A.- Introdução

Nesta entrevista, faremos perguntas sobre sua gravidez, sua saúde, a saúde de seu bebê e algumas exposições que você pode ter tido durante a gravidez. Essas perguntas abrangem muitos temas, e esperamos que nos ajudem a compreender melhor por que alguns bebês têm microcefalia e outros não.

1. Idade atual da mãe (anos) :

2. Idade atual do bebê:

Idade em: semanas meses

3. Sexo do bebê:

5. Localização da residência:

B. Residência e histórico de deslocamentos da mãe

1. Há quanto tempo você mora na Paraíba?

Anos Meses Não sei

2. Há quanto tempo você mora em seu endereço atual?

3. Durante a gravidez, você morou...

4. Durante a gravidez, você passou 3 noites consecutivas ou mais fora de casa, onde o trajeto foi superior a 3 horas?

Nota: Se a mãe estiver morando no local há menos de 8 meses (mais a idade do bebê), talvez não atenda aos critérios de elegibilidade para o estudo; verificar os critérios de inclusão

5. Liste as datas e destinos dos deslocamentos:

Data Locais: Dias:

Data Locais Dias:

Data Locais: Dias

C. Informações sobre a gravidez

1. Data da útima mestruação: ☐ Não sei

2. Qual foi a data provável do parto informada pelo médico? ☐ Não sei

3. Tipo de gravidez Se gemelar, número de bebês: 4. Os outros bebês nasceram vivos?

Se sim, teve alguma malformação: Especificar

5. Tipo de parto:

6. Quantas vezes você engravidou antes desta gravidez, incluindo gestações que podem ter terminado em abortos naturais, bebê nascido morto ou outros resultados?

Número de gestações: Número de nascidos vivos

Número de abortos: Número de nascidos mortos:

7. Há alguma (outra) criança ou adulto da sua família que nasceu com microcefalia?

Se sim, especifique (grau de parentesco em relação ao bebê e o momento do diagnóstico):

8. Você e o paí da criança têm algum grau de parentesco? Se sim, qual?

9. Qual é a data de nascimento deste bebê?

D. Doenças durante a gravidez

Agora, vou fazer algumas perguntas sobre doenças que você pode ter tido durante a gravidez.

1. No período de 30 DIAS ANTES do início da gravidez, você teve alguma doença com algum dos seguintes sintomas:

Manchas vermelhas no corpo: Quando — Semanas ou meses: ◯ Semanas ◯ Meses ◯ Não sei

Hello, I am (name, affiliation).

Thank you for taking the time to talk to me today. Understanding healthcare and community exposures you had before you got sick with Elizabethkingia is critical for identifying the source of these illnesses and stopping more people from getting sick. During this interview I will ask you about your health, healthcare, and activities in the 30 days before you tested positive for Elizabethkingia. This is the period from (first date of exposure period) to (date of culture collection) [if conducting in person interview, show a calendar]. To answer these questions, it might be helpful for you to gather information that will help you remember what you did in the month before you became ill, such as an appointment diary, calendar, statements from healthcare providers, and receipts from restaurants or travel. This is a standardized interview form we are using for all the patients affected, to see if we can find some things in common that may have led to people becoming sick with this bacteria. We are still not sure the source of this outbreak. This bacteria is very rare and relatively newly discovered, so there are a lot of things we don't know about it. What we do know is that it likes to live in water and when it has infected people in the past that has typically been people who are already sick in the hospital. For that reason many of these questions will focus on prior healthcare exposures in the month before you became sick. I'll also be asking about home exposures, including water and soil exposures. Then we'll also talk about food exposures.

InstructionstotheInterviewer-IfthecaseisstillonlyPossibleandnotConfirmed,besuretostate:

"The state health department is automatically receiving any samples of this bacteria from hospital labs, and so we have been informed that you grew this bacteria on __(date)__ from __(body location)__. We still need to check the DNA fingerprint of the sample we received and see if it matches the same fingerprint of the other patients in this outbreak, and so we cannot confirm at this time that you are actually a part of the outbreak. Nevertheless, we are trying to get ahead of things and start contacting anyone we think MIGHT be affected by the outbreak to ask some questions."

Please remember that all of your responses are confidential. This interview will take up to an hour.

Are you ready to begin?

Wisconsin Clinical Course Abstraction Form

SECTION A

Section A Instructions: Abstract Section A using all medical records relevant to Elizabethkingia infection. This includes the medical record from the outpatient encounter, ER, or hospitalization where the positive culture was collected and follow-up care (hospitalization for EK, care at AL for EK, or outpatient treatment for the positive culture). If a patient was transferred during their EK hospitalization, abstract medical records for EK hospitalization from both facilities.

