SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This Notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology. These comments will help OIRA determine whether to approve the ICR referred to in this Notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, [USCG-2016-0258], and must be received by October 11, 2016.

Previous Request for Comments

This request provides a 30-day comment period required by OIRA. The Coast Guard published the 60-day notice (81 FR 28088, May 9, 2016) required by 44 U.S.C. 3506(c)(2). We received three comments from two commenters to the 60-day notice.

The first comment was not related to the periodic renewal of this information collection. The comment was about the need to correct outdated organizational addresses and standards of certain materials incorporated by reference in the title 33 CFR part 127 Waterfront Facilities Handling LNG and LHG. The Coast Guard will consider this comment in an ongoing rulemaking that will revise these facility standards.

The second comment recommended revising the hour burden per response for certain reporting and recordkeeping activities. We agree in part and have changed as recommended the estimated burden for Operational and Emergency Manual development, and person in charge certification. However, we have kept unchanged our estimated burden for amendments to Operational and Emergency Manuals and declarations of inspection, as the current estimates are more representative of the time required for most activities of this nature.

The third comment recommended allowing LNG-LHG-related submissions via <https://HOMEPORT.uscg.mil> to reduce administrative burden. We will consider incorporating this option in the future.

Information Collection Request

Title: Waterfront Facilities Handling Liquefied Natural Gas (LNG) and Liquefied Hazardous Gas (LHG).

OMB Control Number: 1625-0049.

Summary: Liquefied Natural Gas (LNG) and other Liquefied Hazardous Gases (LHG) present a risk to the public when handled at waterfront facilities. These rules should either prevent accidental releases at waterfront facilities or mitigate their results. They are necessary to promote and verify compliance with safety standards.

Need: Title 33 CFR part 127 prescribes safety standards for the design, construction, equipment, operations, maintenance, personnel training, and fire protection at waterfront facilities handling LNG or LHG.

Forms: N/A.

Respondents: Owners and operators of waterfront facilities that transfer LNG or LHG.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has increased from 6,425 hours to 9,734 hours a year due to several factors. First, the increase is due to public comment that recommended increasing certain hour burden estimates per response. Second, the increase is due to a reevaluation by the Coast Guard that resulted in an increase in the estimated annual number of LHG facility waterway suitability assessments.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended.

Marilyn Scott-Perez,
U.S. Coast Guard, Acting Deputy Chief Information Officer.
