Subject: IRB approval obtained: study declared exempt

Hello all,

We have obtained IRB approval for the study ahead of schedule. This email from the IRB (below) is the documentation required for deliverable 2.3 due on 11-21-16. RAND has declared the study exempt because our data collection efforts involve adult interviews/surveys with minimal risk.

We can proceed with OMB now which is wonderful given that the timeline can be unpredictable. We will send a draft focus group protocol for your review and inclusion in the package early next week. Please let us know if we can provide any additional materials on this. In a few minutes, I will also send Faruque the full IRB submission and supporting documents.

Best,
Lori

Title: Feasibility of Social Distancing in U.S. Schools: A Qualitative Study

Description: This study appears to be minimal risk and is Exempt in Category 2.

The PI is responsible for carrying out appropriate informed consent and data safeguarding procedures without further HSPC guidance. Any changes in the protocol or new tasks require an amendment to be filed with and approved by the HSPC before work begins and any adverse events should be immediately reported to the HSPC. The HSPC is available to consult should questions arise.

Action Required: No action is required of you at this time.

Date of Determination: 10/6/2016

Administrator: Carolyn Tschopik

The HSPC is RAND's Institutional Review Board to review research involving human subjects, as required by federal regulations. RAND's "Federalwide Assurance for the Protection of Human Subjects" (FWA00003425, effective through July 1, 2018, at <http://intranet.rand.org/groups/hspc/fwa.pdf>) serves as our assurance of compliance with the regulations of 16 federal departments and agencies. According to this assurance, the Committee is responsible for review regardless of source of funding.