Obtain list of ICU locations from hospital prior to abstraction to ensure that all ICU stays are captured in item 21.

SECTION 1: Case Background Information. Complete this section using the Case Report Form

1. Date positive culture collected: ___/___/_____ (MM/DD/YYYY) Time positive culture collected (24 hour): HH:MM
2. First date of 30-day exposure period (date of culture collection – 30 days): ___/___/_____ (MM/DD/YYYY)
3. First date of 7-day exposure period (date of culture collection – 7 days): ___/___/_____ (MM/DD/YYYY)
4. Name of facility where first positive culture was collected: _____

LOCATION OF CULTURE COLLECTION:

- ☐ Inpatient
- ☐ Emergency Room
- ☐ Observational unit/Clinical Decision Unit
- ☐ Outpatient
- ☐ Assisted Living
- ☐ LTCF/SNF
- ☐ LTACH
- ☐ Dialysis clinic
- ☐ Unknown

5. Was this collected more than 3 calendar days after admission: ☐ Yes ☐ No
6. Where was patient **residing** at time of culture collection:

- ☐ Private residence
- ☐ Acute care hospital inpatient
- ☐ Homeless
- ☐ Assisted living
- ☐ LTCF/SNF
- ☐ LTACH
- ☐ Other
- ☐ Unknown

7. Was the patient hospitalized for *Elizabethkingia* infection? ☐ Yes ☐ No
8. **If yes to 5**: Admission date: ___/___/_____ (MM/DD/YYYY) Admission time(24 hour): _____HH:MM
9. If culture was not collected in a hospital facility, what was the reason for culture? _____

2016 Urgent Assessment of Blood Collection and Use in Puerto Rico in Response to the Zika Virus Outbreak

¡Hola!

Please fill out the following sections that pertain to your institution as completely as possible. The arrows will help you progress through the survey. In general, Section 2 corresponds to Blood Collections and Section 3 corresponds to Blood Transfusions.

Please complete and return to the below email by February 19, 2016

General Information

Which of the following best describes your institution?	Select one (with "X")
A local or regional blood center (non-hospital) that collects blood from donors and supplies blood and components to other institutions, but does not perform transfusion services	
A hospital-based blood bank and transfusion service that collects blood from donors (may be only autologous or directed) and provides blood and components for transfusion primarily to your own institution	
A transfusion service that provides blood and components for transfusion, but does not collect blood from donors	
A local or regional blood center that collects blood from donors and supplies blood, components, and cross matched blood products to participating facilities (e.g., centralized transfusion services). In this category, the service is not limited to reference laboratory work, but includes routine transfusion service work	

	Yes/No
Does your institution collect blood from donors? (Even if you collect autologous units only, enter "Yes.")	

Section 2 Blood collections

From Jan 1, 2015 through Dec 31, 2015, how many collections were successfully completed by your institution in each of the following categories? (*indicates required fields)	Number of Collection Procedures*	Number of Units

2.5-2.6 Blood collections

2.5 What was the average whole dollar amount your institution was reimbursed (by hospital or clinical facility) per unit in 2015 for the following components? (Include discounts in your calculations. If you do not use a particular component, select "Not Applicable". CPT/HCPCS codes are in in parenthesis.)	Average Amount Paid Per Unit ($)
Plasma, single donor, frozen with 8 hours of phlebotomy (P9017)	
Plasma, frozen between 8 and 24 hours of phlebotomy (P9059)	
Red cells, leuko-reduced (P9016)	
Red cells, non-leuko-reduced (P9021)	
WBD platelets, each unit, not leuko-reduced, not irradiated (P9019)	
Apheresis platelets, leuko-reduced (P9035)	
Cryoprecipitate, each unit (P9012)	

2.6. If your facility does not use pathogen reduction technology for apheresis platelet or plasma collections...	Cost
What is the estimated total cost of implementation (this includes equipment, capital investment, training, etc)?	
What is the estimated additional cost per each unit type below if your facility adopted pathogen reduction technology?	

Section 3 - Blood utilization

	Yes/No
Is your institution directly involved in the transfusion of blood to patients?	

