mailing address. If you have clicked the ‘Copy CDX Registration’ button, the fields populate with information entered during CDX registration. This is a required field.
- **Country:** Displays ‘United States.’

Navigation: Click the 'Cancel' button or 'X' icon at the top left-hand corner of the window to return to the 'Technical Contact Information' screen without saving the technical contact information. Click the 'OK' button to save the entered technical contact information and return to the 'Technical Contact Information' screen.

6.4 Chemical Information

You can access the 'Chemical Information' screen by clicking the 'Next' button from the 'Technical Contact Information' screen. You can also access this screen by clicking the 'Chemical Information' link within the navigation tree.

The 'Chemical Information' screen provides fields to identify the chemical the submitter has begun to manufacture or import. The 'Specific Chemical Identity' section provides fields to input information describing the chemical for which the NOC is to be filed. This screen outlines the unique chemical properties and displays the name and CASRN of the chemical. Most of the

chemicals submitted under a NOC will not be found in the ‘Search Substance Registry Services’ window, and a new chemical will have to be created. To create a new chemical, click the ‘Search SRS’ button, found in the ‘Chemical Information’ screen, and then the ‘Create New Chemical’ button to generate the ‘Chemical Not Found In Substance Registry Services’ pop-up window.

If you claim a chemical as CBI, the ‘Generic Chemical Name’ text box generates. A ‘CBI Substantiation’ folder displays within the navigation tree upon navigating away from the screen.

If you claim chemical identity as confidential, you must provide a generic chemical name for your substance that reveals the specific chemical identity of the new chemical substance to the maximum extent possible. Please note that EPA will be closely assessing the generic name at this time; please make sure that your generic name is a good generic name that only hides the proprietary parts of the chemical information.

- **Add New Chemical:** Click the ‘Add New Chemical’ button to generate the ‘Specific Chemical Identity’ expandable/collapsible field set. At least one chemical is required.
- **Search SRS:** Click the ‘Search SRS’ button to generate the ‘Search SRS’ window. Refer to **Section 3.8** for additional details regarding the search SRS functionality.
- **CASRN:** Displays the CASRN of the chemical being reported, if applicable.
- **Chemical Name:** Displays the chemical name of the substance being reported.
- **CBI:** Check the ‘CBI’ checkbox to claim the ‘Specific Chemical Identity’ information as confidential and generate the ‘Generic Chemical Name’ text box. If you claim the chemical as confidential, a ‘CBI Substantiation’ folder displays within the navigation tree after clicking the ‘Next’ button from the ‘Chemical Information’ screen.
- **Generic Chemical Name:** Enter the generic name to associate with a chemical. This field displays only when the ‘Specific Chemical Identity’ is claimed CBI.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the ‘Save’ icon () located within the bottom action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the ‘Previous’ and ‘Next’ buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.
- **Cancel:** Click the ‘Cancel’ link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and to remove a field set. The ‘Cancel’ link is displayed when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the ‘Edit’ link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The ‘Edit’ link is displayed when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the ‘Delete’ icon () located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion. The ‘Delete’ icon () is displayed when the user has clicked the ‘Add New Chemical’ button.
- **Expand All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to expand a series of field sets.

- **Collapse All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to collapse a series of field sets.
- **Substance Identity Confidentiality Status:** You will only be able to select a single radio button. If you claim the chemical as CBI, after clicking the ‘Save’ button in the ‘Specific Chemical Identity’ expandable/collapsible field set, the system will enable the first radio button and disable the second and third radio buttons. If you do not claim the chemical as CBI, after clicking the ‘Save’ button in the ‘Specific Chemical Identity’ expandable/collapsible field set, the system will disable the first radio button and enable the second and third radio button options. This section displays the following options:
 - I wish to claim the substance identity confidential and the substantiation to support this claim is attached. Failure to submit the required substantiation in accordance with 40 CFR 720.85(b) will result in waiver of your claim.
 - I previously claimed the substance identity as confidential and hereby relinquish that claim.
 - I did not claim the substance identity as confidential in my original PMN submission.

Part VII - Substance Identity Confidentiality Status

I wish to claim the substance identity confidential and the substantiation to support this claim is attached. Failure to submit the required substantiation in accordance with 40 CFR 720.85(b) will result in waiver of your claim.

Exhibit 6-5 shows a screen capture of the ‘Chemical Information’ screen (Scroll 2):

Exhibit 6-5: Chemical Information Screen (Scroll 2)

The screenshot displays the 'Chemical Information' screen. On the left is a navigation tree under 'Notice of Commencement Primary Support' for 'NOC-20130619-10:06:58 EDT'. The 'Chemical Information' link is selected. The main area contains a 'CASRN' section with a 'Search SRS' button and a 'Generic Chemical Name' section with a text input field. Below this is the 'Part VII - Substance Identity Confidentiality Status' section with three radio button options. The 'Next' button is highlighted with a red box. At the bottom, there is a dark blue bar with 'Validate', 'Save', and 'Preview' buttons, and a footer with links to CDX, MyCDX, EPA, and other resources.

Navigation: Click the ‘Next’ button to navigate to the ‘Site Information’ screen. You can also access this screen by clicking the ‘Site Information’ link within the navigation tree.

6.5 Site Information

You can access the ‘Site Information’ screen by clicking the ‘Next’ button from the ‘Chemical Information’ screen. You can also access this screen by clicking the ‘Site Information’ link within the navigation tree.

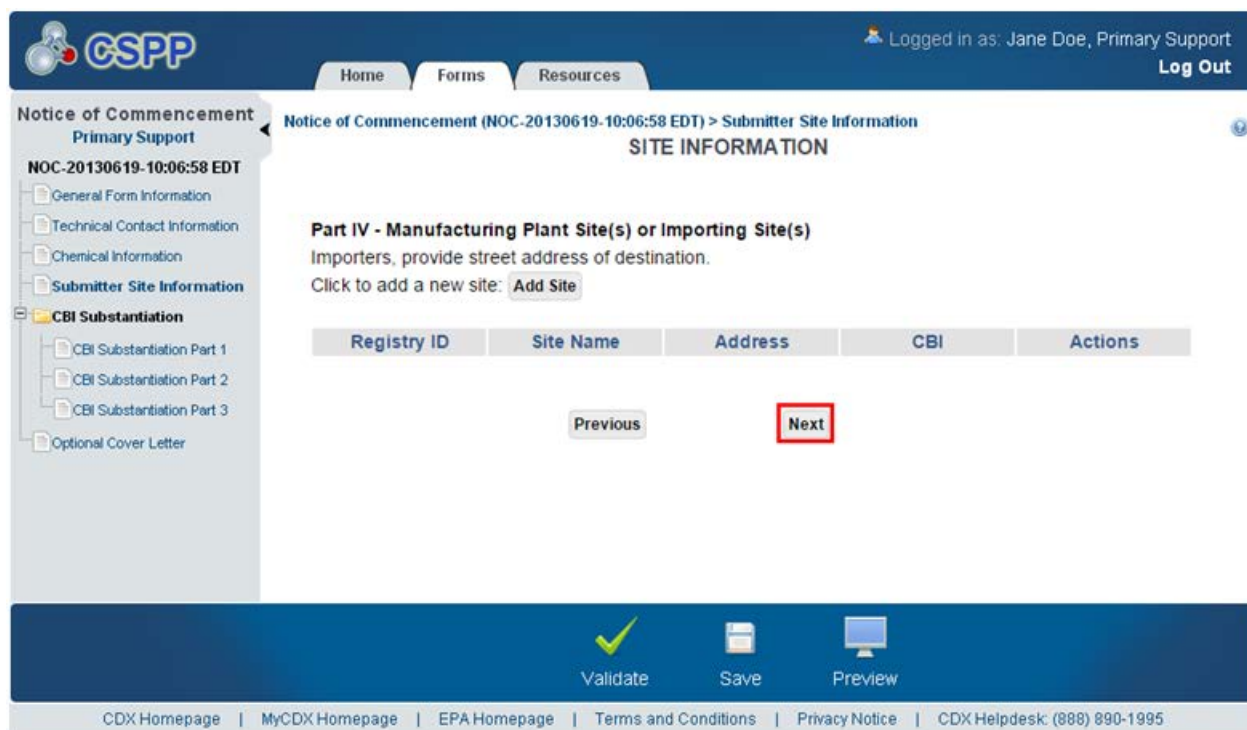

The ‘Site Information’ screen identifies the site at which the manufacture or import of the chemical occurs. You are able to identify sites via the ‘Add Site’ pop-up window. To do so, click

the ‘Add Site’ button. You must select a site before moving on to the ‘CBI Substantiation Part 1’ screen or to the ‘Optional Cover Letter’ screen.

- **Add Site:** Click the ‘Add Site’ button to generate the ‘Add Site’ pop-up window. Refer to **Section 3.9** for additional details regarding the add site functionality.
- **Registry ID:** Displays the EPA registry ID of the site.
- **Site Name:** Displays the site name associated with a site.
- **Address:** Displays the site address of a site.
- **CBI:** Indicates the CBI status of a site by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon (✖) to delete the site row permanently from the system. A confirmation prompt displays to confirm the deletion.

Exhibit 6-6 shows a screen capture of the ‘Site Information’ screen:

Exhibit 6-6: Site Information Screen

Navigation: If you claimed a chemical CBI, click the ‘Next’ button to navigate to the ‘CBI Substantiation Part 1’ screen. You can also access this screen by clicking the ‘CBI Substantiation Part 1’ link within the navigation tree. If you did not claim a chemical as CBI, click the ‘Next’ button to navigate to the ‘Optional Cover Letter’ screen. You can also access this screen by clicking the ‘Optional Cover Letter’ link within the navigation tree to access this screen.

6.6 CBI Substantiation Part 1

You can access the ‘CBI Substantiation Part 1’ screen by clicking the ‘Next’ button from the ‘Site Information’ screen if a chemical was claimed CBI on the ‘Chemical Information’ screen.

You can also access this screen by clicking the ‘CBI Substantiation Part 1’ link within the navigation tree.

The ‘CBI Substantiation Part 1’ screen presents substantiation questions that require you to provide answers into the text fields as free text or enter ‘N/A’ if the question does not apply. The ‘CBI Substantiation Part 1’ screen consists of questions A through D, which read as follows:

- **(A) What harmful effects to your competitive position, if any, do you think would result if EPA publishes on the Inventory the identity of the chemical substance? How could a competitor use such information given the fact that the identity of the substance otherwise would appear on the Inventory of chemical substances with no link between the substance and your company or industry? How substantial would the harmful effects of disclosure be? What is the causal relationship between the disclosure and the harmful effects?:** Enter the answer to substantiation question A. This is a required field.
- **(B) For what period of time should confidential treatment be given? Until a specific date, the occurrence of a specific event, or permanently? Why?:** Enter the answer to substantiation question B. This is a required field.
- **(C) Has the chemical substance been patented? If so, have you granted licenses to others with respect to the patent as it applies to the chemical substance? If the chemical substance has been patented and therefore disclosed through the patent, why should it be treated as confidential for purposes of the Inventory?:** Enter the answer to substantiation question C. This is a required field.
- **(D) Has the identity of the chemical substance been kept confidential to the extent that your competitors do not know it is being manufactured or imported for a commercial purpose by anyone?:** Enter the answer to substantiation question D. This is a required field.

Exhibit 6-7 shows a screen capture of the ‘CBI Substantiation Part 1’ screen (Scroll 1):

Exhibit 6-7: CBI Substantiation Part 1 Screen (Scroll 1)

The screenshot shows the 'CBI Substantiation Part 1' screen in the GSPP system. The top navigation bar includes 'Home', 'Forms', and 'Resources' tabs, and a 'Log Out' button. The user is logged in as 'Jane Doe, Primary Support'. The main content area is titled 'CBI SUBSTANTIATION PART 1' and contains three questions (A, B, and C) with corresponding text input fields. A left sidebar lists navigation options under 'CBI Substantiation', with 'CBI Substantiation Part 1' selected. At the bottom, there are 'Validate', 'Save', and 'Preview' buttons, and a footer with various links and contact information.

