**III. Preliminary Finding on the Applications**

SGS submitted acceptable applications for expansion of its scope of recognition. OSHA’s review of the application files and its detailed on-site assessments indicate that SGS can meet the requirements prescribed by 29 CFR 1910.7 for expanding its recognition to include the addition of three sites and these 39 test standards for NRTL testing and certification listed above. This preliminary finding does not constitute an interim or temporary approval of SGS’s applications.

OSHA welcomes public comment as to whether SGS meets the requirements of 29 CFR 1910.7 for expansion of its recognition as an NRTL. Comments should consist of pertinent written documents and exhibits. Commenters needing more time to comment must submit a request in writing, stating the reasons for the request. Commenters must submit the written request for an extension by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer period. OSHA may deny a request for an extension if it is not adequately justified. To obtain or review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Room N–2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. These materials also are available online at

<http://www.regulations.gov> under Docket No. OSHA–2006–0040.

OSHA staff will review all comments to the docket submitted in a timely manner and, after addressing the issues raised by these comments, will recommend to the Assistant Secretary for Occupational Safety and Health whether to grant SGS’s applications for expansion of its scope of recognition. The Assistant Secretary will make the final decision on granting the applications. In making this decision, the Assistant Secretary may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing collections of information in accord with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information

collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The basic purpose of the collections of information in the Standard is to document that employers in general industry are providing their workers with protection from exposure to hazardous asbestos. Asbestos exposure results in asbestosis, an emphysema-like condition; lung cancer; mesothelioma; and gastrointestinal cancer.

Several provisions of the Standard are collections of information, including: Implementing an exposure monitoring program that notifies workers of their exposure monitoring results, establishing a written compliance program, and informing laundry personnel of the requirement to prevent release of airborne asbestos above the time-weighted average and excursion limit. Other collections of information in the Standard include: maintaining records of information obtained concerning the presence, location, and quantity of asbestos-containing materials (ACMs) and/or presumed asbestos-containing materials (PACMs) in a building/facility; notifying housekeeping workers of the presence and location of ACMs and PACMs in areas they may occupy during their work; and using information, data, and analyses to demonstrate that PACMs do not contain asbestos. In addition, the collections of information in the Standard include: providing medical surveillance for workers potentially exposed to ACMs and/or PACMs, including administering a worker medical questionnaire, providing information to the examining physician, and providing the physician's written opinion to the worker; maintaining records of exposure monitoring, objective data used for exposure determinations, and medical surveillance; and making specified records (*e.g.*, exposure monitoring and medical surveillance records) available to designated parties.

These collections of information permit employers, workers and their designated representatives, OSHA, and

other specified parties to determine the effectiveness of an employer's asbestos-control program. Accordingly, the requirements ensure that workers exposed to asbestos receive all of the protections afforded by the Standard.

##### **II. Special Issues for Comment**

OSHA has a particular interest in comments on the following issues:

- Whether the proposed collections of information are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the collections of information, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

##### **III. Proposed Actions**

The Agency is requesting an adjustment decrease of 6 burden hours (from 11,694 to 11,688 burden hours). The decrease is due to the removal of burden hours associated with OSHA requests to access records from employers. Usually, OSHA requests access to records during an inspection. Information collected by the Agency during the investigation is not subject to the PRA under 5 CFR 1320.4(a)(2). There is also an estimated increase in operation and maintenance costs of \$38,624, from \$925,026 to \$963,650. The increase in operation and maintenance costs is due to the increase in medical exam costs, offset by a decrease in estimated costs for contract industrial hygiene services to conduct exposure monitoring sampling, due to the Agency's use of a different data source to calculate the exposure monitoring sampling estimate.

OSHA is providing the following summary information about the Asbestos in General Industry information collection:

**Type of Review:** Extension of a currently approved collection.

**Title:** Asbestos in General Industry (29 CFR 1910.1001).

**OMB Control Number:** 1218–0133.

**Affected Public:** Businesses or other for-profits.

**Number of Respondents:** 121.

**Frequency of Responses:** Varies.

**Total Responses:** 32,173.

**Average Time per Response:** Varies.

**Estimated Total Burden Hours:**

11,688.

*Estimated Cost (Operation and Maintenance):* \$963,650.
