

HUD RfR Financial Factors Tool

Version 1.01

4/12/2016

INSTRUCTIONS

This spreadsheet is a template for use by MAP Lenders in preparing a financial plan for funding reserve for replacement needs in accordance with HUD's instructions for such financial plans as described in the 2016 MAP Guide Appendix 5G, Section VII, Subsection C. All lender data entries are made as indicated on the "Input Sheet" and on the project information lines of the "RfR commitment ltr attachmnt." No other entries or changes to the spreadsheet should be made. Instructions for each entry blank or numbered step are as follows:

User inputs on the "Input Sheet" worksheet are to be typed into the cells with white background. Other cells are protected.

Project Name	Enter the name as shown on the HUD 92013.
FHA #	Enter the FHA number assigned to the application.
Item #1	Enter the number of units in the project.
Item #2	Enter proposed mortgage amount.
Item #3	Enter the mortgage interest rate, the term, and the estimated date of endorsement or final endorsement.
Item #4	Enter the total uninflated cost of all repairs/replacements for each relative year in the estimate period.
Item #5	Enter the current rate of inflation, then the relative year in which this rate likely will change and then the historic average of annual inflation rates.
Item #6	Enter the amount of the initial deposit to the RfR (IDRR) if any.
Item #7	Enter the current rate of interest for short term deposits (3-6 months), the relative year in which this rate likely will change and then the historic average of short term rates.
Item #8	Enter the amount of the initial or year 1 Annual Deposit per unit to the RfR (ADRR)
Item #9	Enter the annual rate of change for the ADRR, the relative year when this rate will change and the rate of change for years thereafter.

Inputs on the "RfR Commitment Ltr Attachmnt" worksheet are to be typed into the cells with white background. Others are protected.

Project Name and FHA # are automatically entered from the "Input Sheet"

Enter the following information about the project. Use data that is consistent with the application:

City
 State
 SOA
 Lender Name
 Date of Firm Commitment (to be input by HUD staff at the time of commitment)

This spreadsheet differs from the CNA e-tool in that it calculates only 10-year and 20-year schedules for 10-year and 20-year Estimate Periods. The CNA e-tool will allow the user to input other Estimate Periods, when, for example, a project mortgage may have less than twenty years to maturity. Relative Years end on the anniversary of the date you enter as the estimated date when amortization of the mortgage begins.

Note that most calculations are performed in a hidden worksheet called "Engine" in this workbook, so some cell formulas make reference to that worksheet.
