UNCOVER EH Survey

Start

Questions about the survey? Please email Justin Gerding at CDC for clarifications.

Welcome

Welcome

You are invited to participate in this survey designed for environmental health (EH) professionals working at public health departments. The primary goal of this survey is to identify and describe EH professional characteristics, areas of practice, and identify workforce and practice needs.

The survey should take about 30 minutes to complete. Your participation is voluntary and you may decide to quit the survey at any time. If you do not want to participate in this survey, please click the appropriate exit button on the next page to opt out. You will not be emailed again.

All information collected in this survey will be aggregated for analysis. This means that it is impossible to identify any individual or organization, or to link you and your responses. No personal information gathered in this survey will be shared with any other organization. By submitting the survey, you agree to participate in this this study and agree to the use of your responses as outlined above.

We truly appreciate the time and effort you take to participate in this study.

Questions about the survey? Please email Justin Gerding at CDC (iud0@cdc.gov) for clarifications.

UNCOVER EH Survey

Understanding the Needs, Challenges, Opportunities, Vision and Emerging Roles in Environmental Health (UNCOVER EH)

The National Environmental Health Association, Baylor University, and Centers for Disease Control and Prevention's National Center for Environmental Health are partnering on this groundbreaking initiative to describe and assess State, Tribal, Local and Territorial (STLT) environmental health (EH) professionals and their scope of work. This collaborative effort will also identify current and future challenges impacting the EH practice. In order to accomplish these goals, we are surveying EH professionals working in STLT governmental public health departments to identify, describe, and understand:

- Grand challenges and emerging environmental health issues;
- Workforce demographics, skills and competencies, and potential training needs; and
- Services, activities, primary responsibilities, and delivery of the 10 Essential Environmental Public Health Services.

The results of this initiative will provide important information about workforce that could contribute to activities such as:

- Establishing uniform practice benchmarks and workforce competencies;
- Allocate funds and resources to support improvement of the practice based on identified needs;
- Informing decisions regarding services and activities; and
- Supporting broader public health initiatives, such as workforce enumeration, health department accreditation, and academic research and training efforts.

Q01Top3

Priority Programs for Protecting Public Health

In your opinion, which three of these programs are the most important for protecting public health? Drag and drop three program options (in order of importance to you) to the box on the right.

Programs to Rank	Most important
Drinking water protection	
Emergency response	
Food safety and protection	
Hazardous materials response	
Healthy housing	
Outdoor air quality	
Recreational water quality	
Vector control	
Wastewater management	

Q01Comments

Do you have any additional comments regarding public health priorities? If so, please enter them below.

Questions about the survey? Please email Justin Gerding at CDC for clarifications.

BWSIntro

Workforce and Profession Priorities

In this part of this survey, we ask your opinions on which workforce and professional attributes you believe are most important.

The following section contains a set of eight comparisons, each comprised of subsets from a list of eleven possible priorities.

Why do we ask you to complete eight comparisons? With this information we can prioritize workforce and professional attributes for each individual taking this survey. With priorities for each individual, we can then aggregate and compare groups (i.e., how professional attribute priorities vary geographically or among different professional organizations).

This section takes some thought and patience. After the first comparison or two, the balance will be much easier.

After you finish this section, we will show you your personal ranking of the workforce and profession priorities.
