## General Comment

I agree with JEAN PUBLIEE and have this to add:

This paper says: CDC's mission is to protect America from health, safety, and security threats, both foreign and in the U.S. To ensure a competent, sustainable, and empowered public health workforce prepared to meet these challenges.

Public perception of what the CDC ACTUALLY does is this:

Our mission is to empower, enrich and elevate the pharmaceutical industry. We help create and foster new sick populations in order to ensure the dependency of entire generations upon the medical industry. Starting at birth, we will overload every developing body with contaminated vaccines and treat the resulting illnesses with drugs of every type. We are the world experts at convincing parents to willingly poison their children via injectables and are quickly gaining ground in neuro-fetal poisoning through our new vaccine recommendations for pregnant females by giving them drugs never tested or approved for those populations.

We, the CDC, therefore, pledge to stand in disregard of actual science and act faithfully to toss out study results we deem unfit for public consumption (i.e. William Thompson, 2014).

We will instruct doctors to prescribe drugs specifically known to cause addiction (a.k.a. repeat customers) and distract the populace to the problem.

We promise to come up with "new" and "deadly" epidemics deemed important and freely

promoted by the media to create need for new vaccines in the pipeline.

We pledge to bribe, coerce and otherwise convince state and federal legislators that we are NOT lying to them in the ways we are. We will fire, condemn, discredit or silence those who would voice opinions that are in opposition to the lies we try to propagate.

We pledge to never acknowledge or promote cures for ANYTHING as our mission is to ensure problems of health are never solved so that the companies who support our organization are made rich in attempting to serve the masses with drugs that treat symptoms. -end

A country that allows an organization like this to run amok unabated is... well... not good. You guys.... you lawmakers.... need to DO something about this.

The actions of the CDC are destroying the health of our children... the future workforce. Is there anyone in Washington that understands that? This makes NO sense. < shaking my head > Absolutely none.
