

CDC survey of county-level surveillance records of Aedes aegypti and Aedes albopictus from 1960 to present

Form Approved
OMB Control No. 0920-XXXX
Exp. Date: XX/XX/XXXX

In response to the ongoing Zika virus outbreak, the Centers for Disease Control and Prevention is implementing a survey to collect county level records for Aedes aegypti and Ae. albopictus, the vectors of dengue, yellow fever, chikungunya, and Zika viruses. This information will be used to update species distribution maps for the contiguous United States and to develop a model aimed at identifying where these vectors can survive and reproduce. The resulting maps and models will:

- Inform the public and policy makers of the known distribution of these vectors
- Identify gaps in vector surveillance
- Target allocation of surveillance and prevention resources

To aid in this public health effort, we would be grateful for your voluntary contribution to this knowledge base. If you have colleagues who might have additional records to share, please forward the link so they are invited to participate as well.

In the interest of timely development of this map, we ask that you complete your survey by October 31, 2016.

This survey is designed to collect records at the county level. If you have surveillance records for more than one county, please fill out one survey for each county.

If you have any questions, you may contact USStegomyiaMap@cdc.gov.

Thank you for your participation.

Public reporting burden of this collection of information is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB Control Number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA 0920-XXXX

* Required

Submitter's Contact Information

Please include contact information for the person submitting the surveillance records and the agency or organization to which these records should be attributed. This information will be used to follow up with

you to confirm accuracy of your entries prior to finalizing the end report.

If you have already submitted a surveillance record, you do not need to include your phone number and mailing address for subsequent entries.

Previous Ae. aegypti or Ae. albopictus records

10. In this survey we are seeking records for Ae. aegypti or Ae. albopictus from 1960 to present. The previous U.S. Stegomyia survey focused on 2000-spring 2016. Do you have new records to submit that were not previously submitted to CDC? *

For example, in the U.S. Stegomyia survey in Spring 2016, through an ELC cooperative agreement, or via ArboNET?

Mark only one oval.

- Yes Skip to question 11.
- No Skip to question 13.
- I am not sure. Skip to question 13.