3.3 Blood utilization

3.3. From Jan 1, 2015 through Dec 31, 2015, how many units of allogeneic whole blood and red blood cells did your institution transfuse? (Leave the field blank if you do not know the answer).	Total Number of Units Transfused	Total number of Recipients	Total outdated units
Allogeneic Whole Blood			
Allogeneic Red Blood Cells (include all blood groups)			
Allogeneic Group O Positive RBCs			
Allogeneic Group O Negative RBCs			
Allogeneic Group A Positive RBCs

Directed Whole Blood Units			
Directed RBC Units			
Autologous Whole Blood Units			
Autologous RBC Units			

3.5 Blood utilization

3.5. From Jan 1, 2015 through Dec 31, 2015, how many units of each of the following components did your institution transfuse and how many units were outdated while on your shelf (include units transfused to pediatric patients)? (* indicates required fields)	**Total Number of Units Transfused**	**Total Number of Units Outdated**
WBD Platelets (individual concentrates and pools expressed as individual concentrate equivalents)*		
Apheresis Platelet units – Full dose*		
Directed Platelets to intended recipients		
Total Plasma*		
Fresh Frozen Plasma (FFP)		
FFP, pediatric size (≤100 mL)		
Plasma, Frozen within 24 hours (PF24)

Jumbo FFP (>400 mL)		
Liquid plasma		
Directed plasma to intended recipients		
Thawed plasma		
Plasma, cryoprecipitate reduced		
Group AB plasma		
Granulocytes*		
Platelets with pathogen reduction technology		
Plasma with pathogen reduction technology		

3.6 Blood utilization

3.6. Indicate the total number of units transfused to pediatric populations in 2015	Number of Adult Equivalent Units in Whole or in Part for Pediatric Patients[1]	Total Number of Pediatric Recipients
Whole Blood		
RBCs		
Plasma		
Platelets		

[1] This should be a subset of data reported in question 4 and 5 if your hospital transfuses non-pediatric patients.

3.7 Blood utilization

3.7. Indicate how many irradiated, leuko-reduced, and leuko-filtered units for each of the following components your institution transfused in 2015. For pediatrics, use the number of adult equivalent units used in whole or part. For components that are irradiated and leuko-reduced, include these in the count for both columns.	**Components Irradiated**	**Components Leuko-reduced Before or After Storage (not at bedside)**	**Components Leuko-filtered at the Bedside**
a. Whole Blood			
b. RBCs			
c. Apheresis platelets (single donor platelets)			
d. WBD platelets			
Total components (if the number for a-d is 'unknown', enter the total number of components for the modification)			

3.8-3.9 Blood utilization

	Yes/No
3.8. Does your institution have a policy to transfuse only leuko-reduced (LR) components?	

3.9a. In 2015, how many total units of RBCs transfused were…	**Number of Units**
1 – 35 day(s) old	
36 – 42 days old	

3.9b. In 2015, how many total units of WBD platelets transfused were…	**Number of Units**
1 – 3 day(s) old	
4 – 5 days old	

3.9c. In 2015, how many total units of Apheresis platelets transfused were…	**Number of Units**
1 – 3 day(s) old	
4 – 5 days old	

3.10-3.11 Blood utilization

	Number of platelet units
3.10. In your institution, on average, how many individual platelet units were included in a pooled WBD platelet dose in 2015?	

3.11. Indicate the number of units that were transfused in inpatient or outpatient settings.	**Number of RBC Units**	**Number of Platelet Units**	**Total**	**Don't Know**
All Surgery (including transplant)				
Inpatient Medicine (including hematology/oncology)				
Emergency Department				
Obstetrics/Gynecology				
Pregnant females				
Pediatrics				
Neonates				
Outpatient and non-acute inpatient settings[1]				

[1] E.g., outpatient dialysis, rehabilitation, long term care, etc.

3.12 Blood utilization

3.12. What was the average whole dollar amount your institution paid per unit in 2015 for the following components? (Include discounts in your calculations. If you do not use a particular component, select "Not Applicable". CPT/HCPCS codes are in in parenthesis.)	Average Amount Paid Per Unit ($)
Plasma, single donor, frozen with 8 hours of phlebotomy (P9017)	
Plasma, frozen between 8 and 24 hours of phlebotomy (P9059)	
Red cells, leuko-reduced (P9016)	
Red cells, non-leuko-reduced (P9021)	
WBD platelets, each unit, not leuko-reduced, not irradiated (P9019)	
Apheresis platelets, leuko-reduced (P9035)	
Cryoprecipitate, each unit (P9012)	

3.13 Blood utilization

	Yes/No
3.13a. Were any elective surgeries postponed due to blood inventory shortages in 2015?	

	Number of days
3.13b. How many days were elective surgeries postponed?	

	Number of surgeries
3.13c. How many elective surgeries were postponed in 2015?	

3.16 - 3.17 Blood utilization

16. In 2015, how many days was your institution's order incomplete for the following components?	Number of days
Whole Blood	
RBCs	
Plasma	
Apheresis platelets	
WBD platelets	

	Number of days
17. In 2015, how many days were you unable to meet other non-surgical blood requests (e.g., red cells, platelets)?	

