This information collection would allow S&T to maintain awareness and knowledge of private sector companies and their technology products that may be of interest to S&T’s research and development (R&D) programs. S&T will also use this information collection to inform its technology scouting function to discover technologies and capabilities of vendors/companies that are interested in working with S&T on current or future projects.	

<b>2. Does this system employ any of the following technologies:</b> <i>If you are using any of these technologies and want coverage under the respective PIA for that technology please stop here and contact the DHS Privacy Office for further guidance.</i>	<input type="checkbox"/> Closed Circuit Television (CCTV) <input type="checkbox"/> Social Media <input checked="" type="checkbox"/> Web portal <sup>1</sup> (e.g., SharePoint) <input type="checkbox"/> Contact Lists <input type="checkbox"/> None of these
	<b>3. From whom does the Project or Program collect, maintain, use, or disseminate information?</b> <i>Please check all that apply.</i>

<sup>1</sup> Informational and collaboration-based portals in operation at DHS and its components that collect, use, maintain, and share limited personally identifiable information (PII) about individuals who are “members” of the portal or “potential members” who seek to gain access to the portal.

<sup>2</sup> DHS defines personal information as “Personally Identifiable Information” or PII, which is any information that permits the identity of an individual to be directly or indirectly inferred, including any information that is linked or linkable to that individual, regardless of whether the individual is a U.S. citizen, lawful permanent resident, visitor to the U.S., or employee or contractor to the Department. “Sensitive PII” is PII, which if lost, compromised, or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. For the purposes of this PTA, SPII and PII are treated the same.

<b>4. What specific information about individuals is collected, generated or retained?</b>

<sup>3</sup> When data is sent over the Internet, each unit transmitted includes both header information and the actual data being sent. The header identifies the source and destination of the packet, while the actual data is referred to as the payload. Because header information, or overhead data, is only used in the transmission process, it is stripped from the packet when it reaches its destination. Therefore, the payload is the only data received by the destination system.

<sup>4</sup> PII may be shared, received, or connected to other DHS systems directly, automatically, or by manual processes. Often, these systems are listed as “interconnected systems” in Xacta.

<b>Component Privacy Office Recommendation:</b> <i>Please include recommendation below, including what new privacy compliance documentation is needed.</i>	
This PTA is being submitted for Paperwork Reduction Act compliance requirements.	
This S&T effort has been restructured such that no PII is being collected, used, or shared. Only general information from the company is being used.	
Because no PII is being collected, used, or shared, S&T Privacy recommends no further compliance requirements be taken.

<b>DHS Privacy Office Comments:</b> <i>Please describe rationale for privacy compliance determination above.</i>	
<p>S&amp;T is submitting this PTA to discuss an Industry Outreach form. It will collect private sector company information to include: company name and address; company classification (size and type); and description of the company’s technology or technical capability, including the current state of the technology, its technology readiness level, and its manufacturing readiness level. This information collection allows S&amp;T to maintain awareness and knowledge of private sector companies and their technology products that may be of interest to S&amp;T's R&amp;D programs. S&amp;T will use this information collection to inform its technology scouting function to discover technologies and capabilities of vendors/companies that are interested in working with S&amp;T on current or future projects.</p> <p>S&amp;T has restructured this form to no longer solicit PII from private sector individuals by requesting general company information instead of individual POC contact information.</p> <p>However, the form still does solicit information about individual POCs at DHS with whom the company may have worked with in the past. Because of this, the form may still contain PII when it is submitted. That being said, the form does not require PIA or SORN coverage (as the PII of the DHS personnel would not be retrieved by personal identifier), and thus no Privacy Act Statement.</p> <p>No further privacy compliance documentation is required.</p>
