

STOP

Shigella is a highly contagious disease that is now spreading in Baltimore. Symptoms are: **diarrhea, stomach cramps and fever.**

Men who have sex with men are particularly at risk.

Shigella can be life threatening especially if you are living with HIV.

THIS NASTY

Wash your hands, penis, butt and toys before and after sex, and always use protection.

If you think you have it, call your provider as quickly as possible for testing and treatment.

If you do not have a provider, contact Chase Brexton Health Services at **410-837-2050.**

Make sure to mention the word "shigella."

PIECE

If you are uninsured and living with HIV, contact **the JACQUES Initiative** at UMMC Midtown.

443-552-2933. Or go to

Baltimorestatusupdate.com

for more information.
