Main Study Questionnaire

[PROGRAMMER: The OMB control number and expiration date should appear at the bottom of every screen. It should be as unobtrusive as possible.]

[PROGRAMMER: Informed consent to be recorded first.]

[PROGRAMMER: Many questions have conditional piping in item stems or response options that will depend on health condition, as will be captured in a derived variable DIAGNOSE (defined below). The conditional text appears in square brackets “[]” with the following rules:

IF DIAGNOSE = 1 “Psoriasis”, then display “DRUG X” in place of bracketed text [DRUG X\DRUG Y] and display “psoriasis” in place of [psoriasis/chronic dry eye]

IF DIAGNOSE = 2 “Chronic Dry Eye”, then display “DRUG Y” in place of [DRUG X\DRUG Y] and display “chronic dry eye” in place of [psoriasis/chronic dry eye]

For questions that would require more complicated piping, we instead created two distinct questions designated by the suffix _PSO or _CDE. The skip logic for those questions is given in separate programming notes.]

[QUOTA REQUIREMENT: Highest education level for 20% of sample must be high school graduate or less]

This study involves an ad for a new product. You will watch a television advertisement twice and then will be asked to answer the questions that follow.

Make sure you are comfortable and can read the screen from where you sit. Please adjust your speakers so that you can hear the television advertisement.

[NEW SCREEN]

The study will take about 25 minutes to complete. We ask you to complete the study in one sitting (without taking any breaks) in order to avoid distractions.