Navigation: Click the ‘Next’ button from the ‘Site Information’ screen if a chemical was not claimed CBI, or the ‘CBI Substantiation Part 3’ screen to navigate to the ‘Optional Cover Letter’ screen. You can also access this screen by clicking the ‘Optional Cover Letter’ link within the navigation tree.

6.9 Optional Cover Letter

If you are not claiming a chemical as CBI on the ‘Chemical Information’ screen, click the ‘Next’ button from the ‘Site Information’ screen to navigate to the ‘Optional Cover Letter’ screen. If you did claim a chemical as CBI on the ‘Chemical Information’ screen, click the ‘Next’ button

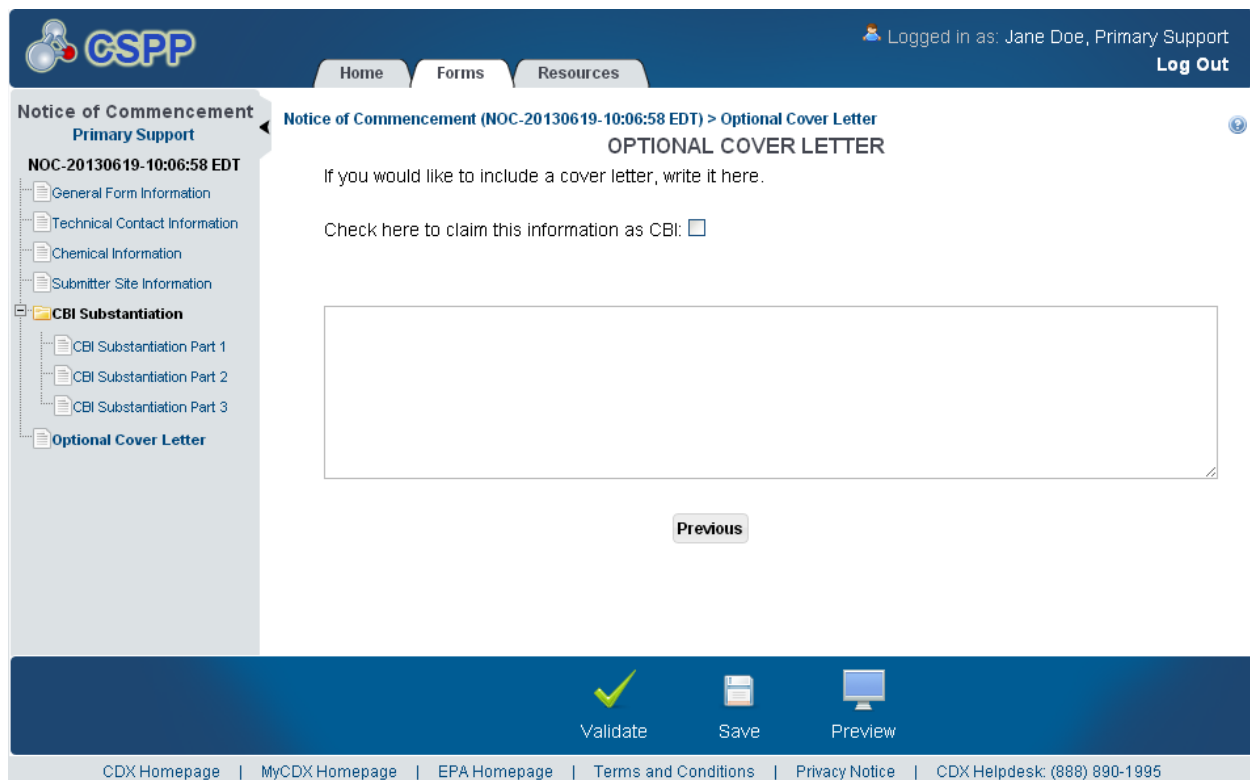

from the ‘CBI Substantiation Part 3’ screen to navigate to the ‘Optional Cover Letter’ screen. You can also access this screen by clicking the ‘Optional Cover Letter’ link within the navigation tree.

The ‘Optional Cover Letter’ screen is used to communicate information to EPA not collected elsewhere in the form. The cover letter is used to give OPPT resources and special instructions regarding the application. The cover letter should be either fully CBI or non-CBI to eliminate user error and to promote transparency between the company and EPA.

- **Check here to claim this information as CBI:** Check the ‘Check here to claim this information as CBI’ checkbox to claim the cover letter as confidential.
- **Cover Letter:** Enter any additional information or special instructions associated with the form.

Exhibit 6-13 shows a screen capture of the ‘Optional Cover Letter’ screen:

Navigation: Click the ‘Validate’ icon (✓) located in the bottom action bar to validate the form. Click the ‘Save’ icon (📁) located in the bottom action bar to perform a global save on the form. Click the ‘Preview’ icon (🖨️) located in the bottom action bar to view a PDF preview of the form.

7 Edit Support Form

The Section 5 Notices and Supports application allows support forms to be submitted such as ‘Amendment,’ ‘Other Correspondence,’ ‘Suspension Request,’ ‘Transfer of Ownership,’ ‘Withdrawal Requests,’ and ‘Test Data.’ Support forms are filed separately from PMN forms due to access restrictions and/or to provide information not included in the original PMN. The Support form is used to supplement the original PMN by providing additional data that was not provided originally, withdraw a PMN application, or provide data that was requested later.

7.1 Edit Support Form

To edit a Support form, navigate to the ‘Section 5 Notices and Supports Forms’ screen and click the alias link in the ‘Alias’ column of a form with a status of ‘In Progress.’ Refer to **Section 3.3** for additional details regarding the ‘Section 5 Notices and Supports Forms’ screen.

Refer to **Section 3.4** for additional details regarding the enter passphrase process.

7.2 General Form Information

You can access the ‘General Form Information’ screen by entering a passphrase on the ‘Enter Passphrase’ screen or creating a passphrase on the ‘Create Passphrase’ screen.

The ‘General Form Information’ screen provides a list of text fields and drop-down menus for you to input information about the originally filed form.

Please note that if you are using IE 7, the action bar icons may be misaligned and hovering over the ‘Next’ button on this screen causes the button to move. In addition, the calendar widget next to the ‘Original Submission Date’ text field will be misaligned.

- **Form Alias:** Enter the form alias. Upon navigating to the screen, the system auto-generates an editable form alias comprised of <Form Type-YYYYMMDD-HH:MM:SS Time Zone>. This is a required field.
- **Case Number:** Enter the case number that connects to the original submission in the system. This is a type-ahead field that displays the forms that have been submitted under the same organization. If the case number is in the application, the remaining fields on the ‘General Form Information’ screen will populate. The ‘Original Submitter Information’ screen will also populate for forms created within the thin client. In the case of legacy submissions, case numbers must be manually entered. The case number must be in one of the following formats: P-XX-XXXX for PMN, SN-XX-XXXX for SNUN, L-XX-XXXX for LVE, LM-XX-XXXX for LVE Modifications, X-XX-XXXX for LOREX, XM-XX-XXXX for LOREX Modifications, T-XX-XXXX for TMEA, I-XX-XXXX for Mock PMN, J-XX-XXXX for MCAN, R-XX-XXXX for TERA, G-XX-XXXX for Tier-I, H-XX-XXXX for Tier-II, or BF-XX-XXXX for Bona Fide. This field does not accept -0000 as a case number suffix. This is a required field.
- **TS Number:** Enter the TS number; this field accepts any six (6) character alphanumeric combination. This value is determined by the company in order to identify the form for both payments and connecting related submissions (Letters of Support, Joint Submissions and corrections). The TS number should include two (2), three (3), or four (4) letters. Company names, recognizable words, and numeric series are not recommended.

- **Type of Support:** Select the type of support from the drop-down menu. This field contains the following values: ‘Amendment,’ ‘Suspension Request,’ ‘Test Data,’ ‘Transfer of Ownership,’ ‘Withdrawal Request,’ and ‘Other Correspondence.’ The ‘Amendment’ type is unavailable when creating an amendment. This is a required field.
- **Check if requested by EPA/Contractor:** Check the ‘Check if requested by EPA/Contractor’ checkbox to display fields to enter information to identify the requestor that asked you to submit support information.
- **Last Name:** Enter the requestor’s last name. This field displays if the ‘Check if requested by EPA/Contractor’ checkbox is checked and is required if displayed.
- **First Name:** Enter the requestor’s first name. This field displays if the ‘Check if requested by EPA/Contractor’ checkbox is checked and is required if displayed.
- **EPA/Contractor:** Select a value from the drop-down menu to identify whether the requestor is an EPA official, a contractor, or unknown. This drop-down menu contains the following options: ‘EPA,’ ‘Contractor,’ and ‘Unknown.’
- **Actions:** Click the ‘Save’ icon () to save an individual EPA/contractor entry. Click the ‘Form’ icon () to edit an individual EPA/contractor entry. Click the ‘Delete’ icon () to delete an individual EPA/contractor entry. Click the ‘Add’ icon () to add another entry to enter EPA/contractor information.
- **CBI:** Check the ‘CBI’ checkbox to claim the support description or explanation of support as confidential.
- **Description or Explanation of Support:** Enter the support description or explanation of support. Either the ‘Description or Explanation of Support’ field is required, or an attached document is required.
- **Attach Document:** Click the ‘Attach Document’ button to generate the ‘Attach Documents’ pop-up window and attach documents describing the Support form. Attachments that are uploaded include individual toxicity studies, GPC data, spectra, exposure monitoring evaluations, physical and chemical properties data, SAR modeling, test samples characterization data, explanatory comments, etc. Analytical tests should be provided with their complete data set. For example, provide a GPC test report with time interval data and all graphs. For ease of review, group attachments by type of data, e.g., physical/chemical properties, fate information. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of a file that is uploaded on the ‘Attach Documents’ pop-up window.
- **Description:** Displays the description of a file that is uploaded on the ‘Attach Documents’ pop-up window.
- **Subtype:** Displays the subtype of a document.
- **Pages:** Displays the number of pages a document contains.
- **CBI:** Indicates the CBI status of a document by displaying either a ‘Y’ or an ‘N.’
- **Actions:** Click the ‘Delete’ icon () to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion.

Navigation: Click the ‘Validate’ icon (✓) located in the bottom action bar to validate the form. Click the ‘Save’ icon (📄) located in the bottom action bar to perform a global save on the form. Click the ‘Preview’ icon (🖨️) located in the bottom action bar to view a PDF preview of the form.

8 Edit Bona Fide Form

The purpose of the Bona Fide module is to receive an official determination from EPA as to whether a substance is on the TSCA inventory. Submitters may attempt to avoid submitting a PMN by completing a Bona Fide form to establish that the chemical already exists on the inventory. The Bona Fide process is covered in a thirty (30) day period.

8.1 Edit Bona Fide Form

To edit a Bona Fide form, navigate to the ‘Section 5 Notices and Supports Forms’ screen and click the alias link in the ‘Alias’ column of a Bona Fide form with a status of ‘In Progress.’ Refer to **Section 3.3** for additional details regarding the ‘Section 5 Notices and Supports Forms’ screen.

Refer to **Section 3.4** for additional details regarding the enter passphrase process.

8.2 General Document Information

You can access the ‘General Document Information’ screen by accessing a Section 5 Notices and Supports Bona Fide form that is ‘In Progress’ and entering the passphrase associated with the selected form.

The ‘General Document Information’ screen presents text fields and checkboxes for you to input identifying information for the specific form. You will have the option to assign a ‘Form Alias’ by which the form can be identified. The form alias is helpful when you or the company has multiple forms and/or when you must differentiate between forms to the help desk. If a form alias is not entered, the system will provide an editable default alias in the following format: <Form Type-YYYYMMDD-HH:MM:SS Time Zone>.

You can claim the entirety of the submission as CBI. The entire submission will be claimed as CBI if you check the ‘I claim the entirety of the submission as CBI’ checkbox. The entire submission will be considered non-CBI if you leave the ‘I claim the entirety of the submission as CBI’ checkbox unchecked.

