

Type of Request: Reinstatement, with change, of previously approved collection.

Form Number: HUD-92901, HUD-92902, HUD-92051, HUD-92561, HUD-92800.5B, HUD-92900-A, HUD-1, HUD-1a, Fannie Mae (FNMA)-1009, FNMA-1025, FNMA-1003, FNMA-1004, FNMA-1004c, FNMA-1073.

Description of the need for the information and proposed use: The Home Equity Conversion Mortgage (HECM) program is the Federal Housing Administration's (FHA) reverse mortgage program that enables seniors who have equity in their homes to withdraw a portion of the accumulated equity. The intent of the HECM Program is to ease the financial burden on elderly homeowners facing increased health, housing, and subsistence costs at a time of reduced income. The currently approved information collection is necessary to screen mortgage insurance applications to protect the FHA insurance fund and the interests of consumers and potential borrowers. Specific forms and related documents are needed to determine the eligibility of the borrower and proposed mortgage transaction for FHA's insurance endorsement. Form HUD-92902, Certificate of HECM Counseling has been revised to: (1) Include a property address line for purchase transactions, (2) remove the reference to 'HECM Saver' as current feature of the program, and (3) include a certification warning concerning the actions that may be taken against anyone who knowingly submits a false, fictitious, or fraudulent claim and the penalties of those actions.

Respondents (i.e. affected public): Business or other for profit.

Estimated Number of Respondents: 1,603.

Estimated Number of Responses: 80,000.

Frequency of Response: On occasion.

Average Hours per Response: 3.41 hours.

Total Estimated Burden: 11,366,400.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond: including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

A. Overview of Information Collection

Title of Information Collection: Understanding Rapid Re-Housing Study.

OMB Approval Number: 2528—New.
Type of Request: New.

Form Number: No Forms.

Description of the need for the information and proposed use: Rapid Re-Housing (RRH) is an increasingly popular approach for using the homeless assistance system to reduce and end homelessness in communities across the United States. Several studies have examined RRH program outcomes. HUD's Rapid Re-Housing for Homeless Families Demonstration Program report and the U.S. Department of Veterans Affairs' research brief Impact and Performance of the Supportive Services for Veteran Families (SSVF) Program: Results from the FY 2013 Program Year measured RRH outcomes, and RRH was one of the active interventions tested in the Family Options Study (FOS). Several local studies have also assessed RRH. Collectively, the research conducted to date has produced varied evidence of the outcomes for participants receiving this type of assistance.

The Understanding Rapid Re-Housing Study provides an opportunity to (1) synthesize existing research on RRH programs, (2) extend the analysis of data from the Family Options Study (2016), (3) provide a detailed examination of all rapid re-housing programs nationwide, and (4) conduct qualitative research with a small sample of families and individuals who receive RRH. The first two objectives will utilize existing literature and data that have already been collected. To examine the nation's RRH programs, we will rely on currently existing Annual Program Reports (APRs) from local Continuums of Care (CoCs) and administer a web-based survey to RRH programs. To accomplish the fourth objective, we will conduct in-depth interviews and ethnographic research with households. This notice announces HUD's intent to collect information through the following

methods: Study investigators (from Abt Associates) will administer a program-level web-based survey, which will include two separate sets of questions—a short set of system-level questions for CoC program staff, and an in-depth set of questions for RRH program staff. The survey will be administered to all CoCs and RRH programs nationwide. To describe the program models in place, the use of progressive engagement, and strategies for RRH in tight rental markets, the study investigators will conduct in-depth telephone follow-up interviews with approximately 20 RRH programs. In addition, investigators will conduct one-time in-person in-depth interviews with a sample of six households in shelter who have been offered RRH but have not yet started to receive it, 16 households who are

receiving RRH assistance, and six households that have already transitioned from RRH to permanent housing. Finally, to understand their experiences both during RRH and once RRH assistance ends, and investigators will conduct ethnographic research with 16 households. This will include in-person interviews, household observations, quarterly check-ins, and the completion of housing journals.

Respondents: Information collection for the program-level web survey will involve program staff from all CoCs (approximately 400) and all RRH programs nationwide (approximately 2,400 programs). Approximately 20 RRH programs will be involved in the in-depth follow-up interviews. Information collection for the qualitative research

will affect approximately 28 households.

From the completed 28 interviews, study investigators will invite all 16 households receiving RRH to continue in the applied ethnographic component of the study (and we assume that 15 will complete the ethnographic research activities). Their one-time in-depth interviews will provide a baseline against which investigators will analyze data to be collected over the subsequent 15 months. Those data will include participant observation, housing journals, quarterly family updates, and two follow-up interviews.

Respondents (i.e., affected public): Continuum of Care Collaborative Applicants, rapid re-housing program directors, and participants of rapid re-housing programs.
