

 **Stakeholder Survey of DSEPD Fellowship Programs**

Project Title: Stakeholder Survey of DSEPD Fellowship Programs

Date Project Began: 03/27/2017

Project Category: Unknown - Insufficient Data

Brief Summary of Activity: Assessment of a workforce development initiative, to learn about the effectiveness of seven DSEPD fellowship programs, and identify opportunities for program improvement to better prepare trainees.

Location: USA

Project Description: DSEPD fellowship programs' outcomes are not systematically measured, making it difficult to use data-informed decisions for program improvement. We plan to survey recent alumni and supervisors of these programs to explore and document the extent to which these programs have met respondents' individual and organizational training needs. We will use findings to improve these programs in the future.

Division Name: DSEPD, EWB

Supervisor Name: M. Kathleen Glynn

HSR Number: 2017-00102