3.18-3.20 Blood utilization

	Number of units
18. At your institution, how many units of Group O red cells are on your shelf on an average weekday?	

	Number of units
19. At what number of Group O positive and Group O negative RBC units in uncrossmatched inventory do you consider your inventory to be "critically low"?	

	Yes/No
20. Does your facility have an electronic system for tracking transfusion-related adverse events (e.g., unplanned, unexpected, and undesired occurrences)?	

3.21 Blood utilization

	Number of units
3.21a. How many total red blood cell units did you buy from a non-American Red Cross blood center in 2015?	

	Number of units
3.21b. How many total red blood cell units did you buy from an American Red Cross blood center in 2015?

Survey Glossary

Autologous: Self-directed donations.

Centralized transfusion service: A hospital or blood center that collects blood from donors and supplies blood, components, medical services and/or crossmatched blood products to multiple transfusing facilities.

Collected: Successful whole blood or apheresis collections placed into production (not QNS, or other removals).

Deferrals: The number of donors deferred for specific reasons:

a) Donors deferred for low hemoglobin do not meet the current FDA blood hemoglobin level requirements for blood donation.

b) Deferrals for other medical reasons may include the use of medications on the medication deferral list, growth hormone from human pituitary glands, insulin from cows (bovine, or beef, insulin), Hepatitis B Immune Globulin (HBIG), unlicensed vaccines, or presenting with physical conditions or symptoms that do not qualify a person to be a blood donor.

c) High-risk behavior deferrals include deferrals intended to reduce the risk of transmission of infectious diseases including HIV and hepatitis viruses. Examples of questions intended to identify these risks are sexual contact (e.g., men who have sex with men (MSM)) and non-medical injection drug use questions.

d) Travel deferrals are deferrals for travel to a specific region of the world.

Directed: Allogeneic donations intended for a specific patient.

Donation: The collection of a unit of blood or blood component from a volunteer donor.

Dose/Dosage: a quantity administered at one time, such as a specified volume of platelet concentrates.

First-time allogeneic donor: A donor who is donating for the first time at your center.

Imported: Units not collected by your institution, but obtained by your institution from another institution for distribution to a transfusion facility.

Modify: Procedures applied by a blood center, hospital blood bank, or transfusion service that may affect the quality or quantity of the final product (e.g., irradiation, leukofiltration, or production of aliquots of lesser volume).

Outdated: Units that expire on your shelf.

Plasma:

a) **Plasma, frozen within 24 hours of phlebotomy (PF24):** plasma separated from the blood of an individual donor and placed at -18 C or colder within 24 hours of collection from the donor.

b) **Fresh frozen plasma (FFP):** Plasma frozen within 8 hours of collection.

c) **Plasma, Jumbo:** FFP having a volume greater than 400 mL.

d) **Plasma frozen within 24 hours of phlebotomy and held at room temperature up to 24 hours after phlebotomy (PF24RT24):** Plasma held at room temperature for up to 24 hours after collection and then frozen at -18 C or colder.

Recipient: A unique individual patient receiving a transfusion one or more times in a calendar year.

Distributed: units that have fulfilled all processing requirements and have been made available for transfer to customers.

Repeat allogeneic donor: A donor who has previously donated a blood component.

Severe Donor-Related Adverse Events: adverse events occurring in donors attributed to the donation process that include, for example, major allergic reaction, arterial puncture, loss of consciousness of a minute or more, loss of consciousness with injury, nerve irritation, etc.

Transfusion Related Adverse Reactions: An undesirable response or effect in a patient temporally associated with the administration of blood or blood components. For a list of adverse reaction types and case definitions, visit http://www.cdc.gov/nhsn/PDFs/Biovigilance/BV-HV-protocol-current.pdf.

Transfusion Service: a facility that performs, or is responsible for the performance of, the storage, selection, and issuance of blood and blood components to intended recipients.

Chart Abstraction Form

Study ID Number COL-____ ____ Encounter level (Brighton 1-5) or not neuro (6): ____

The ID number begins with the 2 digit case number (for example COL-01). Information as documented by attending physician.

