

Oil and Gas Information Collection Request

Part 2. Detailed Facility Survey

Gathering and Boosting (G&B) Random Facility Selector Tool

Instructions

This information collection request is designed to be completed by operators of gathering and boosting facilities.

Step 1. Please go to "Formulas" in Excel's functional tabs on the ribbon, select "Calculation Options", and choose "Set True" for "Circular References".

Step 2. Please go to the "Parent Company" tab and complete the parent company information requested. The information should be for the highest-level, majority corporate owner. See table below Section 1 on standards by primary NAICS code for guidance when responding to the small business question.

Step 3. Please complete the facility-level information requested in "Compression_Fac" sheet for all gathering and compression facilities operating under the parent company. Please refer to the definition of "gathering and compression facility" in the blue Definitions box (to the right of these instructions). If you own/operators multiple facilities, please use the super-sized form.

Step 4. Please complete the facility-level information requested in "Pipeline_Fac" sheet for all gathering and pipeline facilities operating under the parent company. Please refer to the definition of "gathering and pipeline facility" in the blue Definitions box (to the right of these instructions). Please note that the pipeline facility count is limited to one county within basins. If you operate in more than 1000 basin/state/counties, please use the super-sized form.

Step 5. Once all facilities have been entered in the "Compression_Fac" and "Pipeline_Fac" sheets, please click "Calculate Now" under the "Formulas" functional tab. Please note that facilities required to respond to the Gas ICR will now be highlighted in yellow in the "Compression_Fac" and "Pipeline_Fac" sheets. The tables "G&B COMPRESSION Facilities Required to Submit Part 2 Survey" and "G&B PIPELINE Facilities Required to Submit Part 2 Survey" will also be populated with required responding facilities.

Step 6. Please save the file and upload it to e-GGRT as part of your Part 2 response.

Definitions

Gathering and Boosting Compression Facility or G
grouping of equipment under the control of the s
single surface site that includes a permanent com
natural gas at increased pressure through gatheri

Gathering and Boosting Pipeline Facility - All natural gas under the control of the same person (or persons) in one county, and single hydrocarbon basin within the continental United States, which is part of the gathering and boosting industry segment except equipment that is part of a processing facility. Associated equipment includes, but is not limited to, compressors, boosters, launchers/receivers, pressure vessels, and storage tanks at gathering and boosting sites if that equipment is owned/operated by the same person.

Gathering pipelines - A network of pipes that are production facilities to a downstream endpoint, the LDC pipeline, or other gathering and boosting pipe.

Surface site - Any combination of one or more grain platforms, or the immediate physical location upon

Basin - Geologic provinces as defined by the American Geologic Note: AAPG-CSD Geologic Provinces Code (Laure G. Wallace, and Fred J. Wagner, Jr., Volume reference, see § 98.7) and the Alaska Geological Federation Association of Petroleum Geologists Committee on Basins (incorporated by reference, see § 98.7).

G&B PIPELINE Facilities Required to Submit Part 2 Survey

Gathering and Boosting Compressor Station - Any same person (or persons under common control) at a combination of one or more compressors that move gas pipelines.

atural gas gathering pipelines and associated equipment (under common control) within a single state, single onshore petroleum and natural gas gathering and boost facility located at a Gathering and Boosting Compression Station. It is limited to, dehydrators, acid gas removal units, pig traps, tanks, and may include equipment at well surface or at a Gathering and Boosting Pipeline Facility.

used to convey petroleum and/or natural gas from typically a gas processing plant, transmission pipeline, or pipeline facility.

aded pad sites, gravel pad sites, foundations, on which equipment is physically affixed.
