If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:

The selection of your targeted respondents

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?
[X] Yes [] No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

Participants are typically organized in 12 groups for many of the course activities. We use these existing groups to randomly select participants by choosing the first participant from a Low/Middle Income Country and the first participant from a High Income Country and the first participant from a domestic country. If that participant declines to participate in the focus group, the next name on that list will be selected. All CPF P fellows are offered the opportunity to participate in the focus group. All participation is voluntary.
