

Appendix B-3
Food Log

National Food Study Pilot

Agency: Economic Research Service

Contractor: Westat, Inc.

National Food Study Pilot

Food Log

The Food Log is an electronic instrument that respondents access via the web using a computer, tablet or smartphone. The instrument is designed to reduce respondent burden by allowing respondents to scan barcodes for food and drink they purchase or obtain for free either at home or away from home. Respondents are also able to upload receipts and pictures of food and drinks.

All household members 11 and older are able to complete their food logs themselves. The primary respondent completes for himself or herself and for members under age 11.

Subsequent screens are triggered based on responses provided to earlier screens. For example, respondents that provide barcode information are asked fewer details on the food product as the NFS Pilot is able to use the barcode to obtain additional information on the product. The pages that follow display select Food Log screens.

Income Worksheet

This worksheet will help you to prepare for the final interview at the end of the survey week. We will ask about your income to help us understand how much money you have available to spend on food. Completing this worksheet during the study week will make the final interview go faster.

We would like you to report all sources of income including earnings from work, unemployment compensation, welfare (TANF and other public assistance), child support, alimony, retirement, disability, investment and any other sources of income. You only need to report income that you have received in the last month.

+ Report income for