You can indicate that a technical contact will be identified by checking the ‘Technical Contact’ checkbox. The technical contact must possess sufficient knowledge to answer any questions EPA may have about the chemical reported in the form. The application will display a ‘Technical Contact Information’ screen when you check the ‘Technical Contact’ checkbox.

You can indicate that a Letter of Support is expected to be filed by a secondary submitter by checking the ‘Letter of Support’ checkbox. The Letter of Support shall be submitted by a Secondary Authorized Official. They will have a unique identification number that will link the submissions. The unique identification number will be sent to the Letter of Support submitter, via email, and the unique identifier will link the two forms together.

You can indicate that you are submitting on behalf of another company by checking the ‘Submitting on Behalf of Company’ checkbox. The ‘Submitting on Behalf of Company’ screen presents a list of text fields for you to input contact information for the company on whose behalf the submission is being made when submitting on behalf of another company. The application will display a ‘Submitting on Behalf of Company’ screen during the submission process when you check the ‘Submitting on Behalf of Company’ checkbox.

- **Form Alias:** Edit the form alias if necessary. Upon navigating to the screen, the screen will auto-generate an editable form alias in the following format: <Form Type-YYYYMMDD-HH:MM:SS Time Zone>. This is a required field.
- **I claim the entirety of the submission as CBI:** Check the ‘I claim the entirety of the submission as CBI’ checkbox to flag all data contained within the form as confidential.
- **Technical Contact:** Check the ‘Technical Contact’ checkbox to display a ‘Technical Contact Information’ screen for you to enter contact information about the technical contact associated with the reported chemical.
- **Letter of Support:** Check the ‘Letter of Support’ checkbox to indicate that the form is pending a Letter of Support and to display the ‘Letter of Support’ folder within the navigation tree. The ‘Letter of Support’ folder contains the following screens: ‘Letter of Support Submitter Information’ and ‘Letter of Support Submission Information.’
- **Submitting on Behalf of Company:** Check the ‘Submitting on Behalf of Company’ checkbox to indicate that you will be submitting a Bona Fide form on behalf of another company. A ‘Submitting on Behalf of Company’ screen will display during the submission process for you to enter information pertaining to the company you are submitting on behalf of that will manufacture or import the chemical substance.

Bona Fide (Bona Fide-20130502-13:16:43 EDT) > General Document Information

GENERAL DOCUMENT INFORMATION

The form alias is a required field that allows the user to give the Bona Fide a name to be displayed in the 'Alias' field on the Section 5 Notices and Supports Forms screen. Its purpose is to make it easier for you to distinguish between multiple forms. If an alias is not selected, the field will default to the date and time the Bona Fide was created. The form alias may be changed at any time.

Form Alias:

Please check all applicable checkboxes below:

claim the entirety of the submission as CBI.

The technical contact is a subject matter expert (SME) who is capable of answering questions related to the chemical within the Bona Fide. The technical contact does not have to physically work at the site reported but must possess extensive knowledge on the chemical reported in order to answer EPA's questions pertaining to the submission. Please check the 'Technical Contact' checkbox below to identify a technical contact for your submission.

Technical Contact:

The 'Letter of Support' screen is used to enter contact information regarding the Letter of Support submitter who will submit information separately for the Bona Fide. The email address will be used to send the secondary submitter the unique identification number to tie the Letter of Support, completed by the secondary submitter, to the primary Bona Fide completed by the primary submitter. Please check the 'Letter of Support' checkbox below to identify a Letter of Support submitter.

Navigation: Click the ‘Next’ button to navigate to the ‘Primary Contact Information’ screen. You can also access this screen by clicking the ‘Primary Contact Information’ link within the navigation tree.

8.3 Primary Contact Information

You can access the ‘Primary Contact Information’ screen by clicking the ‘Next’ button from the ‘General Document Information’ screen. You can also access this screen by clicking the ‘Primary Contact Information’ link within the navigation tree.

The data fields on the ‘Primary Contact Information’ screen are pre-populated based on information entered during CDX registration. All fields are editable allowing for necessary

updates. The 'Title' field on this screen is not pre-populated from CDX registration and you are required to enter a value for this field.

If you checked the 'I claim the entirety of the submission as CBI' checkbox on the 'General Document Information' screen, all entered primary contact information will be flagged as CBI.

The following fields are captured and displayed from the primary submitter's CDX registration information:

- **Prefix:** Select the primary contact's prefix from the drop-down menu.
- **First Name:** Enter the primary contact's first name. This is a required field.
- **Middle Initial:** Enter the primary contact's middle initial.
- **Last Name:** Enter the primary contact's last name. This is a required field.
- **Suffix:** Select the primary contact's suffix from the drop-down menu.
- **Title:** Enter the primary contact's job title. This is a required field.
- **Company Name:** Enter the primary contact's company name.
- **Phone Number:** Enter the primary contact's daytime U.S. phone number; dashes are not allowed. This is a required field.
- **Phone Extension:** Enter the extension to the primary contact's daytime U.S. phone number.
- **Email Address:** Enter the primary contact's email address. The email address must follow the standard email address format: John.Doe@ABC.com. This is a required field.
- **Mailing Address 1:** Enter the first line of the primary contact's mailing address. This is a required field.
- **Mailing Address 2:** Enter the second line of the primary contact's mailing address.
- **City:** Enter the city of the primary contact's mailing address.
- **State:** Select the state of the primary contact's mailing address from the drop-down menu. The state field is required if the user selects 'United States' from the country drop-down menu.
- **Postal Code:** Enter the postal code of the primary contact's mailing address. This is a required field.
- **Country:** Select the country of the primary contact's mailing address. This is a required field.

Exhibit 8-3 shows a screen capture of the ‘Primary Contact Information’ screen:

Exhibit 8-3: Primary Contact Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Technical Contact Information’ screen if you checked the ‘Technical Contact’ checkbox on the ‘General Document Information’ screen. You can also access this screen by clicking the ‘Technical Contact Information’ link within the navigation tree. Click the ‘Next’ button to navigate to the ‘Statement of Intent’ screen if you left the ‘Technical Contact’ checkbox unchecked on the ‘General Document Information’ screen. You can also access this screen by clicking the ‘Statement of Intent’ link within the navigation tree.

8.4 Technical Contact Information

If you indicated on the 'General Document Information' screen that technical contact information would be provided, then you can navigate to the 'Technical Contact Information' screen by clicking the 'Next' button from the 'Primary Contact Information' screen. You can also access this screen by clicking the 'Technical Contact Information' link within the navigation tree.

The technical contact is a subject matter expert (SME) who is capable of answering questions related to the chemical submitted to EPA within the Bona Fide form. The technical contact does not have to work at the port or site reported on the form but must possess sufficient knowledge to answer EPA's questions pertaining to the chemical reported in the form.

The text fields on the 'Technical Contact Information' screen will be blank upon accessing the screen. To add information, you will enter data into the blank text boxes for the listed text fields. If you checked the 'I claim the entirety of the submission as CBI' checkbox on the 'General Document Information' screen, all entered technical contact information will be flagged as CBI.

Please note that if you are using IE 7, there will be a spacing issue between the 'Suffix' drop-down menu and the 'Title' text field.

- **Prefix:** Select the technical contact's prefix from the drop-down menu.
- **First Name:** Enter the technical contact's first name. This is a required field.
- **Middle Initial:** Enter the technical contact's middle initial.
- **Last Name:** Enter the technical contact's last name. This is a required field.
- **Suffix:** Select the technical contact's suffix from the drop-down menu.
- **Title:** Enter the technical contact's job title.
- **Company Name:** Enter the technical contact's company name.
- **Phone Number:** Enter the technical contact's daytime U.S. phone number; dashes are not allowed. This is a required field.
- **Phone Extension:** Enter the technical contact's phone number extension.
- **Email Address:** Enter the technical contact's email address. The email address must follow the standard email address format: John.Doe@ABC.com. This is a required field.
- **Mailing Address 1:** Enter the first line of the technical contact's mailing address.
- **Mailing Address 2:** Enter the second line of the technical contact's mailing address.
- **City:** Enter the city of the technical contact's mailing address.
- **State:** Select the state of the technical contact's mailing address from the drop-down menu.
- **Postal Code:** Enter the postal code of the technical contact's mailing address.
- **Country:** Displays 'United States.'

Exhibit 8-5 shows a screen capture of the ‘Technical Contact Information’ screen (Scroll 2):

Exhibit 8-5: Technical Contact Information Screen (Scroll 2)

Navigation: Click the ‘Next’ button to navigate to the ‘Statement of Intent’ screen. You can also access this screen by clicking the ‘Statement of Intent’ link within the navigation tree.

8.5 Statement of Intent

You can access the ‘Statement of Intent’ screen by clicking the ‘Next’ button from the ‘Primary Contact Information’ if you left the ‘Technical Contact’ checkbox unchecked on the ‘General Document Information’ screen or by clicking the ‘Next’ button on the ‘Technical Contact Information’ screen if you checked the ‘Technical Contact’ checkbox on the ‘General Document Information’ screen. You can also access this screen by clicking the ‘Statement of Intent’ link within the navigation tree.

The ‘Statement of Intent’ screen requires you to indicate whether your intent is to manufacture or import the chemical substance for which you are requesting a TSCA inventory determination from EPA. You must indicate the activities of ‘Manufacture’ and/or ‘Import’ by checking the

provided checkboxes. If you indicate that you intend to manufacture the chemical substance, a prompt to identify the ‘Site of Manufacture’ after clicking the ‘Add Site’ button on the ‘Submitter Site Identification’ screen will display. Similarly, if you indicate that you intend to import the chemical substance, a prompt to identify a ‘Port of Entry’ after clicking the ‘Add Site’ button on the ‘Submitter Site Identification’ screen will display.

On this screen, you are required to enter the date you expect to submit a Section 5 notification if the result is that the chemical is not found on the inventory.

If you checked the ‘I claim the entirety of the submission as CBI’ checkbox on the ‘General Document Information’ screen, all information entered on the ‘Statement of Intent’ screen will be flagged as CBI.

- **Manufacture:** Check the ‘Manufacture’ checkbox to indicate the chemical substance will be manufactured. Either the ‘Manufacture’ or ‘Import’ checkbox is required to be checked.
- **Import:** Check the ‘Import’ checkbox to indicate the chemical substance will be imported. Either the ‘Manufacture’ or ‘Import’ checkbox is required to be checked.
- **Date of expected Section 5 notification if the result is that the chemical is not on the inventory:** Enter the date when you are expecting to submit a Section 5 notification if the result is that the chemical is not found on the inventory. This data can be entered in any format (e.g. ‘Quarter 1 of 2014,’ ‘10/01/14’). This is a required field.

Exhibit 8-6 shows a screen capture of the ‘Statement of Intent’ screen:

Exhibit 8-6: Statement of Intent Screen

' and 'Import: '. A text field is labeled 'Date of expected Section 5 notification if the result is that the chemical is not on the inventory.' Below the text field are two buttons: 'Previous' and 'Next'. The 'Next' button is highlighted with a red border. The left navigation pane shows a tree structure with categories like 'Bona Fide Primary Support', 'Letter of Support', 'Chemical', and 'Site Information'. The top navigation bar includes 'Home', 'Forms', and 'Resources' tabs, and a 'Log Out' button. The bottom of the page has a blue bar with 'Upload XML' button and 'Validate', 'Save', and 'Preview' icons. The footer contains links to CDX, MyCDX, EPA, and CDX Helpdesk."/>

Navigation: Click the ‘Next’ button to navigate to the ‘Letter of Support Submitter Information’ screen if you checked the ‘Letter of Support’ checkbox on the ‘General Document Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submitter Information’ link within the navigation tree.

8.6 Letter of Support Submitter Information

You can access the ‘Letter of Support Submitter Information’ screen by clicking the ‘Next’ button from the ‘Statement of Intent’ screen if you selected the ‘Letter of Support’ checkbox on the ‘General Document Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submitter Information’ link within the navigation tree.

