

Memorandum

Date: June 16, 2016

From: Mary Kathleen Glynn, DVM, MPVM 
Associate Director for Science
Division of Scientific Education and Professional Development
Center for Surveillance, Epidemiology and Laboratory Services
Office of Public Health Scientific Services

Subject: Generic ICR for CDC Fellowship Programs Assessments

To: Leroy A. Richardson, MS, MPH, MSCJ, CPHA
Chief, Information Collection Review Office
Office of Scientific Integrity
Office of the Associate Director for Science
Office of the Director

Based on the description and justification for the Generic ICR for the *CDC Fellowship Programs Assessments* and the definition of research as defined by the Federal Policy for the Protection of Human Subjects (45 CFR 46), IRB approval is not required for Generic ICRs. These activities are usually considered public health program evaluation of CDC fellowships and not research based on the definition provided by 45 CFR 46. For individual information collections, the appropriate CDC Human Subjects Review contact is consulted for an official research determination.

Should there be any questions regarding this determination, feel free to contact me at 404-498-6169 or mjg6@cdc.gov.
