Background Information

Overview of the OSHA Directorate of Training and Education (DTE)

DTE, located in Arlington Heights, Illinois, supports the Agency's mission and performance goals of securing safe and healthy workplaces and increasing workers' voice in the workplace through the development and delivery of training courses and educational programs. The Directorate has three distinct functional areas: the OSHA Training Institute (OTI), the Office of Training Programs and Administration, and the Office of Training Educational Development. The Directorate provides training for federal and state compliance officers and State consultants. The Directorate administers three distinct external training programs including the OSHA Training Institute (OTI) Education Centers Program, the Outreach Training Program, and the Susan Harwood Training Grants Program. The Directorate also develops training and educational materials that support OTI courses and the Agency's compliance assistance initiatives.

Overview of the OSHA Training Institute (OTI)

OTI, located in Arlington Heights, Illinois, is OSHA's primary training provider. OTI conducts over 50 unique course offerings on an annual basis. Training includes job hazard recognition as well as OSHA standards, policies, and procedures for persons responsible for enforcing or directly supporting the Occupational Safety and Health Act of 1970. The OTI's primary responsibility is to federal and state compliance officers and state consultation program staff. The OTI Education Centers are the primary training providers for private and public sector personnel, and federal personnel from agencies other than OSHA.

Overview of OTI Education Centers Program

The OTI Education Centers are a national network of non-profit organizations authorized by OSHA to deliver occupational safety and health training to private and public sector workers, supervisors, and employers on behalf of OSHA. The OTI Education Centers Program was initiated in 1992 when OSHA began partnering with other training and educational institutions to conduct OSHA courses. The OTI Education Centers Program supports OSHA's training and education mission through a variety of safety and health programs.

OTI Education Center courses include OSHA standards and Outreach Training Program trainer and update courses. The OTI Education Centers offer more than 50 courses on various safety and health topics including recordkeeping, machine guarding, confined space, electrical standards, ergonomics, safety and health management, and fall protection. Information regarding the OTI Education Centers Program background, including a complete list of current organizations, OSHA numbered course offerings, and descriptions can be found on the OSHA web site at: <http://www.osha.gov/otiec>.

OTI Education Centers are selected through a national competitive process and receive no funding from OSHA; they support their OSHA training through their normal tuition and fee structures. OTI Education Centers are located in all OSHA Regions and work closely with OSHA Regional and Area offices to meet the needs of the regional constituency. OTI Education Centers are encouraged to conduct courses at host site organizations in addition to their own facilities and are required to conduct courses in all states and U.S. territories within their Region. Host site organizations must be non-profit organizations. OTI Education Centers are responsible for authorizing Outreach trainers, processing Outreach trainer card requests, and conducting Outreach trainer monitoring activity for the OSHA Outreach Training Program.

Overview of the OSHA Outreach Training Program

The OSHA Outreach Training Program was established during the early years of the Agency to provide an overview of OSHA and to disseminate basic occupational safety and health workplace hazard information to workers using independent authorized trainers. Courses are intended to provide information on worker rights and employer responsibilities, and focus on work-related hazards. Outreach Training Program courses do not focus on or teach OSHA standards. Workers who complete the construction industry, general industry, maritime industry, or disaster site worker Outreach courses receive OSHA student course completion cards from the authorized trainer who conducted the training. OSHA Outreach Trainers are authorized exclusively through the OTI Education Centers. OTI Education Centers are responsible for administering the Outreach Training Program, including issuing course completion cards to authorized Outreach trainers and conducting monitoring activity such as record audits and training observations.

The Outreach Training Program is a voluntary program. OSHA recommends Outreach Training Program courses as an introduction to occupational safety and health hazard recognition for workers. Although a voluntary program, some cities and states have enacted laws mandating the training. In addition, some employers, unions, organizations, or other jurisdictions may also require this training. Please note that Outreach Training Program courses do not meet specific training requirements contained in OSHA standards. The OSHA Outreach Training Program requirements and procedures contain instructions and information for Outreach Trainers. Among the items addressed in the requirements and procedures are course topic requirements, minimum lengths for course topics, advertising restrictions, records retention, and reporting requirements.

OSHA Outreach Training Program requirements and procedures are located at:

<http://www.osha.gov/dte/outreach/index.html>.