The ‘Letter of Support Submitter Information’ screen is used to enter contact information regarding the Letter of Support submitter who will provide additional, separate information regarding the Bona Fide form. The email address provided for the Letter of Support submitter

will be used to send the unique identification number, which is used to link the primary and secondary submissions, to the Letter of Support submitter.

If you checked the 'I claim the entirety of the submission as CBI' checkbox on the 'General Document Information' screen, all information entered on the 'Letter of Support Submitter Information' screen will be flagged as CBI.

- **Prefix:** Select the Letter of Support submitter's prefix from the drop-down menu.
- **First Name:** Enter the Letter of Support submitter's first name. This is a required field.
- **Middle Initial:** Enter the Letter of Support submitter's middle initial.
- **Last Name:** Enter the Letter of Support submitter's last name. This is a required field.
- **Suffix:** Select the Letter of Support submitter's suffix from the drop-down menu.
- **Title:** Enter the Letter of Support submitter's job title.
- **Company Name:** Enter the Letter of Support submitter's company name. This is a required field.
- **Phone Number:** Enter the Letter of Support submitter's U.S. or international daytime phone number; dashes are not allowed. This is a required field.
- **Phone Extension:** Enter the Letter of Support submitter's U.S. or international daytime phone number extension.
- **Email Address:** Enter the Letter of Support submitter's email address. The email address must follow the standard email address format: John.Doe@ABC.com. This is a required field.
- **Mailing Address 1:** Enter the first line of the Letter of Support submitter's mailing address. This is a required field.
- **Mailing Address 2:** Enter the second line of the Letter of Support submitter's mailing address.
- **City:** Enter the city of the Letter of Support submitter's mailing address. This is a required field.
- **State:** Select the state of the Letter of Support submitter's mailing address from the drop-down menu. This is a required field when the 'Country' field is identified as 'United States.'
- **Postal Code:** Enter the postal code of the Letter of Support submitter's mailing address. This is a required field.
- **Country:** Select the country of the Letter of Support submitter's mailing address from the drop-down menu. This is a required field.

Exhibit 8-7 shows a screen capture of the ‘Letter of Support Submitter Information’ screen:

Exhibit 8-7: Letter of Support Submitter Information Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Letter of Support Submission Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submission Information’ link within the navigation tree.

8.7 Letter of Support Submission Information

You can access the ‘Letter of Support Submission Information’ screen by clicking the ‘Next’ button from the ‘Letter of Support Submitter Information’ screen. You can also access this screen by clicking the ‘Letter of Support Submission Information’ link within the navigation tree.

The ‘Letter of Support Submission Information’ screen is used as a communication point between two companies. The ‘Letter of Support Submission Information’ screen displays a comment box for you to enter information that will be passed on to the Letter of Support

submitter. A text field will be used to send information to the Letter of Support submitter in an email sent by the primary submitter. A 'Unique Identification Number for Letter of Support Submissions' box will also display on this screen. The unique identification number is generated when you declare a Letter of Support submission is being established.

Letter of Support Submission Process: When you designate that a Letter of Support submission is being filed, you will be asked to enter all the information within the 'Letter of Support Submission' folder. The forms from the primary submitter will be linked, but not combined by the system.

When the primary submitter chooses to notify the Letter of Support submitter of the unique identification number, the system will send an email to the Letter of Support submitter designated on the 'Letter of Support Submitter Information' screen. The email will contain the 'Unique Identifier Number' that will link the two forms.

When the Letter of Support submitter accesses the 'Section 5 Notices and Supports Forms' screen and creates a form to be filed, the user will be prompted to enter the unique identification number on the 'Create Passphrase' screen. Once the unique identification number has been entered, the system will link the primary and Letter of Support forms. You may add additional Letters of Supports by clicking the 'Add Letter of Support' link within the navigation tree.

- **Letter of Support Submission Information Instructions:** Enter the information that the Primary AO is sending to the Letter of Support submitter.
- **Letter of Support Submission Informational Text:** Displays instructional text provided by OPPT, the unique identifier number generated for the form, and allows you to email the unique identifier number to the Letter of Support submitter by clicking the 'Notify the Secondary Submitter of the letter of support submission' link.
- **Unique Identification Number:** The unique identification number is a random number auto-generated to pass on to the Letter of Support submitter to create a Letter of Support submission.

Exhibit 8-8 shows a screen capture of the ‘Letter of Support Submission Information’ screen:

Exhibit 8-8: Letter of Support Submission Information Screen

Navigation: Click the ‘Notify the Secondary Submitter of the letter of support submission’ link to access the ‘Unique Identifier Notification’ pop-up window. Click the ‘Next’ button to navigate to the ‘Chemical Identification Information’ screen. You can also access the ‘Chemical Identification’ screen by clicking the ‘Chemical Identification’ link within the navigation tree.

8.7.1 Notify Secondary Submitter of Letter of Support Information

You can access the ‘Unique Identifier Notification’ window by clicking the ‘Notify the Secondary Submitter of the letter of support submission’ link from the ‘Letter of Support Submission Information’ screen.

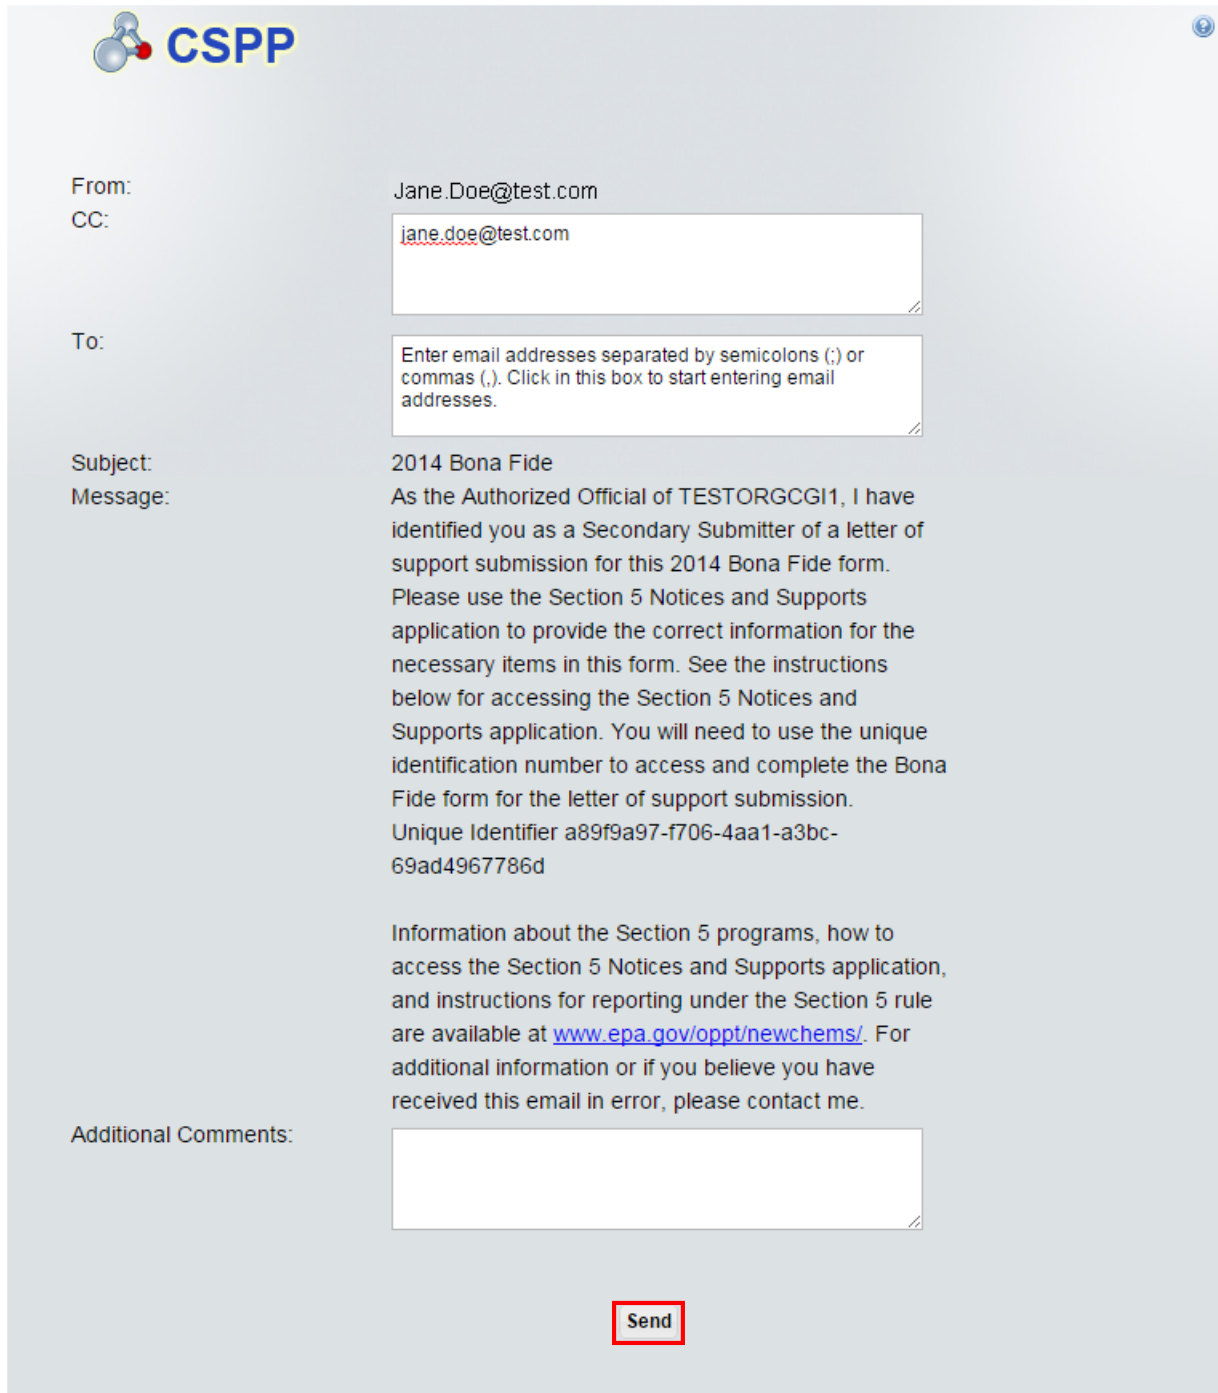

The ‘Unique Identifier Notification’ window is used to notify the Secondary Submitter of the ‘Unique Identifier Number.’ The ‘Unique Identifier Notification’ screen displays a ‘CC’ field for

you to add other email addresses to the notification (including the original submitter), a ‘To’ field, and an ‘Additional Comments’ text box.

- **From:** Displays the email address of the Primary AO that created the form.
- **CC:** Contains instructional text for a user to enter multiple email addresses. This will automatically populate with the email address of the Primary AO, and the email address of the technical contact.
- **To:** Contains the editable email address of the Letter of Support submitter specified on the ‘Letter of Support Submitter Information’ screen; this email address will be automatically populated upon navigating to the window.
- **Subject:** Displays ‘YYYY Bona Fide.’
- **Message:** Displays a pre-determined message in the email sent to a Letter of Support submitter.
- **Additional Comments:** Enter any other additional comments or instructions to be passed onto the Letter of Support submitter.
- **Send:** Click the ‘Send’ button to generate and send the email to the email addresses identified in the ‘CC’ and ‘To’ fields.

Exhibit 8-9 shows a screen capture of the 'Unique Identifier Notification' pop-up window:

Exhibit 8-9: Unique Identifier Notification Pop-Up Window

The screenshot shows a web-based email form titled "CSPP". The form fields are as follows:

- From:** Jane.Doe@test.com
- CC:**
- To:**
- Subject:** 2014 Bona Fide
- Message:**

As the Authorized Official of TESTORCGI1, I have identified you as a Secondary Submitter of a letter of support submission for this 2014 Bona Fide form. Please use the Section 5 Notices and Supports application to provide the correct information for the necessary items in this form. See the instructions below for accessing the Section 5 Notices and Supports application. You will need to use the unique identification number to access and complete the Bona Fide form for the letter of support submission. Unique Identifier a89f9a97-f706-4aa1-a3bc-69ad4967786d

Information about the Section 5 programs, how to access the Section 5 Notices and Supports application, and instructions for reporting under the Section 5 rule are available at www.epa.gov/oppt/newchems/. For additional information or if you believe you have received this email in error, please contact me.
- Additional Comments:**

At the bottom center of the form is a red-bordered button labeled "Send".

