

# Notification of Serious Incidents

If a large multiengine aircraft (more than 12,500 pounds maximum certificated takeoff weight) experienced any of the following: (i) in-flight failure of electrical systems which required the sustained use of an emergency bus powered by a back-up source to retain flight control or essential instruments; (ii) in-flight failure of hydraulic systems that resulted in sustained reliance on the sole remaining hydraulic or mechanical system for movement of flight control surfaces; (iii) sustained loss of power or thrust produced by two or more engines; (iv) an evacuation of the aircraft in which an emergency egress system is utilized, please provide the information below.
