OMB No. 0596-0010 Approval Expires *date*

U.S.D.A., Forest Service Northern Research Station 1992 Folwell Avenue St. Paul, Minnesota 55108 Form Approved OMB No. 0596-0010 Expires: xx/xx/20xx

ROUNDWOOD RECEIVED FOR PROCESSING, state, year

This form has been designed to determine the location, size, and composition of the primary wood-using mills in your state, the volume of roundwood harvested by product, species, and geographic location, and the volume and disposition of wood residues generated during primary processing in <u>year</u>. If records are not available, please give your best estimates. This survey is voluntary. While you are not required to respond, your cooperation is needed to make the results of the survey comprehensive, accurate, and timely. All information is held in confidentiality and used only for statistical reports. NO individual mill production data will be released.

Type of Roundwood Processed Check the type of roundwood processed at the mill. (Roundwood is any log, bolt, or other round section cut from trees of any size, including chips from roundwood and whole tree chips). Do not include any unprocessed logs that were sold to other mills or log buyers/brokers. Do not include any mill residues used from wood using mills in this section.											
Please fill out a separate form for	each type check	ked.

Other States or Countries (List below, please use state abbreviation)
State Percent State Percent State Percent %
What is your normal one-way procurement radius? miles.
Do you process any logs from cities or towns (urban areas) at your mill? YES NO
What percent of the total roundwood received was urban wood in <u>year</u> ? %
What percent of the total roundwood received was from salvaged dead trees from forested areas?
Please estimate the percent of each species received (the total should equal 100%).
Cedar/juniper Other pines Yellow birch Hickory Cypress Spruce White birch Red oaks
Cypress Spruce White birch Red oaks True firs Other softwoods Other birch White oaks
Hemlock not listed Black cherry Sweetgum
Tamarack/larch Ash Cottonwood Sycamore
Jack pine Aspen/poplar Elm Tupelo/black gum
Red pine Basswood Hard maple Black walnut
White pine Beech Soft maple Yellow-poplar
Other hardwoods not listed

Please place a check mark in each county you received wood from in <u>year</u>. If know, please complete table at the bottom of the map.

If known, Enter species processed, State and county of origin, and the amount of roundwood received in <u>year</u>, or the percent of the total.

	List State and county of origin								
List species									

DISPOSAL OF BARK AND WOOD RESIDUES GENERATED

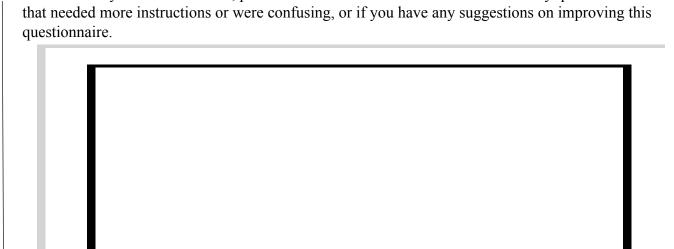

Indicate how the wood and bark residues generated at the mill are disposed of by placing percentages in the boxes under the appropriate wood-residue type columns. Only produce disposition information for the types of residue generated at the mill. The percentages in each of the appropriate wood-residue type columns should sum to 100%.

Please fill out a separate form for each type of roundwood processed.

Example:

Hardwood bark - 50% Mulch, 50% Residential fuelwood Hardwood coarse - 50% Fiber products, 50% residential fuelwood Hardwood shavings - don't have a planer, so nothing reported Hardwood sawdust - 100% Animal bedding Hardwood short/cull log sections - 100% residential fuelwood
