The purpose of the RFI is to gather industry input on options available to the Federal Government for a potential aggregated power purchase of 100-250 MW of new construction geothermal electricity generated in the Salton Sea area, within the Riverside and Imperial Counties of California, for delivery over a ten-year or twenty-year contract period to serve regional Federal load. The RFI can be found at [www.energy.gov/node/2000486](http://www.energy.gov/node/2000486).

**DATES:** Written comments and information are requested on or before September 29, 2016.

**ADDRESSES:** Interested parties are to submit comments electronically to: [tracy.niro@ee.doe.gov](mailto:tracy.niro@ee.doe.gov). Include "August

2016 Geothermal RFI" in the subject of the message.

The RFI requests responders to provide information on potential new construction geothermal projects in the Salton Sea area and to describe details about those options such as whether the power would include any associated renewable energy certificates, the optimal term for any agreement, and whether transmission, congestion, or infrastructure issues might impact projects, among other things. The RFI is available on the FEMP Web site at: [www.energy.gov/node/2000486](http://www.energy.gov/node/2000486).