The following pages are to be abstracted from the medical records / exam:

Chart Abstractor: _____ Abstraction Date: __ __ /__ __ /_____
MRN: _____ MM DD YYYY

1. First name: _____ Middle name: _____
2. Paternal name: _____ Maternal name: _____
3. Age (years): _____ Date of birth: __ __ /__ __ /_____
MM DD YYYY

4. Sex: ☐ Male ☐Female

5. Patient address: _____

6. Patient phone number: _____

7. Date of neuro symptom onset: __ __ /__ __ /_____ Date first sought care: __ __ /__ __ /_____
MM DD YYYY MM DD YYYY

Date of admission: __ __ /__ __ /_____ Date of discharge/death: __ __ /__ __ /_____
MM DD YYYY MM DD YYYY

8. Discharged to:

☐ Home ☐ Rehab/skilled nursing facility ☐ Transferred ☐ Died ☐ Other (specify) _____

CURRENT ILLNESS

9. How long from onset until hospital admission? _____minutes/hours/days/weeks

10. What were the initial neurologic symptoms (i.e. within the three days of illness onset)? (check all that apply, signs from PE, symptoms from HPI)

☐ Leg weakness ☐ Arm weakness ☐ Diplopia/Ophthalmoplegia
☐ Leg numbness/paresthesias ☐ Arm numbness/paresthesias ☐ Face numbness/paresthesias
☐ SOB / respiratory distress ☐ Gait imbalance (not weakness)/ataxia ☐ Hand clumsiness/ataxia
☐ Hyporeflexia/areflexia ☐ Face weakness ☐ Dysarthria ☐ Dysphagia ☐ Dysautonomia

11. What neurologic symptoms occurred AT ANY TIME during the neuro illness? (check all that apply, signs from PE, symptoms from HPI)

☐ Leg weakness ☐ Arm weakness ☐ Diplopia/Ophthalmoplegia
☐ Leg numbness/paresthesias ☐ Arm numbness/paresthesias ☐ Face numbness/paresthesias

☐ SOB / respiratory distress ☐ Gait imbalance (not weakness)/ataxia ☐ Hand clumsiness/ataxia

☐ Hyporeflexia/areflexia ☐ Face weakness ☐ Dysarthria ☐ Dysphagia ☐ Dysautonomia

12. How long from onset until maximum/worst neuro symptoms? _____ minutes/hours/days/weeks

13. At the worst point during this neuro illness, check all that apply for the patient:

☐ Unable to walk without assistance (e.g. cane, walker) ☐ Unable to walk at all

☐ Admitted to the hospital ☐ Admitted to the ICU/CCU ☐ Intubated

14. If any blood was taken for this neurologic illness, please fill out the following for the INITIAL blood draw:

Date __ __ /__ __ /_____ WBC ____ HgB____ Plts _____ Na ____ K____
MM DD YYYY

BUN ____ Cr _____ Glucose____ TBili____ AST ____ ALT____ AlkPhos ___

15. Was there documented hyporeflexia/areflexia? ☐ Yes ☐ No ☐ Unknown

16. a. Was there documentation of upper motor neuron signs?

☐ Yes ☐ No ☐ Unknown

b. If yes, which:

☐ Hyperreflexia ☐ Increased tone/spasticity ☐ Babinski/Hoffman ☐ Sustained clonus

17. Was there any sensory level documented? ☐ Yes ☐ No ☐ Unknown

LABORATORY, IMAGING, AND ELECTROPHYSIOLOGIC STUDIES

18. Was a lumbar puncture (LP) done? ☐ Yes ☐ No ☐ Unknown

ANTECEDENT ILLNESS

25. a.) In the 2 months prior to neuro onset date, did the individual experience an acute illness? (other than their neuro illness)? ☐ Yes ☐No ☐ Unknown

b.) How long from prior acute illness onset until admission for neuro illness? _____ minutes/hours/days/weeks

26. a.) What symptoms did they report having or what signs were noticed? (check all that apply)

☐ Fevers ☐ Chills ☐ Nausea or Vomiting ☐ Diarrhea

☐ Muscle pains ☐ Joint pains ☐ Skin rash ☐ Conjunctivitis

☐ Headache ☐ Pain behind eyes ☐ Stiff neck ☐ Confusion

☐ Back pain ☐ Abdominal pain ☐ Coughing ☐ Runny nose

☐ Sore throat ☐ Calf pain ☐ Pruritis

b.) If any blood was taken for this acute illness, please fill out the following for the INITIAL blood draw:

Date __ __ /__ __ /_____ WBC ____ HgB____ Plts _____ Na ____ K____
DD MM YYYY

BUN ____ Cr _____ Glucose____ TBili____ AST ____ ALT____ AlkPhos ___

c.) Were they hospitalized for this acute illness? ☐ Yes ☐ No ☐ Unknown

d.) Did they receive any blood products / IVIG for this illness? ☐ Yes ☐ No ☐ Unknown

What product? _____ Date? __ __ /__ __ /_____
MM DD YYYY

e.) Did they receive plasmapheresis / plasma exchange for this illness? ☐ Yes ☐ No ☐ Unknown

