

**NON-MATERIAL NON-SUBSTANTIVE CHANGE  
SUPPORTING JUSTIFICATION  
Rail Fixed Guideway Systems: State Safety Oversight  
OMB No. 2132-0558**

This is a request for a “No Material Non-Substantive Change to a Currently Approved Information Collection”. The Rail Fixed Guideway Systems; State Safety Oversight Information Collection is an approved information collection with an expiration date of July 31, 2019. Currently, State Safety Oversight Agencies (SSOA's) submit their annual reports to FTA via a Microsoft Excel spreadsheet. The proposed change will allow SSO's to upload the same report to a dedicated link on FTA's Safety Resource and Training System public website at <https://safety.fta.dot.gov/>. There is no change to the information collected, burden hours or cost, as a result of this change, only the vehicle by which SSOA's submit their annual reports.
