

Non-substantive Change Justification
Notice of Denial of Medicare Part D Prescription Drug Coverage
CMS-10146, OMB 0938-0976

The Division of Appeals Policy believes that the modifications (see the Crosswalk and the Track Change versions of the notice and the instructions) are non-substantive in nature but are necessary for clarity for Part D plan sponsors who issue this notice.

The text on alternative formats that is specific to plan enrollees was not approved for use at the time the previous package went through the PRA process. The need for clarification on the other points was identified following approval of the previous package.

Burden Changes

None. The modifications do not affect our currently approved burden estimates.
