3. Human Embryonic Stem Cells Section

Use the following instructions to complete the fields in this section.

For additional guidance, see the NIH Guide Notice on the [Change in Requirements for NIH Applications Involving Human Embryonic Stem Cells](#).

Does the proposed project involve human embryonic stem cells?

This field is required.

If the proposed project involves human embryonic stem cells (hESC), check “Yes” and complete the rest of the “4. Human Embryonic Stem Cells” section.

If the proposed project does not involve hESC, check “No” and skip the rest of the “4. Human Embryonic Stem Cells” section.

Additional Instructions for Training:

Check “Yes” if training plans include or potentially will include involvement of trainees in projects that include hESC. Note that trainees may only conduct research with hESC lines that are approved for use in NIH-funded research; these cell lines are listed on the NIH [hESC Registry](#). Use of the cell lines must be in accordance with the NIH [Guidelines for Human Stem Cell Research](#).

Additional Instructions for Multi-project:

Overall Component: If human embryonic stem cells are used in any Component, then you must answer “Yes.”

Specific stem cell line cannot be referenced at this time. One from the registry will be used.

If you will use hESC but a specific line from the NIH [hESC Registry](#) cannot be chosen at the time of application submission, check this box.

If you cannot specify which cell lines will be used at the time of application submission, specific cell line information will be required as Just-in-Time information prior to award.

Additional Instructions for Research:

If you cannot choose an appropriate cell line from the registry at this time, provide a justification in the [G.400 - PHS 398 Research Plan Form, Research Strategy attachment](#).

Additional Instructions for Career Development:

If you cannot choose an appropriate cell line from the registry at this time, provide a justification in the [G.410 - PHS 398 Career Development Award Supplemental Form, Research Strategy attachment](#).

Additional Instructions for Training:

When individual project hESC line information is requested as Just-in-time (JIT), the NIH will require information regarding project title, mentor, and specific cell line(s) from the registry (NIH [hESC Registry](#)) for each trainee utilizing human embryonic stem cells. Trainees may not participate in hESC related research until this information has been provided.

Additional Instructions for Multi-project:

Overall and Other Components: If you cannot choose an appropriate cell line from the registry at this time, provide a justification in the [G.400 - PHS 398 Research Plan Form, Research Strategy attachment](#).

Additional Instructions for SBIR/STTR:

If you cannot choose an appropriate cell line from the registry at this time, provide a justification in the [G.400 - PHS 398 Research Plan Form, Research Strategy attachment](#).

Cell Line(s):
