

Attachment 9 ACBS Questionnaire Changes

- In 2008 there was a change to the medication section of the ACBS questionnaire. Several new medications were added and several medications no longer on the market were dropped.
- In 2010 the skip pattern was changed at the following locations:
 - The beginning of section 9 (adult and child)
 - At question 10.5 (adult and child) and at questions 10.12 (child)
 - The beginning of section 12 (adult) and section 11 (child)
- 2012 ACBS questionnaire changes included:
 - The name for INH_MED 25 was changed to flexhaler
 - Three inhaler medication questions were deleted (ILP01, ILP02, and ILP07)
 - Response categories for inhaler medication question ILP03 were changed
 - The question PILLX (how long taking a specific pill) was deleted and PILL01 (on daily use) was added
 - Three questions on nebulizers were added
 - Some skip patterns and help screens were revised in the medication section
 - The content of the work-related asthma section was completely revised
 - The time reference period for the activity limitation variable was changed from 12 months to 30 days
- 2013 ACBS questionnaire changes included:
 - Inhaler medications Brethaire, Intal, and Tilade were deleted since all have been discontinued
 - Inhaler medications Alvesco and Dulera were added
 - Nebulizer medications Combivent Inhalation Solution and Perforomist/Formoterol were added
- There were no changes to the ACBS questionnaire in 2007, 2009, 2011, 2014, and 2015.
