**SUPPLEMENTARY INFORMATION:** In  
accordance with the Paperwork  
Reduction Act of 1995, we provide the  
general public and other Federal  
agencies with an opportunity to  
comment on new, proposed, revised,  
and continuing collections of  
information. This helps us assess the  
impact of our information collection  
requirements and minimize the public's  
reporting burden. It also helps the  
public understand our information  
collection requirements and provide the  
requested data in the desired format.

We are soliciting comments on the  
proposed ICR that is described below.  
We are especially interested in public  
comment addressing the following  
issues: (1) Is the collection necessary to  
the proper functions of the Service; (2)  
will this information be processed and  
used in a timely manner; (3) is the  
estimate of burden accurate; (4) how  
might the Service enhance the quality,  
utility, and clarity of the information to  
be collected; and (5) how might the  
Service minimize the burden of this

collection on the respondents, including  
through the use of information  
technology.

Comments that you submit in  
response to this notice are a matter of  
public record. We will include or  
summarize each comment in our request

**Abstract:** The Migratory Bird Treaty  
Act (16 U.S.C. 703–712) and the Fish  
and Wildlife Act of 1956 (16 U.S.C.  
742a–754j–2) designate the Department  
of the Interior as the primary agency  
responsible for:

- Management of migratory bird  
populations frequenting the United  
States, and
- Setting hunting regulations that  
allow for the well-being of migratory  
bird populations.

These responsibilities dictate that we  
gather accurate data on various  
characteristics of migratory bird  
populations.

The North American Woodcock  
Singing Ground Survey is an essential  
part of the migratory bird management  
program. State, Federal, Provincial,  
local, and tribal conservation agencies  
conduct the survey annually to provide  
the data necessary to determine the  
population status of the woodcock. In  
addition, the information is vital in  
assessing the relative changes in the  
geographic distribution of the  
woodcock. We use the information  
primarily to develop recommendations  
for hunting regulations. Without  
information on the population's status,  
we might promulgate hunting  
regulations that:

- Are not sufficiently restrictive,  
which could cause harm to the  
woodcock population, or
- Are too restrictive, which would  
unduly restrict recreational  
opportunities afforded by woodcock  
hunting.

The Service, State conservation  
agencies, university associates, and  
other interested parties use the data for  
various research and management  
projects.

**Title of Collection:** North American  
Woodcock Singing Ground Survey.  
**OMB Control Number:** 1018–0019.
