Security controls enable only identified personnel to access the administrative functions of the application where PII can be accessed. Administrative functionality is only available via the NIH network.						
33	Describe the methods in place to allow those with access to PII to only access the minimum amount of information necessary to perform their job.	Users are assigned to specific roles which limit the information required to perform the duties of the role.						

34 Identify training and awareness provided to personnel (system owners, managers, operators, contractors and/or program managers) using the system to make them aware of their responsibilities for protecting the information being collected and maintained.