Navigation: Click the ‘Send’ button to send the email to the Letter of Support submitter and navigate back to the ‘Letter of Support Submission Information’ screen. Click the ‘X’ button in the upper right-hand corner to cancel the unique identifier notification process.

8.8 Chemical Identification Information

You can access the ‘Chemical Identification Information’ screen by clicking the ‘Next’ button from the ‘Statement of Intent’ screen if you left the ‘Letter of Support’ checkbox unchecked on the ‘General Document Information’ screen. You can also access the ‘Chemical Identification Information’ screen from the ‘Letter of Support Submission Information’ screen if you checked the ‘Letter of Support’ checkbox on the ‘General Document Information’ screen. You can also access this screen by clicking the ‘Chemical Identification Information’ link within the navigation tree.

The ‘Chemical Identification Information’ screen identifies the type of chemical the submitter will be entering into the application. You will be able to file a Bona Fide form for a class 1 or 2/Biotechnology chemical substance or a polymer. Based on your selection, the appropriate screens for the respective chemical will appear.

This screen also provides a text field for you to identify an alias for the chemical substance. The chemical alias is required if a Letter of Support is being filed.

- **Class 1 or 2/Biotechnology Chemical Substance:** Select the ‘Class 1 or 2/Biotechnology Chemical Substance’ radio button to indicate that the chemical is a class 1 or 2/biotechnology substance. If you select the ‘Polymer’ radio button after initially selecting the ‘Class 1 or 2/Biotechnology Chemical Substance’ radio button, the application generates a notification message warning you that you will lose all data for this chemical if the chemical type changes. The user is required to select one of the two radio button options displayed in the ‘Chemical Type’ section.
- **Polymer:** Select the ‘Polymer’ radio button to indicate that the chemical is a polymer. If you select the ‘Class 1 or 2/Biotechnology Chemical Substance’ radio button after initially selecting the ‘Polymer’ radio button, the application generates a notification message warning you that you will lose all data for this chemical if the chemical type changes. The user is required to select one of the two radio button options displayed in the ‘Chemical Type’ section.
- **Chemical Alias:** Enter the chemical alias to associate with a chemical. This is a required field only if a Letter of Support is being filed.

Exhibit 8-10 shows a screen capture of the ‘Chemical Identification Information’ screen (Class 1 or 2 Chemical Substance):

Exhibit 8-10: Chemical Identification Information Screen (Class 1 or 2 Chemical Substance)

The screenshot displays the 'Chemical Identification Information' screen within the CDX GSPPP system. The user is logged in as Jane Doe, Primary Support. The page features a navigation tree on the left and a main content area. The 'Chemical Type' section has two radio buttons: 'Class 1 or 2 Chemical Substance' (selected) and 'Polymer'. The 'Chemical Alias' section has a text input field. Below the input fields are 'Previous' and 'Next' buttons, with 'Next' highlighted by a red box. At the bottom of the screen, there are buttons for 'Upload XML', 'Validate', 'Save', and 'Preview'. The footer contains navigation links and contact information.

Navigation: If you selected the ‘Class 1 or 2/Biotechnology Chemical Substance’ radio button, click the ‘Next’ button to navigate to the ‘Class 1 or 2/Biotechnology Chemical Substances’ screen. If you selected the ‘Polymer’ radio button, click the ‘Next’ button to navigate to the ‘Polymer Identification Information’ screen.

8.9 Class 1 or 2/Biotechnology Chemical Substances

If you selected the ‘Class 1 or 2/Biotechnology Chemical Substance’ radio button, click the ‘Next’ button to navigate to the ‘Class 1 or 2/Biotechnology Chemical Substances’ screen.

The ‘Class 1 or 2/Biotechnology Chemical Substances’ screen provides fields for you to enter information describing the chemical for the Bona Fide which is to be filed, including its name, composition, and structure.

You can add a chemical component by clicking the 'Add New Chemical' button. Upon clicking the 'Add New Chemical' button, an expandable/collapsible field set generates that contains numerous fields to identify the chemical in question. You will be able to enter multiple chemical substances, each with unique information, by clicking the 'Add New Chemical' button for each chemical substance you wish to identify.

After the document(s) is/are attached and you have clicked the 'OK' button, the 'Attach Chemical Structure' pop-up window closes and the document information will be displayed in a table format on the 'Class 1 or 2/Biotechnology Chemical Substances' screen. The attachment table displays the file name of the document and user-provided description of the document. The system allows you to delete unwanted documents by clicking the 'Delete' icon (✖) located under the 'Actions' column. To access or edit previously attached documents, click the appropriate file name of the document within the 'File Name' column of the attachment table.

Please note that if you are using IE 7, part of the content on this screen displays behind the Bona Fide navigation tree and certain fields on this screen may display twice.

- **Add New Chemical:** Click the button to generate the class 1 or 2/Biotechnology chemical substances field set.
- **Cancel:** Click the 'Cancel' link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and to remove a field set. The 'Cancel' link displays when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the 'Edit' link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The 'Edit' link displays when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the 'Delete' icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion.
- **Expand All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the link located at the upper right-hand corner of the expandable/collapsible field sets to collapse a series of field sets.
- **Class of Substance:** In the section, 'Class of Substance,' you identify whether a 'Class 1' or 'Class 2/Biotechnology' chemical substance is being reported. When you select a 'Class 2/Biotechnology' chemical substance radio button, you are indicating that some portions of the structure may not be known and an additional screen will appear within the navigation tree that provides fields for you to enter information concerning how the chemical was created. If multiple class 2 chemical substances are added, one 'Class 2/Biotechnology Substances' screen will apply to all chemical substances.
- **Add Chemical ID:** You can access the 'Add Chemical ID' pop-up window by clicking the 'Add Chemical ID' button within the 'Chemical Identification Information' field set. You can search for the reported chemical(s) either by the 'CASRN' or 'CA Index Name or Other Synonym.' If you retrieve zero results, the system provides fields for you to enter the chemical information by filling in the 'Chemical Name' and the 'Chemical Abstract Services Registry Number' under the manual entry field set. The system provides functionality to enter the

selected chemical by clicking the 'OK' button located at the bottom of the 'Add Chemical ID' window.

- **Chemical Name:** The system provides fields for you to identify the 'Chemical Name' and the 'CASRN' (if available). The system provides functionality for you to search for the chemical substance using the 'Add Chemical ID' search or manually enter the chemical information in the 'Add Chemical ID' pop-up.
- **ID Method:** The system shall require that you identify which ID method was used to determine the chemical identity. If you select 'Method 1,' you are required to attach an IES report. You can also select 'Method 2 (Other Method).'
- **Attach IES Report:** To access the 'Attach IES Report' pop-up window, click the 'Attach IES Report' button that displays within the 'Chemical Identification Information' field set. After you attach the document(s), and click the 'OK' button, the 'Attach IES Report' pop-up window will close and the document information will be displayed in a table format on the 'Class 1 or 2/Biotechnology Chemical Substances' screen. The document attachment table displays the file name of the document(s) and the user-provided description of the document(s). Click the 'Delete' icon (✖) located under the 'Actions' column to delete unwanted documents. Click the file name link under the 'File Name' column to access or edit previously attached documents.
- **Molecular Formula:** Enter a molecular formula in a text field using a free text format. This field is optional.
- **Chemical Structure Diagram:** The system allows you to attach a chemical structure diagram. This field is optional.
- **Attach Chemical Structure:** Click the 'Attach Chemical Structure' button within the 'Chemical Identification Information' field set to access the 'Attach Chemical Structure' pop-up window. You can attach the file(s) and enter a description of the document regarding the chemical structure.
- **File Name:** Displays the file name and file extension of the file that is uploaded on the 'Attach Chemical Structure' window.
- **Description:** Displays the description of the chemical structure.
- **Actions:** Click the 'Delete' icon (✖) to delete the entire attached chemical structure row permanently from the system. A warning message displays to confirm the deletion of the document.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the 'Save' icon (💾) located within the bottom action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the 'Previous' and 'Next' buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.

Exhibit 8-11 shows a screen capture of the ‘Class 1 or 2/Biotechnology Chemical Substances’ screen:

Exhibit 8-11: Class 1 or 2 Chemical/Biotechnology Chemical Substances Screen

The screenshot displays the CDX web application interface. At the top, the CDX logo is on the left, and the user is logged in as 'Jane Doe, Primary Support' on the right. The main navigation bar includes 'Home', 'Forms', and 'Resources'. The left sidebar shows a navigation tree with categories like 'Bona Fide Primary Support', 'Letter of Support', 'Chemical', and 'Site Information'. The main content area is titled 'CLASS 1 OR 2/BIO TECHNOLOGY CHEMICAL SUBSTANCES' and contains the following form fields:

- Class of Substance:** Radio buttons for 'Class 1' (selected) and 'Class 2/Biotechnology'.
- Add Chemical ID:** A button to search EPA's Substance Registry Services (SRS).
- CASRN:** A text input field.
- Chemical Name:** A text input field.
- ID Method:** Radio buttons for 'Method 1 (CAS Inventory Expert Service)' and 'Method 2 (Other Method)'.
- Attach IES Report:** A button.
- Molecular Formula:** An optional text input field.
- Chemical Structure Diagram:** An optional text input field with a note to include an attachment.
- Attach Chemical Structure:** A button.
- Save:** A button highlighted with a red box.

At the bottom of the page, there is a navigation bar with icons and labels for 'Validate', 'Save', 'Preview', and 'Submit'. The 'Next' button is also highlighted with a red box. The footer contains links to 'CDX Homepage', 'MyCDX Homepage', 'EPA Homepage', 'Terms and Conditions', 'Privacy Notice', and 'CDX Helpdesk: (888) 890-1995'.

Navigation: If you selected the ‘Class 1’ radio button, click the ‘Next’ button to navigate to the ‘Use Information’ screen. You can also access this screen by clicking the ‘Use Information’ link within the navigation tree. If you selected the ‘Class 2’ radio button, click the ‘Next’ button to navigate to the ‘Class 2 Substances’ screen. You can also access this screen by clicking the ‘Class 2 Substances’ link within the navigation tree.

8.10 Class 2/Biotechnology Substances

You can navigate to the 'Class 2/Biotechnology Substances' screen by clicking the 'Next' button from the 'Class 1 or 2/Biotechnology Chemical Substances' screen when you select the 'Class 2/Biotechnology' radio button. You can also access this screen by clicking the 'Save' icon () within the action bar and clicking the 'Class 2/Biotechnology Substances' link within the navigation tree.

The 'Class 2/Biotechnology Substances' screen provides fields for you to enter in information regarding a class 2/biotechnology chemical substance. A class 2/biotechnology chemical substance is a substance that may not have a defined chemical structure that has been identified. This screen provides fields for you to identify specific elements in the creation of the chemical using the following fields: 'Precursor Substances,' 'Nature of Reaction,' and 'Range of Composition (Optional).'

You will be able to enter precursor substances by searching SRS or by the manual entry fields when the substance is not in SRS. The substances will display in a table listing the 'Chemical Name' and CASRN.

The system provides fields for you to capture 'Nature of Reaction' and 'Range of Composition' in text boxes. The text boxes for both 'Nature of Reaction' and 'Range of Composition' can be claimed as CBI.

