2. MAINTENANCE OF APPROVED SCOPE OF PROJECT

Clearly describe in narrative format the health center's plan for maintaining its current scope of project (i.e., sites and services) for the existing patient population(s). Specifically address how the health center is prepared to meet the primary care needs of the new target population while also assuring that resources will not be reduced for providing services to the current patient population. Requires narrative response.

3. SERVICE AREA ANALYSIS: This section addresses how the proposed addition of this target population(s) will complement and not duplicate existing health services and resources within the service area.

Based on UDS Mapper Map and Data Table information, will the site serve all or part of a service area currently served by another health center grantee or look-alike and/or of another primary care safety net provider (rural health clinic, critical access hospital, health department, etc.)? Yes or No. Checkboxes for Yes options to allow multiple selections; No skips narrative; Any Yes response requires

Checklist for Adding a New Target Population

narrative response.

- € No
- Yes the site will serve a newly identified sub-group/underserved population (e.g., people experiencing homelessness, populations with limited English proficiency within the service area), whose health care needs are not being met.
- Yes the site will serve an area where unmet need exceeds the capacity of the existing health center site(s) and/or other safety net providers.
- Yes the site will serve a population where the distance and travel time to the nearest safety-net provider site, (e.g., health center grantee or look-alike, rural health clinic, critical access hospital) is a barrier for patients to access care.
- Note: UDS Mapper is the best tool for identifying the nearest Health Center Program grantee or look-alike. Distance should be measured as the distance (in miles) from the address of the proposed service site to the nearest Health Center Program grantee or look-alike service sites. Use the UDS Mapper Distance tool and/or Google Maps to determine (1) the distance in miles between sites and (2) travel time by driving or public transportation, as appropriate (e.g., if at least 30% of the patient population uses public transportation as the main source of transportation to work, provide travel time based on public transport as opposed to providing travel time by car/drive time).
 - Distance in miles:
 - Travel time in minutes:

Required for any Yes response: Based on this answer and attached UDS Mapper data and other needs assessment documentation that shows other health centers and service providers and their penetration rates, address any service area overlap and how the proposed site will complement existing services and programs so as to minimize the potential for unnecessary duplication and/or overlap in services, sites or programs.

Requires narrative response.

Note: Upload any relevant letters of support from all health centers serving the same service area in the next section

4. COLLABORATION WITH HEALTH CENTERS AND OTHER SAFETY NET PROVIDERS

For the purposes of this question, collaborative relationships are those that contribute to one or both of the following goals relative to the proposed target population:

- (1) maximize access to required and additional services within the scope of the health center project for target population patients that will be served; and/or_
- (2) promote the continuity of care of target population patients by coordinating with the services and activities of other federally funded, as well as State and local, health services delivery projects and programs serving the same or a similar patient population (e.g., other health centers, rural health

Checklist for Adding a New Target Population

clinics, hospitals, health departments).

a. Describe the established and/or proposed collaborative efforts with other health centers and safety net providers (e.g., health departments, rural health clinics, hospitals) within and adjacent (e.g., neighboring ZIP codes) to the service area and how this collaboration will benefit the new target population.

Requires narrative response.

b. Attach documentation of collaboration, including any agreements (e.g., MOA, MOU, contract), relevant and specific to the proposed site which support the response to 4a. If documentation could not be obtained, describe the outreach made to these service area providers concerning this proposed target population and the result of this outreach.

Optional narrative response:

Optional attachment: Documentation of Collaboration

5. PLAN to meet newly applicable program requirements: The addition of a new target population may impact which Health Center Program Requirements apply to the health center. Address how the health center can or will demonstrate compliance with any newly applicable Health Center Program Requirements resulting from the addition of the proposed target population(s). Attach supporting documentation (e.g., existing bylaws that already demonstrate compliance, draft revised bylaws, etc.).

Newly Applicable Proram Requirements (applicable section depends on type of population added)

New Target Population - 330(e): General Underserved Community

Newly Applicable Program Requirement - Board Composition: Document that the health center's governing board currently meets all of the following board composition requirements. If the board does not yet meet these requirements, describe how and when they will be met:

- The health center governing board is composed of a majority of individuals whom are being served by the center and this majority as a group, represent the individuals being served by the center in terms of demographic factors such as race, ethnicity, and sex.
- The overall governing board has at least 9 but no more than 25 members, as appropriate for the complexity of the organization.
- The non-patient/consumer members of the board are representative of the community in which the center's service area is located and are selected for their expertise in community affairs, local

OMB No.: 0915-0285. Expiration Date: xx/xx/xxxx

Checklist for Adding a New Target Population

government, finance and banking, legal affairs, trade unions, and other commercial and industrial concerns, or social service agencies within the community.

• No more than one half (50%) of the non-patient/consumer board members derives more than 10% of their annual income from the health care industry.

Plan for Demonstrating Compliance with Program Requirement: Requires narrative response

New Target Population - 330(h): Individuals Experiencing Homelessness

Newly Applicable Program Requirement - Required and Additional Services: Describe how the health center will assure that all appropriate substance abuse services for homeless populations are or will be available (either directly or via a formal written referral arrangement) among their required services.

Plan for Demonstrating Compliance with Program Requirement: Requires narrative response

Public Burden Statement: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0915-0285. Public reporting burden for this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to HRSA Reports Clearance Officer, 5600 Fishers Lane, Room 14N-39, Rockville, Maryland, 20857.

Checklist for Adding a New Target Population

Questions for Adding Target Population for Grantee

1. When do you plan to start serving the new target population noted below?

2. BACKGROUND AND JUSTIFICATION FOR TARGET POPULATION ADDITION

Provide brief background/justification for why your health center is proposing add this new target population to your scope of project by addressing ALL of the following questions.

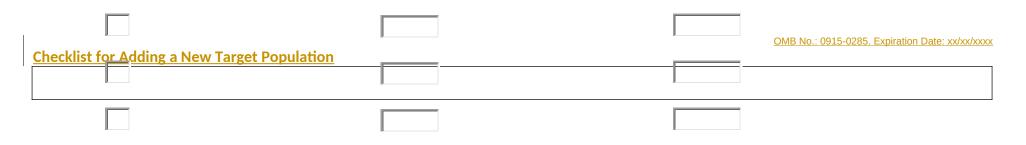

- **2a.** Clearly address why and how the addition of the new target population will address unmet need and further the mission of the health center. In responding, address any or all of the following points as applicable:
 - Is there an increased demand from this new target population in general in the service area?
 - Is there a decrease in demand from the existing target population(s) served?
 - Are there other environmental or demographic changes, which have resulted in fluctuations, or declines in existing target populations and present a need to redirect resources to another target population?

Maximum paragraph(s) allowed approximately: 3 (3000 character(s) remaining)