If yes, date? __ __ /__ __ /_____

Instrumento para la recolección de datos de historias clínicas. Caracterización de casos con Síndrome de Guillain-Barré – Colombia, 2016

Número de Identificación COL-____ ____ ____ Nivel (Brighton 1-5) o no neurológico (6): ____

El número de identificación comienza con los 3 dígitos del número de caso (por ejemplo COL-001). Información según lo documentado por el médico tratante

Las siguientes páginas son para ser tomadas a partir de las historias clínicas/exámenes:

Revisor de Historia Clínica: _____ Fecha de revisión: __ __ /__ __ /_____
Número de Historia Clínica: _____ MM DD YYYY

1. Primer Nombre: _____ Segundo Nombre: _____
2. Primer Apellido: _____ Segundo Apellido: _____
3. Edad (años): _____ Fecha de Nacimiento: __ __ /__ __ /_____
MM DD YYYY

4. Sexo: ☐ Masculino ☐ Femenino

5. Dirección de residencia del paciente (Incluir dirección completa, ciudad o municipio y departamento):
_____

6. Número de teléfono del paciente: _____

7. **a.)** Fecha de ingreso hospitalario: __ __ /__ __ /_____
MM DD YYYY
b.) Fecha en la que buscó atención por primera vez: __ __ /__ __ /_____

☐ Muerte ☐ Otro (Especifique) _____

ENFERMEDAD ACTUAL

9. ¿Cuánto tiempo transcurrió desde el inicio de los síntomas hasta el ingreso al hospital?___minutos/horas/días/semanas

10. ¿Cuáles fueron los síntomas neurológicos iniciales dentro de los tres días previos al inicio de la enfermedad? (Marque todas las opciones que apliquen, signos del examen físico y síntomas de historia de enfermedad actual)

☐ Debilidad en extremidades inferiores ☐ Debilidad en extremidades superiores ☐ Diplopia/Oftalmoplejía

☐ Adormecimiento de extremidades inferiores/parestesias

☐ Adormecimiento de extremidades superiores/parestesias

☐ Adormecimiento de la cara/parestesias

☐ Dificultad para respirar/distress respiratorio ☐ Trastornos de la marcha (sin debilidad)/ataxia

☐ Trastornos de la motricidad manual/ataxia

☐ Hiporeflexia/areflexia ☐ Debilidad en la cara ☐ Disartria ☐ Disfagia ☐ Disautonomía

11. ¿Qué síntomas neurológicos ocurrieron en CUALQUIER MOMENTO durante la enfermedad neurológica? (Marque todas las opciones que apliquen, signos del examen físico y síntomas de historia de enfermedad actual)

☐ Debilidad en extremidades inferiores ☐ Debilidad en extremidades superiores ☐ Diplopia/Oftalmoplejía

☐ Adormecimiento de extremidades inferiores /parestesias

☐ Adormecimiento de extremidades superiores /parestesias

☐ Trastornos de la motricidad manual/ataxia

☐ Hiporeflexia/areflexia ☐ Debilidad en la cara ☐ Disartria ☐ Disfagia ☐ Disautonomía

12. ¿Cuánto tiempo transcurrió desde el inicio hasta la presentación de los síntomas neurológicos más severos?
____ minutos/horas/días/semanas

13. Marque todas las opciones que apliquen al paciente que se presentaron al momento de mayor severidad del cuadro neurológico:

☐ Incapacidad para caminar sin asistencia (por ejemplo: bastón, caminador) ☐ Incapacidad total para caminar

☐ Ingreso al hospital ☐ Ingreso a Unidad de Cuidado Intensivo (UCI) ☐ Intubación

14. Si se extrajo muestra de sangre como parte de los análisis de laboratorio para el cuadro neurológico, por favor complete las siguiente información de la muestra de sangre obtenida INICIALMENTE:

Fecha __ __ /__ __ /_____ Recuento de blancos _____ Hemoglobina _____ Plaquetas _____

