

Dosage of services received by participants

- What is the total attendance for every program participant?

There are 3 performance measures for dosage to be reported to the agency (and to congress) that will be calculated using the attendance data:

- Mean percentage of program services received by youth, summarized by grant type and tier.
- Median percentage of program services received by youth, summarized by grant type and tier.
- The percentage of youth receiving at least 75% of the program (i.e., the percentage of youth with attendance 75% or greater), summarized by grant type and tier.
