

# Current MIECHV Performance Measures

| MIECHV Performance Measurement Area  | List of Performance Measures   |   |
|--|--|---|
| Maternal and newborn health  | <ul style="list-style-type: none"> <li>• Prenatal Care</li> <li>• Parental use alcohol, tobacco, or illicit drugs</li> <li>• Preconception Care</li> <li>• Interbirth interval</li> <li>• [Medical home or primary healthcare provider for both mothers and children (tribal grants only)]</li> </ul>  | <ul style="list-style-type: none"> <li>• Screening for Maternal depression</li> <li>• Breastfeeding</li> <li>• Well-child visits</li> <li>• Maternal and child health insurance status</li> </ul>   |
| Child injuries, child abuse, neglect, or maltreatment, and reduce emergency visits | <ul style="list-style-type: none"> <li>• Visits for children to the emergency department from all causes</li> <li>• Visits of mothers to the emergency department from all causes</li> <li>• Information provided or training of adult participants on prevention of child injuries<br/>Incidence of child injuries requiring medical treatment</li> </ul> | <ul style="list-style-type: none"> <li>• Reported suspected maltreatment for children in the program</li> <li>• Reported substantiated maltreatment for children in the program</li> <li>• First-time victims of maltreatment for children in the program</li> </ul>  |
| School readiness and achievement   | <ul style="list-style-type: none"> <li>• Parent support for children's learning and development</li> <li>• Parent knowledge of child development and of their child's developmental progress</li> <li>• Parenting behaviors and parent-child relationship</li> <li>• Parent emotional well-being or parenting stress</li> </ul>                            | <ul style="list-style-type: none"> <li>• Child's communication, language, and emergent literacy</li> <li>• Child's general cognitive skills</li> <li>• Child's positive approaches to learning including attention</li> <li>• Child's social behavior, emotion regulation, and emotional well-being</li> <li>• Child's physical health and development</li> </ul> |

# Current MIECHV Performance Measures

| MIECHV Performance Measurement Area                                   | List of Performance Measures  |  |
|---|---|--|
| Crime <u>or</u> domestic violence                                     | <ul style="list-style-type: none"> <li>• Screening for domestic violence</li> <li>• Of families identified for the presence of domestic violence, number of referrals made to relevant domestic violence services (e.g., shelters)</li> </ul>                   | <ul style="list-style-type: none"> <li>• Of families identified for the presence of domestic violence, number of families for which a safety plan was completed.</li> </ul>  |
| Family economic self-sufficiency                                      | <ul style="list-style-type: none"> <li>• Household income (including earnings, cash benefits, and in-kind and non-cash benefits)</li> </ul>   | <ul style="list-style-type: none"> <li>• Employment or education of participating adults</li> <li>• Health insurance status of participating adults and children</li> </ul>  |
| Coordination and referrals for other community resources and supports | <ul style="list-style-type: none"> <li>• Number of families identified for necessary services</li> <li>• Number of families that required services and received a referral to available community resources</li> <li>• Number of completed referrals</li> </ul> | <ul style="list-style-type: none"> <li>• MOUs: Number of Memoranda of Understanding or other formal agreements with other social service agencies in the community</li> <li>• Information sharing: Number of agencies with which the home visiting provider has a clear point of contact in the collaborating community agency that includes regular sharing of information between agencies.</li> </ul> |

# Pew HV Data Initiative Indicators

| MIECHV Performance Measurement Area | Proposed List of Constructs        | Definitions  |
|-------------------------------------|------------------------------------|--|
| Improve maternal and newborn health | Interbirth interval                | Percent of women participating in home visiting who had an interbirth interval of 18 months or more  |
|                                     | Interconception/ Postpartum visits | Percent of women enrolled in home visiting at the time of birth who receive a timely postpartum visit (within two months following birth). |
|                                     | Breastfeeding                      | Percent of mothers enrolled in home visiting during pregnancy who initiate breastfeeding for their infants.                                |
|                                     | Parental use tobacco               | Percent of women participating in home visiting for at least six months who are currently smoking or using tobacco.                        |
|                                     | Well-child visits                  | Percent of children who participated in home visiting that received last recommended well child visit based on AAP schedule.               |
|                                     | Maternal depression and stress     | Percent of women participating in home visiting who receive maternal depression screening with validated tool.                             |

# Pew HV Data Initiative Indicators

| MIECHV Performance Measurement Area  | Proposed List of Constructs                | Definitions  |
|--|--|--|
| Child injuries, child abuse, neglect, or maltreatment, and reduce emergency visits | Child maltreatment                         | Percent of children who participated in home visiting with reported cases of child maltreatment  |
| School readiness and achievement   | Parental Capacity<br><br>Child Development | Percent of parents participating in home visiting who engage in behaviors that nurture children<br><br>Percent of children who participated in home visiting that received developmental screening and were referred when indicated. |
| Crime <u>or</u> domestic violence  |  |  |
| Family economic self-sufficiency   | Maternal education                         | Percent of women that entered home visiting without high school or GED completion who have completed high school or equivalent.  |
| Coordination and referrals for other community resources and supports              |  |  |

# Criteria

| <b>Communication Power</b>  | <b>Proxy Power</b>   | <b>Data Power</b>   |
|---|--|---|
| <p>Can be understood and is meaningful to experts, policy makers, and the general public.</p> <ul style="list-style-type: none"><li>• Has policy value/salience.</li><li>• Represents consensus among diverse stakeholders.</li></ul> | <p>Represents a relevant topic.</p> <ul style="list-style-type: none"><li>• Is proximal to work; based on evidence that home visiting can have impact.</li><li>• Says something important about the desired outcome.</li><li>• Reflects a set of related issues.</li></ul> | <p>Is measurable now with reliable and readily available data.</p> <ul style="list-style-type: none"><li>• Maximizes administrative data.</li><li>• Maximizes data collected by models/ programs.</li></ul> |
