(OMB Control No. 0938-1258)
Non-substantive Change Request

CMS is requesting approval of a non-substantive Change Request to CMS-10454. We would like to change the wording of some questions in the form to improve clarity and precision. We are not collecting any additional information, so there will be no change in burden to respondents.

We are planning to release the revised form along with a guidance document on December 16, 2016. We therefore request approval of this request by that date.