Infectious Period Determination

Question	**Code**	**Variable**

Date of infectious period beginning (format MM/DD/YY) -For symptomatic patients, start the infectious period 3 months before “Date of symptom onset” recorded on page 2. -For asymptomatic patients who have sputum smear-positive or cavitary disease, start the infectious period 3 months before the “Diagnosis date” recorded on page 2. -For asymptomatic patients without sputum smear-positive or cavitary disease, start the infectious period 1 month before the “Diagnosis date” recorded on page 2		IPopen
Date of infectious period end (format MM/DD/YY) For patients who are not isolated, the infectious period can be closed when the following three conditions are met: 1) Treatment with an adequate regimen (based on drug susceptibility results) for ≥2 weeks, AND 2) The patient shows clinical improvement, AND 3) Three consecutive sputum smears are negative (which have been obtained at least 8 hours apart) For patients who are isolated (e.g. in a hospital) until these three conditions are met, then use date of isolation as the end of the infectious period. Explain to the patient that you have been asked by the health department to help determine why there have been more cases of tuberculosis, or TB. Explain that you will be asking a series of questions to try to identify where the health department might be able to find other people who have TB, as well as to figure out where the patient might have gotten sick. Acknowledge that the patient has already participated in many interviews with health care providers. Reassure the patient that all answers will be kept confidential, and that the purpose of the interview is to learn information that can help stop the spread of TB and prevent other people from getting sick (emphasize protection of families). Thank the patient for his or her time and for speaking with us.

Note that throughout the interview, the period of interest is
2 years before the start of the infectious period to the end of the infectious period.

Ask patient whether they are from the Tribe A Reservation.
If not, ask where patient came from and when he/she came to the area.

Discuss symptom onset date. *Confirm based on chart data.*

"We are interested in learning where you could have been exposed to TB in the 2 years before you got sick with TB. People sick with TB often have a bad cough, or might lose a lot of weight. TB is spread through the air when a person who is sick coughs or speaks and does anything that brings up air from the lungs. How do you think that you got TB?" *Mention household exposure (i.e. people you visited or people who visited you). Attempt to elicit names of sick contacts who might have been source patients. Note when and where the exposure occurred. Emphasize that these people are not in trouble, and we are not trying to blame anyone. We are trying to make sure we can find all sick people and treat them.*

"TB is commonly spread among people staying in the same household. We're worried about people who may have been staying with you or people you may have stayed with when you were coughing a lot or started feeling sick. I know it might be hard to remember, but please try your best. During [infectious period**], where did you live, and who was staying with you?"** *Emphasize protecting family.*

Time period(s)	**Last time visited**	**Location**	**People in household**

“TB can also be spread to people you spend a lot of time around, even if you don’t stay in the same household. During [infectious period**], could you tell us where you worked, where you hung out, and who else was usually there?”** *Emphasize protecting friends and family. Mention work sites, bars, friends’ homes.*

Location	**Dates of first attendance**	**Dates of most recent attendance**	**Frequency of attendance**	**Contacts present**

Ask patient how else he/she passes time. *As examples, you could mention cards, bingo, video lottery. Record locations and contacts present.*

Activity	**Location**	**Dates of first attendance**	**Dates of most recent attendance**	**Contacts present**

Ask the patient whether he/she visits friends or family or attends social events ON any of the reservations in the area, or whether friends/family from on a reservation visited the patient. *Ask for location and dates of visit. Record exposed contacts.*

Ask the patient whether he/she visits friends or family or attends social events OFF the reservations in the area, or whether friends/family from off the reservations visited the patient. *Ask for location and dates of visit. Record exposed contacts.*

Explain to patient that certain activities make the body less able to fight off a TB infection, and make a person more likely to become sick.
Ask about the following TB risk factors. *Circle response.*

Smoking commercial tobacco during the year before diagnosis?
0=None
1=Less than Daily
2=Daily
3=Does not recall or refuses

Smoking traditional tobacco during the year before diagnosis?
0=None
1=Less than Daily
2=Daily
3=Does not recall or refuses

If so:

What substance:_____

Participates in "sweats" (traditional sweat lodge purification ceremony): Y N

Location: _____

Alcohol use ("drinking") within 1 year before diagnosis?
0=Never
1=Rarely (1-2 times ever)
2=Occasionally (more than 1 or 2 times, but less than most days or nights)
3=Frequently (most days or nights of the week)
4=Does not recall or refuses

Note the locations where patient drank alcohol? Smoked?

With whom would the patient usually drink? Smoke?

Among the group that the patient drank with/smoked with, did anyone possibly have TB?

Non-injection drug ("taking anything for recreation, e.g. marijuana") use within 1 year before diagnosis
0=Never
1=Rarely (1-2 times ever)
2=Occasionally (more than 1 or 2 times, but less than most days or nights)
3=Frequently (most days or nights of the week)
4=Does not recall or refuses

What kinds of drugs were used before diagnosis? *Circle all that apply.*

Marijuana Crack or cocaine Methamphetamine Heroin Prescription drugs

Other drugs: _____

Note the locations where non-injection drugs were used:

Drug use with anyone with possible TB?