- **Precursor Substances:** This table captures the chemicals identified as immediate precursor substances, along with the respective CASRNs.
- **Search SRS:** Click the 'Search SRS' button to display the 'Search Substance Registry Services' pop-up window. Refer to **Section 3.8** for further details regarding the search SRS functionality.
- **Chemical Name:** Displays the chemical name associated with a precursor substance. Click the 'Chemical Name' link to navigate to the 'Search SRS' pop-up window for edits.
- **CASRN:** Displays the CASRN associated with a precursor substance.
- **Action:** Click the 'Delete' icon () to delete the entire chemical row permanently from the system. A warning message will display to confirm the deletion of the chemical.
- **Nature of Reaction:** Enter the 'Nature of Reaction' description. This is a required field.
- **Range of Composition:** Enter the 'Range of Composition' description. This field is optional.
- **Attach Document:** Click the 'Attach Document' button to generate the 'Attach Documents' pop-up window and upload a document. Refer to **Section 3.7** for further details regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of the file that is uploaded on the 'Attach Documents' window.
- **Description:** Displays the description associated with a document.
- **Actions:** Click the 'Delete' icon () to delete the entire document row permanently from the system. A warning message displays to confirm the deletion.

Exhibit 8-13 shows a screen capture of the ‘Class 2/Biotechnology Substances’ screen (Scroll 2):

Exhibit 8-13: Class 2/Biotechnology Substances Screen (Scroll 2)

The screenshot displays the 'Class 2/Biotechnology Substances' screen. At the top, the user is logged in as 'Jane Doe, Primary Support'. The navigation tree on the left shows the current path: Bona Fide Primary Support > Chemical > Chemical 41487 > Class 2 Substances. The main content area includes a 'Search SRS' button, a table for precursor substances, a 'Nature of Reaction' text area, a 'Range of Composition (Optional)' text area, and an 'Optional Attachments' section with an 'Attach Document' button. At the bottom, there are 'Previous' and 'Next' navigation buttons, with 'Next' highlighted in red. The footer contains links to CDX, MyCDX, EPA, and other resources, along with a 'Validate', 'Save', and 'Preview' button bar.

Navigation: Click the ‘Next’ button to navigate to the ‘Use Information’ screen. You can also access this screen by clicking the ‘Use Information’ link within the navigation tree.

8.11 Polymer Identification Information

You can navigate to the ‘Polymer Identification Information’ screen by clicking the ‘Next’ button from the ‘Chemical Identification Information’ screen when you select the ‘Polymer’ radio button. You can also access this screen by clicking the ‘Polymer Identification Information’ link within the navigation tree.

Click the 'Add New Chemical' button to create a chemical substance. Upon clicking the 'Add New Chemical' button, an expandable/collapsible field set generates that contains numerous fields that pertain to the particular polymer. The system provides numerous fields for you to enter multiple chemical substances, each with unique information, by clicking the 'Add New Chemical' button for each chemical you wish to identify.

For a single component submission, create the field set by clicking the 'Add New Chemical' button. Upon clicking the 'Add New Chemical' button, the application generates a field set containing numerous fields for you to enter information pertaining to that particular chemical.

For a multi-component submission, create individual field sets by clicking the 'Add New Chemical' button. Multi-component chemical submissions occur when two or more chemicals always generate together in a single pot and are never isolated. Upon clicking the 'Add New Chemical' button, the application generates a field set containing numerous fields for you to enter information pertaining to that particular chemical. Enter additional chemical components, each with unique identifying information, by clicking the 'Add New Chemical' button for each additional chemical that is part of the multi-component mixture. All multi-component chemicals will reside in one chemical folder in the navigation tree.

- **Add New Chemical:** Click the button to generate the 'Polymer Identification Information' field set.
- **Cancel:** Click the 'Cancel' link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and to remove a field set. The 'Cancel' link displays when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the 'Edit' link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The 'Edit' link displays when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the 'Delete' icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion.
- **Expand All:** Click the 'Expand All' link located at the upper right-hand corner of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the 'Collapse All' link located at the upper right-hand corner of the expandable/collapsible field sets to collapse a series of field sets.
- **Add Chemical ID:** Click the 'Add Chemical ID' button within the 'Polymer Identification Information' field set to generate the 'Add Chemical ID' pop-up window. You can search for the reported chemical(s) either by the 'CASRN' or 'CA Index Name or Other Synonym.' If you retrieve zero results, the system provides fields for you to enter the chemical information by filling in the 'Chemical Name' and the 'Chemical Abstract Services Registry Number' (CASRN) under the manual entry field set. The system provides functionality for you to enter the selected chemical by clicking the 'OK' button located at the bottom of the 'Add Chemical ID' window.
- **Chemical Name:** The system provides fields for you to identify the 'Chemical Name' and the CASRN (if available). The system provides functionality for you to search for the

chemical substance using the 'Add Chemical ID' search or manually enter the chemical information in the 'Add Chemical ID' pop-up.

- **ID Method:** The system shall require that you identify which ID method was used to determine the chemical identity. When you select 'Method 1 (CAS Inventory Expert Service),' the system generates an 'Attach IES Report' button for you to attach an IES report. If you select 'Method 1,' you are required to attach an IES report. You can also select 'Method 2 (Other Method).'
- **Attach IES Report:** To access the 'Attach IES Report' pop-up window, click the 'Attach IES Report' button within the 'Polymer Identification Information' field set after selecting the 'Method 1 (CAS Inventory Expert Service)' radio button. After you attach the document(s), and click the 'OK' button, the 'Attach IES Report' pop-up window will close and the document information will be displayed in a table format on the 'Polymer Identification Information' screen. The attachment table displays the file name of the document and the user-provided description of the document. Click the 'Delete' icon (✖) located under the 'Actions' column to delete unwanted documents. Click the file name link under the 'File Name' column to access or edit previously attached documents.
- **Chemical Structure Diagram:** The system allows you to attach a chemical structure diagram. This field is optional.
- **Attach Chemical Structure:** Click the 'Attach Chemical Structure' button within the 'Polymer Identification Information' field set to access the 'Attach Chemical Structure' pop-up window. You can attach the file(s) and enter a description of the document.
- **File Name:** Displays the file name and file extension of the document that is uploaded on the 'Attach Chemical Structure' window.
- **Description:** Displays the description of the chemical structure.
- **Actions:** Click the 'Delete' icon (✖) to delete the entire attached chemical structure row permanently from the system. A warning message displays to confirm the deletion.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the 'Save' icon (💾) located within the bottom action bar to successfully save the entered information within the field set before being able to navigate away from the screen using the 'Previous' and 'Next' buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.

After the document is attached and you click the 'OK' button, the 'Attach Chemical Structure' pop-up window closes and the document information will be displayed in a table format on the 'Polymer Identification Information' screen. The attachment table displays the file name of the document and provided description of the document. The system provides functionality for you to delete unwanted documents by clicking the 'Delete' icon (✖) located under the 'Actions' column. Click the appropriate file name of the document within the 'File Name' column of the attachment table to access or edit previously attached documents.

Exhibit 8-14 shows a screen capture of the ‘Polymer Identification Information’ screen:

Exhibit 8-14: Polymer Identification Information Screen

The screenshot displays the 'POLYMER IDENTIFICATION INFORMATION' screen. The left navigation tree includes sections like 'Bona Fide Primary Support', 'Letter of Support', 'Chemical', and 'Site Information'. The main content area contains the following elements:

- Buttons: 'Add Chemical ID', 'Attach IES Report', 'Attach Chemical Structure', 'Save', 'Add New Chemical', 'Previous', and 'Next' (highlighted with a red box).
- Form Fields: 'CASRN:', 'Chemical Name:', 'ID Method' (with radio buttons for 'Method 1 (CAS Inventory Expert Service)' and 'Method 2 (Other Method)').
- Tables: Two tables with columns 'File Name', 'Description', and 'Actions' for IES Reports and Chemical Structures.
- Text: 'Click the button below to add a substance to this document.' and 'Chemical Structure Diagram (optional): Include an attachment for the chemical structure diagram below.'

The bottom navigation bar features 'Upload XML', 'Validate', 'Save', and 'Preview' buttons, along with a footer containing links to 'CDX Homepage', 'MyCDX Homepage', 'EPA Homepage', 'Terms and Conditions', 'Privacy Notice', and 'CDX Helpdesk: (888) 890-1995'.

Navigation: Click the ‘Next’ button to navigate to the ‘Monomers and Other Reactants’ screen. You can also access this screen by clicking the ‘Monomers and Other Reactants’ link within the navigation tree.

8.12 Monomers and Other Reactants

You can navigate to the ‘Monomers and Other Reactants’ screen by clicking the ‘Next’ button from the ‘Polymer Identification Information’ screen. You can also access this screen by clicking the ‘Monomers and Other Reactants’ link within the navigation tree.

The 'Monomers and Other Reactants' screen is used to identify the chemical measurements and monomers that make up a polymer. The 'Monomers and Other Reactants' screen has an 'Add Monomer' button that allows you to identify the monomer(s) that make up the polymer composition.

- **Add Monomer:** Click the 'Add Monomer' button to generate an expandable/collapsible field set.
- **Cancel:** Click the 'Cancel' link located in the upper right-hand corner of the expandable/collapsible field set to prevent edits from saving and to remove a field set. The 'Cancel' link displays when the expandable/collapsible field set is open for editing. A confirmation message displays to confirm the action.
- **Edit:** Click the 'Edit' link located in the upper right-hand corner of the expandable/collapsible field set to modify the information entered in the fields. The 'Edit' link displays when the expandable/collapsible field set has been saved and the data is not currently editable.
- **Delete:** Click the 'Delete' icon (✖) located in the upper right-hand corner of the expandable/collapsible field set to delete the field set. A confirmation message displays to confirm the deletion.
- **Expand All:** Click the 'Expand All' link located at the upper right-hand corner of the expandable/collapsible field sets to expand a series of field sets.
- **Collapse All:** Click the 'Collapse All' link located at the upper right-hand corner of the expandable/collapsible field sets to collapse a series of field sets.
- **Search SRS:** Click the 'Search SRS' button to generate the 'Search Substance Registry Services' pop-up window. Refer to **Section 3.8** for additional details regarding the search SRS functionality.
- **CAS Registry Number:** Displays the CASRN for the specified monomer; this field populates based on information entered on the 'Search Substance Registry Services' pop-up window. This is a required field.
- **Monomer or Other Reactant:** Displays the monomer or other reactant name; this field populates based on information entered on the 'Search Substance Registry Services' pop-up window. This is a required field.
- **Include in Identity:** Check the 'Include in Identity' checkbox to claim the value for 'Monomer or Other Reactant' as part of the monomer identification.
- **Typical Composition:** Enter the 'Typical Composition' value that a monomer contributes to a polymer; the value entered must be a positive numerical value greater than zero (0) and less than or equal to 100 with up to three decimal points. If the value entered is less than or equal to '2' a warning will be displayed in the global 'Validate' function or during the submission process indicating that the 'Typical Composition' is a value that is less than or equal to 2% and asking the user whether it should be included in the 'Chemical Identity.' This is a required field.
- **Save:** Click the button to save the information entered within the expandable/collapsible field set. You must click this button instead of the 'Save' icon (💾) located within the bottom action bar to successfully save the entered information within the field set before being able

to navigate away from the screen using the 'Previous' and 'Next' buttons. Refer to **Section 3.6** for more information regarding the save functionality in an expandable/collapsible field set.

- **Attach Document:** Click the 'Attach Document' button to generate the 'Attach Documents' pop-up window. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of the file that is uploaded on the 'Attach Documents' pop-up window. Click the file name link to navigate to the 'Attach Documents' pop-up window to make any edits.
- **Description:** Displays the description associated with a document.
- **Actions:** Click the 'Delete' icon (✖) to delete the entire attached document row permanently from the system. A warning message displays to confirm the deletion of the document.

