PRIVACY THRESHOLD ANALYSIS (PTA)

The PTA is a compliance form developed by the Privacy Branch to identify the use of Personally Identifiable Information (PII) across the Department. The PTA is the first step in the PII verification process, which focuses on these areas of inquiry:

- Purpose for the information,
- Type of information,
- Sensitivity of the information,
- Use of the information,
- And the risk to the information.

Please use the attached form to determine whether a Privacy Impact Assessment (PIA) is required under the E-Government Act of 2002 or a System of Record Notice (SORN) is required under the Privacy Act of 1974, as amended.

Please complete this form and send it to your program Privacy Liaison Officer (PLO). If you have no program Privacy Liaison Officer, please send the PTA to the HUD Privacy Branch:

Marcus Smallwood, Acting, Chief Privacy Officer
Privacy Branch
U.S. Department of Housing and Urban Development

privacy@hud.gov

Upon receipt from your program PLO, the HUD Privacy Branch will review this form. If a PIA or SORN is required, the HUD Privacy Branch will send you a copy of the PIA and SORN templates to complete and return.

SPECIFIC PTA QUESTIONS

1. Reason for submitting the PTA: Choose an item.

This is a renewal PTA with changes to the burden hours submitted because of the designated housing provision found in 42 U.S.C. 1437e – 7(d) requiring Public Housing Agencies (PHAs) to submit a Designated Housing Plan (DHP) for HUD approval before a project(s) can be designated as either elderly only, disabled only, or elderly and disabled. The information collection burden associated with this provision is required by Section 10 of the Housing Opportunity and Extension Act of 1996 which modified Section 7 of the U.S. Housing Act of 1937. In this plan, PHAs must document why the designation is needed and provide the following information:

- 1. Description of the designated housing plan;*
- 2. Justification for the designation;*
- 3. Availability of alternative housing resources for the non-designated population(s);*
- 4. Impact on the availability of accessible housing;*
- 5. A statement that existing tenants in good standing will not be evicted;*
- 6. A statement of the resources that will be made available if the PHA offers voluntary relocation benefits; and*
- 7. Information describing how the DHP is consistent with any outstanding court orders, lawsuits, investigations, Voluntary Compliance Agreements (VCAs), or Letters of Finding.*

Respondents (i.e. affected public): State, or Local Government

Estimated Number of Respondents: 39

Estimated Number of Responses: 1

Frequency of Response: On Occasion

Average Hours per Response: 15 hours

Total Estimated Burdens: 585 hours

The previous estimation of 375 annual burden hours has been increased to 585. This change is based on the number of Plans submitted in Calendar Year 2016, and the expectation that the number of respondents will continue to increase based on the upward trend in senior demographics and the increased use of Low-Income Housing Tax Credits (LIHTC) to finance mixed developments that include senior units by Public Housing Agencies (PHAs).

"Sensitive PII" is PII, which if lost, compromised, or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. For the purposes of this PTA, SPII and PII are treated the same.

³ Header: Information that is placed before the actual data. The header normally contains a small number of bytes of control information, which is used to communicate important facts about the data that the message contains and how it is to be interpreted and used. It serves as the communication and control link between protocol elements on different devices.

Payload data: The actual data to be transmitted, often called the payload of the message (metaphorically borrowing a term from the space industry!) Most messages contain some data of one form or another, but some actually contain none: they are used only for control and communication purposes. For example, these may be used to set up or terminate a logical connection before data is sent.

6. Does this project, program, or system connect, receive, or share PII with any external (non-HUD) partners or systems?	<input checked="" type="checkbox"/> No. <input type="checkbox"/> Yes. If yes, please list: Click here to enter text.