Injection drug use ("shooting up") within 1 year before diagnosis

0=Never
1=Rarely (1-2 times ever)
2=Occasionally (more than 1 or 2 times, but less than most days or nights)
3=Frequently (most days or nights of the week)
4=Does not recall or refuses

What kinds of drugs were used before diagnosis? _____

Note the locations where injection drugs were used or obtained:

Drug use with anyone with possible TB?

ANY drug use prior to the year before diagnosis

What kinds of drugs were used? _____

Note the locations where drugs were used or obtained:

Drug use with anyone with possible TB?

Does the patient have any other ideas about places where TB might have spread (i.e., where people were coughing a lot) or people we should contact?

Any other contacts not yet discussed:

Name of Contact (and contact info if available)	**Where and when had contact**	**How often had contact?** (1=daily, 2=few times/week, 3=weekly or less, 99=unk)	**Activities Together**	**Smoked together?** (0=no, 1=yes, 99=unk)	**Drank together?** (0=no, 1=yes, 99=unk)	**Drugs together?** (0=no, 1=yes, 99=unk)	**Comments**

Tuberculosis Contact Screening Form

Contact Name:	q Male q Female	DOB: _____/_____/_____	Age:
Current Location:			

Contact Exposure History (During the Infectious Period)	
Contact's Relationship to Index:	**Date of Last Exposure:** _____/_____/_____
Location of Exposure:	
1. How much time did you spend **in the same room or house** as the index while he/she was contagious (during the infectious period)?	Number of days per week: Number of hours per day:
2. How much time did you spend **in a bar or drug-using location** as the index while he/she was contagious (during the infectious period)?	Number of days per week: Number of hours per day:
3. How much time did you spend in the same room **in the hospital** while he/she was contagious (during the infectious period)?	Number of days per week: Number of hours per day:
4. **If you are a healthcare worker**, did you perform any procedures on the index patient that may have caused them to cough (such as suctioning, collecting sputum, performing CPR, using a bag mask, or intubation)	q Yes (If Yes, person is automatically a close contact) q No
IF YES, specify type of procedure(s) and date(s)	
5. Specify **other contact** setting and any related details	
Ø **Based upon the answers above, is this a "close" contact?** A "close" contact is a person who spent ≥4 hours multiple times *or* spent ≥8 hours at least one time inside the same room as the index patient (during the infectious period)?	q **Yes** q **No**

TB Symptom Screening (Current Symptoms)		**Start Date and Duration**
Instructions: Screen to see if the contact *currently* has TB symptoms. Consider the contact "symptomatic for TB" if they have: (1) A cough for ≥2 weeks duration *OR* (2) Two "yes" responses to symptoms #2-8 that cannot be explained by another medical condition		
1. Have you been coughing for ≥2 weeks?	q Yes q No	
2. Have you been coughing up blood?	q Yes q No	

3. Have you had difficulty breathing?	q Yes q No	
4. Have you had fevers or chills?	q Yes q No	
5. Have you had night sweats? (completely soaking your clothes at night)	q Yes q No	
6. Have you been tired or feeling weak lately?	q Yes q No	
7. Have you lost your appetite?	q Yes q No	
8. Have you had unplanned weight loss?	q Yes q No q Unknown	If yes, how much?
Ø **Is this contact symptomatic for TB?**	q **Yes** q **No** **If yes, specify symptom start date: ____/____/_____**	

TB Risk Factor Screening		**Notes**
Instructions: Screen to see if the contact has risk factors that could increase their risk for progression to active TB disease.		
1. Is this contact >50 years old?	q Yes q No	
2. Was this contact <5 years old during the exposure period?	q Yes q No	
3. Do you have diabetes?	q Yes q No or Unknown	
4. Do you have HIV?	q Yes q No or Unknown	
5. Do you have cancer?	q Yes q No or Unknown	
6. Do you take prednisone every day?	q Yes q No	
7. Do you smoke tobacco?	q Yes q No	
8. Do you drink alcohol?	q Yes q No	If yes, specify amount/frequency
9. Do you use any other substances?	q Yes q No	If yes, include types/routes, frequency, and locations where substances acquired and used
Ø **Does this contact have a high-risk condition?** If the contact answers "yes" to **questions 1-6** above, then the contact has a high-risk condition.		q **Yes** q **No**

Additional Questions
1. Have you ever been diagnosed with active TB disease? If so, please provide details including treatment if any.
2. Have you ever been diagnosed with latent TB infection? If so, please provide details including treatment if any.
3. **Have you ever known anybody with TB?** If yes, what was/is the nature of your relationship and contact? What did/does this person do during the day? How did/does he/she spend his/her time? Who spent/spends a lot of time with that person?

4. **Do you know anybody now who might have TB symptoms?**
(e.g., cough ≥2 weeks, fevers, chills, unintended weight loss)