Exhibit 8-15 shows a screen capture of the ‘Monomers and Other Reactants’ screen:

Exhibit 8-15: Monomers and Other Reactants Screen

The screenshot shows the 'Monomers and Other Reactants' screen for a Bona Fide submission. The left navigation tree includes sections for 'Bona Fide Primary Support', 'Letter of Support', 'Chemical', and 'Site Information'. The 'Chemical' section is expanded to show 'Chemical 41490', with 'Monomers and Other Reactants' selected. The main content area displays the title 'MONOMERS AND OTHER REACTANTS' and a modal window for adding monomers. The modal window contains a 'Search SRS' button, a 'CAS Registry Number' field, a 'Monomer or other reactant' checkbox, an 'Include in Identity' checkbox, and a 'Typical Composition' percentage field. Below the modal window, there is an 'Add Monomer' button and a 'Composition Total:0.0%' display. The 'Optional Attachments' section includes an 'Attach Document' button. At the bottom, there is a table with columns for 'File Name', 'Description', and 'Actions', with 'Previous' and 'Next' buttons. The bottom navigation bar features an 'Upload XML' button and icons for 'Validate', 'Save', and 'Preview'.

Navigation: Click the ‘Next’ button to navigate to the ‘Use Information’ screen. You can also access this screen by clicking the ‘Use Information’ link within the navigation tree.

8.13 Use Information

You can navigate to the ‘Use Information’ screen by clicking the ‘Next’ button from the ‘Class 1 or 2 Chemical Substances’ screen, on the ‘Class 2 Substances’ screen, or on the ‘Monomers and Other Reactants’ screen, depending on the choice made on the ‘Class 1 or 2 Chemical Substances’ screen. You can also access this screen by clicking the ‘Use Information’ link within the navigation tree.

The 'Use Information' screen is used to capture data about the chemical substance's intended use. When the user navigates to the screen, the screen contains a text box with instructional text that reads, 'How will the substance be used?' Enter specific data for the chemical substance and then advance to the next screen.

- **How will the substance be used?:** Enter data regarding how the chemical substance is intended to be used. This is a required field.

Exhibit 8-16 shows a screen capture of the 'Use Information' screen:

Exhibit 8-16: Use Information Screen

The screenshot displays the 'USE INFORMATION' screen within the CDX system. The top navigation bar includes 'Home', 'Forms', and 'Resources' tabs, along with a user login status: 'Logged In as: Jane Doe, Primary Support' and a 'Log Out' link. The left sidebar shows a navigation tree with categories like 'Bona Fide Primary Support', 'Letter of Support', 'Chemical', and 'Site Information'. The 'Chemical' category is expanded to show 'Chemical 41490', which includes 'Use Information'. The main content area features a text box with the prompt 'How will the substance be used?' and a 'Next' button highlighted with a red box. The bottom of the screen has a blue bar with 'Upload XML' and 'Validate', 'Save', and 'Preview' buttons. The footer contains links for 'CDX Homepage', 'MyCDX Homepage', 'EPA Homepage', 'Terms and Conditions', 'Privacy Notice', and 'CDX Helpdesk: (888) 890-1995'.

Navigation: Click the 'Next' button to navigate to the 'Submitter Site Identification' screen. You can also access this screen by clicking the 'Submitter Site Identification' link within the navigation tree.

8.14 Submitter Site Identification

You can navigate to the 'Submitter Site Identification' screen by clicking the 'Next' button from the 'Use Information' screen. You can also access this screen by clicking the 'Submitter Site Identification' link within the navigation tree.

The 'Submitter Site Identification' screen captures information about the identification of the sites of manufacture and/or the port of entry. A screen captures specific data for the site of manufacture and/or port of entry by allowing you to identify sites based on sites with which you are registered. The system requires you to select from the 'Site of Manufacture or Import' drop-down menu when both the 'Manufacture' and 'Import' checkboxes are checked on the 'Statement of Intent' screen. List all of the sites of manufacture and/or the ports of entry that are controlled by the submitter on this screen; at least one site is required.

- **Add Site:** Click the 'Add Site' button to display the 'Add Site' pop-up window. Refer to **Section 3.11** for additional details regarding the add site functionality.
- **EPA Registry ID:** Displays the EPA Registry ID of the site and/or port.
- **Site of Manufacture or Port of Entry:** Displays the site of manufacture or port of entry depending on the checkbox (es) the user checks on the 'Statement of Intent' screen. This is a required field if the checkboxes were checked.
- **Site Name:** Displays the site name of the site or port. This is a required field.
- **Address:** Displays the address of the site or port. This is a required field.
- **Actions:** Click the 'Delete' icon (✖) to delete the entire site row permanently from the system. A warning message displays to confirm the deletion of the site.

Exhibit 8-17 shows a screen capture of the ‘Submitter Site Identification’ screen:

Exhibit 8-17: Submitter Site Identification Screen

Navigation: Click the ‘Next’ button to navigate to the ‘Document Management’ screen. You can also access this screen by clicking the ‘Document Management’ link within the navigation tree.

8.15 Document Management

You can navigate to the ‘Document Management’ screen by clicking the ‘Next’ button from the ‘Submitter Site Identification’ screen. You can also access this screen by clicking the ‘Document Management’ link within the navigation tree.

The ‘Document Management’ screen is used to attach required documents to the electronic form. The user must attach three required documents: ‘Spectrum of Substance,’ ‘Statement of Commercialization,’ and ‘Statement of Research and Development.’ The application also allows the user to attach ‘Other’ documents.

Please note that in IE 7, you must attach the three required documents before clicking the ‘Next’ button and navigating to the next screen. If you click the ‘Next’ button with only one or two documents attached, you will be taken to an error screen. Navigate away from this screen using the back button on your browser and ensure that the correct documents have been attached.

- **Attach Document:** Click the ‘Attach Document’ button to generate the ‘Attach Documents’ pop-up window to upload documents. Refer to **Section 3.7** for additional details regarding the attach document functionality.
- **Document Name:** Displays the document name and file extension of the document uploaded on the ‘Attach Documents’ pop-up window.
- **Document Type:** Displays the document type associated with the uploaded document.
- **Action:** Click the ‘Delete’ icon (✖) to delete the entire document row permanently from the system. A warning message displays to confirm the deletion of the document.

Exhibit 8-18 shows a screen capture of the ‘Document Management’ screen:

Exhibit 8-18: Document Management Screen

The screenshot shows the 'DOCUMENT MANAGEMENT' screen for user Jane Doe. The left navigation pane includes sections for 'Bona Fide Primary Support', 'Letter of Support', 'Chemical', and 'Site Information'. The main content area prompts the user to attach documents, listing three required items: 'Spectrum of Substance', 'Statement of Commercialization', and 'Statement of Research and Development'. Below the list is an 'Attach Document' button and a table with columns for 'Document Name', 'Document Type', and 'Action'. At the bottom of the main area are 'Previous' and 'Next' buttons, with 'Next' highlighted in a red box. The footer contains an 'Upload XML' button and 'Validate', 'Save', and 'Preview' buttons.

Navigation: Click the ‘Next’ button to navigate to the ‘Optional Cover Letter’ screen. You can also access this screen by clicking the ‘Optional Cover Letter’ link within the navigation tree.

8.16 Optional Cover Letter

You can navigate to the ‘Optional Cover Letter’ screen by clicking the ‘Next’ button from the ‘Document Management’ screen. You can also access this screen by clicking the ‘Optional Cover Letter’ link within the navigation tree.

The ‘Optional Cover Letter’ screen is used to communicate information with EPA that is not collected elsewhere in the form. The cover letter is used to give EPA resources and special instructions regarding the application.

- **Optional Cover Letter:** Enter any additional special instructions regarding the form.

Exhibit 8-19 shows a screen capture of the ‘Optional Cover Letter’ screen:

Exhibit 8-19: Optional Cover Letter Screen

Navigation: Click the ‘Validate’ icon (✓) located in the bottom action bar to validate the form. Click the ‘Save’ icon (💾) located in the bottom action bar to save the overall form. Click the ‘Preview’ icon (🖨) located in the bottom action bar to view a PDF preview of the form.

9 Edit Alternative Control Measures (ACM) Form

The Section 5 Notices and Supports application allows alternative control measures (ACM) forms to be submitted. The ACM form is used to report proposed Alternative Control Measures for published significant new use rules (SNURs).

9.1 Edit ACM Form

To edit an ACM form, navigate to the 'Section 5 Notices and Supports Forms' screen and click the alias link in the 'Alias' column of an ACM form with a status of 'In Progress.' Refer to **Section 3.3** for additional details regarding the 'Section 5 Notices and Supports Forms' screen.

Refer to **Section 3.4** for additional details regarding the enter passphrase process.

9.2 Contact Information

You can access the 'Contact Information' screen by entering a passphrase in the 'Enter Passphrase' screen.

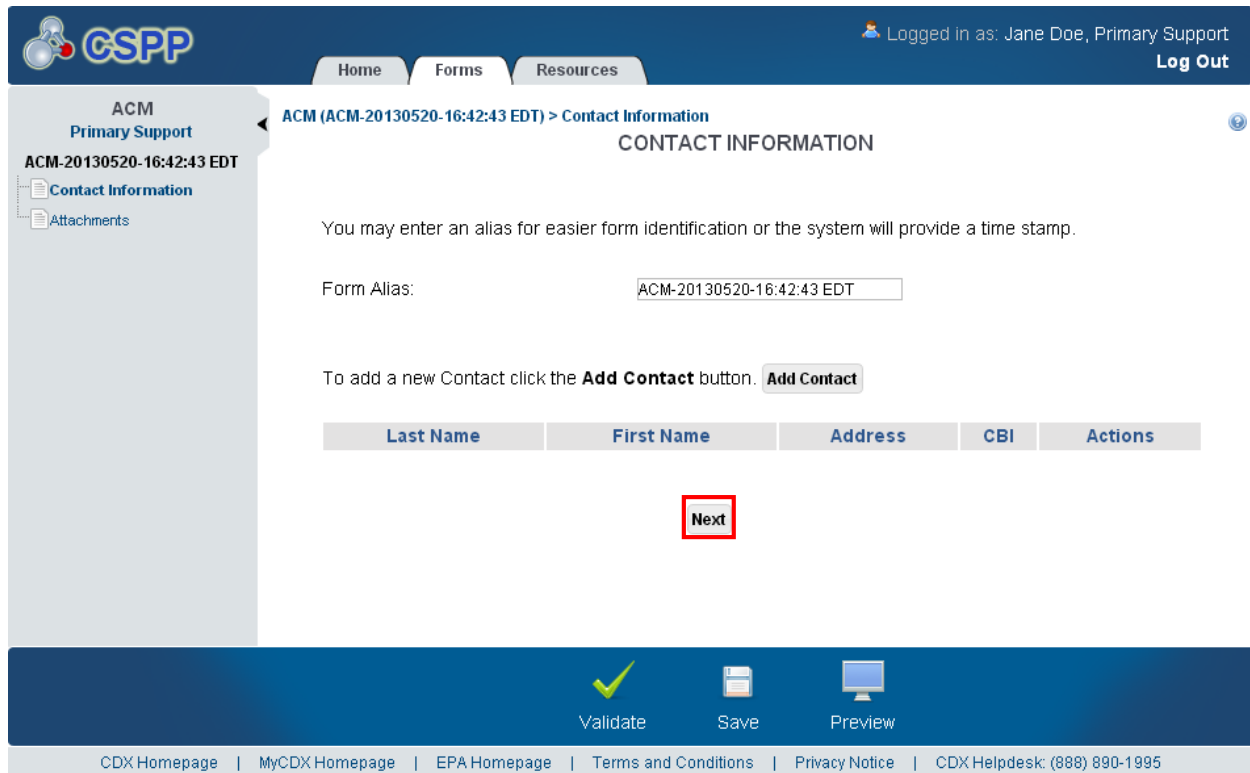

The 'Contact Information' screen provides an 'Add Contact' button and a contact information table for you to identify a point of contact who is working for a U.S. based company.

Please note that if you using IE 7 to view this screen, the 'Form Alias' text field label is displayed within the form alias at the top of the screen.

- **Form Alias:** Enter a custom alias to differentiate the ACM 721.30 form, if applicable. The system auto-generates a default alias consisting of the form type and date stamp in the following format: <Form Type-YYYYMMDD-HH:MM:SS Time Zone>. The form alias is an editable field that may be changed at any time. This is a required field.
- **Add Contact:** Click the button to display the 'Add Contact' window, for you to enter information for a point of contact. At least one contact is required.
- **Last Name:** Displays the last name of the contact identified on the 'Add Contact' pop-up window.
- **First Name:** Displays the first name of the contact identified on the 'Add Contact' pop-up window.
- **Address:** Displays the mailing address of the contact identified on the 'Add Contact' pop-up window.
- **CBI:** Indicates the CBI status of a contact by displaying either a 'Y' or an 'N.'
- **Actions:** Click the 'Delete' icon (✖) to delete a contact from the table. A warning message displays to confirm deletion of the contact.

Exhibit 9-1 shows a screen capture of the ‘Contact Information’ screen:

Exhibit 9-1: Contact Information Screen

Navigation: Click the ‘Add Contact’ button to begin the process of adding contact information. Click the ‘Next’ button to navigate to the ‘Attachments’ screen. You can also access this screen by clicking the ‘Attachments’ link within the navigation tree.

9.2.1 Add Contact

You can access the ‘Add Contact’ pop-up window by clicking the ‘Add Contact’ button on the ‘Contact Information’ screen.

The ‘Add Contact’ pop-up window displays fields for you to enter information regarding the point of contact.

Please note that if you are using IE 7 to view this pop-up window, the ‘Copy CDX Registration’ button and ‘Help’ button are misaligned.

- **Click here to copy your information from CDX Registration:** Click the ‘Copy CDX Registration’ button to populate the fields with your contact information provided during CDX registration. A prompt will display confirming the import of CDX registration information.
- **Check here to claim this information as CBI:** Check the ‘CBI’ checkbox to claim the contact information as confidential. If the ‘CBI’ checkbox is checked before clicking the ‘Copy CDX Registration’ button, the ‘CBI’ checkbox will become unchecked upon navigating back to the screen after copying CDX registration information. To claim a contact as confidential, check the ‘CBI’ checkbox after importing CDX registration information.

- **First Name:** Enter the contact's first name. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Last Name:** Enter the contact's last name. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Company Name:** Enter the contact's company name. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Phone Number:** Enter the contact's daytime phone number; dashes are not allowed. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Phone Extension:** Enter the contact's phone number extension, if applicable.
- **Email Address:** Enter the contact's email address. The email address must follow the standard email address format: John.Doe@abc.com. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Mailing Address 1:** Enter the first line of the contact's mailing address. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Mailing Address 2:** Enter the second line of the contact's mailing address. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration.
- **City:** Enter the contact's U.S. city of the mailing address. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **State:** Select the state of the contact's mailing address from the drop-down menu. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Postal Code:** Enter the postal code of the contact's mailing address. If you have clicked the 'Copy CDX Registration' button, the fields populate with information entered during CDX registration. This is a required field.
- **Country:** Displays 'United States.'

Exhibit 9-2 shows a screen capture of the ‘Add Contact’ pop-up window:

Exhibit 9-2: Add Contact Pop-Up Window

Navigation: Click the ‘Cancel’ button or the ‘X’ icon to stop populating contact information. Click the ‘OK’ button to save the entered contact information and navigate back to the ‘Contact Information’ screen.

9.3 Attachments

You can access the ‘Attachments’ screen by clicking the ‘Next’ button from the ‘Contact Information’ screen. You can also access this screen by clicking the ‘Attachments’ link within the navigation tree.

The ‘Attachments’ screen provides an ‘Attach Document’ button for you to upload documentation that fulfills the specified requirements, and a text field to provide the 40 CFR 721 citation to which the documentation refers.

- **Attach Document:** Click the ‘Attach Document’ button to attach documents that fulfill the outlined requirements in the instructional text. At least one document is required. Refer to **Section 3.7** for additional information regarding the attach document functionality.
- **File Name:** Displays the file name and file extension of a document uploaded on the ‘Attach Documents’ pop-up window.
- **Description:** Displays the description of a document uploaded on the ‘Attach Documents’ pop-up window.
- **Pages:** Displays the number of pages a document uploaded on the ‘Attach Documents’ pop-up window contains.
- **Date:** Displays the date that a document was uploaded on the ‘Attach Documents’ pop-up window.
- **CBI:** Indicates the CBI status of a document uploaded on the ‘Attach Documents’ pop-up window by displaying either a ‘Y’ or an ‘N.’
- **Action:** Click the ‘Delete’ icon (✖) to remove the attached document row. A warning message displays to confirm deletion of the document.
- **ACM Citation at 40 CFR 721:** Enter the ACM citation reference that the uploaded documents support. This field allows up to seven (7) numeric characters; letters or other characters are not allowed. This is a required field.

Please remember to upload documentation that fulfills the following requirements:

- 1) The specific chemical identity of the substance.
- 2) A detailed description of the activities involved.
- 3) The specifications of the alternative worker exposure control measures or environmental release control measures.
- 4) An analysis justifying why such alternative control measures provide substantially the same degree of protection as the specific control measures identified which pertain to the substance for which the request is being submitted.
- 5) The data and information described in 720.50 (a) and (b) of this chapter unless such data and information have already been submitted to the Office of Pollution Prevention and Toxics, EPA.

Validate Save Preview

CDX Homepage | MyCDX Homepage | EPA Homepage | Terms and Conditions | Privacy Notice | CDX Helpdesk: (888) 890-1995

Navigation: Click the ‘Validate’ icon (✓) in the bottom action bar to validate the form. Click the ‘Save’ icon (📄) located in the bottom action bar to save the overall form. Click the ‘Preview’ icon (🖨️) located in the bottom action bar to view a PDF preview of the form.

10 Preview

The system provides the option to preview a form at any point during the submission process. Click the 'Preview' icon () located within the bottom action bar, to see a PDF version of the form. A screen will display for you to view either the 'Full' or the 'Sanitized' version of the PDF differentiated by buttons. After you choose either the 'Full' or 'Sanitized' PDF, the application generates a draft, watermarked PDF version of the form.

Please note in IE 7, the 'Preview EPMN FORM' screen text might be misaligned.

The watermark reads 'Not for Submission' and displays across each page in the background. The form preview displays the entire form in a printable format. The preview functionality provides the flexibility to track the status of the form and see the entire form in a single viewpoint.

Exhibit 10-1 shows a screen capture for the 'Preview' of the Biotechnology form:

Exhibit 10-1: Preview Biotechnology Form Screen

The screenshot shows the 'Preview EPMN FORM' screen. At the top, the GSPP logo is on the left, and the user is logged in as 'Jane Doe, Primary Support' with a 'Log Out' link on the right. Below the navigation bar are tabs for 'Home', 'Forms', and 'Resources'. The left sidebar contains a tree view for 'Biotechnology Primary Support' with sub-items like 'Biotechnology-20130114', 'Joint Submission', and 'Letter Of Support'. The main content area displays the title 'PREVIEW EPMN FORM' and the instruction 'Please choose a Regular or Sanitized PDF.' Below this is an icon of two overlapping documents. Two buttons, 'Full Version' and 'Sanitized Version', are highlighted with a red border. A note below the buttons states: 'Note: If you make no CBI claims, the two versions will be the same.' At the bottom of the page, there is a blue bar with three icons: a green checkmark for 'Validate', a floppy disk for 'Save', and a computer monitor for 'Preview'. The footer contains links to 'CDX Homepage', 'MyCDX Homepage', 'EPA Homepage', 'Terms and Conditions', 'Privacy Notice', and 'CDX Helpdesk: (888) 890-1995'.

11 Validate

You can click the 'Validate' icon (✓) at any stage of completing a Section 5 Notices and Supports form. The 'Section 5 Notices and Supports Validation' pop-up window displays when you click the 'Validate' icon (✓). The pop-up blocker within your internet browser must be disabled to ensure that the window displays correctly. The 'Section 5 Notices and Supports Validation' pop-up window displays a report of all validation errors and warning messages. During the validation process, the application validates each screen of the Section 5 Notices and Supports form to find missing and invalid data.

Please note in IE 7, the 'Help' button is aligned to the right side of the 'Section 5 Notices and Supports Validation' pop-up window.

Validation Errors: Errors are denoted by an 'Error' icon (❗) and can be fixed by clicking the error link. The links will display the *Screen Title Name* (e.g., Chemical Identification) and the associated error. After you click a link, the main application screen will display the section where the error occurred so you can easily fix the error. Once you have fixed the error(s), click the 'Validate' icon (✓) again to refresh the 'Section 5 Notices and Supports Validation' pop-up window. If the information you fixed passes validation, the error will be removed from the 'Section 5 Notices and Supports Validation' pop-up window.

Warning Messages: Warnings are denoted by a 'Warning' icon (⚠) and can be fixed by clicking the warning link. The links will display the *Screen Title* and the associated warning. After you click a link, the main application screen will display the section where the warning occurred so you can easily fix the warning. Once you have fixed the warning(s), click the 'Validate' icon (✓) again to refresh the 'Section 5 Notices and Supports Validation' pop-up window. If the information you fixed passes validation, the warning will be removed from the 'Section 5 Notices and Supports Validation' pop-up window.

You can close the 'Section 5 Notices and Supports Validation' pop-up window by clicking the 'X' button located at the top right-hand corner of the window.

Exhibit 11-1 shows a screen capture for the ‘Section 5 Notices and Supports Validation’ pop-up window:

12 Resources

You can access the ‘Resources’ screen by clicking the ‘Resources’ tab located at the top of the screen at any time during the submission process. You can also access the ‘Resources’ screen by clicking the ‘Resources’ link from the Section 5 Notices and Supports ‘Home’ screen. The ‘Resources’ screen provides you with links to the appropriate Section 5 Notices and Supports user guides as well as additional helpful links. Click the ‘User Guide’ link to access the Section 5 Notices and Supports user guide document.

- **Regulatory Impact Analysis for the Regulation of Microbial Products of Biotechnology: Government Costs:** If you click this link, a new internet browser window will generate displaying the ‘Regulatory Impact Analysis for the Regulation of Microbial Products of Biotechnology: Government Costs’ screen.
- **Microbial Products of Biotechnology: Final Rule (62 FR 17910):** If you click this link, a new internet browser window will generate displaying the ‘Microbial Products of Biotechnology: Final Rule (62 FR 17910)’ screen.
- **Points to Consider in the Preparation of TSCA Biotechnology Submissions for Microorganisms:** If you click this link, a new internet browser window will generate displaying the ‘Points to Consider in the Preparation of TSCA Biotechnology Submissions for Microorganisms’ PDF.
- **CDX Homepage:** If you click this link, a new internet browser window will generate displaying the CDX Homepage.
- **TSCA Chemical Substances Inventory:** If you click this link, a new internet browser window will generate displaying the ‘TSCA Chemical Substances Inventory’ screen.
- **Substance Registry Services (SRS):** If you click this link, a new internet browser window will generate displaying the ‘Substance Registry Services (SRS)’ screen.
- **Facility Registry System (FRS):** If you click this link, a new internet browser window will generate displaying the ‘Facility Registry System (FRS)’ screen.

The FRS generally includes such core data elements as name, address, affiliated organizations and contacts, and industrial classifications. When using this query to search for facilities, use any combination of facility name, geographic location, facility industrial classification, affiliated organization and contact, program category, and national systems information. Enter in as many fields as possible, otherwise the system will return a results list too big to display.

To search for a specific facility, search by Facility Name, Registry ID, Zip Code, and State for an accurate list of results. Search by City Name, Zip Code, and State to return a truncated list of results within a geographic region.

- **CAS Inventory Expert Services:** If you click this link, a new internet browser window will generate displaying the ‘CAS Inventory Expert Services (IES)’ screen.
- **National Pollutant Discharge Elimination System (NPDES):** If you click this link, a new internet browser window will generate displaying the ‘National Pollutant Discharge Elimination System (NPDES)’ screen.
- **New Chemicals Program Homepage:** If you click this link, a new internet browser window will generate displaying the ‘New Chemicals Program’ screen.

- **Status of Section 5 Notices:** If you click this link, a new internet browser window will generate displaying the ‘Status of Section 5 Notices’ screen.

Exhibit 12-1 shows a screen capture of the ‘Resources’ screen (Scroll 1):
